

Online Training Programme on Emerging Challenges for Disaster Risk Reduction: New Strategy and 15th Finance Commission

**28-30 April 2021,
11.00 AM-01.00 PM.**

**Department of Social Work
Pondicherry University
Puducherry
&
National Institute of Disaster
Management, New Delhi**

BACKGROUND

There is a growing need to look at disasters from a development perspective. Disasters can have devastating effect on communities and can significantly set back development efforts to a great extent. But then, it could also offer an opportunity to invest in development efforts in a post disaster scenario. Disasters are opportunities for communities to reinvent themselves.

One of the glaring lacunae in the process of Disaster Management in India has been the overlooking of unnatural disasters. Current global situation also demands initiatives in managing the impact of unnatural disasters and developments at the international level.

The global community has recognized the serious consequences of Nuclear, Biological and Chemical (NBC) warfare. Hence, unnatural disasters remain a serious challenge for India to address in the near future.

The need of the hour is to chalk out a multi-pronged strategy for total disaster management comprising prevention, preparedness, response and recovery on the one hand and initiate development efforts, on the other.

Keeping in view the increasing new emerging challenges in disaster risk reduction, the training programme is intended to discuss the strategies for States to cope with the new emerging challenges in disaster risk reduction.

AIM OF TRAINING

This training -**Emerging Challenges for Disaster Risk Reduction: New Strategy and 15th Finance Commission** is intended for officials of Health, Education, Panchayat Raj, Rural Development, Revenue, Women and Child Welfare, Police Department and any other relevant department officials and Students and faculty, State level sectoral departments, Administrative Training Institutions and civil society practitioners to help build their knowledge, skills and perspectives on new emerging challenges in disaster risk reduction.

OBJECTIVES

At the end of this course, participants will be able to:

- Explain the impacts of disaster on development
- Identify and list new emerging challenges in disaster risk reduction
- Explain the process of mainstreaming disaster risk reduction into development plan.
- Draft and apply strategies for the new emerging challenges in disaster risk reduction.

TARGET GROUP

This training programme targets officials working in Health, Education, Women and Child welfare, Revenue and Panchayat Raj and Rural Development Department. Though the training targets the government officials considering the contribution of civil servants, this training also targets Civil servants from Non-Government Organization.

PROGRAMME DETAILS

This training programme is scheduled for 3 days. It is based on e-learning module covering 2 hours each day during the programme.

REGISTRATION

Participants will have to fill up and submit the on line registration Google form for the course.

LEARNING METHODS

Google Link/Cisco Webex platform will be used for this programme. All the participants are requested to install 'Google Link/Cisco Webex' App in their devices. The webinar would be conducted through power point presentation by the speaker/experts.

EVALUATION

At the end of the programme, the participants will be provided with online evaluation form. Evaluation form is to be mandatorily filled by all the participants.
