15. What are the derivative instruments available for hedging against exchange rate variation? Explain with suitable examples.

16. Discuss the theories relating to determination of foreign exchange rate.

PART C — (1 × 20 = 20 marks)

Case Study – Compulsory

17. Shrewsbury Herbal Products, located in central England close to the Welsh border, is an old-line producer of herbal teas, seasonings, and medicines. Its products are marketed all over the United Kingdom and in many parts of continental Europe as well. Shrewsbury Herbal generally invoices in British pound sterling when it sells to foreign customers in order to guard against adverse exchange rate changes. Nevertheless, it has just received an order from a large wholesaler in central France for £320,000 of its products, conditional upon delivery being made in three months' time and the order invoiced in Euros. Shrewsbury's controller, Elton Peters, is concerned with whether the pound will appreciate versus the euro over the next three months, thus eliminating all or most of the profit when the euro receivable is paid. He thinks this is an unlikely possibility, but he decides to contact the firm's banker for suggestions about hedging the exchange rate exposure.
