(A Central University established by an
Act of Parliament No. 53 of 1985)

ACCREDITED WITH "A" GRADE BY NAAC

PROSPECTUS
2012-13

From the Vice Chancellor's Desk

With the consistent growth of Indian economy, the focus of the country has been to produce competent Human Resource to meet the challenges of the growing needs of the Indian Industry and the society at large. Increasing access to excellent education with equity and inclusiveness has been the policy of this Central University.

During the XI Plan, we set a target of expanding by 300% on student intake and proportionate growth on all other fronts and we achieved it. It has emerged as the India's fastest expanding Central University during XI Plan. Now, we have set a target of doubling this strength during the XII Plan to reach ultimately 12,000 students by the end of 2017.

The University has three campuses. The Main Campus is located at Puducherry with 800-acres of lushgreen Wi-Fi-enabled area, housing 15 Schools, 45 Departments & Centres, 168 PG & Research Programmes and the other two smaller Campuses are located at Port Blair and Karaikal (about 150 kms. from Puducherry), which have been established during the XI Plan period.

Notwithstanding the constraints of such expansion, yet the University is providing one of the best infrastructure & teaching facilities, Library, laboratories, sports, hostels and a host of student welfare and support systems in the country.

The Choice Based Credit System provides for interdisciplinary cross-faculty instruction and even two degrees in allied programmes, not necessarily studying for four years (8 semesters) but even earlier, say, three years (6 semesters). This University has been a trendsetter in several innovations. The library has remote access to over 35,000 E-resources including 24,000 Journals. The campus has 19 hostels, state-of-the-Art laboratories, free transport on & off campus, excellent sports

facilities. The evening programmes offered are open to regular students and they can choose from over 28 Diploma/Certificate courses which will add value to the main PG degrees. Nine Foreign Languages are taught in the evening. The campus is vibrant with conferences, seminars, cultural programmes and festivals.

The University is unique in its affirmative action to encourage access to the entire cross-section of the society. It offers rent-free accommodation to all the girl students, Rs.400 food subsidy in hostels to those students whose parental income is less than Rs.4,50,000/-, provides totally-free education to all the physically-challenged, provides free/subsidized transport (both on-campus and off-campus). The campus has 100% power back-up to all the Departments and the Hostels of the University. A 24-hour hospital with fully equipped Ambulance is yet another facility on the campus.

The campus has zero tolerance for Ragging, Drug, Alcohol and smoking. Stringent action is taken on erring students, which includes removal from hostels and also rustication. Adequate security is provided all through the campus for a day-and-night vigil.

The University is committed to producing talented, tolerant and disciplined youth for the emerging New India of 21st century. We welcome our youth to try their luck to enter this University through country-wide competition. Last year 47,000 students wrote the entrance examination for over 3000 admissions.

Best wishes from your Vice-Chancellor to you and your parents.

PUDUCHERRY is situated on the Coramandal coast, 160 k.m. south of Chennai. It is now a growing city and the capital of the Union Territory bearing the same name.

Puducherry, which attracted the French to settle here two centuries ago still carries several marks of French culture and heritage. It is also the place where the national poet Shri Subramania Bharathiar wrote several of his masterpieces that fanned the flames of freedom and also enriched modern Tamil literature. Bharathidasan, a staunch disciple of Subramania Bharathiar, whose poems stressed social revolution and emancipation of women, was also an eminent son of Puducherry.

The intellectual activities are fostered in many of its institutions such as Sri Aurobindo Ashram and the French Institute which caters to research needs in Science, Indology and Culture. The Romain Rolland Library which is more than 150 years old and preserves a rich collection of several rare French and Tamil manuscripts, is a veritable repository of treasures.

The Puducherry museum houses rare kinds of pottery from the Arikamedu site which was a bustling port city in the first century A.D. where Roman ships called in for trade and friendship.

Some of the other places worth seeing are Auroville, Beaches, Backwaters, Lake and Garden, Temples, Churches and Mosques, Heritage Buildings and Monuments. Puducherry Tourism provides more detailed information in this regard.

THE UNIVERSITY Pondicherry University is a Central University established by an Act of Parliament in October 1985. It is an affiliating University with a jurisdiction spread over the Union Territory of Puducherry, Lakshwadeep and Andaman and Nicobar Islands.

CENTRAL INSTRUMENTATION FACILITY

Excellence in teaching and research by Science Schools need state-of-the-art sophisticated equipment, various workshops and support facilities. These equipment and facilities help the faculty, research scholar and students to carry out globally competitive R & D in basic and applied sciences. Since individual researchers may not be able to generate huge research funds for these research instruments, a few years back Central Instrumentation Facility (CIF) was started in Pondicherry University with a mission to enrich the resources on a shared basis for promoting R and D with the following objectives.

- To strengthen technological infrastructure to carry out advanced research in various science disciplines under one roof and make their services available to academic departments and schools.
- To provide guidance in acquisition of data and train personnel in operation and maintenance of Sophisticated Instruments.
- To organize short-term courses/workshops on the use and application of various spectroscopic and analytical techniques for students, teachers and technical personnel from our University, affiliated institutions, universities in the region and industry.

It is governed by the Management Advisory Committee consisting of Vice-Chancellor as Chairman, Deans Science Schools, Heads of Science Departments, Outside Experts and Centre Head as Member-Secretary.

SYSTEM OF INSTRUCTION - Choice Based Credit System (CBCS)

The University has introduced the Choice Based Credit System(CBCS) from the academic year 1992-93 onwards. Under this system the students have a good deal of freedom in designing their own curriculum to suit their needs. The students can take any course offered in any department as long as they fulfill the prerequisites for that course. The students can also take as many courses as they can handle subject to a maximum of 30 credits in any semester. Each course is associated with a credit value and this accrues to the student when he/ she successfully completes the course. The minimum credits required for the award of degree in various PG Programs are given in the following table.

S.No	Program	Hard-core Courses credits	Soft-core Courses credits	Total (Minimum credits required for award of the degree)
1	M. A./ M.Sc./ All M.Tech. and M.Tech (Electronics)/ any other 2 year P.G. Programme not mentioned below	48 to 60	12 to 24	72
2	M.Com., M.A. Economics, M.P.A. Drama and Theatre Arts	68 to 78	12 to 22	90
3	All M. B. A. programmes	72 to 86	14-28	100
4	M.C.A.	72 to 90	18 to 36	108
5	5 year Integrated P.G.	148 to 162	30 to 44	192
6	M. Phil. Programme	30	6	36
7	M.Tech (Electronics)	70	3	73

- 1) The courses offered under a Program of Study are designated as Hard Core and Soft Core.
- 2) A course designated as Hard Core for a particular Program of Study must invariably be completed by the student to receive the degree in that program. The Hard Core Course cannot be substituted by any other course.
- 3) A student needs to earn certain number of minimum credits by successfully completing Soft core courses to receive the degree (see Table above).

Each student, soon after he/ she joins the course, will fill a plan of study detailing the courses he/ she plans to take. Depending upon the availability of the courses every semester, he/ she registers for a set of courses before the semester starts by filling in the appropriate forms. Each student should submit the registration card to the Head of the Department on or before the last date prescribed for the same.

LETTER GRADES

Performances of students in each paper are expressed in terms of marks as well as in Letter Grades. In case of fractions the marks shall be rounded off to nearest integer. The class interval for the purpose of awarding the grades can be arrived at by dividing the difference between the highest mark secured and the minimum pass mark by 6 as there are six passing grades. The formula is given below:

$$K = (X-50)/6$$

Where, K = class interval, X= the highest mark in the subject.

The grades may be awarded as given in the following table.

Range of Marks in %	Letter Grade	Points for Calculation of GPA/ CGPA
X to (X-K)+1	A+	10
(X-K) to (X-2K)+1	A	9
(X-2K) to (X-3K)+1	A-	8
(X-3K) to (X-4K)+1	B+	7
(X-4K) to (X-5K)+1	B	6
(X-5K) to 50	C	5
Below 50	F	0
Failure due to lack of attendance	FA	0

K should not be rounded off to less than two decimal places. The numbers given in Range of Marks column, (X-K), (X-2K), (X-3K), etc., can be rounded off to the nearest whole number.

In courses where the number of students who have secured 50 marks and above is less than 10 then grading may be given based on the Table below

Range of Marks in %	Letter Grade	Points for Calculate of CGPA
81-100	A+	10
71-80	A	9
66-70	A-	8
61-65	B+	7
56-60	B	6
50-55	C	5
Below 50	F	0

The GPA and CGPA will be calculated as weighted average of points secured by the student in all the papers registered by him / her. The weights are the number of credits for each paper. For example, a student getting in A grade in 4 credit course, A- grade in 2 credit course, A+ grade in a 3 credit course and F grade in a 3 credit course will have a GPA as $(9 \times 4 + 8 \times 2 + 10 \times 3 + 0 \times 3) / (4 + 2 + 3 + 3) = (36 + 16 + 30 + 0) / 12 = 82 / 12 = 6.83$ out of 10.0; GPA = 6.83. The CGPA shall also be calculated in similar lines taking all subjects taken by the students in all semesters.

Students with a CGPA of 9.0 and above and did not fail in any of the courses taken by him/ her shall be awarded Distinction. A CGPA of 6.0 and above shall be placed in First class.

Student who has secured less than 50% marks in any paper gets F Grade and he is treated as failed in that paper.

INTRODUCTION

The concern of the nation has been about enhancing the quality of research in Universities, as well as increasing the number of students pursuing research and obtaining Doctoral degrees.

Integrated Ph.D. program gives unique opportunity to obtain Ph.D. degree within a shorter duration and is very useful to the students who plan to build their career in research or higher education. This program offers research orientation from the third semester onwards by giving specialized courses in the area of research the student plans to pursue. The fourth semester is entirely devoted to research project which could be a pilot or precursor to the Ph.D. research work. On completion of all the credit requirements the student enters into the part II of the program which is entirely research.

ADMISSION AND OTHER GENERAL CONDITIONS

1. No separate application and entrance examination for the Integrated Ph.D. Programmes.

2. Admission of students to the programmes will be made as per the merit lists of the respective regular P.G. programmes (Not exceeding 10 per year).

3. Intake will be decided by the respective Heads of Departments at the time of admission.

4. A candidate joining the integrated Ph.D. program shall get a monthly stipend of Rs.1000/- for four semesters (20 months) and Rs.5000/- per month for the next three years extendable by one year. During the Ph.D. period, the candidate is also eligible for contingency from UGC.

5. The students admitted to integrated Ph.D. program shall take courses of first three semesters together with the students of main stream Master's degree program.

6. Students with a CGPA of 6 or more on completion of mandated credits at the end of 4 semesters are eligible to proceed to Part II of the Ph.D. program. Others will be eligible for award of PG degree if they have completed the credit requirements for that degree.

7. The student who has CGPA of 6 or more on completion of four semesters may be permitted to exit the program with the P.G. degree on successful completion of credit requirements for that degree, however, he or she shall have to refund the entire stipend of Rs.1000/- per month paid.

8. Evaluation and award of grades during first four semester will be governed by the CBCS regulations.

9. The students of integrated Ph.D. program are advised to take additional courses in the same department or any other department in order to meet the deficiencies for pursuing Ph.D. program.

10. The successful candidate shall get two degrees after the award of Ph.D. degree namely, M.A./ M.Sc./ M.Tech., as applicable, along with the Ph.D. degree.

The fast changing dynamics of Global economy has directly influenced the knowledge and skill requirement of human resources. The older concepts of focused fields of education in a particular subject or a branch of the subject has been replaced largely by inter disciplinary horizons of learning. The Dual Degree Programmes enhance the marketability of the student and also make him more useful on a larger canvas of industry's need. It was also found that PG four semester programmes in allied fields will have several papers common between them. Pondicherry University has, therefore, proposed the dual degree programme in allied subjects wherein the student takes advantage of the choice based credit system (CBCS) and does not necessarily study the 4 semesters for a second degree but completes it in two additional semesters by fulfilling the requirements of credits taking only those courses for which he/she has not studied.

Dual degree programme permits a student to seek admission and complete a second Master's degree without registering for courses already studied. This Program is proposed at

Post-Graduate (PG) level under the Choice Based Credit System.

ADMISSION AND GENERAL CONDITIONS

1. The candidate need not apply for dual degree separately. They have to only apply for any of the two degrees for which they are eligible as per the criteria prescribed under "Admission Requirements" for regular P.G. courses.
2. The dual degrees are designed in such a way that (a) common courses are offered in first two semesters and (b) balance of credits in prescribed courses shall fall in the last two semesters (5 & 6) so that students of second degree can horizontally tow the 3rd semester along with the students of the main stream.
3. It is mandatory that dual degree should be pursued continuously and without any break unless the student has failed in some of courses taken in the third/fourth semester of 1st degree.
4. Students with discontinuation of one academic year or more are not eligible for admission to dual degree.

5. There shall be no separate entrance test for dual degree (2nd degree) for lateral entry. The admission will be based on the CGPA earned in the 1st degree and shall be in the order of merit, with due reservations.
6. The intake to second degree under the dual degree programme shall be decided by the concerned department depending on the faculties and facilities available.
7. The Cumulative Grade Point Average (CGPA) of the 2nd degree shall be calculated based on the grades earned in the subjects common to both 1st and 2nd degrees and those earned in the prescribed courses of the 2nd degree.
8. Separate grade card and degree certificates shall be issued to each of the degrees covered under the Dual Degree program.
9. A student is entitled to get his/her first degree in the convocation without completing the second degree or he/she can apply for both the degrees at the end of 6th semester or when he/she completes both the degree courses.

FEES

 Department of Sanskrit
 Department of Philosophy
 Department of Physical Education and Sports
 Centre for Foreign Languages
 Escande Chair in Asian Christian Studies

All the Departments offer P.G., Ph.D. programmes. However, the Centre for Asian Christian Studies offers only Ph.D. and P.G. Diploma in Asian Christian Studies programmes. The School caters to the needs of a large number

of students of the University and some of the faculty members of the School have made enormous contributions to their respective disciplines and they are known and recognised in the academic community for their scholarship

The centre for Foreign Languages offer evening certificate courses in Japanese, Chinese, Korean, French, Italian, Spanish, German and Russian.

DEPARTMENT OF ENGLISH

School of Humanities

The Department of English, one of the oldest Department of the University, was established on 1st December, 1986, and since inception the Department has been the hub of teaching and research activity, attracting a cross-section of students and research scholars from all over the country. It has established itself as a stronghold of Comparative Literature, teaching Comparative Literary Theory and fostering Comparative Literary Studies between Indian Languages and English. In recent years, Cultural and Translation Studies too have come to be a thrust area, inspiring inter-disciplinary and intra-disciplinary insights among faculty and students alike. An ecologically sensitive critical thinking and teaching has also emerged and the Department is one of the earliest in the country to proffer multicultural studies in this area—and with the founding and establishment of the Association for the Study of Literature and Environment-ASLE India (the Indian counterpart of the International forum of that name) in 2006, this has fostered a renewed direction to academics and scholars alike.

At the postgraduate level, the Department of English offers courses in poetry, drama, prose and fiction of canonical British literature and American Literature, thus offering a good training for UGC-NET aspirants, and all those keen to acquaint themselves with these classics. A strong theoretical foundation is laid with two Literary Theory courses spread over two semesters. The Department offers courses in ELT and Research Methodology which are application-oriented. A basic course devised as Language through Literature offers students an orientation to the formal study of English language and literary appreciation. A high-point of our M.A. Programme is the research project that encourages individual initiative and self-study on the part of the students. Emerging areas of study such as, Media Studies Postcolonial Literatures, and Ecocritical Studies along with an array of specialized electives make for an M.A. programme that is a mix of the conventional and the new.

The M.Phil programme is marked by rigorous course-work in theory and criticism and in emergent literatures cutting across various genres like poetry and fiction, and a semester-long work on a dissertation. The Department encourages research at the Ph.D. levels in a number of areas, such as Poetry and Poetics, Diaspora Studies, Subaltern Literatures, Nature-oriented Literatures, Interdisciplinary and Cultural Studies.

PROGRAMMES OF STUDY

M.A. English and Comparative Literature
Ph.D. English (Full-time & Part-time (Internal & External))
PG Diploma in Professional Communication in English (PGDPCE)

ENTRANCE EXAMINATION

M.A.: The entrance Examination would comprise Objective Type questions of a general nature drawn from Undergraduate syllabi from Indian Universities. The major focus should be on poetry, prose, drama and literary criticism—British, American, Commonwealth and Indian—that an undergraduate is expected to be familiar with—An overall awareness of literature is what is tested.

Ph.D.: A common entrance test—with Objective type questions drawn from the postgraduate syllabi of Indian Universities. Since the student has the option to choose to appear for either of the two or both at the application level itself, a greater emphasis will be given to evaluating the research aptitude and awareness of international literary movements, theoretical perspectives and writing from across cultures.

MADANJEET SCHOOL OF GREEN ENERGY TECHNOLOGIES

Dean: Prof. J.A.K. TAREEN

Centre for Green Energy Technology
Centre for Nano Science and Technology

India ranks fifth in the world in terms of primary energy consumption, accounting for about 3.5% of the world commercial energy demand in the year 2003. Despite the overall increase in energy demand, per capita energy consumption in India is still very low compared to other developing countries. India is well-endowed with both exhaustible and renewable energy resources. Coal, oil, and natural gas are the three primary commercial energy sources. Coal was by far the largest source of energy. Despite increasing dependency on commercial fuels, a sizeable quantum of energy requirements (40% of total energy requirement), especially in the rural household sector, is met by non-commercial energy sources,

which include fuel wood, crop residue, and animal waste, including human and draught animal power. However, other forms of commercial energy of a much higher quality and efficiency are steadily replacing the traditional energy resources being consumed in the rural sector. Resource augmentation and growth in energy supply has not kept pace with increasing demand and, therefore, India continues to face serious energy shortages.

Besides Solar, Wind, Biomass, there are quite a few other eco-friendly and renewable sources from which one can tap energy for varied applications. Some of them are stated below.

- Chemical Sources Of Energy
- Hydrogen Energy
- Geothermal Energy
- Alternate Fuels for Surface Transportation

There is a need to carryout in-depth studies and research in Green Science and Technology at higher education level utilizing the expertise available in India and abroad. Developing Green Energy is the only alternative to meet the challenges of our Future. It is under this context, the Madanjeet School of Green Energy Technologies has been established with two composite units as Centre for Green Energy Studies and Research and Centre for Nano Sciences and technology.

CENTRE FOR GREEN ENERGY TECHNOLOGY

Co-ordinator: Prof. H. Surya Prakash Rao, Dept. of Chemistry.

The centre for Green Energy Technology (C-GET) was established in 2010 under the aegis of Madanjeet School of Green Energy Technologies with a vision to promote education and research in environmentally clean methods of energy production, conservation and utilization. The center offers M. Tech. in Green Energy Technology which is partly supported by South Asia Foundation (SAF). The center also promotes research in the fields of all clean sources of energy production, conversion and utilization like solar photovoltaic, solar thermal, energy storage, bio-fuels, wind energy, ocean energy, chemical energy, applications of nanotechnology for energy conversion etc. The center has well trained faculty to teach, offer consultancy and take up research work in many core areas of green energy. The center is involved quality assurance testing in all fields of renewable energy. Establishment of MOUs with various alternate energy generating firms specializing in photovoltaic, solar-thermal has taken place. In addition several MOUs with industries specializing in solar thermal devices and power plant engineering are in pipeline.
