Total Number of Industry Interface Programs	: 2
Number of Projects	: 2

MBA DEGREE PROGRAMME

REGULATIONS FOR THE MBA PROGRAMME OFFERED IN THE UNIVERSITY DEPARTMENT

1. Duration of the Course: 2 Years

2. Examination: End semester examination is under CBCS Scheme. The complete evaluation is made 100% internal. The faculty member who teaches the subject will set the question paper and evaluate the answer scripts, enter the marks in SAMS takes the print out and brings to the Programme Committee meeting for approval.

Since it is single valuation, re-valuation system is being introduced. Within 7 days of announcing the provisional results, the students, if deemed necessary may apply for re-valuation along with the challan for prescribed re-valuation fee. After receiving the applications, their answer scripts will be photocopied, dummy number is given and sent to Dean's office for further processing. Dean will send those scripts to external examiner for re-valuation. The marks awarded by the external examiner is final.

3. Proportion of marks between internal assessment and end-semester evaluation for courses is 40:60 respectively, while it is fully internal for the workshop and lab courses.

4. Guidelines for awarding mark for project works:

a. Minor Project (2 WEEKS):

It will be done during the winter vacation after first semester.

Marks for Project Viva awarded by the Guide & Co-examiner: 50 Marks
[The co-examiner is one of the faculty members of the department]

b. Summer Project (8 Weeks)

There will be a mid-term review after 4 weeks

Marks for Project awarded by Guide	80 Marks
Marks for Project in the Mid-Term Review	20 Marks
Marks for Project viva awarded by the Guide & Co-examiner: [The co-examiner is one of the faculty members of the department]	50 Marks

5. Passing Requirement: The student should have a minimum of 40% marks in End Semester Examination and a minimum total of 50 % marks in Internal and End Semester Examination put together in theory subjects. Wherever there is no internal component, the student should have a minimum of 50% marks in the University Examination.

6. Question paper pattern:

Time: 3 Hours

Maximum Marks: 60

PART A: 15 Marks

Answer All Questions (No choice)

The number of questions to be announced is decided by the course teacher

PART B: $5 \times 7 = 35$ Marks

Question 6A or Question 6B

Question 7A or Question 7B

Question 8A or Question 8B

Question 9A or Question 9B

Question 10A or Question 10B

PART C ($1 \times 10 = 10$ Marks)

Question 11: COMPULSORY (Case/Problem depending upon the course)

7. Maximum number of years permitted after completion of Semester IV to write arrear subjects:

- a. Two years
- b. **Old Regulation Students:** Two years

8. Guidelines to deal with attendance shortage of the students:

The students are permitted to proceed to the succeeding semesters without break. Under this scheme, the students should repeat the semester in which shortage occurred after completing the last semester (Semester-IV).

Total	29	950	Total	25	800

Total Number of Credits	: 108
Total Marks	: 3400
Total Number of theory papers	: 28
Total Number of Skills development workshop	: 3
Total Number of Lab	: 4
Total Number of Industry Interface Programs	: 2
Number of Projects	: 2

REGULATIONS FOR THE MBA PROGRAMME OFFERED IN AFFILIATED COLLEGES

1. Examinations:

Question paper setting, and valuation (double valuation) will be fully taken care of by the Controller of Examinations Office, Pondicherry University. However, in the workshop-based subjects the assessment is continuous and internal.

The panel of Question Paper setters and the panel of Examiners for evaluation will be suggested by the University Department.

If the difference between the two valuations is more than 15%, the script will be evaluated by a third subject expert and the mark awarded by that expert will be the final.

2. Proportion of marks between internal evaluation and external evaluation for subjects: 40:60

3 Guidelines for awarding marks for project works:

1. Minor Project (2 WEEKS):

It will be done during the winter vacation after the first semester.

Marks for Project Viva awarded by the Guide & Co-examiner: 50 Marks
[The co-examiner is one of the faculty members of the department]

2. Summer Project (8 Weeks)

There will be a mid-term review after 4 weeks

Marks for Project awarded by Guide	80 Marks
Marks for Project in the Mid-Term Review	20 Marks
Marks for Project viva awarded by the External Examiner assigned by the University	50 Marks

Passing Condition:

The student should have a minimum of 24 marks out of 60 in the University Examination and a minimum total of 50% marks in Internal and University Examinations put together in each of the courses. Wherever there is no internal component as in Project viva, the student should have a minimum of 50% marks in the project viva Examination. For workshop and lab courses, the passing minimum is 50% of the internal assessment carried out on continuous basis.

4. Question paper pattern

Time: 3 Hours

Maximum Marks: 100

PART A: $6 \times 5 = 30$ Marks

Answer any SIX Questions out of TEN Questions

Question 1 to Question 10

PART B: $5 \times 10 = 50$ Marks

Question 11 or Question 12

Question 13 or Question 14

Question 15 or Question 16

Question 17 or Question 18

Question 19 or Question 20

PART C ($1 \times 20 = 20$ Marks)

Question 21: COMPULSORY (Case/Problem depending upon the subject)

Note: For answers, the following are the prescribed word limits.

5 marks – maximum 50 words

8 marks – maximum 200 words

10 marks – maximum 300 words

5. Maximum number of years permitted after completion of Semester IV to write arrear subjects:

- a) Two years
- b) **Old Regulation Students:** Two years

6. Guidelines to deal with attendance shortage for students:

The students are permitted to proceed to the succeeding semesters without break. Under this scheme, the students should repeat the semester in which shortage occurred after completing the last semester (Semester-IV).

SEMESTER - I

SEMESTER I

LIST OF CORE PAPERS

Title of the Paper	Code
MANAGEMENT PROCESSES	MBAH011
ORGANISATIONAL BEHAVIOUR	MBAH012
MANAGERIAL ECONOMICS	MBAH013
ACCOUNTING FOR MANAGERS	MBAH014
BUSINESS LAW	MBAH015
BUSINESS ENVIRONMENT	MBAH016
BUSINESS ANALYTICS LAB - I	MBAH017
COMMUNICATION SKILL WORKSHOP	MBAH018
SPREADSHEET FOR MANAGERS LAB	MBAH019
PERSONALITY DEVELOPMENT WORKSHOP	MBAH019A

MANAGEMENT PROCESSES

COURSE CODE: MBAH011

OBJECTIVES:

- Providing conceptual understanding of management concepts
- Familiarizing the students with the contemporary issues in management
- Enable them to apply the concepts in the management organization

METHODOLOGY:

Lectures, Case studies, Application exercises, Group or Class learning activities, Experiential Exercises

UNIT I

Nature of Management – Tasks of a Professional Manager - Social Responsibilities of Business – Manager and Environment – Systems Approach to Management – Levels in Management – Managerial Skills.

UNIT II

Planning – Steps in Planning Process – Scope and Limitations – Short Range and Long-Range Planning – Flexibility in Planning – Characteristics of a Sound Plan – Management by Objective (MBO) – Policies and Strategies – Scope and formulation – Decision Making - Techniques and processes.

UNIT III

Organizing – Organisation Structure and Design - Authority Relationships – Delegation of Authority and Decentralisation – Interdepartmental Coordinator – emerging Trends in corporate Structure, Strategy and Culture – Impact of Technology on Organisational design - Mechanistic vs. Adoptive Structures – Formal and Informal Organisation.

UNIT IV

An Overview of Staffing and Directing functions – Controlling – Prerequisites' of Control Systems – Control Process – Methods, Tools and Techniques of Control – Design of techniques – Choices in Control.

UNIT V

Comparative Management Styles and approaches – Japanese Management Practices – Organisational Creativity and Innovation – Management of Innovation – Entrepreneurial Management – Benchmarking – Best Management Practices across the world – Select cases of Domestic & International Corporations – Management of Diversity.

Course Outcomes:

CO1: Define and classify the concepts, approaches, and managerial skills

CO2: Recall the planning and decision-making process.

CO3: Outline the concepts of organization.

CO4: Summarize the concepts of controlling and equip the knowledge with the staffing process

CO5: Explain the management styles and approaches and interpret the best

MANAGERIAL ECONOMICS

COURSE CODE: MBAH013

COURSE OBJECTIVES

- To provide a basic foundation on concepts and principles of Macro Economics, Micro Economics and managerial economics.
- To demonstrate the application of economic theory to business decision- making.

METHODOLOGY

- Class sessions comprise a mixture of lectures, interactive discussions, case presentations, and problem solving.
- In addition to the in-class exams and homework assignments, each student will undertake a short econometric project.

SYLLABUS

UNIT I: INTRODUCTION

Introduction to Managerial Economics: Definition, Nature, Scope, Importance and General Foundation of Managerial Economics. Circular flow of activities. Nature of firm; Objectives of firm; Theory of firm Forms of Organizations-Sole Proprietorship; Partnership; Joint Stock Company; Cooperatives; Public Enterprises.

Relevance of demand analysis in Business Decision-making: Law of Demand; Elasticity of Demand; Determinants of Demand; Individual, firm and Market demand; Demand Curve and its nature; Demand Forecasting Techniques.

UNIT II: MARKETS AND PRICING

Product Markets and Recourse Markets. Market Structure: Differently Competitive Markets; Pricing under different Market structures. Methods of Pricing new and existing products; Pricing strategies. Cost-Oriented and Market-Oriented Pricing. Cost concepts: Types of cost; Relationship between Average and Marginal Cost in Short run and long run; Economics and Accountant View on Cost; Preparation of Cost sheet and Computation of UNIT and Total Cost; Using Marginal costing in business decision- making. Production functions in short and long run. Wages and wage differentials.

UNIT III: ECONOMIC DECISION-MAKING

Concept of Required Rate of Return and Internal Rate of Return; Annual-cost and Annual-worth Comparisons; Present-worth analysis; Computation of Cost of Capital and its relevance to decision-making; Economic Life; Replacement Economy; Analysis of risk and uncertainty in capital expenditure decisions.

Budgetary Control: Preparation of Cash Budgets, Purchase Budgets, Production Budgets and Flexible Budgets; Concept of Zero-Based Budgeting.

UNIT IV MACRO ECONOMIC ISSUES (I)

The Great Depression of 1920s and lessons learnt. Global recession of 2008 and its impact on Indian business. The Euro crisis. WTO and its impact on Indian Agriculture and Textiles industry. Concepts of SEZs, EPZs, FTZs and EPCs.

UNIT V: MACRO ECONOMIC ISSUES (II)

Introduction to National Income and Methods of Estimating National Income. Inter-Sectoral Linkages Macro Aggregates and Policy Interrelationships- Fiscal and Monetary Policies. Business and Government. Economic Indicators Technology, Employment and Poverty-Issues and Challenges Industrial Finance – Money Market and Capital market.

Course Outcomes:

- CO1: Aware with the fundamental concepts and principles of Managerial Economics – the definition, nature, scope, importance, Firms – nature, objectives, theory, Forms of organizations and Demand concepts- forecasting techniques.
- CO2: Familiar about different Product and Resource Markets and Pricing in those markets, Cost and Production Functions.
- CO3: Thorough with various concepts of economic decision making, economic life, replacement economy, budgetary control, and types of budgets
- CO4: Learnt about the past recessions, depressions and crisis happened worldwide; WTO and its impact on Indian Industry; and the concepts of economic zones.
- CO5: Aware about the Macro economic issues; national income; sectoral linkages & economic policy interrelationships and economic indicators

ILLUSTRATIVE EXERCISE:

- Problems on Preparation of Cost sheet, Forecasting demand using Regression Analysis, Calculation of Cost of Capital, Preparation of various budgets such as Production Budgets, Purchase Budgets, Cash Budgets and Flexible Budgets, and Cost of Acquiring and Replacing Machines using Capital Budgeting shall be worked out.
- Students shall be required to deliberate on various macro and micro economic problems at global and national level, and on issues having an impact on the functioning of any business.

ACCOUNTING FOR MANAGERS

COURSE CODE: MBAH014

OBJECTIVES

- To acquaint the students with the fundamental's principles of financial, cost and management accounting.
- To enable the students to prepare, analyse and interpret financial statements.
- To enable the students to take decisions using management accounting tools.

METHODOLOGY FOR COVERING SYLLABUS

- Class Room teaching of each of the UNIT s followed by regular exercises and surprise tests.
- One practical assignment on 'Accounting for SBEs" and its presentation by students.
- Case Study - Analysis of Company Annual Report & application of marginal costing
- Training on Tally Package

UNIT I

Book-keeping and Accounting – Meaning – Definition – Objectives of Financial Accounting – Branches of Accounting: Financial, Cost and Management Accounting – Accounting Concepts and conventions – journal – Ledger – Trial Balance – Preparation of Final Accounts: Trading, Profit and Loss Account and Balance Sheet (problems) – Accounting Standards – Groups interested in Accounting Information – An Introduction to Tally Package – salient features – types of vouchers – reports generated by Tally.

UNIT II

Capital and Revenue Expenditure – Deferred Revenue Expenditure – Capital and Revenue Receipts – Depreciation – Definition – Causes – Necessity of providing for depreciation – Methods of Calculating Depreciation: Straight Line Method and Written Down Value Method – Problems.

UNIT III

Financial Statements – Meaning – Types of financial Analysis – Techniques of Financial Analysis – Ratio Analysis – Profitability Ratios – Coverage Ratios – Turnover Ratios – Financial Ratios – Ratios to Financial Statement (problems) – uses and limitations of Ratio Analysis – Funds Flow Analysis (simple problems) – uses and limitations – Cash Flow Analysis (simple problems) – uses and limitations – Difference between funds flow and cash flow analysis.

UNIT IV

Marginal costing – assumptions – Cost Volume Profit Analysis – Breakeven Analysis – Key Factor – Profit Planning (problem) – Decisions involving Alternative Choices: Determination of sales mix, exploring new markets and Make or Buy decisions (Problem for case study)

UNIT V

Concept of cost – Elements of Cost – Cost Accounting – Objectives – Cost Sheet (Problems) – classification of cost – Cost UNIT and Cost Centre – Methods of Costing – Techniques of Costing.

Course Outcomes:

- CO1: Recall the accounting principles and prepare and interpret Final accounts of a Business Concern.
- CO2: Classify various categories of expenditure and analyze problems concerning different methods of Depreciation.
- CO3: Describe the various Techniques of Financial Analysis, classify different types of ratios and distinguish Fund Flow Analysis from Cash Flow.
- CO4: Analyze the problems related to Marginal Costing and Break-Even Analysis and choose the decisions from alternative choices pertaining to determination of sales mix, exploring new markets and analyze the cases related to make or buy decisions
- CO5: Classify in detail about the various elements of cost and define different methods and techniques of Costing and analyze the Cost Sheet of any firm

ILLUSTRATED EXERCISES

1. Tally practical record and examination – 15 marks
2. Practical assignment on Accounting by Small Business Enterprises and presentation of the same in the class – 5 marks
3. Submission of assignment on IFRS and accounting standards – 5 marks
4. Brain storming session on Emerging Trends in Accounting – 5 marks

BUSINESS LAW
COURSE CODE: MBAH015

OBJECTIVES:

- To introduce the statutory provisions that affects the business decisions.
- To give an exposure to important commercial laws, the knowledge, that is essential for an understanding of the legal implications of the general activities of a modern business organisation.
- To understand the legal frame work related to contract
- To familiarise about the legal aspects regarding negotiable instruments
- To understand the legal regulations about the company

METHODOLOGY:

- Lectures, Case studies, Assignments, Presentation of legal reports

UNIT I (11 SESSIONS)

The Indian Contract Act, 1872

Definition of a Contract and its essentials, Formation of a valid Contract - Offer and Acceptance,

Consideration, Capacity to Contract, Free consent, Legality of object, Discharge of a Contract by performance, Impossibility and Frustration, Breach, Damages for breach of a contract, Quasi contracts, Contract of Agency.

UNIT II (08 SESSIONS)

The Indian Partnership Act, 1932

Definition of Partnership and its essentials, Rights and Duties of Partners: Types of Partners, Minor as a partner, Doctrine of Implied Authority, Registration of Firms, Dissolution of firms.

Limited Liability Partnership Act, 2008

Incorporation by registration, Relationship of members, members as agents, ex- members, designated members, Cessation of trade by Limited liability partnership, Insolvency and winding up

UNIT III (08 SESSIONS)

The Sale of Goods Act, 1930

Definition of a Contract of Sale, Conditions and Warranties, Passing of Property, Right of Unpaid Seller against the Goods, Remedies for Breach.

The Negotiable Instrument Act, 1881

Definition and characteristics, Kinds of negotiable instruments, Promissory Note, Bill of Exchange and Cheques, Holder and Holder in due course, Negotiation, Presentment, Discharge from Liability, Noting and Protest, Presumption, Crossing of Cheques, Bouncing of Cheques.

UNIT IV (10 SESSIONS)

The Companies Act, 2013

Nature and Definition of a Company, Registration and Incorporation, Memorandum of Association, Articles of Association, Prospectus, Kinds of Companies, Directors: Their powers and duties, Meetings, Winding up.

UNIT V (08 SESSIONS)

The Consumer Protection Act, 2019

Aims and Objects of the Act, Redressal Machinery under the Act, Procedure for complaints under the Act, Remedies, Appeals, Enforcement of orders and Penalties.

Competition Act 2002

Objective, Anti-Competitive Agreements, Abuse of Dominant Position, Regulation of Combinations, Competition Commission of India –Composition, Powers and Functions.

Goods and Service Tax (GST)

Introduction, Overview and Evolution of GST, Registration under GST, Supply under GST and Valuation of Supply, Input Tax Credit under GST & Returns, Custom Duty and Indirect Taxation.

Course Outcomes:

CO1: Identify and demonstrate the essentials of Law of Contract and its elements

CO2: Recalls the legal provisions relating to partnership, sale of good and insurance

CO3: Identify and check the procedural stipulation on negotiable instruments and contract of agency

CO4: Analyze the legal provisions on company law

CO5: Apply Company Administration & Management

BUSINESS ENVIRONMENT

COURSE CODE: MBAH016

Course Objectives:

- To enable students, understand the opportunities and challenges of prevailing and desirable global business environment in which business has to operate.
- Provide an understanding of the role of business in society.
- To enable students read, research and discuss the issues through written papers, presentations, industrial visits and role plays in class seminars.

Methodology:

- Teaching and Learning involves multiple and varied pedagogical tools with an emphasis on interactivity, which include the following:
- Classroom Lectures, Group Discussion on selective Articles taken from Newspapers, Magazines, Journals, Online Sources, and Various Reports.
- Case Studies, Seminar Presentations, Written Assignments, Role Plays and Field Visits

UNIT I: Economic Environment

- External and Internal Environment
- PEST / PESTEL Analysis
- Environmental Analysis – Scanning, Monitoring, Forecasting and Assessing the Current and Future Environmental Changes.
- Liberalization, Privatization and Globalization of Economy.
- Social, Political and Economic Consequences of globalization.
- Structure of the Economy, Inflation and GDP

UNIT II: Political and Legal Environment

- Democracy, Political Diversity, Politics and Markets
- Bureaucracy, Corruption Level, Societal Outlook and Orientation
- Roles of Government:
 - a) Regulatory Role – Fiscal, Monetary and Industrial Policies, Tax Policies, Education and Employment Laws
 - b) Promotional Role
 - c) Entrepreneurial Role
 - d) Planning Role

UNIT III: Socio-Cultural Environment

- Population & its Growth Rate, Education Levels, Age Distribution and Life Expectancy Rates
- Family Size and Structures, Gender Distribution, Religion, Nationality and Beliefs and Minorities
- Social Classes and Lifestyle, Average Disposable Income
- Attitude towards Product Quality and Customer Service, Buying Habits,

Environmental Consciousness, Work and Leisure, Health Consciousness, Risk Taking Ability.

UNIT IV: Technological Environment

- Basic Infrastructure Level - Energy, Transport, Communication, Science and Technology.
- Research and Development, Product and Process Innovation, Rate of Technological Change and Penetration Levels, Protection of Intellectual Property Rights
- Technological Leadership and Followers, Technology and Competitive Advantage, Time Lags in Technology Introduction, Adaptation, Transfer of Technology
- Internet Infrastructure

UNIT V: Global Environment

- International Relations - MNCs
- World Trade Organization, Competition
- FDI, FPI, Special Economic Zone
- Environmental Issues
- Outsourcing and Collaboration
- Sustainable Development

Course Outcomes:

CO1: Understand the external and internal environment of business with LPG, GDP and national income concepts

CO2: Enrich themselves with political and legal environment prevailing around the business and learn about the different roles of Government in Business

CO3: Analyze the social and cultural factors of business with attitude of customers towards quality and service provided by business organizations.

CO4: Recognize the basic infrastructure of our country and know about the research and development process innovation and technology growth of business

CO5: Clarify in detail to know about WTO, FDI, FPI and SEZ and outsourcing with Global Environment

Illustrative Exercises:

1. Study and analysis of prevailing business environment in the industry chosen/or given and recommendations for creating more enabling environment to promote

business activity.

2. Visit to an Industrial Estate / Other organization and assess the infrastructural facilities such as appropriate roads, street lights, industrial waste treatment plants and other amenities, and submit a Written Report small team project.

BUSINESS ANALYTICS LAB -I

[2-Credit Paper- Workshop Mode]

COURSE CODE: MBAH017

OBJECTIVES

- To enable the students to know about the information needs of Management
- To introduce the concepts of data analysis methods
- To have hands-on training of Statistical Data Analysis through MS-EXCEL

METHODOLOGY

- The methodology is predominantly by Problem Solving [using MS-EXCEL], supplemented by lecture mode and case discussion. The students have to undertake a project work in a topic of their interest and product, whereby apply the concepts studied in the course as their course evaluation submission.

UNIT I

BASICS OF STATISTICS AND EXCEL

Basic Statistical Terms - Population and Sample (Theory), Understanding Data- Qualitative Vs Quantitative Data / Continuous vs Discrete (Theory) -Measurement Scales - Nominal, Ordinal, Interval & Ratio

Types of Data in Excel - Text, Numbers, Date/Time, Logical (Excel) -Understanding Formulas and Functions (Excel) - Relative vs Absolute Reference (Excel), Basic Formulas, Functions and Named Ranges (Excel)

DESCRIPTIVE STATISTICS

Descriptive Statistics – Summary statistics [Mean/Median/Mode/Quartiles, Percentiles / Standard Deviation / Coefficient of Variation/Measures of Skewness & Kurtosis

Installing Data Analysis Pack and Calculating Descriptive Statistics (Excel)

DATA VISUALIZATION

Importance of data visualization- types of charts

Bar/Pie Charts -Histogram -Box and Whisker Chart -Scatter Diagram (Excel)

UNIT II

BASIC PROBABILITY CONCEPTS AND PROBABILITY DISTRIBUTIONS

Basic Probability Concepts – Types - Rules - Concept of Bayes' theorem

Probability Distribution - Types (Discrete, continuous) -Random variable -Use of expected value in Decisions making - Binomial Distribution - Poisson Distribution - Normal Distribution

Theory of Sampling-Types probability sampling, non-probability sampling - Introduction to Sampling Distribution (Concept of SE) - Sample Size Estimation

Theory of Estimation- Types - Interval Estimates and Confidence Interval - Calculation Interval Estimates (C.I) for small & large samples

HYPOTHESIS TESTING

Tests for Mean and Proportions –One Sample test)

[One Sample z Test - One Sample t Test- One Sample p Test]

Testing of Hypothesis (two sample test) - Test for differences between means (large, small samples) - Test for proportions (small, large samples)

UNIT III

Chi Square Analysis - Test of Independence - Test of Goodness of fit Analysis of Variance - One-Way Classification - Two-way Classification

Theory of Correlation - scattered diagram, Karl-Pearson & Spearman Rank Correlation - Introduction to partial Correlation - Regression Analysis- Introduction to Time series and forecasting

Course Outcomes:

CO1: To Study about basics of statistics and excel, Descriptive statistics and Data Visualization

CO2: To know about the basic probability concepts and probability distributions

CO3: To analyze chi square, correlation, and time series analysis

CO- PO Mapping:

COMMUNICATION SKILLS WORKSHOP

COURSE CODE: MBAH018

No. of Credits: 2

OBJECTIVES:

- To understand the communication process in an organization
- To sharpen the communication skills – both oral and written - of the learner
- To simulate real-world business communication contexts and communicate effectively
- To facilitate experiential learning through use of role plays, presentations and so on.

METHODOLOGY:

1. Entirely Experiential Learning based course. Briefings, case discussions, storytelling, role-plays, seminar presentations, position papers, mini-projects, social media content discussions

UNIT I: COMMUNICATION FOUNDATIONS

Communication model – relevance and types of managerial communication – communication barriers – ethical communication

Professionalism in communication – team communication, meetings, listening, nonverbal communication

UNIT II: ANALYSIS OF BUSINESS COMMUNICATIONS

Reading and understanding business related articles, company profiles, not-for-profit organizations, profiles of corporate leaders and styles of communication, using reference sources

Organizing and writing business messages – Patterns – Use of tools such as word cloud, mind maps – composing messages in various forms such a poster, videos, interviews and presentations

Crafting readable messages by using the principles of clarity and completeness, avoiding clutter and complexity

Writing business proposals and reports by doing a mini survey for a chosen problem or issue

UNIT III: WORKPLACE COMMUNICATION

Electronic messages and digital media – Analyzing the use of audio visuals and their reach

Positive messages - Negative messages – structure and patterns in communicating news

Persuasive messages – Changing mindsets through social cause communications

Presentation skills – preparation for good content, overcoming stage fright – gaining and retaining attention

Course Outcomes:

CO1: To understand the communication process in an organization

CO2: To sharpen the communication skills – both oral and written - of the learner

CO3: To simulate real-world business communication contexts and communicate effectively and to facilitate experiential learning through use of role plays, presentations and so on.

ILLUSTRATIVE EXERCISES:

- The continuous assessment is done based on components such as role play, presentation, active classroom participation, Web 2.0 based assignments related content

SPREADSHEET FOR MANAGERS

COURSE CODE: MBAH019

OBJECTIVES

- To familiarize students with the information needs of management.
- To introduce concepts and methods of data analysis
- To provide hands-on training in statistical data analysis using MS-Excel
- You will learn data analysis using MS Excel and gain proficiency in Excel's interface, data entry, formatting, data analysis, tables, data tools, and lookup functions.

METHODOLOGY

The course will primarily use problem-solving through MS Excel, supplemented by lectures and case discussions. Students will undertake a project on a topic of their choice and apply the course concepts to their project as their evaluation submission.

UNIT I: Introduction to MS-Excel

- MS-Excel Interface: Tabs and Ribbons, Document Windows, Navigation Tips, Office Button, and Save
- Multiple ways of Entering Data: Fonts, Fills, and Alignment, Cut, Copy, and Paste, Paste Special, Undo and Redo, Moving, Finding, and Replacing a Value, Cell Styles, Comments
- Formatting Numbers: Currency Format, Format Painter, Formatting Dates, Custom and Special Formats
- Managing Worksheets: Naming and Moving Worksheets, Copying Worksheets, Adding, Deleting, and Hiding Worksheets, Grouping Worksheets, Moving, Copying, Deleting, and Hiding Grouped Worksheets

UNIT II: Data Analysis Techniques in MS-Excel

- Modifying Rows and Columns: Inserting and Deleting Columns and Rows, Inserting and Deleting Cells, Inserting Multiple Columns and Rows, Modifying Cell Width and Height, Hiding and Unhiding Rows and Columns
- Understanding Formulas: Using Operations, Creating Formulas, AutoSum, Common Formulas, Searching for Formulas, Copying Formulas, Using Relative and Absolute References
- AutoFill and Custom Lists: AutoFill a Series, AutoFill Non-Adjacent Cells, AutoFill on Multiple Sheets, Creating Custom Lists, Series Formatting
- Conditional Formatting: Highlight Cell Rules, Top/Bottom Rules, Data Bars, Color Scales, Custom Formatting Rule

UNIT III: Advanced Data Analysis Techniques in MS-Excel

- Tables: Insert a Table and Style Options, Add Rows and Columns, Perform a Function in a Table, Summarize with Pivot Table
- Data Tools: Data Validation, Drop-Down Lists, Removing Duplicates, Text to

Columns, Goal Seek, Scenario Manager

- Referencing Formulas: Multiple Sheet References, Consolidating Data, With or Without Links, Trace the Precedents and Dependents, Using the Watch Window
- Ranges and Dates: Cell Names, Named Ranges, Formulas with Cell Names, Date Formulas
- Lookups: VLOOKUP, VLOOKUP Exact Match, HLOOKUP, HLOOKUP Exact Match

Mode of Evaluation:

- Continuous Internal Assessments through exercises

PERSONALITY DEVELOPMENT WORKSHOP

COURSE CODE: MBAH019A

Duration and Mode of Evaluation:

- Number Credits :2 Credit
- Number of Contact hours :30 Hours [30 Sessions]
- Maximum Marks :50
- Evaluation: Continuous Internal Assessment based on exercises

Learning Objectives:

- Developing Favorable and balanced personality
- Understand Self, Identify potentials and limitations
- Building Self-esteem and Attitude
- Set the goals and Manage Emotions
- Understanding importance of Positive thinking and decision making
- Cultivate Interpersonal skills and manage conflicts for successful life.

Methodology

- The methodology is predominantly by Activity based learning and incidental exercises that includes, Conceptual Discussion, Case study, Role play, Management Games, In-Basket exercise, Individual and Group presentation, Web-assisted instructions and tests and Guest lectures.

UNIT I: Self Development and Management

Understanding the Self: Anatomy of the self-the mind-the intellect, Personality, The sub-conscious mind-Consciousness- States of awareness-Innate. Self-Evaluation, SWOT Analysis, Recognition of one's own limits and deficiencies, managing self – emotions, ego, pride, Building Self-Esteem, Self-Confidence and Self-Efficacy, Locus of Control, Setting Goals, Attitude (Positive and Negative Attitude).

UNIT II: Emotional Intelligence, Mindfulness, Positive thinking

Emotional Intelligence: Meaning, components, developing EI. Mindfulness: Meaning, Principles of Mindfulness, Models and frameworks for mindfulness practices. Developing thought pattern: The power and effects of thoughts, Principles of positive thinking- Benefits of positive thinking, changing mind set- Steps to change cycle of thinking. Decision making: The key decisions, Group decision making, General aids and tips for improving decisions making.

UNIT III: Interpersonal Skill Development

Communication: Verbal, Non-Verbal, Para-Verbal, Listening-It's Importance, Good & Bad Listening, Body Language, Empathy, Mutuality, Trust, Emotional Bonding. Managing interferences- Perceptual Challenges, Interpersonal Transactions, Tips for

Improving interpersonal relationship, Assertiveness and negotiation skills, Conflict Management

FINANCIAL MANAGEMENT

COURSE CODE: MBAH020

OBJECTIVES:

- To know the various concept and sources of finance.
- To understand the various uses of finance.
- To familiarize oneself with the techniques used in financial management.

METHODOLOGY:

- Assignment
- Test after completion of each UNIT
- Class room lectures for all UNIT s
- To solve problem self-made with all features will be used
- Importance should be given for solving problems in each UNIT.

UNIT I: FINANCIAL MANAGEMENT

Importance of Finance; Meaning of Business Finance; Meaning of Financial Management; Objectives of Financial Management; Scope of Financial management, Role of Financial Manager in the Changing Scenario; Method of Financial Management; Organization of the Finance Function; Importance of Financial Management. Tools of Financial Management and Financial Forecasting, Financial Statement, Analysis and Interpretation; Practical Problems.

UNIT II: FINANCIAL PLANNING

Meaning of Financial Planning; Pattern of Financing; Source of Finance; Security Financing; Convertible Debentures; Internal Financing; Loan Financing; Public Deposits; Bridge Financing; Loan Syndication, & Finance Decision, Leverage; Types of Leverage; Significance of Operating Leverage, Financial Leverage and Composite Leverage; Practical Problems

UNIT III: CAPITAL STRUCTURE

Meaning of Capital Structure; Capital Structure and Financial Structure; Pattern of Capital Structure; Optimum Capital Structure; Capital Structure Theories, Determination of Capital Structure; Financial Break Even Point and EPS Analysis, Capital Gearing and Trading on Equity, Cost of Capital, Importance of Cost of Capital; Classification of Cost of Capital; Determination of Cost of Capital, Capital Assets Pricing Model (CAPM) and Weighted Average Cost of Capital (WACC), Practical Problems.

UNIT - IV: WORKING CAPITAL MANAGEMENT

Concept of Working Capital Management; Need for Working Capital; Types of Working Capital; Management of Working Capital, Projection of Working Capital, Conservative Asset Policy, Aggressive Asset Policy, Risk Return Trade Off, Source of Working

Capital; Management of Cash, Tools of Cash Management, Cash budget, Playing on Float, Lock Box System; Management of Inventory, Tools of Inventory Management, ABC Analysis, VED Analysis, EOQ Analysis, Perpetual Inventory System, Different Stock Level and Management of Receivable and Factoring Management; Practical Problems

UNIT V: CAPITAL BUDGETING

Concept of Capital Budgeting, Importance of Capital Budgeting, Characteristic of Capital Budgeting Decisions; Limitations of Capital Budgeting Decisions;

Capital Budgeting Process; Capital Rationing. Capital Budgeting Techniques- Accounting Rate of Return- ARR Method of Evaluation & Its Analysis; Payback Method of Evaluation & Its Analysis; Internal Rate of Return- IRR Method of Evaluation & Its Analysis; Net Present Value- NPV Method of Evaluation & Its Analysis; Profitability Index- PI Method of Evaluation & Its Analysis, Dividend, Bonus, Right Shares, Theories of Dividend, Types of Dividend, Determination of Dividend, Inflation; Inflation Accounting; Capital Market and Money Market, Practical Problems.

Course Outcomes:

CO1: Define the term “Finance & Business Finance”, Describe objectives, scope, importance & methods of Financial Management, recognize the organization of Finance Function and the role of Financial Manager in Changing Scenario, demonstrates and apply the tools of Financial Management in analyzing and Interpreting Financial Statements.

CO2: Demonstrates the term “Financial Planning”, recognize the pattern of financing and sources of Finance, generalize the concepts such as Security Financing, Convertible Debentures, Internal Financing, Loan Financing, Public Deposits, Bridge Financing, Loan Syndication and Finance Decision, classify the types of leverages and compute the problems related to Operating, Financial and Operating Leverage.

CO3: Describe Capital Structure, Distinguish Capital Structure from Financial Structure, summarize Capital Structure Theories and apply it in determining capital structure of a Firm

CO4: Define the Term “Inventory Management”, apply its tools and technique to determine average inventory utilized and required (It includes EOQ Analysis, ABC Analysis, VED analysis etc.

CO5: Recognize and describe the concept of Capital Budgeting, Classify and apply tools and techniques of Capital Budgeting such as ARR (Payback Period Method, NPV (Net Present Value Method, ARR (Accounting Rate of Return, IRR).

MARKETING MANAGEMENT

COURSE CODE: MBAH021

OBJECTIVES:

- This is an introductory course that will help the learners acquire the vocabulary of Marketing, understand how marketing strategies are shaped and stimulate the learner to take up Marketing as a career or apply the learning to careers in other functional areas.

METHODS

- Lectures for conceptual understanding, live cases, class discussions, reading and sharing of marketing related articles, experiential exercises.
- Live Cases of existing companies and brands will form a part of the entire learning process for understanding how marketing principles are applied in the local and global contexts

SYLLABUS

UNIT I: Understanding marketing and the marketing process

The importance and scope of marketing Evolution of marketing: From transaction-based to relationship marketing Fundamental marketing concepts Marketing and customer value - The marketing environment (macro and micro), ethics and social responsibility Marketing management process

Experiential Exercise: Identify a product and company and the environmental forces shaping marketing strategies

UNIT II: Marketing planning, information and strategy

Strategic planning and the marketing process; Developing marketing plans Marketing research and Decision support systems Understanding consumer behaviour – marketing implications Market Segmentation, Targeting and Positioning Competitive strategies

Experiential Exercise: Take up a multi-product conglomerate and study the STP for their brands in various markets. Learn how to make a Marketing Plan.

UNIT III: Developing the marketing mix: Product and Price

Product classifications, Product Mix Product management decisions, Product Life Cycle Strategies New Product Development Pricing considerations and approaches (cost-based, buyer based and competition-based), pricing strategies

Experiential Exercise: Introduce a hypothetical new product/service adding to the existing product portfolio of a company and apply the principles of product policy and pricing

UNIT IV: Developing the marketing mix: Place and Promotion

Distribution channels and physical distribution – channel design decisions, channel

management decisions Retailing and wholesaling – Retail classification, retailer marketing decisions, wholesaler marketing decisions Integrated marketing communication and promotion strategy, Promotion mix

Experiential Exercise: Continue the exercise as above and apply the principles of channel design and promotion mix decisions.

UNIT V: Marketing applied

Introduction to and the basic concepts of Industrial marketing, Services marketing, Rural marketing, international marketing, marketing for non-profit organizations, marketing in a connected world

Experiential Exercises and Live Cases

Course Outcomes

CO1: Define market opportunities by analyzing customers, competitors, collaborators, context and the strength and weakness of a company

CO2: To develop effective marketing strategies to achieve organizational objectives

CO3: To design, create and to maintain the Product and pricing strategy for developing the business competencies.

CO4: To learn and decide place and promotion of Marketing practices

CO5: To apply marketing practices in varied corporate and geographic Scenarios.

NB: Latest editions of the books mentioned above are recommended.

OPERATIONS MANAGEMENT

COURSE CODE: MBAH022

OBJECTIVES

- To understand the concepts and techniques of Operations Management
- To use the above for improving the Operational Productivity of Organizations.

UNIT I

Systems Concept of Production, Types of Production System, Productivity, World Class Manufacturing. Process Planning & Design, Value Analysis/ Value Engineering, Make or Buy Decision. Capacity Planning, Forecasting: Demand Patterns, Measures of forecasting, Forecasting Models: Simple Moving Average Method, Weighted Moving Average, Simple(single) Exponential Smoothing, Linear Regression, Delphi Method.

UNIT II

Facility Location: Factors influencing Plant Location, Break Even Analysis. Plant Layout & Materials Handling: Classification of Layout, Advantages and Limitations of Process Layout, Advantages and Limitations of Product Layout, Advantages and Limitations of Group Technology Layout. Layout Design Procedures: Introduction to CRAFT, ALDEP & CORELAP, Material Handling System, UNIT Load Concept, Material Handling Principles, Classification of Materials Handling Equipment's.

Line Balancing: Concept of Mass Production system, Objective of Assembly Line Balancing, Rank Positional Weight Method.

Inventory Control: Review of Basic Models of Inventory, Quantity Discount Model, Implementation of Inventory Systems, Introduction to P & Q system of Inventory

UNIT III

Nature of Aggregate Planning Decisions, Aggregate Planning Strategies, Aggregate Planning Methods: Heuristic Method, Transportation Model for Aggregate Planning.

Material Requirement Planning: Product Structure/Bill of Materials(BOM), MRP Concept

Single Machine Scheduling: Types of Scheduling, Concept of Single Machine Scheduling, SPT Rule to Minimize Mean Flow Time, Minimizing Weighted Mean Flow Time, EDD Rule to Minimize Maximum Lateness, Flow Shop Scheduling: Introduction, Johnson's Problem, Extension of Johnson's Rule.

UNIT IV

Work Study: Method Study – Recording Techniques, Steps in Method Study, Principles of Motion Economy, Time Study.

Quality Control: Introduction, need for Controlling Quality, Definition of a Quality System, Classification of Quality Control Techniques, Control Charts, Control Charts for Variable, Control Charts for Attributes, C-Chart, Acceptance Sampling: Operating Characteristic Curve (O.C. Curve), Single Sampling Plan.

UNIT V

Maintenance Planning and Control: Maintenance Objectives, Types of Maintenance, Basic Reasons for Replacement (Need for Replacement), Group Replacement Vs Individual Replacement – Trade-off.

Reliability: Reliability Improvement, Reliability Calculations for systems in series and parallel, Just-in-Time Manufacturing: Introduction-Overview of JIT, Kanban Systems.

Course Outcomes

CO1: To prepare the students for leadership positions in the productions and service industries.

CO2: To develops skills in problem solving, project management, communication, and managing effectively in team-based work environments.

CO3: To understand the importance of an effective production and operations strategy to an organization.

CO4: To gain an understanding and appreciation of the principles and applications relevant to the planning, design, and operations of manufacturing/service firms.

CO5: To gain some ability to recognize situations in a production system environment that suggests the use of certain quantitative methods to assist in decision making on operations management and strategy.

HUMAN RESOURCES MANAGEMENT

COURSE CODE: MBAH023

OBJECTIVES:

- This subject provides the platform to the students of management to appreciate the critical managerial functions, processes and tasks of HRM in an organization.
- To become sensitive to the HR Management Processes and to adopt conceptual learning to real-life situations.
- To appreciate the methods and mechanics to bring out the best in people directing their energies towards corporate goals with personal satisfaction.
- The Class-room interaction is supplemented by Feel HRM Visits, Case Study presentation & Discussion and team-oriented sharing of knowledge inputs via c-group.

METHODOLOGY:

- Consultative and participative involving role modeling and fieldwork, case studies, role-plays, simulation exercises, group discussions and structured and unstructured group work. Eminent competent professionals from HR and other industrial realms will interact with the students besides the faculty.

UNIT I

INTRODUCTION TO HUMAN RESOURCES MANAGEMENT: Context and Concept of People Management– Organization and Functions of the HR– HR Structure and Strategy; Role of Government and Personnel Environment including that of MNCs.

UNIT II

HR PLANNING AND SELECTION: Human Resource Information System (HRIS), Manpower Planning – Selection System including Induction – Performance and Potential Appraisal; Coaching and Mentoring; HRM issues and practices in the context of Outsourcing as a strategy and MNCs.

UNIT III

PERSONNEL DEVELOPMENT AND RETIREMENT: Training and Development – Methods, Design & Evaluation of T & D Programs; Career Development – Promotions and Transfers – Retirement and Other Separation Processes.

UNIT IV

FINANCIAL COMPENSATION, PRODUCTIVITY AND MORALE: - Principal Compensation Issues & Management – Job Evaluation – Productivity, Employee Morale and Motivation; Stress Management and Quality of Work Life.

UNIT V

CURRENT ISSUES AND TRENDS IN HRM: Creating Safer Workplaces, Diversity

Management, Management of Multi-Generational workforce, Understanding International Human Resource Management, Hybrid workplace management, E-HRM, Green HRM, Workforce Analytics to improve business outcomes.

Course Outcomes

CO1: Define the meaning and definition of Human resource management context and concept of people management in system perspective and classify the functions of HR and personnel department- HR structure and strategy and by finding the role of Government and personnel environment including that of MNC's

CO2: Demonstrate the Human resource information system HRIS, manpower planning- Selection systems including induction system Explain performance appraisal and potential appraisal, coaching and mentoring. Illustrate the HRM issues and practices in the context of outsourcing as a strategy and MNC's

CO3: Describe the training and development- methods, Design and evaluation of training and development Programmes Summarize career development- Promotions and transfers- Personnel empowerment including delegation- Classify the Retirement and other separation processes.

CO4: Measure principal Compensation issues and management - Job evaluation- Productivity_ Identify employee morale and motivation, Stress management and develop the strategies Quality of work life.

CO5: Recognize and describe the concepts of trade unions- Managing conflicts- disciplinary process- Collective bargaining - Measure the workers and management decision making- A discussion on Concept, Mechanics and experience.

RESEARCH METHODOLOGY

COURSE CODE: MBAH025

[3 credit paper]

OBJECTIVES

- To enable the students to know about the information needs of Management.
- To introduce the concept of Scientific Research and the methods of conducting Scientific Enquiry.
- To enable them to conduct a Business Research Study and prepare the report.

METHODOLOGY

- The methodology is predominantly by lecture mode and case discussion, complemented with a mini-project work. The students have to undertake a project work in a topic of their interest and product, whereby apply the concepts studied in the course.

UNIT I

Research – Meaning – importance and definition, Research in business, manager's role revisited, role of research, measures of a good research.

Research process – the manager-researcher relationship, defining research problem and formulation of hypothesis, feasibility study and research proposal

UNIT II

Research Design – types of research design-exploratory, descriptive and experimental studies. The sources and collection of data – primary and secondary data sources- Sampling design – sampling procedures, types of sampling plans, sample size determination, common sources of error in sampling and data collection

UNIT III

Attitudinal measurements and scales - Basic methods of collecting data – survey methods, personal interviewing, telephone interviewing and self-administered surveys, instruments for respondent communication – Questionnaire design.

UNIT IV

Analysis and interpretation of data: editing, coding and analysis of collected data- an Introduction-Univariate [T-tests Z-Tests] / Bivariate [Correlation-Regression-Chi Square, ANOVA]/ Multivariate Data analysis [Factor Analysis- Cluster Analysis-Multiple Regression-Discriminate Analysis, - Conjoint Analysis]

UNIT IV

Presenting results, – written and oral reports – technical report, survey-based report research report Criteria-Application of research in functional areas of business- Guidelines for reviewing draft, Report format – Typing instructions, oral presentation

Course Outcomes:

CO1: Understand the Concepts of Research, research problems and explain the research process

CO2: Outline the Various types of scale, Basics statistical measures& Probability

CO3: To learn the meaning of Hypothesis, non-parametric tests

CO4: To learn about the Multivariate Analysis- ANOVA and discriminate Analysis

CO5: To learn about the various types of reports, reports formatting - Typing Instructions-Oral Presentations

MANAGEMENT INFORMATION SYSTEMS

COURSE CODE: MBAH026

OBJECTIVES:

- To introduce the concepts of different business system
- To focus on different components of information systems and to plan, design and develop such systems

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study
- Assignments, test. Subject quiz, Factory visit and field study
- seminar, Game, Subject Video presentation
- Illustrative exercise

UNIT I

Foundations of Information Systems in Business: Foundation Concepts: Information Systems in Business – Foundation Concepts: The Components of Information Systems
Competing with Information Technology: Fundamentals of Strategic Advantage – Using Information Technology for Strategic Advantage.

UNIT II

Telecommunications and Networks: The Networked Enterprise Telecommunications
Network Alternatives
Electronic Business Systems: e-Business Systems – Functional Business Systems

UNIT III

Electronic Commerce Systems: Electronic Commerce Fundamentals – e-commerce
Applications and Issues
Enterprise Business Systems: Getting All the Geese Lined Up: Managing at the Enterprise
Level – Enterprise Resource Planning: The Business Backbone

UNIT IV

Decision Support Systems: Decision Support in Business – Artificial Intelligence
Technologies in Business
Developing Business/IT strategies: Planning Fundamentals – Implementation Challenges

UNIT V

Developing Business/IT Solutions: Developing Business Systems – Implementing
Business
Security and Ethical Challenges: Security, Ethical, and Societal Challenges of IT –
Security Management of Information Technology
Enterprise and Global Management of Information Technology – Management of
Information Technology – Managing Global IT

Course Outcomes:

CO1: Student can understand the foundation of information system in business with competitive with information technology

CO2: Students understand about the various types of telecommunication networks and E business systems

CO3: Students learned about the E commerce systems and E business functional systems

CO4: Students have learned about the decision support systems and IT strategies

CO5: Students learn about developing business/ IT, security and ethical challenges in IT

ILLUSTRATIVE EXERCISES:

1. Develop an original case for a MIS project in a government organization.
2. Develop an original case for a MIS project in a financial organization
3. Develop an original case for a MIS project in a hospital.
4. Develop an original case for a MIS project in an educational institution.
5. Develop an original case for a MIS project in a company manufacturing any product
6. Develop an original case for a MIS project in a hotel
7. Develop an original case for a MIS project in retail industry
8. Develop an original case for a MIS project in Telecommunication Industry

SELLING & NEGOTIATION SKILLS WORKSHOP

COURSE CODE: MBAH027

OBJECTIVES:

- To appreciate the importance of persuasive communication in different professional and organizational contexts, and its process and principles
- To enhance salesmanship in non-sales roles to generate greater buy-in among different stakeholders
- To understand the principles and process of negotiation and conflict resolution in the professional and business context

METHODOLOGY:

- Entirely experiential learning -based course. Briefings, case discussions, story-telling, role-plays, business and social media content discussions

UNIT I: PERSUASIVE COMMUNICATION

Principles of persuasion – reciprocity, commitment or consistency, consensus or social proof, authority, liking, scarcity and UNIT y

Patterns of persuasion – Steps in in-direct pattern of persuasion – Use of attention builders, interest creators, resistance reducers and action motivators

Communicating negative news – Importance of getting a buy-in and goals in communicating negative news – 4-step communication process for different organizational contexts

UNIT II: SALESMANSHIP AND SELLING SKILLS

Selling as a professional skill to generate buy-in – Selling as a systematic, micro-process to define the approach and organize the content

Organizing the ‘sales pitch’ for non-sales roles in different professional and organizational contexts

Approaches to objection handling and to close the deal; utility of ‘trial close’

UNIT III: NEGOTIATION SKILLS

Types of negotiation – distributive and integrative, deal-making and dispute settlement

Components of negotiation – Strategy, process and behavior – Concepts of BATNA, ZOPA and Negotiator’s dilemma; Cognitive bias and common mistakes in negotiation

Conflict resolution styles – Accommodation, Collaboration, Compromise, Avoidance and Competition

Cross-cultural negotiation – Impact of cultural factors on negotiation

Course Outcomes:

CO1: The students would have understood the Personal Selling process – the attributes of a good salesperson, knowledge, skill and attitude and the psychology of persuasion.

CO2: The students would have learnt to prepare the sales pitch, the steps in personal selling –

the opening, need & problem identification, presentation and demonstration, objections handling, closing the sale, follow up and after-sales service.

CO3: The students would have understood about the Phases of Negotiation and Conflict Resolution skills.

ILLUSTRATIVE EXERCISES:

- The continuous assessment is done based on components such as role play, presentations, active classroom participation, Web 2.0-based assignments

OPERATIONS RESEARCH LAB (Using Software)

COURSE CODE: MBAH029

OBJECTIVES:

- To introduce various optimization techniques of operations research
- To apply Optimization Techniques and interpret solutions using software
- To facilitate the use of Quantitative Technique in various functional areas

METHODOLOGY

- The methodology is predominantly by Problem Solving, case analysis complemented with lecture.

UNIT I

Stages of Development of Operations Research, Applications of Operations Research, Limitations of Operations, Introduction to Linear Programming, Graphical Method, Simplex Method, Duality and Sensitivity Analysis-Transportation Problem, Assignment Problem- Project Management-CPM/PERT, Crashing of a Project network.

UNIT II

Inventory Control – Introduction to Inventory Management, Basic Deterministic Models, Purchase Models, Manufacturing Models without Shortages and with Shortages. Dynamic Programming, Capital Budgeting Problem, Shortest Path Problem, Reliability Problem, Optimal subdividing Problems-Markov Analysis

UNIT III

Game Theory: Two Person Zero-sum Games, Graphical Solution of $(2 \times n)$ and $(m \times 2)$ Games

Introduction to Queuing Theory, Basic Waiting Line Models: $(M/M/1) : (GD/\alpha/\alpha)$, $(M/M/1) : (GD/N/\alpha)$, $(M/M/C) : (GD/\alpha/\alpha)$, $(M/M/C) : (GD/N/\alpha)$, Introduction to queuing system simulation – Introduction to Basic Replacement Analysis: Economic Life of an Asset.

ILLUSTRATIVE EXERCISE:

- The Internal mark is awarded based on the components.

CAREER DEVELOPMENT WORKSHOP

COURSE CODE: MBAH029A

Duration and Mode of Evaluation:

- Number Credits :2 Credit
- Number of Contact hours :30 Hours [30 Sessions]
- Maximum Marks :50
- Evaluation: Continuous Internal Assessment based on exercises

Learning Objectives:

- Understand Career development theories
- Acquaint with the major career assessment instruments and techniques.
- Identify the major sources of career, occupational information and develop a career plan.
- Understanding career development programs.
- Engage in thoughtful academic, extracurricular, career and lifelong planning.
- Evaluate potential effects of career choices
- Implement appropriate resume writing
- Develop interview skills and Etiquette

Methodology:

- The methodology is predominantly by Activity based learning and incidental exercises that includes Self-Study, Web-based Presentation, Forum Participation, Class Reflection, Assignment on Self-Assessment, Collaborative and Crossover Learning.

UNIT I: Career planning and development

Career Planning, Career Planning Process, Career Development: Theories and models of career development, Portfolio (CPCP) and Key Assessment: Career Development Self-Study, Strategies for assessing abilities, interests, values, personality, identifying and using career information resources, facilitating skill development for career, assessment tools and techniques of career planning, Self-awareness and self-assessment, Setting goals and exploring opportunities and self-interests, Strong Interest Inventory (SII) assessment

UNIT II: Developing Professional Resume

An Introduction to the Resume, define resume and its purpose, types of resumes, key components of resume, Gathering Information, Preparing Resume, draft a resume for presentation, writing a cover letter, resumes in the Digital Age, Enhancing Your Professional Resume.

UNIT III: Interview Skills and Business Etiquette

Interview Preparation, Types of interviews, Pre- Interview, During Interview, Post-Interview: Attitude & Effort, Body Language, Common Interview Questions, Closing the Interview & Follow-Ups. Essentials of Business Etiquette, Strategies for Building a Professional Image.

INDUSTRY INTERFACE PROGRAM-1

COURSE CODE: MBAH029B

[2-Credit Paper- Workshop Mode]

OBJECTIVES

- To enable the students to know about basic concept of Management
- To understand about real-world business through interaction and direct visiting.

METHODOLOGY

- The methodology is predominantly through lecture series from eminent persons. A workshop by field visits to various industries. Learning will be assessed through management events.

UNIT I

Expert Lectures Series - Industry, NGOs and Government Organisations experts giving fundamental and practical trends in Management

UNIT II

Industrial Visits – field study by visiting various industries, observing and understanding concepts of management by interacting directly

UNIT III

Synergy– Man Meet event – a platform where learning through management events and panel discussion.

SEMESTER - III

SEMESTER III

LIST OF CORE PAPERS

Title of the Paper	Code
STRATEGIC MANAGEMENT	MBAH031
PROJECT MANAGEMENT	MBAH032
QUALITY MANAGEMENT	MBAH033
MANAGEMENT CONTROL SYSTEMS	MBAH034
FUNCTIONAL ELECTIVES (4)	
MAJOR PROJECT	MBAH035

STRATEGIC MANAGEMENT

COURSE CODE: MBAH031

OBJECTIVE:

- To enable the students to apply the strategies studied in the foundation and fundamental courses, its specific strategic knowledge in different functional areas.
- This paper will enable the students to create, execute and evaluate different strategies in their everyday life as managers.

METHODOLOGY:

- Students belonging to different functional areas form into groups, identify different organizations and study their strategies in depth and try to identify different strategies for the betterment of the organizations they chose.

UNIT I

Strategic management – definition, need, dimensions – strategic planning – strategic decision-making process – benefit and risks of strategic management – ethics and social responsibility.

UNIT II

Strategic management process – vision of the company – business vision models – objectives and goals. Business policies and strategies.

UNIT III

Environmental scanning and analysis – types: international, external, internal – characteristics – SWOT – approaches of the environmental scanning.

UNIT IV

Generic competitive strategies – integration strategies – outsourcing strategies – offensive and defensive strategies – strategic alliances and collaborative partnerships – merger and acquisition – diversifications – tailoring strategies to fit specific industry and company situations.

UNIT V

Building resource strengths and organizational capabilities – frame work for executing strategy – strategy execution process – organizational structure – managing internal operations corporate culture of leadership – designing strategic control system, key success factors – monitoring success and evaluating deviation.

Course Outcomes:

CO1: Describe about Strategic Planning, Strategic Decision Making & Corporate Social Responsibility of Business with the thorough understanding in the basic concepts, need, dimensions and benefits of Strategy.

CO2: Describe the Strategic Management Process steps and elements of Strategic Intent. Illustrate Business vision models, distinguish between objectives & goals and interpret Business Policies & Strategies.

CO3: Point out the international, external & internal characteristics of business, critically scan and analyze the environment factors affecting business by using various scanning approaches and appropriate Tools and Techniques.

CO4: Demonstrate their proficiency by critically assessing a wide range of strategic concepts including generic competitive strategies, integration strategies, offensive and defensive maneuvers, strategic alliances, mergers and acquisitions and diversification strategies. Appraise how the strategies can be tailored to suit specific industry and company circumstances.

CO5: Formulate the framework for executing the chosen strategy and implementing it effectively using behavioral and structural dimensions with leadership qualities. Design a suitable strategic control system with key success factors; monitor success; evaluate it and take corrective action in case of deviation occurs.

ILLUSTRATIVE EXERCISE:

- Choose a specific organization, study their strategies, critically analyse the performance and prepare a report.

PROJECT MANAGEMENT

COURSE CODE: MBAH032

LEARNING OBJECTIVES

- To appreciate the concepts of project management
- To prepare business proposals and
- To evaluate the projects using PM tools.
- To be effective as project managers and team members.
- To prepare students to acquire globally accredited certifications on PM.

METHODOLOGY FOR COVERING SYLLABUS

- Class room teaching
- B-Plan Assignment and its presentation by students.
- Case Studies of real projects
- Role plays of major projects focusing on project issues.
- Problems for network analysis and evaluation of projects financially

UNIT I: Project Management Framework

Project Management: Basic Concepts - Understanding Projects, Project Management, Project Lifecycle and Project Management Knowledge Areas - Triangular Relationship: Project, Program, and Portfolio - Project Environment: Identifying Environmental Factors and Process Assets - Understanding Organizational Structures and Organizational Culture - Introducing the Project Stakeholders - Technical Project Management Skills: Strategic and Business Management Skills, Leadership Skills, Three Skills: Negotiation, Influencing and Problem Solving - Project Integration Management: Developing Charter and Plan - directing, managing, monitoring and controlling project work, project closure.

UNIT II: Project Scope and Resources

Project Scope Management: Developing the Project Scope Management Plan - Tools and Techniques for Collecting Requirements - Defining the Project Scope - Input and Output of Scope Definition - Creating a Work Breakdown Structure (WBS) - Controlling Scope - Validating the Scope of Project Deliverables - Project Resource Management: Developing the Resource Plan - Tools and Techniques - The Resource Management Plan - Estimating Activity Resources - Acquiring Project Resources - Developing the Project Team and its process - Managing and motivating the Project Team - Controlling Project Resources.

UNIT III: Project Schedule, Cost and Evaluation

Project Schedule Management: Developing the project network – constructing a project network (Problems) – PERT – CPM – crashing of project network – resource levelling and resource allocation - Project Cost Management: Developing Cost Management Plan - Project Evaluation: Under certainty: Net Present Value, Benefit Cost Ratio, Internal Rate of Return, Payback Period, ARR – Theoretical Framework for Project Evaluation

under Risk and Uncertainty: Risk Adjusted Rate Method, Certainty Equivalent Method, Probability Method, Sensitivity Analysis and Decision Tree Analysis.

UNIT IV: Project Cost, Stakeholders, and Communication

Project Cost Management: Developing Cost Management Plan - Estimating Project Costs - Determining Project Budget - Controlling Costs - Performance Measurement Analysis for Cost Control - The Triple Constraint : Scope, Schedule, and Cost - Project Stakeholder Management: Identifying the Project Stakeholders – Planning, managing and monitoring Stakeholder Engagement - Project Communication Management: Project Communication Process, Tools and Techniques - Tools and Techniques for Managing Communication.

UNIT V: Project Quality, Risk, and Procurement

Project Quality Management: Planning Quality Management - Tools and Techniques Used for Quality Planning - Managing and Controlling Quality - Tools and Techniques for Quality Control - Project Risk Management: Planning and Developing the Risk Management Plan - Identifying - Analyzing Risks (Qualitative and Quantitative) - Risk Response Plan - Tools and Techniques - Implementing Risk Responses - Monitoring Risks - Project Procurement Management : Procuring the Project Resources - Procurement Planning, methods and management – Conducting and controlling procurements.

Course Outcomes:

CO1: Thorough with the basic concepts and steps of project management

CO2: Outline in detail about feasibility studies and managing resources from project planning to project completion

CO3: Apply the theories of project evaluation under certainty and uncertainty and to solve problems relevant to net present value, Payback period, Internal Rate of Return.

CO4: Illustrate the problems related to developing the project network and apply the theories of project control process

CO5: Identify the qualities of project managers and the stages of team development.

QUALITY MANAGEMENT

COURSE CODE: MBAH033

OBJECTIVES:

- To recognize the importance of Quality Management
- To have comprehensive knowledge of quality management
- To study the tools and techniques which are needed for enhancing quality.

UNIT I

Stages of quality control, History of quality, Quality management and its importance, Contributions of quality gurus, Impact of quality on business performance, Distinction between product quality and service quality, Desirable qualities of a leader, Leadership grid, Quality information system, Strategy development and deployment, need for quality approach to strategy, Quality and its types, Supporting policies

UNIT II

Functions of human resource management (HRM), recruitment and selection, Training Methods, quality circles- Steps of quality circle meetings, Implementation of quality circle, Rewards and recognition, Customer Focus - Customer focus Vs Process focus, Internal customers and management, Quality edge, Factors affecting customer satisfaction, Role of marketing for customer satisfaction, Importance of customer retention, Impact of Customer Retention on Profitability, Steps of developing customer focus

UNIT III

Process and Statistical Quality Control- quality system, Process Capability – Concepts and indices -control chart for variables (X and R) and (X and S charts), control charts for attributes (p, c and u charts), Quality function deployment, Six Sigma - elements of six sigma, DMAIC Methodology, DMADV Methodology, six sigma technical tools, Benchmarking - types of benchmarking, stages of benchmarking process, Cost of quality- Activity based costing, Introduction to Shainin techniques, Business performance management - performance measures and their importance, balanced score card, quality control activities during product cycle and balanced score card

UNIT IV

Total productive maintenance - objectives of TPM, performance measures of maintenance system, pillars of TPM, stages of implementation of TPM, reliability, Failure modes and effects analysis (FMEA), Analysis of Variance (ANOVA) - complete factorial experiment with three factors, Orthogonal arrays - design of orthogonal arrays, ANOVA for orthogonal array with two-level factors, ISO 9000 series and ISO 9000:2000.

UNIT V

Malcolm Baldrige National Quality Award - Baldrige criteria, criteria of Baldrige award

for performance excellence, steps of effective Baldrige assessment, Business process reengineering- steps of business process reengineering, measures of performance of BPR, applications of BPR, Building and sustaining total quality - role of quality professionals for quality organization, relevance of organizational culture to quality management, cultural change, employees role in cultural change, Sustaining quality organization - steps to Sustain Quality Organization, Quality Organization Sustenance Tools

Course Outcomes:

CO1: To recall conceptual frame work of quality, contribution of quality guru, service quality, quality information system and supporting policies.

CO2: To demonstrate the functions of quality circle and customer focus.

CO3: To apply statistical quality control, benchmarking, business performance management to assure quality and ensure quality control

CO4: To apply TPM, FMEA, ANOVA in the process of quality assurance

CO5: To recall the criteria of MALCOM BALDRIDE award and comprehend implementation of Business Process Reengineering.

MANAGEMENT CONTROL SYSTEMS

COURSE CODE: MBAH034

Course Objectives:

- The main aim of the course is to appraise the students about the newer paradigms of management control systems and its role in efficiently managing public and private sector organisations in various functional areas.

METHODOLOGY:

- Classroom lectures for all UNITS;
- Problem in the course will be solved in the classroom;
- More emphasis will be given on working with case studies and discussions in the class.

Illustrative Exercises:

- Students would be required to take private and public sector undertakings and come out with a study on the best control practices exercised by them in respect of Finance, Marketing, HR and Operations.

Internal Assessment:

- Students will be required to appear for pre-announced tests and surprise class tests;
- Students will be required to prepare for presentation on topics assigned to them and make a presentation on the same;
- Finally, students will be required to make a presentation about the good control practices exercised by the firms in respect of the functional areas of Finance, HR, Marketing and Operations.

Syllabus:

UNIT I: The Newer Paradigms of Management control systems

Definition, Meaning, nature and purpose of Management Control Systems-four paradigms of control-four levels of control-Twelve commandments of control design-management, administration and organisation-organisational structure-management control structure-Management control process-strategic planning-organisational goals-organisational climate-Six sources of tensions in control systems-Span of control and determination of span of control-MBO; MBE; SBU-360 Degree Technique-SWOT analysis-Delegations and decentralisations-new peoples management (NPM)-social responsibility-conflict management-mutual supportive management systems.

UNIT II: Traditional instruments of control in organisations

Definition of audit-Types of audit-External audit, Internal audit, Internal controls, Operational audit, Social audit, Statutory audit, marketing audit, distribution audit, Cost audit, Special audit, Efficiency audit, proprietary audit, compliance audit, energy audit,

Government audit- Management audit, Procedure for introduction of management audit, uses of management audit- Environmental accounting and Green accounting- Multiple role of an auditor- Difference between auditing and investigation.

UNIT III: Accountability and Responsibility in organisations

Responsibility Accounting-Concept of responsibility centre, cost centre, profit centre, investment centre- ABC costing- Transfer prices- Budgetary control-flexible budget, zero base budget, performance budgeting, master budget- control ratios- performance report-analysis of variance (standard costing control)- Financial statement and control- CVP Analysis- Sensitivity analysis (what if analysis).

UNIT IV: The Newer dimensions of control

Behavioural aspect of management control-motivations, quality of work life, morale, participatory management; learning curves- HR accounting- knowledge management control- risk management- replacement technique- controls for different situations-measuring performance to match strategy- Balanced score cards.

UNIT V: Management control in specialised organisations (Public utility)

- Sectorial applications-
- controlling banking sector-the balance sheet concept, the concept of schedule of advances for bankers-
- controlling insurance sector- controlling non-profit organisations- controlling public service organisations- Control mechanism used on subsidiary companies; controlling public utility service providers; controlling co-operative business.

Course Outcomes:

CO1: Understand the Meaning, Nature and purpose of control systems. The new paradigms of Management Control Systems, four elements of control, organizational structure, organizational goals, organizational climate, strategic planning. Explaining the concepts of balancing the four levers of control, balancing the tensions in control systems, six sources of tensions in control systems, opportunities and limitations of the span of control, key control variables, delegation and decentralization, mutual supportive management systems

CO2: Discuss about External audit, internal controls, internal audit, role of financial controllers, multiple roles of an auditor, management control process. An outline about budgetary control, flexible budget, zero base budget, performance budgeting, master budget, analysis of variance, accounting aspect of control is explained to the students. Students are explained about the topics like management audit, marketing and distribution control, different types of audits.

CO3: Describe about the concept of responsibility centre, management control structure, responsibility accounting, explaining the concepts of cost centre, profit centre, investment centre, ABC costing, transfer prices, CVP analysis, process control.

CO4: Reciprocate the Behavioral aspect of management control, motivations, morale, participative management, learning curves, HR accounting, knowledge management control, management

control with reference to risk management to different students. To discriminate the controls for different situations, measuring performance to match strategy, balanced score cards

Explain the concepts of Sectoral applications, controlling the financial sector, the banking sector, the balance sheet concept, the concept of schedule of advances, the use of ABC costing standard.

CO5: Describing the insurance, system of insurance accounts, non-profit organizations, legal environment of non-profit organization, public service organizations, public utility accounts, holding company accounts, government and co-operative business, control in projects to students. To recognize the twelve-step process of designing controlling system.

BUSINESS ETHICS & CORPORATE GOVERNANCE	MBAH043
BUSINESS VALUATION LAB	MBAH044
FUNCTIONAL ELECTIVES (4)	
INDUSTRY INTERFACE PROGRAM - II	MBAH045

PUBLIC SYSTEMS MANAGEMENT

COURSE CODE: MBAH041

Objectives

- To bring theoretical tools and practical experience to bear on the relationship among Business, Government, and Society.
- To understand the significance of various Public Systems and their relevance with respect to the Quality, Transparency and Sustainability.
- To enhance the awareness of diverse issues affecting the governance of the nation and world at large.

Methodology

- Teaching and Learning involves multiple and varied pedagogical tools with an emphasis on interactivity, which include the following:
- Classroom Lectures, Group Discussion on selective Articles taken from Newspapers, Magazines, Journals, Online Sources, and Various Reports.
- Case Studies, Seminar Presentations, Written Assignments, Role Plays and Field Visits

UNIT I: INTRODUCTION

- Meaning, Definition, Scope and Significance of Public Systems.
- Public Policy Formation, Implementation and Evaluation.
- Centre – State Relations, Regional Disputes.

UNIT II: GOVERNANCE

- Civil services, training and development of government employees, bureaucracy, work culture of public sector employees.
- Processes and procedures of government administration, filing system, proactive versus reactive government regulation, cost benefit analysis of regulation, citizen friendly services, Plain language in government administration.
- Transparency and Accountability – Objectivity versus Subjectivity, Process versus Objectivity/Outcome based approach in decision making.
- Open Government, E-Democracy, Computerization and E-Governance,
- Leadership Issues – Significance of Ethics, Integrity and Wisdom

UNIT III: DEVELOPMENT AND REGULATION

- Inclusive growth and development, agenda and ideological issues of multi-party versus two-party system and nationalism.
- Privatization and Public-Private Partnerships: Different forms of relationship between public, private and voluntary sectors and alternative forms of institutional arrangements for service delivery to citizens.
- Networking with NGOs, private companies, other organizations and individual experts for the synergistic benefits for the citizens

- Productivity – Systemic Efficiency, Futuristic and Visionary Planning.
- Subsidies – Analysis of Career versus carrot approach of Public Welfare Schemes

UNIT IV: GRIEVANCE REDRESSAL MECHANISM:

- Awareness through multiple media channels,
- Citizen care services - Online and offline Online frauds, social media Role of Media in the society.

UNIT V: SYSTEMIC ISSUES

- Significance of systemic issues on the society, nation and world
- Corruption - Meaning, Adverse impact of corruption on societal attitude towards life.
- Types of Corruption - Systemic and Sporadic/Individual, Petty and Grand, Moral and Legal, Rumors and Reality.
- Societal Issues - Bribery, Dowry, Embezzlement, Nepotism, Patronage System
- Eradication of - Slums, Poverty, Extremism, Regionalism, Fundamentalism

Course Outcomes:

CO1: To comprehend the theoretical foundations of the evolution of the concept, the nature and scope of public systems management; and highlight the characteristics of public systems management.

CO2: To Outline the Processes and procedures of government administration, E-Democracy and Bureaucracy. Highlight the citizen friendly services and work culture of public sector employees.

CO3: To describe the impact of managerial reforms that are undertaken to enhance the efficiency of public systems management through NGO'S, public and Private partnerships.

CO4: To identify the citizen care offline and online services through the awareness of social media.

CO5: To categorize the systematic and societal issues prevailing in the nation and predict the ways of eradication.

- Small team project to understand the practical working of government in offering citizen-friendly services and submit a report as well as make presentation.

ENTREPRENEURSHIP

COURSE CODE: MBAH042

OBJECTIVES:

- Providing the knowledge base of Entrepreneurship, and
- Developing tomorrow's owners of business by providing the necessary inputs for the creation of the new ventures.

UNIT I

Entrepreneur and entrepreneurship: Characteristics, Functions, Types, Ethics and Social Responsibilities of an Entrepreneur. Entrepreneurship: Importance, Growth and Role of Entrepreneurship in Economic Development– EDPs in India and Social Entrepreneurship.

UNIT II

Small Scale Enterprise: Definition, Characteristics, Role of Small Enterprise in Economic Development, Problems of SSE, Steps involved to start SSE, Package for promotion of Small-Scale Enterprise.

UNIT III

Institutional support to small enterprise: Need, Institutional support by State and Central Government, Creativity and Innovation in Business, Creative problem-solving methods, International Entrepreneurship opportunities, SWOT Analysis.

UNIT IV

Project management: Objectives, Financial Marketing and HR Planning, Project Report Preparation. Project Appraisal: Introduction, Technical Analysis, Economic Analysis, Financial Analysis, Market Analysis and Social Cost Benefit Analysis – Environmental Clearance of Small-Scale Enterprise.

UNIT V

Women Entrepreneurship – Need – Growth of women Entrepreneurship – Problems faced by Women Entrepreneurs – Development of women Entrepreneurship – Entrepreneurship in Informal Sector – Rural Entrepreneurship – Entrepreneurship in Sectors like Agriculture, Tourism, health care, Transport and allied services.

Course Outcomes:

CO1: To know about the Characteristics, Functions, Types, Ethics and Social Responsibilities of an Entrepreneur. EDPs in India and Social Entrepreneurship.

CO2: To identify the Characteristics, Role of Small Enterprise in Economic Development, Problems of SSE, Steps involved to start SSE, Package for promotion of Small-Scale Enterprise.

CO3: To know the various schemes provided like Institutional support by State and Central Government, Creativity and Innovation in Business, Creative problem-solving methods, International Entrepreneurship opportunities, SWOT Analysis.

CO4: Project Report Preparation. Project Appraisal: Introduction, Technical Analysis, Economic Analysis, Financial Analysis, Market Analysis and Social Cost Benefit Analysis – Environmental Clearance of Small-Scale Enterprise.

CO5: Project Report Preparation. Project Appraisal: Introduction, Technical Analysis, Economic Analysis, Financial Analysis, Market Analysis and Social Cost Benefit Analysis – Environmental Clearance of Small-Scale Enterprise.

BUSINESS ETHICS AND CORPORATE GOVERNANCE

COURSE CODE: MBAH043

OBJECTIVES:

- To introduce the concept and importance of business ethics and corporate governance
- To know the facets of ethics management
- To know the ethical values and Indian ethos in Management

METHODOLOGY:

- Lectures, Group Discussion, Case Studies
- Seminar Presentations, Field works and Term projects

UNIT I: BUSINESS ETHICS:

Meaning – Definition –Scope – Ground Rules –Classification- Myths –Ethics Vs Morality-Functional Areas in Business Management: Some Ethical Issues – Business Ethics: Cross-Country Perspectives.

Case discussion, Web exercises, Field Based Activities-Visiting Organisation for Studying Ethical Issues, importance of personal and professional ethics

UNIT II: ETHICS MANAGEMENT:

Ethical Dilemma – Ethical Decision Making – Ethical Reasoning – Ethical issues – Ethics Management Programmes – Benefits of Managing Ethics in Work Place – Organisation Ethics Development System (OEDS) –Code of ethics – Guidelines for developing Comprehensive Ethics programme –Value based leadership.

Case discussion, Web exercises, Self-Awareness Exercises & Situation Analysis - Studying Ethical Dilemmas, Ethical Reasoning and Value Based Leadership in Pandemic Period

UNIT III: ETHICAL VALUES:

Values - Characteristics- Types- Importance - Work Ethics – Work Culture – Ethical Theories – Ethical Values- Professional Ethics- Environmental Ethics – Challenges of Cyber Age-Intellectual Property rights.

Video case discussion, Web exercises, Ethics Application-Group Based Activities-Making Short Videos on Real Time Ethical Issues and Developing Solution in Pandemic Period

UNIT IV: CORPORATE GOVERNANCE:

Meaning –Mechanism-Principles - Code of Corporate Governance – Audit Committee – Role of Independent Directors – Protection of Stakeholders – Corporate Social Responsibility – Changing Roles of Corporate Boards with changing times – Issues in Corporate Governance-Emerging Trends.

Video case discussion, Web exercises, Self-Awareness Exercises & Group Activities-

Corporate Social Responsibility

UNIT V: INDIAN ETHOS IN MANAGEMENT:

Principles – Approaches – Role of Gita – Karma Yoga – Wisdom Management- Gandhian Ethics-Spirituality-Humanism-Morals Standards in Indian Ethics.

Video case discussion, Web exercises, Self-Awareness Exercises and Presentation – Indian Ethos in Management

Course Outcomes:

CO1: Describe the meaning & definition of business ethics, find out the nature & importance of Business Ethics, Recognise the Ground rules, myths, list out the sources of ethics, Factors Influencing business Ethics, and Professional ethics

CO2: Demonstrate ethical dilemma, Classify the steps in ethical decision making, and explain the ethical issues, Outline the concept OEDS and generalize Organizational Culture, Recognize the tools & guidelines for developing the code of Ethics, Value Based Leadership

CO3: Identify and measure Ethical Values, develop work ethics, outline Environmental ethics, Consumer Protection

CO4: Explain the Corporate Governance, apply the Role of Audit committee, Identify the role of Board of Directors, Corporate Social Responsibility

CO5: Identify the principle & approaches of Management, Role of Gita in Management – Karma Yoga – Wisdom management - Gandhi an ethics – Spirituality – Humanism - Morale standard in Indian ethics

BUSINESS EVALUATION LAB

COURSE CODE: MBAH044

OBJECTIVES:

- To understand the macro-economic factors that affect valuation.
- To understand the various techniques of valuation.
- To enhance the skill level in financial analytics for business valuation.
- To enable to do financial projections and write valuation reporting.

Methodology:

- Teaching and Learning involves multiple and varied pedagogical tools with an emphasis on interactivity, which include the following:
- Classroom Lectures, Group Presentation and Discussion on selective Articles taken from Newspapers, Magazines, Journals, Online Sources (videos), Various Research Reports and Papers and Interactive sessions.
- Excel based calculation, Case Studies, Quiz, Viva, Report writing, Seminar Presentations and Written Assignments.

UNIT I: Introduction and Approaches to Valuation

Introduction to valuation – Principles of valuation - Intrinsic value foundation - Fundamental analysis- Economy, Industry, Company analysis, Financial Statement Analysis - Calculation of Financial Ratios - Discounted cash flows, Free Cash Flow to Equity and Free Cash Flow to Firm - Calculation of unlevered beta - Understanding role of Working capital in valuation - Concepts of valuation techniques relative valuation, Residual Income and Replacement Value - Intrinsic value vs market price - undervaluation and overvaluation, Dark side of valuation, emotions and mispricing in market, market anomalies.

UNIT II: Industry Analysis and Building Financial Models for Business Valuation

Understanding the Industry for the purpose of valuation- Reading the industry specific parameters – Analysis of ratios of various sectors - Macro economic factors affecting the industry- Market structure- Use of Porters five force model to understand industry for the purpose of valuation- Industry concentration using Herfindahl-Hirschman Index Understanding the value drivers of the industry- Understanding the key trends in the Industry - Firm valuation models - Free cash flow to firm models (FCFF Model), Excess return model, Equity valuation models- Relative valuation models (P/E Model- earnings multiples, P/B Model- book value multiples, Revenue multiples), Ohlson model, Capital asset pricing model - Reading the Company Annual Report to get key inputs for valuation- Understanding the strategies and the competitors - Understanding the business model- Revenue and cost drivers - Building the financial model from the scratch- Forecasting financial statements using Excel - Estimation of capital expenditure and working capital requirement - Projection of Free Cash Flows, Calculation of Weighted Average Cost of Capital– Selecting a terminal growth rate - Arriving at the equity value of the company

using FCFE and FCFF.

UNIT III: Application of Financial Valuation Methods and Report Writing

Review of valuation models using spreadsheet - Sensitivity analysis of the valuation model– Arriving at the range of equity value of the company – Calculating the market multiple
UNIT Other Methods of Valuation: Relative Valuation- Residual Income and Replacement Value methods of Valuation and its application in the real life - Report Writing: Investment Note writing- principles of logic and structure of the report - Use of Infographic and use of linking words in report writing - Special Cases in Valuation: Valuation of young companies, financial service firms, privately held companies, distressed companies - value enhancement strategies of firms.

Course Outcomes:

CO1: Analyze the balance sheet of the firm using excel formats

CO2: Analyze beta value of the Firm to determine Fluctuations

CO3: Perform valuation using financial comparable with excel formula

CO-PO Mapping:

	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2

INDUSTRY INTERFACE PROGRAM- 2

COURSE CODE: MBAH045

[2-Credit Paper- Workshop Mode]

OBJECTIVES

- To enable the students to know about advanced concept of Management and business
- To understand about real-world business through interaction and direct visiting.

METHODOLOGY

- The methodology is predominantly through lecture series from eminent persons. A workshop by field visits to various industries to gain practical knowledge.

UNIT I

Expert Lectures Series- Industry, NGOs and Government Organisations experts giving present and advanced scenario in all functional areas of Management.

UNIT II

Industrial Visits – field study by visiting directly to various industries, observing and understanding the functionality of management Studio

UNIT III

Synapse – Institute Industry Interface Event –a platform for interaction about present scenario in industry through panel discussions.

FINANCE ELECTIVES

ADVANCED DATA ANALYSIS

COURSE CODE: MBAS101

Objective

- The objective of this paper is to give exposure to students on various quantitative techniques used for fact-based decision making. The next objective is to give exposure on how business problems can be solved using quantitative techniques.

Methodology

- Giving importance to application of software to solve business problem.
- The students should use SPSS or SAS, Eviews and DEA software
- Preparation of record note book is a must
- The question will be on interpretation of output
- The students should collect data from CMIE database

UNIT I

Collection and editing of live data- Hypothesis based analytics- Chi-Square, t-test, paired t-test, non-parametric chi-square - Correspondence analysis – Analysis of variance, Factorial ANOVA, Repeated measures ANOVA-correlation – partial correlation

UNIT II

Predictive Analytics – Simple linear regression – Multiple linear regressions - Logistic and step wise regression, non-linear regression.

UNIT III

Multivariate Analytics – MANOVA -Factor Analysis – Cluster Analysis – Discriminant Analysis, Multidimensional Scaling, Structural Equation modeling

UNIT IV

Efficiency analysis – Data Envelope Analysis (DEA) – Corrected OLS – MOLS, DFA

UNIT V

Econometric models – ARIMA – ARCH- GARCH – Box Jenkins method of forecasting

Course Outcomes (COs)

1. **CO1:** Apply statistical and data mining techniques to analyze business data and extract meaningful insights.
2. **CO2:** Develop and implement data-driven decision-making models for business problems.
3. **CO3:** Utilize advanced data visualization techniques to communicate complex findings effectively.
4. **CO4:** Critically evaluate the quality and reliability of data for analysis.

5. **CO5:** Employ appropriate data analysis tools and software for business problem-solving.

APPLIED ECONOMETRICS

COURSE CODE: MBAS102

COURSE DESCRIPTION:

The purpose of this course is to expose students to the econometric techniques frequently used in economics, finance and business research. This course is intended to be an introduction to specification, estimation, and prediction with econometric models. The course provides a large number of applications of econometric models to finance and business research and an introduction to standard software for econometric analysis, such as E-Views and STATA. The objective of the course is to train students in applied econometrics, including single and multiple regression estimation and related hypothesis testing. Emphasis will be placed on practical use of such methods in a variety of economic and finance examples. The course therefore has two components: econometric theory and “Hands-on” experience.

Learning Outcomes:

- After successful completion of the course students are able to.
- Critically assess empirical research, and to thoughtfully produce their own empirical research.
- Formulate economic and business interactions in analytical terms and analyse them using tools provided by the theory.
- Make informed decisions about the model building process and the relevance of theoretical models in conducting applied work.
- Model and interpret data with the problems of omitted variables, endogenous regressors, problems that are prevalent in most economic data.
- Apply a range of econometric models and tools that are useful when dealing with different types of data sets
- Use regression models to forecast future values.
- Use software such as EViews and STATA for effective econometric modelling.

Course Contents

UNIT I

Introduction to Econometrics, Structure of Data (Cross sectional, Time series and Panel data), Sampling, Random Variables and Probability Distributions, The Meaning Of Linearity, Normal Distribution, Key Concepts in Statistical Inference. Time Series Analysis: Introduction, UNIT Root Test, Simple (Two-variable) Linear Regression Model, Multiple Regression Models, Auto Regressive Integrated Moving Average (ARIMA), Auto Regressive Conditional Heteroskedasticity (ARCH) and Residual Checking.

UNIT II

Introduction to Error Correction Modelling (ECM), Co-integration, Vector Auto Regression (VAR), Vector Error Correction Modelling (VECM), and Structural Vector Auto Regression (SVAR).

UNIT III

Generalised Auto Regressive Conditional Heteroskedasticity (GARCH), TGARCH, GARCH-M, EGARCH, GJR-GARCH (Asymmetric GARCH Models) Seasonal ARIMA, Generalized Methods of Moments (GMM) and Regime Switching.

UNIT IV:

Panel Data Structure and Panel Data Model, Panel Data Models Estimation: Pooled OLS, Fixed Effect Model (FEM), Random Effect Model (REM), Panel with dummies, Panel UNIT Root Tests, Panel Co-Integration Tests, Panel Causality Testing, Dynamic Panel Data Model and Auto Regressive Distribution Lag (ARDL)

UNIT V:

Data Envelop Analysis (DEA), Stochastic Frontiers Analysis (SFA), Corrected Ordinary Least Square (Corrected OLS), Simultaneous Equation Modelling (SEM) and Limited Dependent Variable Models.

BANK FINANCIAL MANAGEMENT

COURSE CODE: MBAS103

OBJECTIVES:

- To know the scope of bank financial management
- To understand the various types of risks faced by banks
- To study the various tools and techniques of measuring and managing bank risks.

METHODOLOGY FOR COVERING SYLLABUS

- Class room teaching
- Assignments based on data collection from CMIE Prowess for measuring various types of risks,
- Brain Storming Session on Convergence of financial markets
- Quiz Programme

UNIT I

Bank Financial Management – Introduction – objectives – New types of risks for bank customers and banks – Evolution of financial management function in banks – major areas of bank financial management: Strategic Planning, Performance Planning, Risk Management, Treasury Operations, Profitability measurement, financial, management and cost accounting, Tax planning and compliance and Internal control systems – Organisational structure, systems and skills – Emerging trends in financial management function of banks - convergence of financial markets (universal banking).

UNIT II

Financial Risks faced by bankers – Credit Risk – Market Risk: Liquidity Risk and Interest Rate Risk – Categories of interest rate risk: Mismatch risk, basis risk, yield curve risk, embedded option risk, reinvestment risk, price risk – Operational Risk - Organisational structure for Risk Management in banks – Risk management process – ALCO – Functions of Treasury Department: Dealing Room, middle office and the back office, linkages with other business UNIT s – Liquidity and liquidity risk, – need for liquidity by banks – sources of liquidity risks – Static Liquidity Gap Analysis – Structural Liquidity Gap Analysis – Dynamic Liquidity Gap analysis – Scenario Analysis: Bank Specific and Market Specific - Liquidity Adjustment Facility.

UNIT III

Interest Rate Risk – Theories on interest rates: Pure Expectation Theory, Liquidity Preference Theory and Market Segmentation Theory – Asset Liability management strategy – Methods used for measuring Interest Rate Risk: Traditional & Standardised Gap Analysis (problem) and its pros & cons, Duration Gap Analysis and its pros and cons, Simulation Method, Standard Deviation and Volatility, co-variance and correlation, measurement of volatility, Value at Risk Method, Parametric or Delta Normal Method of Computing VaR, Applications of VaR, Back testing – Techniques of management of interest rate risk: Derivatives, Interest Rate Options, Forward Rate Agreements (interest

rate derivative), Interest Rate Futures, Interest Rate Swaps, on balance sheet techniques and off-balance sheet techniques.

UNIT IV

Credit Risk: default risk, exposure risk, recovery risk, collateral risk, third party guarantee risk, legal risk - default, default probability - credit risk management in banks: Limit Systems and credit screening, risk quality and rating, external ratings, internal ratings, credit enhancement, covenants, structured transactions, securitization – measuring credit risk in banking transactions: Historical frequencies of defaults, agency ratings and default frequencies, default rate volatility and horizon, interbank exposure, contingencies, expected exposures and the time profile, loss in the event of default, credit risk and potential losses, expected losses and unexpected losses, risk based capital, default probabilities over different time horizon, default risk vs. term structure, default risk vs. transition matrices – Operational Risk and its types – organizational setup for operational risk – Operational Risk Management (ORM) Process in banks.

UNIT V:

Bank Capital – Tier I and Tier II capital – Computation of capital adequacy: Capital to Risk-weighted Assets Ratio (CRAR) – Risk weights of Funded assets and off- balance sheet items - Profits and profitability – Need for Profits – NPA and its impact on profitability of banks - Bank Profitability Model – Measures of Return (Problem): ROE, ROA, Return on Risk Weighted Assets, Equity Multiplier, Profit Margin, Asset Utilization, Net Income, Total Income, Total expenditure, spread and burden, average assets – Measures of Risk (problem): Liquidity risk, interest rate risk, credit risk and capital risk – EVA - Performance parameters of Indian Banks: Business parameters, efficiency parameters, productivity parameters and vulnerability parameters – Measures to improve profitability.

Course Outcomes (COs)

1. **CO1:** Understand the fundamentals of bank financial management and its role in the overall financial system.
2. **CO2:** Analyze various types of bank risks, their impact on bank profitability, and develop risk mitigation strategies.
3. **CO3:** Apply quantitative techniques and models to measure and manage bank risks effectively.
4. **CO4:** Evaluate the regulatory environment and its impact on bank risk management practices.
5. **CO5:** Demonstrate an understanding of the ethical considerations in bank risk management.

ILLUSTRATED EXERCISES:

1. Assignments based on data collection from CMIE Prowess for measuring interest rate risk by using GAP Analysis Method – 10 Marks
2. Students have to collect minimum of 3 research papers related to BFM from journals and viva will be conducted based on those research papers – 5 Marks
3. Brain Storming Session on Convergence of financial markets – 5 Marks
4. Quiz programme based on all the UNIT s – 5 Marks

BANKING AND INDIAN FINANCIAL SYSTEMS

COURSE CODE: MBAS104

OBJECTIVES

- To get an insight into the constitutions, structure, objectives and working of the Banking Institutions in India.
- To evaluate the performance of Banking Institutions and their contribution to the growth of Indian Corporate Sector.
- To have a Bird's view of the Indian Financial System and in the context of Global Indian Banking System.

METHODOLOGY

- Class room lectures, assignments and field visits to financial intermediaries

UNIT I: BANKING SYSTEMS:

Definitions- Functions- Types- Central Banking- Structure of Banking System- Rural Financing- Banker and Customer Relationship- Deposit Mobilization- Loans and Advances- Assets and Liabilities Management- Secured Advances- Endorsement and Crossing of Cheques- Payment of Cheques- Collection of Cheques.

UNIT II: CENTRAL BANKING SYSTEM:

Nature- Organization and Management- Functions- Methods of Credit Controls- Objects of Monetary Policy- Autonomy of Central Bank Systems- Indian Money Market- Indian Capital Market- New Issue Market- Banking Legislations in India.

UNIT III: INDUSTRIAL AND AGRICULTURAL BANKING SYSTEMS:

All Indian Development Banks- Investment Institutions- State Level Institutions- Specialized Financial Institutions- International Finance Institutions- IBRD- IFC- IDA- NABARDNHB- Micro Financing Institutions.

UNIT IV: FINANCIAL SYSTEMS:

Introduction- Overview of Indian Financial System- savings and Financial Intermediation- financial Markets- Listing Regulations- Primary Markets- Secondary Markets- Mutual Funds- Indian Fiscal Systems.

UNIT V: FOREIGN INVESTMENTS:

Foreign Capital- Foreign Collaboration- Foreign Direct Investment- foreign Institutional Investors- Offshore Country Funds- Overseas Venture Capital Investments- International Capital Market

Course Outcomes:

CO1: Understand the Central Banking Structure of Indian Banking System

CO2: Comprehend about Indian Money Market- Indian Capital Market- New Issue Market Banking Legislations in India

CO3: Describe about Development Banks- Investment Institutions- State Level Institutions- Specialized Financial Institutions- International Finance Institutions- IBRD- IFC- IDA- NABARDNHB- Micro Financing Institutions.

CO4: Determine the Functions of Development Banks- Investment Institutions- State Level Institutions- Specialized Financial Institutions- International Finance Institutions- IBRD- IFC- IDA- NABARDNHB- Micro Financing Institutions

CO5: Know about Foreign Capital- Foreign Collaboration- Foreign Direct Investment- foreign Institutional Investors- Offshore Country Funds- Overseas Venture Capital Investments- International Capital Market

BLOCKCHAIN FOR BUSINESS

COURSE CODE: MBAS105

Course Objectives:

With blockchain fast emerging as a safe and secure technology, organisations across various sectors are exploring the option of using this in their operations. However, there is severe shortage of blockchain professionals. It is regarded as one of the safest and most secure technology and as a result, organisations not just fintech companies but also those from other domains are experimenting with it, necessitating the need for blockchain experts, this trend is here to stay and more jobs will be created in the blockchain domain

After this course,

- students will develop a global vision of Blockchain's disruptive potential, and learn about the future challenges that this technology is likely to face, both technical and regulatory.
- students will learn why blockchain is disrupting all sectors and actors across the value chain, and will be given the tools to understand the long-term transformation that all sectors are likely to undergo through blockchain's implementation.
- This practical program goes beyond the conceptual aspect of Blockchain. It provides theoretical as well as practical aspects of blockchain. It will enable students in understanding the opportunities and challenges in adoption of blockchain technology in different areas of business.

Methodology:

- The methodology includes, explaining cores concepts, read, research and discuss the issues through written papers, presentations, Lectures, term papers, case discussions and role plays in class seminars.

UNIT I

What is Blockchain- Definition- Types of blockchain – Blockchain and Traditional data storage systems - Consensus mechanisms - Blockchain applications – Merits of Blockchain Technology to Business – How Blockchain Work - What is a block - Peer to Peer network- Distributed consensus - Public and Private Blockchains - Immutability, Security, Privacy, Anti-fragility - Security and Safeguards - Challenges in adoption – Scalability problems - Types of Blockchain and Enterprise

UNIT II

History of Centralized Services – trusted third party- Smart Contracts- Why is this revolutionary- Comparison to legal - Cryptography- Hashing- Data Integrity- Public vs Private Key - Decentralized Applications - Potential Application In Different Fields - Barriers and potentials for blockchain - Regulation and legal frameworks - Distributed ledger technology - Ethereum Platform - Scalability and distributed ledgers - Consensus Protocols and Byzantine Fault Tolerance (BFT) – cryptocurrencies- Regulation of blockchain - Regulation and Anonymity.

UNIT III

Blockchain applications- Industry Applications of Blockchain - Applications in Fintech Regtech and insurtech- Application for banking - Application HRM, Operations, Marketing, SCM- Blockchain for sustainable business - How people are using blockchain - Numerai, DAO, etc. - Lightning networks and plasma – Sidechains.

UNIT IV

Digital Rights - Paradigm shift/future/big picture - ownership and accessibility, education -Industry – healthcare – identity - finance - Elections and Voting - Auto execution of contracts- Blockchain applied to mobility etc.

UNIT V

Development of Blockchain – Pros and cons of different implementations- Use Case - Business Case - Business Model.

Course Outcomes (COs)

1. **CO1:** Understand the fundamental concepts, technologies, and applications of blockchain.
2. **CO2:** Analyze the potential business implications and opportunities of blockchain technology.
3. **CO3:** Evaluate the legal, regulatory, and ethical challenges associated with blockchain implementation.
4. **CO4:** Develop blockchain-based solutions for business problems and challenges.
5. **CO5:** Communicate effectively about blockchain technology to various stakeholders.

BUSINESS ACCOUNTING AND ADVANCED FINANCIAL MANAGEMENT

COURSE CODE: MBAS106

OBJECTIVES:

- To know the various business accounting methods.
- To understand the various sources and uses of funds.
- To understand the various tools of financial management

METHODOLOGY:

- Lectures, Numerical Problems solving, regular exercises and surprise tests

UNIT I: BUSINESS ACCOUNTING

Accounting for Partnership Business – Branch Accounts- Departmental accounts- Hire Purchase Accounts- Corporate Accounting- Issue of Shares- Forfeiture of Shares- Redemption of Preference Shares- Preparation of Balance Sheet- Amalgamation- Mergers and Acquisition- Absorption- Internal and External Reconstruction- Practical Problems.

UNIT II: SPECIAL ACCOUNTS:

Public Utility Accounts- Railways, Electricity Accounts- Insurance Company Accounts- Bank Company Accounts- Holding Company Accounts- Consolidated Balance Sheet- Inflation Accounting- Human Resource Accounting- Concept of Environmental Accounting- Difference between Double Accounting and Double Entry Book Keeping- Practical Problems.

UNIT III: BUSINESS FINANCE:

Financial Planning, financial forecasting, forecasting models, Quantitative models (multiple, discriminate analysis) in Financial Analysis, short term financial decisions, advance credit analysis, factoring, credit insurance, cash management models.

UNIT IV: FINANCIAL DECISIONS:

Interaction of investment and financing decisions, assessing borrowing capacity of the firm, Innovative of Option Embedded Corporate Liabilities, Leasing.

UNIT V: BUSINESS RESTRUCTURE:

Corporate restructuring, forms of corporate restructuring, mechanics of mergers and acquisitions, corporate turnaround strategies, international financial managements, international investment decisions, cost of capital for foreign investment, financing foreign operations.

Course Outcomes (COs)

1. **CO1:** Apply accounting principles and concepts to analyze financial information for decision-making.
2. **CO2:** Evaluate the financial performance of a business using various financial ratios and analysis techniques.
3. **CO3:** Understand the sources and uses of funds and their impact on a company's financial position.
4. **CO4:** Apply financial management techniques to optimize resource allocation and investment decisions.
5. **CO5:** Analyze and interpret financial statements to assess a company's financial health and prospects.

CORPORATE COMPLIANCE MANAGEMENT

COURSE CODE: MBAS107

UNIT I: Corporate compliance

Concept and significance – systems approach to compliance management – process of establishment of compliance management system – Compliance in letter and spirit.

UNIT II: Due Diligence

Nature, Objectives, Significance and Scope of due diligence – Steps in the process of due diligence - Initial Public Offer (IPO) – Follow-on Public Offer – Right Issue – Employees Stock Option Plans (ESOPs) – Preferential Allotment – Takeovers and acquisitions – Setting up of business UNIT s in India and abroad – Setting up joint ventures – Compliance of listing agreement.

UNIT III: Legal Framework

Competition Act, 2002; Secretaries Contracts (Regulation) Act, 1956; Depositories Act, 1996, Foreign Exchange Management Act, 1999; Water (Prevention and Control of Pollution) Act, 1981; Environment Protection Act, 1986; Consumer Protection Act, 1986,

UNIT IV: Search/ Status Reports

Importance, Scope and Verification of documents relating to charges – Requirements of financial institutions and corporate lenders – Preparation of reports

UNIT V Securities Management and Compliances

Meaning, Need and Scope of self-regulation – Mechanism for self-regulation – Advantages to company – Regulator and investors.

CORPORATE FINANCE

COURSE CODE: MBAS108

OBJECTIVES:

- To understand the concept of Business Finance and Finance Techniques.
- To gain experience in financial policies, strategies and practices towards efficient corporate financial accounting and management.

METHODOLOGY:

Lectures, Numerical Problems solving, regular exercises and surprise tests

UNIT I: Introduction to Corporate Finance & Tools of Corporate Finance Analysis:

What is Corporate Finance-Corporate Securities as Contingent Claims on Total firm value — The Corporate Firm - Goals of Corporate Firms-Importance of Corporate Finance — Functions of Corporate Finance — Organisation Structure for Corporate Finance - Scope of Corporate financing — Financial Planning — Financial Forecasting — Forecasting Techniques — Profit Planning — Marginal Costing, Standard Costing-Leverage Analysis - Economic Value-Added Analysis.

UNIT II: Corporate Promotion & Entrepreneurship

Promotion-Procedure for Promotion-Company Promotion in India-Function of Entrepreneurs -Venture Capital Funds-Capital rationing — Sensitivity analysis— Public utility accounts— Repairs and replacements — Banking company accounts — Insurance company accounts (**Practical Problem**).

UNIT III: Corporate Securities & Capital Market

Corporate Securities, Marketing of Securities — Financial markets — Money markets — Capital Markets — Stock exchange — Different kinds of securities — Valuation of Shares- Bond- Double Accounts-Valuation of Goodwill — Tools of risk investment analysis — Inflation. (**Practical Problem**)

UNIT IV: Corporate Accounting & Strategic Decision

Corporate Merger-Amalgamation-Absorption-External Reconstruction— Holding Company — Merchant Banking - Non-Banking Finance company- Foreign Capital and Collaboration — Mutual Funds in India. (**Practical Problem**)

UNIT V: Development Financial Institution & Project Appraisal

Development Banks- Projects appraisal — Financial Analysis-Technical Analysis-Social Cost Benefit Analysis-International Corporate Finance.

Course Outcomes (COs)

1. **CO1:** Understand the fundamental concepts of corporate finance and its role in business

- decision-making.
2. **CO2:** Analyze financial statements and calculate financial ratios to assess a company's financial health.
 3. **CO3:** Evaluate investment opportunities and make sound investment decisions using financial analysis tools.
 4. **CO4:** Understand and apply different capital budgeting techniques for project evaluation.
 5. **CO5:** Develop and implement effective working capital management strategies.

CORPORATE TAX MANAGEMENT

COURSE CODE: MBAS109

OBJECTIVES

- To make the students understand the canons of taxation.
- To train them to calculate income tax for individuals and corporate
- To make the students to appreciate the tax applications in managerial and financial decision making.

METHODOLOGY

- Lectures, numerical problems solving, training on filing tax returns for individuals and corporate

UNIT I

Basic concepts- assessment Year- Previous Year-Person- Assesse- Income-Gross Total income- Total Income- Capital Asset- Company- Capital Receipts Vs Revenue Receipts Capital Expenditure Vs Revenue Expenditure- Methods of Accounting- Amalgamation. Residential Status and Tax Incidence- Incomes Exempt from Tax.

UNIT II

Computation of Profits and Gains of Business or Profession- General Principles- Deductions and Allowances- Deemed Profits- Income from Undisclosed Sources- Valuations of Stock- Problems on Computation of Income from Business or Profession.

UNIT III

Taxation of Companies: Definitions of Indian Company-Domestic Company, Foreign Company, Industrial Company, Widely Held Company, Closely Held company, Investment Company, Consultancy, Service Company and Trading company. Deductions available Company- Carry Forward and Set off of Losses in the cases of certain companies- Tax on undistributed Profits of Domestic Companies- Problems on Computation of Taxable Income of Corporate Assesseees.

UNIT - IV

Tax Consideration in Specified Managerial Decisions and Their Implications on Cash Flow, Make or Buy, Own or Lease, Retain or Replace, Export or Domestic Sales, Shutdown or Continue, Purchase by Installation or Hire, Expand or Reduce the Size of Business.

UNIT V

Tax Consideration in Special Areas- Foreign Collaboration Agreements, Mergers, Amalgamation, Reconstructions, Acquisition, Capital Structure, Dividend Policy Depreciation and Other Allowances- New Industrial Undertakings and Tax Relieves- Personal Compensation Plan.

Course Outcomes (COs)

1. **CO1:** Understand the Indian tax system, its structure, and the principles of taxation.
2. **CO2:** Compute income tax for individuals and corporations as per the prevailing tax laws.
3. **CO3:** Analyze the tax implications of business transactions and decisions.
4. **CO4:** Apply tax planning strategies to minimize tax liabilities for individuals and corporations.
5. **CO5:** Understand the role of indirect taxes (GST, customs, excise) in business operations.

DIRECT TAXES LAW AND PRACTICE

COURSE CODE: MBAS110

COURSE OBJECTIVES

- To provide a basic foundation on concepts and principles of direct tax laws;
- To demonstrate the application of tax laws in tax planning.

METHODOLOGY

- Class sessions comprise a mixture of lectures, interactive discussions, case presentations and problem solving.
- In addition to the in-class exams and assignments, each student will undertake a short project comprising of survey on tax related issues.

SYLLABUS

UNIT I: Introduction to Income Tax Act of 1961

Income Tax Act 1961-Concept of Income; Residential status and Tax Liability; Incomes exempted from Tax; Computation of Income under Salaries; Income from House Property.

UNIT II: Gross Income Computation

Computation of Income from Profits and Gains of Business or Profession; Income from Capital Gains; Income from other sources.

UNIT III: Deductions and Relevant Provisions

Clubbing of Income; set off and carry forward of losses; Deductions from Gross Total Income; Relief and rebate in respect of Income Tax.

UNIT IV: Tax Assessment

Assessment of Individuals, HUFs, Firms and Thrust; Tax Administration; Income Tax Authorities; Procedure for Assessment.

UNIT V: Wealth Tax Act 1957

Incidence of Tax; Net Wealth Assets; Deemed Assets; Exempted Assets; Computation of Wealth Tax liability.

Course Outcomes (COs)

1. CO1: Understand the fundamental concepts, principles, and structure of direct tax laws in India.
2. CO2: Apply direct tax laws to compute income tax liabilities for individuals and corporations.
3. CO3: Analyze the tax implications of business transactions and decisions.
4. CO4: Identify tax planning opportunities and develop strategies to minimize tax liabilities.
5. CO5: Stay updated with the latest developments and amendments in direct tax laws.

ENVIRONMENTAL ACCOUNTING AND COSTING

COURSE CODE: MBAS111

OBJECTIVES:

- To get an insight into the environmental accounting and costing system.
- To cover the inter relationship between the costing system and cost computations.
- To understand the importance of environmental accounting

METHODOLOGY:

Lectures, numerical problem solving, term projects

SYLLABUS:

UNIT I: CONCEPT OF ENVIRONMENTAL ACCOUNTING

Environment- National Accounts- Importance of National Resource and Environment-Sustainable Development- Origin and Development of Environmental Accounting Natural Resource and Environmental Accounting in Other countries- The UNSO System- SNA System- SEEA.

UNIT II: VALUATION OF NATURAL ASSETS

Market Value Approach- Present Value Approach- Net Price Approach- Maintenance Cost Approach- Compensation Cost Approach-Valuation of Welfare Losses from Environmental Deterioration- Merits and Demerits of Environmental Accounting- Implementation of Environmental Accounting- Environmental Accounting for Developing Countries- Practical Problems.

UNIT III: CONCEPT OF COSTING

Scope- Objectives- Benefits and Functions of Costing Systems- Cost UNIT Cost Center- Cost Classification- Types of Costing- Material Costing- Labor Costing- Overhead Costing- Practical Problems.

UNIT IV: COSTING MEHTODS

UNIT Job- Batch- Contract –Process- Joint Product- By-product- Operating Cost Reconciliation- Practical Problems

UNIT V: SPECIAL COSTING

Standard Costing- Cost Value Profit Analysis- Margin of Safety- Key Factor Analysis- Master Budgets- Production Budgets- Zero Budgets- Control Ratios- Cost Audit- Practical Problems.

Course Outcomes (COs)

1. CO1: Understand the concept of environmental accounting and its role in business.

2. CO2: Apply environmental accounting principles to measure and report environmental costs.
3. CO3: Evaluate the impact of environmental costs on business performance.
4. CO4: Develop environmental cost management strategies to improve organizational efficiency.
5. CO5: Communicate environmental performance information to stakeholders effectively.

EXPORT MANAGEMENT

COURSE CODE: MBAS112

OBJECTIVES:

- To make the students well aware about the formalities associated with export trade.
- To make the students aware of the external environmental factors having a bearing on the export trade.
- To make the students aware of the export stimulation efforts of the government and the opportunities available to exporters to make good business.

METHODOLOGY:

- Lectures shall be delivered on the theory aspects of the paper.
- Students shall be made to submit assignments about the various issues related to exports and the institutional support available for promotion of exports.
- Students shall be asked to assess the support available for boosting exports in Puducherry and the impact of such measures in the UT.

SYLLABUS:

UNIT I

Exports- Meaning, scope and difference between export and domestic trade; Difficulties in export trade- fishing in turbulent waters- Impact of external and internal environment on export trade; Identifying and selecting foreign markets- modes of entering foreign markets.

UNIT II

Product planning for exports; Product designing - standardization Vs. Adoption; Export pricing; Factors influencing export price; Pricing process; Methods of pricing; International price quotations; Payment terms.

UNIT III

Promotion of product for export; Methods of international promotion; Direct mail and sales literature; Advertising, personnel selling; Trade fairs and exhibitions. Branding and packaging; Labelling; Quality issues; After sales services. Distribution channels and logistics decisions for export trade; Selection and appointment of foreign sales agents.

UNIT IV

Export policy and practices in India; EXIM Policy; Legislative framework regarding exports- Customs Act, FERA and FEMA; Trends in India's foreign trade; EXIM Bank; Measures for Export promotion and incentives offered for exports by the government of India- EPZs, EOUs, and FTZs.

UNIT V

Export documentation; Export procedure; Free Trade Agreements negotiated by India; WTO and its impact on India's agriculture and textiles trade; TRIPs and TRIMs.

Course Outcomes (COs)

1. **CO1:** Understand the fundamentals of international trade and export procedures.
2. **CO2:** Analyze the global export environment and identify potential export markets.
3. **CO3:** Develop effective export marketing and promotional strategies.
4. **CO4:** Manage export documentation and shipping processes efficiently.
5. **CO5:** Understand the role of government policies and incentives in export promotion.

FINANCIAL ENGINEERING

COURSE CODE: MBAS113

OBJECTIVES

- To introduce the concept of Financial Engineering and its evolution
- To acquaint the students with the conceptual tools of Financial Engineering
- To make the student understand the physical tools of Financial Engineering, its processes and strategies.
- To appraise the students with the recent developments and future trends in Financial Engineering

METHODOLOGY FOR COVERING SYLLABUS

- Class room teaching of all the UNITS
- Practical assignment and its presentation
- Viva based on research papers related to strategies for financial services
- Quiz programme for all the UNITS.

UNIT I

Introduction – Scope – Financial Engineering Versus Financial Analysis - Financial Engineering Team, Productizing the solution – career opportunities for Financial Engineers- Factors contributing to the growth of Financial Engineering (Case study): Environmental Factors (price volatility, globalisation, tax asymmetries, technological advances, advances in financial theory, regulatory changes, competition and transaction cost) and Intrafirm factors (liquidity needs, risk aversion, agency cost, quantitative sophistication, management training and accounting benefits) – Knowledge Base of Financial Engineer: Financial theory, mathematical and statistical skills, modelling skills, product knowledge, knowledge of relevant technology, accounting, tax and legal expertise – Financial Innovations in India: any five instruments/processes/strategies with the factor(s) responsible for the same (Case Study).

UNIT II

Conceptual Tools of the Financial Engineer – Valuation relationships and applications: cash flows, time value, sensitivity analysis, applications, spreadsheets, compounding, absolute vs. relative valuation – Measuring return: Utility theory, profit vs. rates, before and after tax rates of return, rates of return and compounding, investment horizon – Risk: volatility, sources of price risk, expressing price risk, mathematics of portfolio analysis, risk aversion and portfolio

analysis, role of investment horizon – Measuring Risks: Measuring exposure to risk – Managing Risk: Insurance, Asset/Liability Management, Hedging - Understanding interest rates: Debt instrument, coupon, yield curve, investment risks in debt markets, interest rate risk (duration and dollar value of a basis point), default risk, reinvestment risk, call risk, prepayment risk, purchasing power risk - Exchange rates: Basics, determinants (interest rate parity, purchasing power parity and the Fisher equation), other factors influencing exchange rates – Speculation and its methods – Arbitrage and its forms – Efficient Market Hypothesis.

UNIT III

Physical tools of the Financial Engineer : New Product Development Model: Direction, Design, Testing, Introduction and Instruments Preview – Futures and Forwards: Forward Rate Agreements – Swaps: structure of a swap, interest rate swap, currency swap, commodity swap, variants, swap dealer's role – Single Period Options: call and puts, pay off profiles, hedging with options, cash settled options – Debt Market Innovations: zero coupon securities, collateralized mortgage obligations (CMOs), Asset Backed Security, Repo and reverse repo, junk bond, shelf registrations – Equity related innovations: equity options, equity warrants, rights issue, pooled investment vehicles, index futures and index options, American Depository Receipts and Global Depository Receipts – Hybrid securities: process of constructing new hybrid securities, types of structured hybrid securities based on security linkage, security structure, derivative form, distribution method–Investor motivation and issuer motivation.

UNIT IV

Financial Engineering, Process and Strategies: Evolution of ALM (Asset – Liability Management), Five foundation concepts in ALM strategy (liquidity, term structure, interest rate sensitivity, maturity composition, and default), Gap Management, Investment Banker in ALM: Total Return Optimisation and Risk Controlled Arbitrage – Hedging: Hedge ratios, composite hedging, size of hedge, measuring hedge effectiveness and cost of hedging, Building Block Approach (BBA) to hedging – ways to visualize the BBA: risk and pay off profiles, boxed cash flow diagrams and time line cash flow diagrams – Other Risk Management Techniques: OTC options market (path-dependent options, look-back options and option-linked loans), diversification, credit enhancement, overcollateralization, assignment(reinsurance) – Synthetic securities: synthetic puts and synthetic zeros, cash and carry synthetic.

UNIT V

Impact of Globalisation on the financial services industry: international commercial banking, international security markets, international investment banking - Legal Protections for Innovative Financial Products and Services: Copy right, Patent, Trademark or service mark.

Course Outcomes (COs)

1. CO1: Understand the fundamental concepts and principles of financial engineering.
2. CO2: Apply quantitative methods and financial modeling techniques to solve financial problems.
3. CO3: Develop and implement financial derivatives and structured products.
4. CO4: Evaluate the risks associated with financial instruments and develop risk management strategies.
5. CO5: Stay updated with the latest trends and developments in financial engineering.

ILLUSTRATED EXERCISES

1. Students are to collect 3 research articles in the area of financial services strategies and viva will be held based on those research papers – 5 marks
2. Assignments based on CMIE data base and excel on arbitrage eg., tax asymmetries, etc. -5 marks
3. Developing a blueprint for a financial service of your choice – 5 marks
4. Brain storming session on Challenges for Future Financial Managers and submission of individual reports – 5 marks
5. Quiz programme based on all the UNIT s – 5 marks.

FINANCIAL MARKETS AND SERVICES

COURSE CODE: MBAS114

OBJECTIVES

- To know about the Indian financial system and its players
- To understand the security market regulations
- To keep abreast of recent financial services

METHODOLOGY

Class room lectures, practical assignment, group discussions

UNIT I

Indian financial system – overview of financial markets in India – Capital markets – money market – government securities markets – foreign exchange market – derivative markets – financial sector reforms.

UNIT II

Structure and institutions in capital market and money market – new issues market – new Instrument – role of new issues in industrial financing – floating of new issues – options and futures.

UNIT III

Securities market in India – origin and emergence – types of securities – investment environment -sources of investment information – stocks exchange in India – trading in stock exchange – listing of securities.

UNIT IV

Security market regulations: securities contract and regulation act, 1945 – regulation and control of stock exchanges, OTCE, NSE – market intermediaries: stock bookers – underwriters. SEBI Act: guidelines relating to capital issues, pricing, insider trading and investor protection.

UNIT V

INFRASTRUCTURE FINANCE

COURSE CODE: MBAS119

OBJECTIVES:

- To identify the sources of infrastructure finance
- To know the mechanism of infrastructure finance
- To understand the importance of infrastructure finance

METHODOLOGY

- Class room lectures, field projects, group discussions

SYLLABUS

UNIT I: PROJECT FINANCE

Infrastructure finance Vs Project Finance- Evaluation of Private and Commercial Financed infrastructure Projects- Structural Issues- Dissatisfaction with the Performance of Existing PSUs- Lack of Funds with Government

UNIT II: STRUCTURAL FINANCE

Concept- Risk Participation- Assistance- types of Guarantees- Contemporary Products- Pricing of Issues- Commercialization.

UNIT III: PRIVATIZATION

Outlook for Infrastructure Projects- Demand for Infrastructure in future- Supply of infrastructure finance- Scope and Avenues- Business and Major Players

UNIT IV: PRODUCTS

Funded and Non-funded- Types- Take Out Products- Tax Implication- Role of FI and Banks- Portfolio of FI and Banks- Skill Required for infrastructure finance- Flow chart of infrastructure Projects

UNIT V: PROJECT PROCESS

MOU Projects- Types of Projects- BOT – BOOTBOLT- BOO- LROT- RMOT- Concession on Agreement- Key Contracts- EPC- O&M- Financial Closure- Functions of TAMP, CERC, SERC, TRAI- Risk analysis- infrastructure Project appraisal.

Course Outcomes (COs)

1. **CO1:** Understand the concept of infrastructure finance and its importance in economic development.
2. **CO2:** Analyze the various sources of infrastructure financing, including public-private partnerships (PPPs).
3. **CO3:** Evaluate the financial feasibility of infrastructure projects.
4. **CO4:** Understand the role of financial institutions in infrastructure financing.
5. **CO5:** Assess the risks and challenges associated with infrastructure financing.

- The students will be asked to visit forex dealer office
- The students should bring some success stories of companies in international finance

MERGERS & ACQUISITIONS

COURSE CODE: MBAS121

OBJECTIVES

- To provide concrete understanding of Mergers & Acquisitions
- To familiarize the concepts to the students with the current issues in M&A
- To expose the students about the process and methods of M&A, measures to evaluate the performance of M&A

METHODOLOGY

Lectures, Problems, Case studies with practical examples, Group or Class learning activities, Seminars, Projects on M&A will be given

SYLLABUS

UNIT I

Mergers & Acquisitions Process – Forms of M&A – Types of Mergers – Reasons for Buying and Selling a Business – Stake holder groups in M&A activities - Framework for M&A strategies – Motivational Hypothesis for M&A – M&A Theories – The Efficiency Theory – The Monopoly Theory – The Valuation Theory – The Empire Building Theory – The Process Theory – The Disturbance Theory

UNIT II

Valuation of Merger and Acquisitions – Objectives – Sources of Information – Valuing the Business Vs Valuing the Company – Net Asset Valuation Model – Dividend Valuation Model – PER Model – EVA and APV Model an overview – Economic Gains and Costs of M&A – The Share Exchange Ratio. Intangible Assets: Types – Importance –Classification – Approaches to Valuation of Intangible Assets

Disinvestments and Privatisation – Methods – Approaches to Valuation – Alternative Valuation approaches for Private Companies – Family Business Valuation and its issues

UNIT III

Synergy – Benefits from Synergy – Synergy Equation – Theories of Synergy – Pricing of M&A – All-cash Acquisition – All-share Exchange Acquisition – Cash and Share Offer – Break-even Synergy – Determining the Price Range of Acquisition – Synergy and Value creation in M&A

– Acquiring Poorly Managed Firm – Acquiring Undervalued Firms – Synergy and Merger Success

UNIT IV

Payments for M&A – Methods – Factors Affecting Choice of Financing Method – Stock Deal or Cash Deal – Financing the Cash Offer – Payment for Cross-Border Acquisitions – Leveraged Buyout – Structuring – Characteristic of LBO Candidates – Sources of LBO Targets – Factors determining LBO returns

UNIT V

Due Diligence – Scopes and Types – Process – Due Diligence in Cross-Border Deals – Integration – Levels of organizational distance – Types – Corporate Cultures – Acculturation – Major Laws of M&A in India Text

Course Outcomes (COs)

1. **CO1:** Understand the concept of mergers and acquisitions and its strategic implications.
2. **CO2:** Analyze the different types of mergers and acquisitions and their motivations.
3. **CO3:** Evaluate the valuation and financial aspects of mergers and acquisitions.
4. **CO4:** Develop strategies for successful merger and acquisition integration.
5. **CO5:** Understand the regulatory and legal framework governing mergers and acquisitions.

RISK MANAGEMENT AND INSURANCE

COURSE CODE: MBAS123

OBJECTIVES

- To introduce the concept of risk management and insurance
- To familiarize the conceptual frame work of risk management and insurance decisions
- To understand the business risk management and public policy issues

METHODOLOGY

Class room lectures, field projects, group discussions

SYLLABUS

UNIT I: RISK MANAGEMENT

Introduction to risk and uncertainty – introduction to risk management – Rationale for Risk Management in organizations.

UNIT II: RISK ASSESSMENT

Risk identification – risk analysis – Exposures – physical assets – financial assets – human assets – legal liability – work-related injury – Risk measurement - Risk Control Tools – Risk financing techniques – Risk Management Decisions – Data Organisation and Analysis.

UNIT III: INSURANCE MARKETS AND FUNCTIONS

Insurance Industry –Pricing of Insurance – Insurance Regulation (IRDA) – Financial assessment – Legal Aspects of Insurance Contracts – Insurance Contract Analysis – property and liability coverage – Classification of Policies – Annuities – Surrender Values – Valuation and Surplus.

UNIT IV: TYPES OF INSURANCE

Life Insurance – Marine Insurance – Fire Insurance – Motor Insurance – Fidelity Insurance – Double Insurance – Re-insurance – Business Insurance Programs – Health Care financing – Health Care insurance – Employee Benefit Plans.

UNIT V: INSURANCE ACCOUNTS

Valuation Balance Sheet – Life Insurance Accounts – Fire Insurance Accounts – Marine Insurance Accounts – Essential Elements of Insurance Contract – Practical Problems.

Course Outcomes:

CO1: Measure risk portfolio of any security using Beta; apply equity valuations to analyze Business Performance.

CO2: Describe the approaches of Fundamental analysis and analyze financial statements using Forecasting and Earning Models

CO3: Demonstrate about Bond Valuation and describe different types of Options Strategies

CO4: Apply Technical Analysis using various charts patterns

CO5: Understand about Capital Market Theory, CAPM theory, V Sharpe Index, Treynor Index, Jensen's Model

SECURITY ANALYSIS & PORTFOLIO MANAGEMENT

COURSE CODE: MBAS124

OBJECTIVES

- To provide understanding and insights into investment avenues
- To give exposure on functioning of capital markets
- To provide knowledge and skills on portfolio management

METHODOLOGY

Class room discussion for all the UNITS

Latest information about market movements, Emphasis will be given to problems.

SYLLABUS

UNIT I: INTRODUCTION TO INVESTMENT

Meaning of investment – speculation and Gambling – Investment avenues: Non- marketable financial Assets – Money market instruments – Bonds or debentures – Equity shares – Mutual fund schemes – Financial derivatives – Life insurance – Real assets. Types of investors – Investment objectives – Factors of sound investment – Investment Basics: Time value of money – Risk-Return analysis in investment – concept and measurement of return – concept of risk – sources of risk – types of risk and measurement of risk – problems on risk and return calculations.

UNIT II: INDIAN CAPITAL MARKET

Financial Market - Segments – Types - Participants in financial Market – Regulatory Environment, Primary Market: Methods of floating new issues – steps in floating a public issue – Book building – Role of primary market – Regulation of primary market. Secondary market: Functions of stock exchanges – Stock exchanges in India – BSE, OTCEI, NSE, ISE, MCX-SX and Regulation of stock exchanges – listing of securities – Trading system in stock exchanges –SEBI.

UNIT III: FUNDAMENTAL ANALYSIS

Meaning – EIC Analysis framework – Economy Analysis: Economic forecasting – Forecasting techniques. Industry Analysis: Industry classification, Industry life cycle – Company Analysis: Financial statements – Analysis of financial statements – Stock return and valuation models: Balance sheet valuation – Dividend discount models – Earnings multiplier approach – Bond

return and valuation: Bond basics– Bond returns and risks – Bond pricing theorems – problems on stock valuation and bond valuation

UNIT IV: TECHNICAL ANALYSIS

Meaning – Dow theory – Basic principles of technical analysis – Price charts – Trends and trend reversals – Chart patterns – Elliot Wave theory – Mathematical indicators: Moving averages – Oscillators. Market Indicators: Breadth of the market – Short interest – Odd lot index – Mutual fund cash ratio – Technical analysis Vs. Fundamental Analysis – Efficient Market theory: Random Walk theory – The efficient market hypothesis – EMH vs Fundamental and Technical analyses.

UNIT V: PORTFOLIO MANAGEMENT

Meaning – Portfolio management process – Portfolio Analysis: Measuring expected risk and return of a portfolio with two securities and more than two securities – portfolio risk diversification – Portfolio Selection: Markowitz model of portfolio selection – Problems. CAPM: Assumptions – SML and CML – APT – Portfolio revision: portfolio revision strategies – Portfolio evaluation: measuring portfolio risk adjusted returns – Sharpe ratio – Treynor ratio – Jensen ratio – problems on portfolio evaluation.

Course Outcomes (COs)

1. **CO1:** Understand the fundamentals of securities markets and investment vehicles.
2. **CO2:** Apply financial analysis techniques to evaluate securities.
3. **CO3:** Construct and manage diversified investment portfolios.
4. **CO4:** Evaluate the performance of investment portfolios.
5. **CO5:** Understand the role of risk management in portfolio management.

STRATEGIC COST MANAGEMENT

COURSE CODE: MBAS125

OBJECTIVES

- This basic objective of the course is to provide strategic cost information and techniques and their application to 'efficient and effective' business decisions.

METHODOLOGY

Class room lectures, group discussions

SYLLABUS

UNIT I

Introduction to Strategic Cost Management – Basic Cost Concepts, Cost Drivers, Cost allocation and apportionment – Strategic Analysis and Strategic Cost Management.

UNIT II

Cost Management Systems – Job Costing – Process Costing – Joint Products – Strategic Profitability Analysis – Pricing Decisions and Cost Management.

UNIT III

Cost Accounting and Operational Control – The Budgetary Control (Flexible and Fixed) – Standard Costing: Direct Materials, Direct Labour and Factory Overhead – Managing Productivity and Marketing effectiveness.

UNIT IV

Management Planning and decision making – Cost Estimation – Cost-Volume-Profit Analysis – Strategy and the Master Budget - Decision Making with a Strategic Emphasis –Capital Budgeting and Strategic Cost Management.

UNIT V

Contemporary Cost Management – Activity Based Costing and Management – Target Costing– Theory of Constraints – Life cycle Costing – Management Control and Strategic Performance Measurement.

Course Outcomes (COs)

1. **CO1:** Understand the concept of strategic cost management and its role in business performance.
2. **CO2:** Apply cost management techniques to support strategic decision-making.
3. **CO3:** Evaluate the cost-benefit relationship of various business strategies.
4. **CO4:** Develop cost management systems to enhance organizational efficiency.
5. **CO5:** Analyze the impact of cost management on competitive advantage.

STRATEGIES FOR FINANCIAL SERVICES

COURSE CODE: MBAS126

OBJECTIVES

- To understand the application of strategic management concept in financial services sector.
- To prepare the students to design strategies required for financial services sector
- To develop skills among the students to manage various strategies through

METHODOLOGY FOR COVERING SYLLABUS

- Class room teaching
- Case studies
- Group Assignments on developing Porter's 5 forces model for financial services intermediaries such as banks, insurance companies, mutual funds, investment banks
- Brain Storming Session on Multiple Regulatory Bodies in India
- Viva based on research papers related to strategies for financial services

SYLLABUS

UNIT I

Indian Financial Services Industry – Market Players & Regulators – DFIs, commercial banks, merchant banks, insurance companies, mutual funds, investment banks, NBFCs, etc. – Strategic Management – importance and its application for managing financial services companies.

UNIT II

Competitive strategies – Five Forces that shape strategy in financial services industry (Case Study) – Entry Strategies – Cost Leadership – Diversification – Consolidation, mergers & takeovers, strategic alliance – Financial Inclusion – Benchmarking – Innovation – Knowledge management – Value Based Management – Technology as a strategic lever – Growth and Survival Strategies.

UNIT III

Banking Companies – Core Competencies – Transformation Strategies: Retail Banking, Universal Banking, Technology: Computerisation and Core Banking Solution – Financial

Strategies: IPOs and Foreign Capital, Risk Management – Operational Strategies: Outsourcing – Marketing Strategies: Segmentation, Marketing Mix for Banking Services, Product and Services Innovation, Cost effective pricing, One Stop Shop, Cross selling of products, value added services, Marketing Information System – HR Strategies: VRS, Right Sizing, Talent Acquisition & Retention Strategies.

UNIT IV

Insurance Companies – Core Competencies – Transformation Strategies – Financial Strategies: Strategic Alliance with foreign players, Reinsurance, Public Private Partnership, Risk Management – Operational Strategies: Online issue and servicing of policies – Marketing Strategies: Segmentation, Marketing Mix for Insurance services, Product and Services Innovation, Tariff on policies, Information System – HR Strategies.

UNIT V

Asset Management Companies, Merchant Banks & Investment Banks – Core Competencies – Transformation Strategies – Financial Strategies: Mezzanine Finance, NFOs, IPOs, Green Shoe Options, Risk Management – Operational strategies: Investor servicing, tie up with banks – Marketing Strategies: Marketing Mix for AMCs, Innovative Schemes, SIP, Entry and Exit Loads, Promoting of schemes – HR Strategies – Issue Management and Marketing of Issues.

Course Outcomes (COs)

1. **CO1:** Understand the strategic management concepts applicable to the financial services industry.
2. **CO2:** Analyze the external and internal environment of financial service organizations.
3. **CO3:** Develop strategic plans for financial service organizations.
4. **CO4:** Evaluate the implementation and performance of financial service strategies.
5. **CO5:** Understand the ethical and social responsibilities of financial service organizations.

3. Group Assignments on developing Porter's 5 forces model for financial services intermediaries such as banks, insurance companies, mutual funds, investment banks and presentation of the same – 5+5 = 10 marks
4. Brain Storming Session on Multiple Regulatory Bodies in India – 5 marks 5. Viva based on research papers related to strategies for financial services

INTERNATIONAL FINANCIAL REPORTING STANDARDS FOR SMALL AND MEDIUM BUSINESS ENTITIES

COURSE CODE: MBAS127

OBJECTIVES

- To introduce concepts of International Financial Reporting Standards to the students. To make students understand and appreciate the applications of IFRS for SMEs
- To provide acquaintance with all existing 35 sections of IFRS for SMEs to the students.
- To prepare students as consultants by equipping them with practical knowledge in IFRS for SMEs.
- To facilitate the students to become eligible to get professional certifications offered by various professional bodies in accounting.

PEDAGOGY

- Class room teaching and learning
- Class room sessions can have theory, case studies, MCQ Tests, Quiz, seminars, mini projects, presentation, brainstorming exercises.
- 8 hours of practical assignment and its presentation
- Worked examples and industry insights shall be shared by the faculty members

SYLLABUS

UNIT I: INTRODUCTION TO IFRS AND IFRS FOR SMEs

- Introduction to Conceptual Framework for Financial Reporting 2018 - Introduction to International Financial Reporting Standards
- IFRS Foundation, International Accounting Standards Committee (IASC), IFRS Interpretations Committee (IFRSIC), Standing Interpretation Committee (SIC)
- International Accounting Standards Board (IASB), Financial Accounting Standards Board (FASB), Generally Accepted Accounting Principles (GAAP)
- IFRS vs. IAS and IFRS vs GAAP
- Objectives, Importance and Benefits of IFRS
- Objectives of Financial Statements and General Features In IFRS
- IFRS Adoption and Convergence

- The Institute of Chartered Accountants of India (ICAI) and Indian Accounting Standards (Ind-AS), First Time Adoption of Ind AS (Ind AS 101)
- IFRS vs. Ind-AS
- IFRS for SMEs: History, Scope, Benefits and Eligible Entities
- Difference between IFRS for SMEs and full IFRS

UNIT II - ACCOUNTING POLICIES & FINANCIAL STATEMENT RELATED STANDARDS

- Section 1: Small and medium sized entities
- Section 2: Concepts and pervasive principles
- Section 3: Financial statement presentation
- Section 4: statement of financial position
- Section 5: Statement of comprehensive income and income statement
- Section 6: Statement of changes in equity and statement of income and retained earnings
- Section 7: Statement of cash flows
- Section 8: Notes to the financial statements
- Section 9: Consolidated and separate financial statements
- Section 10: Accounting policies, estimates and errors

UNIT III: FINANCIAL INSTRUMENTS, ASSETS AND LIABILITIES RELATED STANDARDS

- Section 11: Basic financial instruments
- Section 12: Other financial instrument issues
- Section 13: Inventories
- Section 14: Investments in associate
- Section 15: Investments in joint ventures
- Section 16: Investment property
- Section 17: Property, plant and equipment
- Section 18: Intangible assets other than goodwill
- Section 19: Business combinations and goodwill

- Section 20: Leases
- Section 21: Provisions and contingencies Guidance on recognising and measuring provisions
- Section 22: Liabilities and equity Example of the issuer's accounting for convertible debt

UNIT IV: REVENUE AND EXPENDITURE RELATED STANDARDS

- Section 23: Revenue Examples of revenue recognition under the principles in section 23
- Section 24: Government grants
- Section 25: Borrowing costs
- Section 26: Share-based payment
- Section 27: Impairment of assets
- Section 28: Employee benefits
- Section 29: Income tax

UNIT V: TRANSITION TO IFRS FOR SMEs AND OTHER TOPICS

- Section 30: Foreign currency translation
- Section 31: Hyperinflation
- Section 32: Events after the end of the reporting period
- Section 33: Related party disclosures
- Section 34: Specialised activities
- Section 35: Transition to the IFRS for SMEs
- Emerging dimensions in IFRS for SMEs
- An introduction to XBRL reporting and Taxonomy for SMEs
- An introduction to Integrated Reporting for SMEs

Course Outcomes (COs)

1. **CO1:** Understand the conceptual framework of International Financial Reporting Standards (IFRS) for SMEs.
2. **CO2:** Apply IFRS for SMEs to prepare financial statements for small and medium-sized entities (SMEs).

3. **CO3:** Analyze the impact of IFRS for SMEs on financial reporting practices of SMEs.
4. **CO4:** Evaluate the differences between IFRS for SMEs and full IFRS.
5. **CO5:** Demonstrate the ability to communicate financial information effectively using IFRS for SMEs.

BEHAVIORAL FINANCE

COURSE CODE: MBAS128

OBJECTIVE

- To identify and understand systematic behavioral factors that influences the investment behavior.

SYLLABUS

UNIT I

Introduction to Behavioral finance: Nature, scope, objectives and application; The role of security prices in the economy – EMH – Failing EMH – EMH in supply and demand framework – Equilibrium expected return models – Investment decision under uncertainty – Introduction to neoclassical economics and expected utility theory – Return predictability in stock market - Limitations to arbitrage.

UNIT II

Decision And Behavioral Theories: Nash Equilibrium: Keynesian Beauty Context and The Prisoner's Dilemma - The Monthly Hall Paradox - The St. Petersburg Paradox - The Allais Paradox - The Ellsberg Paradox – Prospects theory – CAPM - behavioral portfolio theory – SP/A theory – brief history on rational thought – pasacl – Fermat to Friedman – savage-- Expected Utility Theory [EUT] and Rational Thought: Decision making under risk and uncertainty.

UNIT III

Decision Making Biases: Information screening bias - Heuristics and behavioral biases of investors – Bayesian decision making – cognitive biases – forecasting biases – emotion and neuroscience – group behaviour –investing styles and behavioral finance—Cognitive information perception -Peculiarities (biases) of quantitative and numerical information perception -Representativeness —Anchoring —Exponential discounting -Hyperbolic discounting.

UNIT IV

Arbitrageurs: Definition of arbitrageur - Long-short trades - Risk vs. Horizon - Transaction costs and short-selling costs - Fundamental risk - Noise-trader risk - Professional arbitrage - Destabilizing informed trading.

UNIT V

Managerial Decisions: Supply of securities and firm investment characteristics (market timing, catering) by rational firms - Associated institutions - Relative horizons and incentives - Biased managers.

Course Outcomes (COs)

1. **CO1:** Understand the behavioral biases that influence investor decision-making.
2. **CO2:** Apply behavioral finance concepts to explain market anomalies and investor behavior.
3. **CO3:** Evaluate the impact of behavioral finance on investment strategies and portfolio management.
4. **CO4:** Analyze the role of behavioral finance in financial markets and asset pricing.
5. **CO5:** Develop strategies to mitigate the impact of behavioral biases on investment decisions.

FINANCIAL ANALYTICS

COURSE CODE: MBAS129

COURSE OBJECTIVE

To provide a strong foundation in financial analytics for handling financial data, build advanced models to understand the structures and patterns in financial data and forecast the future performance of a company or an asset.

COURSE OUTCOME

On completion of the course the student should be able to

1. Demonstrate skills in financial statement analysis and decision making
2. Construct and optimize portfolios
3. Evaluate Risk on various financial assets
4. Use the advanced techniques in Python for modelling financial data.

SYLLABUS

UNIT 1: INTRODUCTION TO FINANCIAL ANALYSIS AND TOOLS

Introduction to Financial Analysis- Profitability Analysis - Liquidity Analysis- Solvency Analysis- Efficiency Analysis - Common Size Analysis - DuPont Analysis - Financial Ratio Analysis - Limitations of Financial Analysis- Introduction to Financial Analysis Tools: Excel and Python

UNIT 2: TIME SERIES ANALYSIS USING PYTHON

Introduction to Time Series Analysis - Types of Data and Components of Time Series - Techniques for Decomposition - Detecting and Handling Missing Values in Time Series Data - Time Series Forecasting using Various Models - ARIMA Models - Exponential Smoothing Models - Modeling Volatility using GARCH

UNIT 3: INVESTMENT RISK ANALYSIS

Introduction to Investment Risk Analysis - Measuring Investment Risk - Traditional Risk Measures: Beta, Alpha, and R-squared - Modern Risk Measures: Conditional Value at Risk (CVaR), Value at Risk (VaR), and Tail Risk Measures - Measuring Portfolio Risk and Diversification - Portfolio Optimization and Its Metrics - Robo Advisory Platforms and Investment Risk Management - Case Studies

UNIT 4: CREDIT RISK ANALYSIS AND MANAGEMENT

Understanding Credit Risk and Its Management - Internal and External Credit Risk Models - Credit Scoring Models for Retail and SME Segments - Risk-Based Pricing and Mitigation Techniques - Applications of Machine Learning Techniques in Credit Risk - Credit Risk Metrics and Regulatory Requirements - Credit Risk Data Analysis Using Python - Case Studies

UNIT 5: FINANCIAL ANALYTICS FOR BUSINESS DECISION MAKING

Analytics for Revenue Management, - Analytics for Cost Management - Analytics for Cash Management - Analytics for Working Capital Management - Analytics for Budgeting and Forecasting, - Analytics for Financial Planning and Analysis - Analyzing Financial Performance Reports

COURSE OUTCOMES (COS)

1. CO1: Apply financial analysis techniques to evaluate the financial performance of a company.
2. CO2: Construct and interpret financial models to forecast financial performance.
3. CO3: Analyze financial statements to assess a company's financial health and position.
4. CO4: Evaluate investment opportunities using valuation techniques.
5. CO5: Utilize financial data to support strategic decision-making.

NGO MANAGEMENT

COURSE CODE: MBAS130

OBJECTIVES

- To enable students, gain theoretical knowledge and practical insight about the working of NGOs;
- To capacitate students to effectively manage a NGO.

METHODOLOGY

Teaching and Learning involves multiple and varied pedagogical tools with an emphasis on interactivity, which include the following:

Classroom Lectures, Group Discussion on selective Articles taken from Newspapers, Magazines, Journals, Online Sources and Various Reports about NGOs.

Seminar Presentations, Written Assignments, Role Plays and Field Visits.

ILLUSTRATIVE EXERCISE

Students will be asked to visit a NGO and assess its working so that they gain real time exposure about the functioning of NGOs.

SYLLABUS

UNIT I

NGOs: Meaning and definition, Characteristic features, functions, Kinds, functioning;

Problems encountered by NGOs; Identification of problems encountered by NGOs-

Strengthening Boundary Efforts; Role of Management in solving problems; Environmental conditions under which NGOs operate.

UNIT II

Understanding the Context of NGO Operations; Aid to Development; Poverty and Development; Poverty and Exploitation; Poverty and Vulnerability; Poverty and Powerlessness; Dependency to Sustainability;

Development Indicators; Governance and Management of NGOs; Need for Good Governance for NGOs; Ethical Challenges for NGOs; Leadership of NGOs; Need for Leadership with Values.

UNIT III

Understanding Organization structure; Organization Development; Strategy and Planning; Strategy in the Management World; Elements of a Strategic Plan; Core Values and Strategic Goals; SWOT Analysis: Meaning of Strengths and Weaknesses; Criteria for Determining Strengths and Weaknesses; Measuring Strengths and Weaknesses; Alternative formats to Analyze Strengths and Weaknesses; Identifying the Strengths and Weaknesses; Matching Strengths and Weaknesses; The Concept of Synergy.

UNIT IV

Planning, Organizing, Delegating, controlling and Coordinating NGOs; Core Competency and Capacity Building; Human communication; Models of communication; Principles of communication; channels of communication; Process of communication; Barriers of effective communication; characteristics of effective communication; importance and Scope of Communication; Importance of feedback in communication; Principles for effective feedback; Interpersonal Communication and Group Communication.

UNIT V

Definitions and History of Computers; Using Information Technology devices like Radio, Mobiles, computers and Internet in managing NGOs; General Guidelines in Preparing Reports; Procedure of Reporting; Stages in Reporting; Long and short Reports.

Course Outcomes (COs)

1. **CO1:** Understand the concept, principles, and evolution of NGOs.
2. **CO2:** Analyze the role of NGOs in social development and change.
3. **CO3:** Develop strategies for effective NGO management and leadership.
4. **CO4:** Evaluate the financial sustainability and resource mobilization of NGOs.
5. **CO5:** Understand the challenges and opportunities facing NGOs in the contemporary world.

CORPORATE REPORTING AND DISCLOSURE

COURSE CODE: MBAS131

OBJECTIVES

- To introduce the concept of Corporate Reporting.
- To make them understand the Indian and International Regulatory Environment of Corporate Reporting
- To make them learn the various Theories of Disclosure.
- To update them with the recent trends in corporate financial reporting
- To update them with the emerging dimensions of corporate reporting.

METHODOLOGY FOR COVERING SYLLABUS

- Teaching through lectures, case studies and discussions.
- Assignments based on annual reports and data from CMIE Prowess databases.
- Brain Storming Session on Sustainability Reporting Practices.
- Quiz Programme on each UNIT to ensure conceptual clarity

SYLLABUS

UNIT I - INTRODUCTION TO CORPORATE FINANCIAL REPORTING

Financial Reporting: Introduction, Evolution, Concept and Objectives - The Origins of Stewardship - Corporate Governance – Modes of Financial Reporting - Qualitative Characteristics of Accounting Information - Users of Financial and Accounting Information - The Role of Accounting Information – Dimensions of Accounting Quality – Published Financial Statements - Corporate Reporting Practices in India.

UNIT II– REGULATORY ENVIRONMENT AND FINANCIAL REPORTING

International Accounting Standard Committee (IASC) - Emergence of the International Accounting Standards Board (IASB) - International Financial Reporting Standards Foundation (IFRS Foundation) – Financial Accounting Standard Board (FASB) - Institute of Chartered Accountants of India (ICAI) - National Differences in Financial Reporting - Accounting Standards – History and Evolution: International Accounting Standards (IAS), International Financial Reporting Standards (IFRS) and Ind AS - Convergence of Indian Accounting Standards with IFRS.

UNIT III –THEORIES OF CORPORATE DISCLOSURE

Theories of Disclosure – Agency Theory – Stakeholders Theory – Signalling Theory – Capital Need Theory - Legitimacy Theory – Institutional Theory - Board Capital Theory – Critical Mass Theory - Motives Behind Disclosure – Basic Problems of Disclosure – Disclosure Requirements Under Companies Act, 2013 - Role of MCA and SEBI - Disclosure by Listed Companies - Disclosure requirements by RBI, IRDA and PFDR – Narrative Disclosure – Mandatory v/s Voluntary Reporting.

UNIT IV – TRENDS IN CORPORATE REPORTING

Segment Financial Statements – Multiple Financial Statements – Interim Financial Statements – Forecast Financial Statements – Simplified Financial Statements – Cash flow Financial Statements – Employee Financial Statements – Human Resource Financial Statements – Social Responsibility Statements – Value Added Financial Statements – Concept of Tripple Bottom Line Reporting – Environment , Social and Governance (ESG) Reporting - Sustainability Reporting - Monitoring and Measuring Sustainability Performance - Sustainability Related Guidelines, Management Standards and Indices: NVG for ESG, Global Reporting Initiative (GRI), Sustainability Accounting and Standard Board (SASB), Business Responsibility Reporting (BRR) – Verification and Assurance of Sustainability Reports.

UNIT V – EMERGING DIMENSIONS OF CORPORATE REPORTING

Integrated Reporting - IIRC Framework- Strategy and Business Model in Integrated Reporting- Elements of Integrated Reporting - Financial Capital - Manufactured Capital - Human Capital - Intellectual Capital 1- Social and Relationship Capital - Natural Capital- Materiality and Connectivity of Capitals - Current Integrated Reporting Practices: Global and Indian - Reporting through XBRL (eXtensible Business Reporting Language) – XBRL International – Features and Advantages of XBRL - An Introduction to XML - Differences Between XML and XBRL - Working Principle of XBRL taxonomies - Adoption of XBRL In India- XBRL for Integrated Reporting - Block Chain for Financial Accounting & Auditing - Block Chain for Corporate Reporting - Advantages of Block Chain in Corporate Reporting - Web Based Corporate Reporting- Real-Time Reporting- Financial Reporting and Business Intelligence - Financial Reporting Analytics.

Course Outcomes (COs)

1. **CO1:** Understand the concept of corporate reporting and its role in stakeholder communication.
2. **CO2:** Analyze the regulatory framework governing corporate reporting in India and internationally.

3. **CO3:** Evaluate the different theories of disclosure and their implications for corporate reporting.
4. **CO4:** Prepare financial statements and disclosures in accordance with relevant reporting standards.
5. **CO5:** Assess the emerging trends and challenges in corporate reporting.

ILLUSTRATED EXERCISES

1. Assignments based on data collection from CMIE Prowess to prepare ESG performance of corporate – 5 Marks
2. Students have to collect minimum of 3 research papers related to CORPORATE REPORTING from journals and viva will be conducted based on those research papers – 5 Marks
3. Brain Storming Session on Sustainability Reporting Practices – 5 Marks
4. Quiz programme based on topics in syllabus – 5 Marks
5. Practical Assignment based on Integrated Reporting Case Study – 5 Marks

HUMAN RESOURCE MANAGEMENT

ADVANCED ORGANIZATION BEHAVIOUR

COURSE CODE: MBAS201

COURSE OBJECTIVES

- To provide a basic foundation on concepts, and principles of Individual, Groups and

ORGANISATION

- To learn and acquaint advances in Organisational Behaviour.
- To demonstrate the application of advanced concepts in OB in the organisation.
- To improvise decision-making ability considering Human aspects in the organisation.

METHODOLOGY

- Class sessions comprise a mixture of lectures, interactive discussions, role play, case presentations, gamification of concepts and problem solving.

SYLLABUS

UNIT I

Individual Behaviour: Meaning, Definition, Individual differences, principles, Factors affecting individual attributions. Concept of individual well-being: Burn Out and Life satisfaction. Meaning of work group, Formation and composition of group, Necessity of work groups, Group

Link in Organizational Practices. Framework of Work Group factors: Group Task, Group Process, Group Cohesion, Group Structure. Organisational Learning: Meaning, Definition, Theories of OL, learning processes, Enablers of OL, Linking OL and Knowledge Management.

UNIT II

Organizational citizenship behavior (OCB)- Introduction, Definition, Origin, Dimensions of OCB, Individual level and Organisational level OCB, Pro-social organizational behavior, Employee Extra-Role Behaviors, Counterproductive work behavior (CWB), Cultural Variations

UNIT III

Psychological Capital-Definition, Meaning, Dimensions of Psychological capital- Hope, Selfefficacy, Optimism, Resiliency. Scope and Application of Psychological capital in organization. Relationship between Positive Psychological Capital, stress, OCB and different organizational outcomes- performance, satisfaction, supportive climate and organizational change- and its measurement.

UNIT IV

Emotional intelligence- Definition, Meaning, dimensions of emotional intelligence, Personality traits- perception, intelligence and attitude; - MSEIT-Goalman's model-Bar- on Reuven model, Application of emotional intelligence in organization; Emotional intelligence- positive and negative work outcomes.

UNIT V

Spirituality in workplace: Meaning, definitions and history, need for spiritual workplace, fundamentals of spiritual workplace, HRM and workplace spirituality; Individual and Organisation contribution towards a spiritual workplace. Conceptualizing Workplace Spirituality — reconciling professional and personal values, spiritual wellness in workplace.

COURSE OUTCOMES:

CO1: Define organizational learning (OL) and discuss its importance, theories, learning processes, and enablers.

CO2: Analyze cultural variations in OCB and CWB.

CO3: Examine the relationship between Positive Psychological Capital, stress, OCB, and various organizational outcomes such as performance, satisfaction, supportive climate, and organizational change.

CO4: Explore models of Emotional Intelligence such as the MSEIT, Goleman's model, and Bar-On's model.

CO5: Explore individual and organizational contributions towards creating a spiritual workplace.

COMPENSATION MANAGEMENT

COURSE CODE: MBAS202

OBJECTIVES

- To understand the various dimensions of Compensation Management
- To know how the compensation options are determined
- To gain awareness of the role of various bodies involved in Compensation Management

METHODOLOGY

Theories and core concepts will be learnt through lectures, case discussions and industry-based field work.

SYLLABUS

UNIT I

Job Evaluation – Definition – Traditional and new Techniques – Performance Appraisal – Basic concepts – Performance standard – Appraisal methods.

UNIT II

Compensation – Definition – Classification – Types – incentives – fringe benefits.

UNIT III

Theories of wages – wage structure – wage fixation – wage payment – salary administration.

UNIT IV

Rewards for sales personnel – pay – commission – pay and commission – performance-based pay system – incentives – Executives compensation plan and packages.

UNIT V

Wage Boards – Pay Commissions – Compensation Management in Multi-National organizations.

Course Outcomes

CO1: To know how the compensation options are determined

CO2: To analyze about the different structures of wages

CO3: To evaluate the reward system and executives' compensation plan and packages

CO4: To identify the wage board and pay commissions of MNC's

CO5: To understand the various dimensions of Compensation Management

ILLUSTRATIVE EXERCISE

- Each student chooses an organization, study the compensation package system and prepare a report.

CROSS CULTURE BUSINESS MANAGEMENT

COURSE CODE: MBAS203

OBJECTIVES

- To provide conceptual framework of global business environment
- To understand the cross culture and its effects on organizations
- To highlight the culture-communication link
- To understand negotiation styles and manage negotiation
- To learn about developing international and global strategies
- To understand the nuances of staffing for global operations and building global management teams

METHODOLOGY

Lectures, Case studies, Application exercises, Group or Class learning activities, Experiential Exercises

SYLLABUS

UNIT I

Introduction: Concept of Culture for a Business Context; Brief wrap up of organizational culture & its dimensions; Definition of CCM [cross culture management]; Role and Significance of CCM to managerial personnel and to the organizations in the global competitive market economy; Theoretical Foundations of CCM; Horizons in Cross Culture Management; Cultural Background of business stake-holders [managers, employees, shareholders, suppliers, customers and others] – An Analytical frame work.

UNIT II

Culture and Global Management: Global Business Scenario and Role of Culture – A Frame work for Analysis; Elements & Processes of Communication across Cultures; Communication Strategy for/of an Indian MNC and Foreign MNC [with 3 illustrations on each drawing from different geo economic and social contexts] & High-Performance Winning Teams and Cultures; Culture Implications for Team Building.

UNIT III

Cross Culture – Negotiation & Decision Making; Process of Negotiation and Needed Skills & Knowledge Base – Overview with two illustrations from multi-cultural contexts [India–Europe/ India – US settings, for instance]; International and Global Business Operations – Strategy Formulation & Implementation; Aligning Strategy, Structure & Culture in an organizational Context.

UNIT IV

Global Human Resources Management – Staffing and Training for Global Operations;

Developing a Global Management Cadre; Motivating and Leading; Developing the values and behaviours necessary to build high-performance organization personnel [individuals and teams included]

UNIT V

Corporate Culture: The Nature of Organizational Cultures; Quality and Cross-Culture; Diagnosing the As-Is Condition; Designing the Strategy for a Culture Change Building; Adjusting in a New Culture – Stages of Cultural Adjustment and Stages of Culture Shock; Successful Implementation of Culture Change Phase; Measurement of ongoing Improvement.

Course Outcomes:

CO1: Define Cross-Culture Management (CCM) and its significance to managerial personnel and organizations in the global competitive market.

CO2: Evaluate the cultural implications for team building and high-performance winning cultures.

CO3: Examine the process of negotiation and the skills and knowledge required, with a focus on multicultural contexts (e.g., India-Europe, India-US settings).

CO4: Foster the development of values and behaviors necessary for building high-performance organizational personnel.

CO5: Implement successful culture change phases and measure ongoing improvement in organizational culture.

GLOBAL HR PRACTICES

COURSE CODE: MBAS204

OBJECTIVES

- To understand the concept of globalization in HR perspective
- Outline some key aspects and contemporary issues in IHRM
- To know about the developments and challenges in globalizing HR functions and practices.

METHODOLOGY

Each lecture addresses a particular theme central to the study of 166. Each class would involve a small group discussion and activity format. Each workshop will discuss the application of theory to case studies and description of intelligence drawn by the students through assignments / mini-project experience. There will be rather high degree of interaction and participation in this course. If feasible, there will also be a few guest-lectures from seasoned professionals from the industry and academic researchers to dwell on the topics connected to IHRM and recent-past trends.

SYLLABUS

UNIT I

Introduction- Growth of International Business and Globalization; Operational Objectives and Means of Globalization – An HR Perspective; Use of Balanced Score Card to bring out the linkages among people, strategy and performance; Choosing an International Competitive Strategy; Forms or Operations.

UNIT II

HR Challenges & Opportunities: National Difference Facing Operations – Domestic & MNC Perspectives; Linkages among Countries; Governance of Operations; Individual and Company Concerns; Multi cultural orientation to employees; Research and documentation orientation in global organizations; Data Management; Ethical and Socially Responsible Behaviour; Careers in International Business.

UNIT III

HR Policy Frame & Operations in a Global Setting: Distinctive Features of HR Functions [Planning, Organizing, Directing & Control] and Operations [Manpower Plan to Separation] in a Global Set-up and the related HR Practices such as Staffing, Skill & Knowledge Development, Incentive & Compensation Package; Motivational Systems, Reporting Relationships; Performance Appraisal Systems; Employee Empowerment; Value Systems; Shared Corporate Culture and Grievance Handling – Reactive & Proactive Mechanisms.

UNIT IV

Change Management Model: Appreciating Change: Industry Analysis; Business Models; Mobilizing Support; Executing Change; Building Change Capability; Leadership and Change; Diversity as enhancer of learning and effectiveness within groups and organizations; HR to develop global organizational learning systems.

UNIT V

Quality Performance in Knowledge Based Organizations: Technology – Behavioural & Technical – for HRM; Universal Quality Standards & HRM – Illustrations from PCMM & EFQM; Eastern Management Thought for Global Management with Illustrations from Sri Aurobindo’s Writings & Practices thereof in the areas such as Commitment, Quality, and Stress-Free orientation.

COURSE OUTCOMES:

CO1: Understand the evolution and growth of international business and globalization.

CO2: Analyze challenges and opportunities related to multiculturalism in international HR.

CO3: Evaluate HR practices including staffing, skill development, incentive systems, and compensation packages in an international context.

CO4: Understand change management models and their application in international business.

CO5: Analyze universal quality standards and their integration with HRM practices.

ILLUSTRATIVE EXERCISE

The course will be conducted in a seminar environment and will use a combination of class lectures, case studies, key research paper discussions, and tutorials. Students will also be expected to have read the assigned reading materials for each session and come prepared in class for active participation

- Class seminars - The students will have to give seminars to the class on the readings that will be assigned by the instructor based on the course outline.
- Case study analysis - This will contain a series of case studies throughout the course highlighting various international HRM issues. The students would be required to analyze these in groups of 2 members and make presentations to the entire class. A written report of their analyses will also have to be submitted for each case in hard copy to the instructor.
- Practice report - The students in dyads would be required to identify a multinational company of their choice and undertake an in-depth study about a particular international HRM practice that the company undertook in the last 2 years. The students need to submit report of their findings and make suggestions to overcome/solve the issue studied in the form of a soft copy report between 2000 to 2500 words including proper referencing.

The Internal mark is awarded based on the components and displayed in the notice board before the commencement of the semester-end examination.

HR ANALYTICS

COURSE CODE: MBAS205

OBJECTIVE

- To understand and improve the value of the Human resource
- To familiarize the use and application of workforce analytics, to maximize return on human capital.

METHODOLOGY

- Lectures, Group Discussion, Case Studies
- Seminar Presentations, Laboratory assignments, Field works

SYLLABUS

UNIT I: INTRODUCTION TO HR ANALYTICS

Meaning of HR analytics, Definition of analytics, Need for HR Analytics, Leading Practices for Improved Organizational Performance, Contribution of HR Analytics, Approaches to HR Analytics, Human Resources analytics applications, Role of HR in building organizational capabilities.

UNIT II: HR INTELLIGENCE FRAMEWORK:

Human Capital Maturity Framework- leadership practices; engagement practices; access to knowledge practices. People research & analytics practices; HR intelligence cycle; Organizational Intelligence Model (OIM); HR intelligence implementation, HR Scorecard; Workforce Scorecard; constructing HR scorecard.

UNIT III: STAFFING METRICS

Recruiting tools and practices an overview, measure the quality of hire, measuring the quality of applicants. Measuring the costs of hiring. Recruitment Analytics and On Boarding Analytics Staffing Analytics Performance & Skill Gap Analytics Attrition metrics – techniques used to calculate attrition, manpower planning metrics – push and pull model.

UNIT IV: DEVELOPMENT METRICS

Training ROI, Training evaluation models, tracking the value of career management, measurement, performance metrics, EFQM, and Baldrige criteria, The Intuitive, non-analytic framework for Performance Management; The Targeted Analytics to improve Talent Decisions

UNIT V: COMPENSATION METRICS

Calculating various wage/salary related measures. Variable pay systems, types of executive

compensation, quantitative application in compensation – percentiles, cost benefit analysis, and comp ratios. Mistakes in compensation designing. Employee benefits, Calculation of incentives, measuring the impact of weak incentives. Monitoring planned and unexpected absence, the cost impact of unplanned absences and staffing.

COURSE OUTCOMES

- CO1: Describe the HR analytics and find the leading practises for improved organization performance with listing of approaches to HR analytics and recall the role of HR in building Organizational capabilities
- CO2: Discuss about Human Capital Maturity framework and classify the different practices of HR intelligence with generalizing the different models and scorecard of HR Workforce
- CO3: Measuring the quality of hire, quality of applicants and cost of hiring with over viewing the recruiting tools and practices. Determine the attrition metrics and manpower metrics techniques and push and pull model
- CO4: Enumerate the training ROI, value of career management and performance metrics and describe the EFQM and Baldrige criteria and framework for performance management
- CO5: Identify the different types of executive compensation and quantitative application in compensation with calculating wage/salary related measures. List out the employee benefits and calculation of incentives to employees calculating wage/salary related measures.

HRIS [Human Resources Information System]

COURSE CODE: MBAS206

OBJECTIVES

- To introduce the concepts of Human Resources Information System
- To enable the students to appreciate the application of HRIS in Organizations.
- To enable them to understand the availability of the existing Software for HRIS and evaluate them.
- To survey the use of HRIS in organizational contexts and submit reports for evaluation.

METHODOLOGY

Power point presentation, Participative type classes, case study, Assignments, Test, Company visit and field study, Seminar.

SYLLABUS

UNIT I

Introduction: Data & Information needs for HR Manager; Sources of Data; Role of ITES in HRM; IT for HR Managers; Concept, Structure, & Mechanics of HRIS; Programming Dimensions & HR Manager with no technology background; Survey of software packages for Human Resource Information System including ERP Software such as SAP, Oracles Financials and Ramco's Marshal [only data input, output & screens].

UNIT II

Data Management for HRIS: Data Formats, Entry Procedure & Process; Data Storage & Retrieval; Transaction Processing, Office Automation and Information Processing & Control Functions; Design of HRIS: Relevance of Decision-Making Concepts for Information System Design; HRM Needs Analysis – Concept & Mechanics; Standard Software and Customized Software; HRIS – An Investment

UNIT III

HR Management Process & HRIS: Modules on MPP, Recruitment, Selection, Placement; Module on PA System; T & D Module; Module on Pay & related dimensions; Planning & Control; Information System's support for Planning & Control;

UNIT IV

HR Management Process II & HRIS: Organization Structure & Related Management Processes including authority & Responsibility Flows, and Communication Process;

Organization Culture and Power – Data Capturing for Monitoring & Review; Behavioral Patterns of HR & other Managers and their place in information processing for decision making;

UNIT V

Security, Size & Style of Organizations & HRIS: Security and Data and operations of HRIS Modules; Common problems during IT adoption efforts and Processes to overcome Orientation & Training Modules for HR & other functionaries; Place & Substance of HRIS & SMEs – Detailed Analytical Framework; Opportunities for combination of HRM & ITES Personnel; HRIS & Employee Legislation; An Integrated View of HRIS; Why & How of Winners and Losers of HRIS orientation.

COURSE OUTCOMES:

CO1: Describe the concept, structure, and mechanics of HR Information Systems (HRIS).

CO2: Explain data storage and retrieval methods in HRIS.

CO3: Identify and describe modules in HRIS related to Manpower Planning & Budgeting (MPP), Recruitment, Selection, and Placement.

CO4: Analyze organizational structures and related management processes, including authority flows and communication processes.

CO5: Evaluate the role and application of HRIS in Small and Medium-sized Enterprises (SMEs) through an analytical framework.

ILLUSTRATIVE EXERCISE:

1. Submit a Performance Appraisal format for comprehensive evaluation of an employee.
2. Submit a report on the HR I System in an organization of your choice.
3. Analyze an HRIS of an Organization and submit a report on the areas of improvement.
4. Submit a list of Software on HRIS and offer your comments

HRM IN KNOWLEDGE BASED ORGANIZATIONS

COURSE CODE: MBAS207

OBJECTIVES

- To understand the challenges of KBOs and HR Mechanisms to manage them effectively for the benefit of both the organization and its stakeholders
- To appreciate the values of autonomy, accountability and, acknowledgement

METHODOLOGY

1. Brief introduction to every topic with the references and encouraging the participants to interact during the class.
2. Conducting class-room presentations and case study discussions; the participants collect substantive material from the library and the net databases.
3. Organizational visit to acquaint with the practices vis-à-vis the learnt inputs.
4. The classroom faculty inputs are associated with, wherever feasible, the interactions of organizational personnel as also with others from the fraternity.

SYLLABUS

UNIT I

An Introduction to life in organizations; Concept and Characteristics of KBOs; Dimensions of HRM in KBOs; New Role and Challenges for HRM in the KBO.

UNIT II

Managing Knowledge for organizational effectiveness – Process and Methods; Concept of Intellectual Capital and Learning Orientation in the Organizations; Knowledge and Role related issues; Performance Appraisal in a KBO – Discussion.

UNIT III

Managing Knowledge and OPH (Personnel and Organizational Health); Rewarding Knowledge; Management of Retention and KBO.

UNIT IV

ICTs in HRM in KBO: HRIS for a KBO – Concept, Mechanics, and Software Orientation; Performance Management – Mechanics and One Illustrative Process.

UNIT V

Comprehensive Case Study on HRM in a KBO – Collection and Compilation of the material by the participants under the guidance of the Resource Person.

COURSE OUTCOMES:

- CO1: Understand the concept of knowledge-based organizations (KBOs) and their characteristics.
- CO2: Describe the processes and methods for managing knowledge in organizations.
- CO3: Examine strategies for managing knowledge and enhancing organizational and personnel health.
- CO4: Understand the role of Information and Communication Technologies (ICTs) in HRM, specifically focusing on HR Information Systems (HRIS).
- CO5: Collect and compile relevant material related to HRM in a KBO.

2. www.citehr.com

ILLUSTRATIVE EXERCISE

- Mini-research assignments / projects
- Interviews with industry professionals on the growing need for orienting HRM in

KBO as practice area

- Case study analysis and presentation
- The Internal mark is awarded based on the components and displayed in the notice board before the commencement of the semester-end examinations.

INDUSTRIAL RELATIONS & LABOUR LEGISLATION

COURSE CODE: MBAS208

OBJECTIVES

- To provide an exposure of theories, techniques and approaches to manage industrial relations.
- To provide an exposure to the management students who intend to take up HRM & IT as their vocation.

METHODOLOGY

Theories and core concepts will be learnt through lectures, case discussions and industry-based field work.

SYLLABUS

UNIT I

Introduction - Concept and Determinants of Industrial Relations – Industrial Relations in India-Managing IR Changes.

UNIT II

Trade Unions-Purpose, Functions and Structure of the Trade Unions- Multiplicity of Trade Unions-Conflict Resolutions-Social Responsibility of Trade Unions.

UNIT III

Discipline and Grievance Redressal Machinery- Purposes and Procedures of Disciplinary Action-Grievance Redressal Procedures-Conciliation-Arbitration and Adjudication-collective Bargaining (Perspective, Bargaining Structure, Procedure and Machinery for Collective Bargaining)- The Bargaining Process-Strength and Skills-Employee Counselling-ILO-ILC.

UNIT IV

Factories act 1948 – contract labour act 1970 – the shops and establishment act 1947 – the trade union act 1926 – the industrial disputes act 1947 - Payment of wages act 1936 – payment of bonus act 1965 – payment of gratuity act 1972

UNIT V

The Employees state insurance act 1948 – The employee’s provident funds and miscellaneous act 1952 – workmen’s compensation act 1923 – the Employees’ pension scheme 1995 – Maternity Benefit Act – Information Technology Act 2006 – Consumer Protection Act 1986.

Course Outcomes (COs)

1. CO1: Understand the evolution and contemporary challenges of industrial relations.
2. CO2: Analyze the legal framework governing industrial relations in India.
3. CO3: Develop strategies for effective labor-management relations.
4. CO4: Evaluate the impact of industrial relations on organizational performance.
5. CO5: Understand the role of trade unions in industrial relations and their impact on organizational outcomes.

ILLUSTRATIVE EXERCISE

- Each student chooses an organization-interview HR managers- Trade Union leaders – prepare a report.
- Each student prepares at least 3 cases for each of the act they study and a consolidated report is made at the end.

KNOWLEDGE MANAGEMENT

COURSE CODE: MBAS209

OBJECTIVE

To impart the basic concepts of knowledge management and to make the students understand the processes and practises in knowledge management in various organisation.

SYLLABUS

UNIT I

Introduction - History, Concepts, Definitions and the Antecedents of KM - Information Management to Knowledge Management - Knowledge Management: What Is and What Is Not? - The Evolution of Knowledge Management - Explicit Knowledge, Tacit Knowledge and the Infrastructure Knowledge Management and Ethics.

UNIT II

KM cycle – Major approaches to KM cycle, Integrated KM cycle – strategic implications – practical considerations – KM models – Theoretical models – Nonaka’s knowledge spiral model – other KM models – Strategic implications – practical implications.

UNIT III

Knowledge capture and codification – Tacit knowledge capture – Explicit knowledge codification - Knowledge sharing – social nature of knowledge, knowledge sharing communities, obstacles to knowledge sharing, organisational learning. Knowledge application – at individual, group and organisational levels – knowledge reuse –knowledge repositories

UNIT IV

Role of organisational culture – different types of culture – culture analysis-culture at the foundation of KM – Knowledge sharing culture – KM Maturity models – KM tools – content creation, data mining, blogs, content management, groupware and collaboration, wikis, networking technologies, intelligent filtering tools, adaptive technologies – KM strategy-knowledge audit, gap analysis, benchmarking, balanced score card method , house of quality

UNIT V

KM teams – Role of senior management – Roles and responsibilities – KM profession – Ethics of KM – Future challenges of KM – Shift to Knowledge based assets, KM research issues – Postmodern KM.

COURSE OUTCOMES:

- CO1: Understand the historical evolution of Knowledge Management (KM) and its conceptual foundations.

- CO2: Evaluate various KM models, including Nonaka’s knowledge spiral model and other theoretical frameworks.
- CO3: Explore the social nature of knowledge sharing and its impact on organizational learning.
- CO4: Examine the role of organizational culture in Knowledge Management.
- CO5: Describe the roles and responsibilities of KM teams and senior management in implementing KM initiatives.

MANAGEMENT OF CHANGE & DEVELOPMENT

COURSE CODE: MBAS210

OBJECTIVES

- To understand the forces that stimulate change
- To understand the necessity for change
- To understand the resistance to change
- To manage the change process and
- To understand the concept and techniques of OD
- To enable the skills for the application of OD in organizations.

METHODOLOGY

Theories and core concepts will be learnt through lectures, case discussions and industry-based field work.

SYLLABUS

UNIT I

Change – stimulating forces – planned change – change agents – unplanned change – Model of organisational change – Lewin's three Step Model.

UNIT II

Resistance to change – individual factors – organisational factors – techniques to overcome change.

UNIT III

Change programs – effectiveness of change programs – change process – job redesign – socio-technical systems.

UNIT IV

OD – basic values – phases of OD – entry – contracting – diagnosis – feedback – change plan – intervention – evaluation – termination.

UNIT V

OD intervention – human process interventions, structure and technological interventions and strategy interventions – sensitivity training – survey feedback, process consultation – team building – inter-group development – innovations – learning organizations.

COURSE OUTCOMES:

- **CO1:** Understand the concept of change within organizations, including stimulating forces and types of change.

- **CO2:** Evaluate techniques and strategies used to overcome resistance to change.
- **CO3:** Evaluate the effectiveness of change programs based on different organizational contexts.
- **CO4:** Define Organizational Development (OD) and its basic values.
CO5: Evaluate different types of OD interventions, including human process interventions, structural and technological interventions, and strategic interventions.

QUALITY PERFORMANCE MANAGEMENT

COURSE CODE: MBAS211

OBJECTIVE

The paper intends to internalize quality orientation through knowledge about and adoption of QPM Mechanisms in practice

METHODOLOGY

The classroom lectures, interactive discussions & presentations, case-study based teaching, case-lets, primary [where feasible] and secondary data compilation on QPM Practices in 5 organizations form part of the methods of coverage of syllabus.

SYLLABUS

UNIT I

Quality Performance Management – Concept – Dimensions – Mechanics – Features of Facilitating Organisations for Performance – Organizational Dynamics and Employee Performance – A Multi-Dimensional Analysis.

UNIT II

Work place and Its Improvement Through 5S – Modern Management Techniques (such as KAIZEN) and Management of Employee Performance – Team Building – Concept, Culture, Methods, Effectiveness & Empowerment, Problems – Potential and Perspectives.

UNIT III

Organizational Structure and Employee Motivation and Morale – Contemporary Thinking on Employment Practices (Tenure Employment) and Work Schedules (Flexitime) and the Related Performance Appraisal Systems; Quality Circle – Features – Process – Pre- requisites for their Efficiency.

UNIT IV

Industrial Restructuring – Reward System and Employee Productivity [Case Studies]; Quality Standards and Employees Dimensions – Illustrations on HR Dimensions drawn from CMM.

UNIT V

Quality Performance Management – Indian and Western Thought in a Market era, Performance Management from the Writings of Sri Aurobindo and the Mother Integrated Studies Dealing with Methods, Techniques, and Processes.

Course Outcomes:

- CO1: Evaluate the impact of organizational dynamics on employee performance through a multi-dimensional approach.
- CO2: Evaluate the role of modern management techniques (e.g., KAIZEN) in enhancing employee performance.
- CO3: Explain the concept, features, and prerequisites for efficient Quality Circles.
- CO4: Discuss quality standards and their implications on employee dimensions, drawing examples from CMM (Capability Maturity Model).
- CO5: Integrate studies dealing with methods, techniques, and processes in Quality Performance Management.

ILLUSTRATIVE EXERCISE

- The exercise on approach to transform a NON QPM organization into a QPM Organization
- An exercise on 5S
- An exercise on Kaizen
- Appreciation of an organization either from primary or secondary sources with QPM Perspective
- Class-room presentation on a topic of interest

The Internal mark is awarded based on the components and displayed in the notice board before the commencement of the semester-end examinations.

STRATEGIC HUMAN RESOURCE DEVELOPMENT

COURSE CODE: MBAS212

OBJECTIVES

- To understand the evolution of HRD, the functions of HRD, Linkage of HRD with organizational goals and strategies
- To recognize the roles and competencies of HRD professionals
- To understand the frame work of Human Resource Development
- To identify the content, outcomes and the process of HRD applications
- To evaluate and understand diversity issues and their impact on organizations and HRD

METHODOLOGY

The case-study approach to bring out the strategic orientation of an organization towards her HRD, appreciation of organizational context vis-à-vis strategic or otherwise orientation of HRD approaches in an organization, among others, form part of the methodology of covering the syllabus.

SYLLABUS

UNIT I

Introduction to Human Resource Development: Meaning, definition of HRD, Evolution of HRD, Relationship with HRM, Human Resource Development functions, Roles and competencies of HRD professionals, Challenges to organization and HRD professionals.

UNIT II

Frame work of Human Resource Development: HRD processes, Assessing HRD needs, the HRD model, designing effective HRD program, HRD interventions, Creating HRD programs, Implementing HRD programs, training delivery methods, self-paced/computer based training, Evaluating HRD programs, models and frame work of evaluation, assessing the impact of HRD programs.

UNIT III

Human Resource Development Applications: Fundamental concepts of Socialization, models of socialization, Realistic job review, Assessment, determination and evaluation of Orientation programs. Coaching- need, coaching and performance management, skills for effective coaching, Employee counseling and wellness services – Counseling as an HRD activity, counseling programs, Issues in employee counseling, employee wellness and health promotion programs.

UNIT IV

HRD strategies for competitive advantage: Organizational strategies based on human

resources, productivity as an HR based strategy, Quality and services as HR based strategies. Management of Human resource surplus and shortage- Work force reduction and realignment, downsizing and outplacement services, HR performance and bench marking, retention of Human resources, its determinants and retention management process, Decision about compensation levels and competency-based pay.

UNIT V

HRD and Globalization: Globalization of business and their impact on HRD- Diversity of work force, Discrimination, Equal employment opportunity, managing diversity and diversity training, HRD programs for diverse employees. Global assignment management- Staffing global assignment, Pre-departure orientation and training, Expatriate & Repatriate support and development, international compensation.

Course Outcomes:

- CO1: Discuss the evolution of HRD and its historical development.
- CO2: Outline the HRD processes and their significance in organizational development.
- CO3: Analyze the role of counseling as an HRD activity.
- CO4: Analyze productivity as a strategic HRD initiative.
- CO5: Analyze the globalization of businesses and its impact on HRD practices.

ILLUSTRATIVE EXERCISE

- Appreciation of SHRM Practices in 3 organizations
- Book Review
- Interactions with senior level [C – Suite] professionals – both from HR and other functional areas – to have their views on learnt SHRM inputs
- Presentation on an empirical evidence of SHRM orientation in an organization
- The Internal mark is awarded based on the components and displayed in the notice board before the commencement of the semester-end examinations.

STRESS MANAGEMENT

COURSE CODE: MBAS213

OBJECTIVES

- To understand the concept of stress management.
- To increase awareness about the impact of mental and physical wellbeing.
- To motivate the students to assume a greater sense of personal responsibility.
- To understand the importance of using effective coping skills to resolve stress.
- To learn about and experience several relaxation techniques to control stress and tension.

METHODOLOGY

Lectures, Group discussions, Seminar, Guest Lecturer, Case study, Meditation, Yoga.

SYLLABUS

UNIT I

Concept of stress – Definition and Nature. Types of stress- eustress and distress – acute and chronic – hyper and hypo. Stress reaction. Stressors – definition, and identifying stressors - physiological systems, illnesses and diseases - psychological effects of stressors -individual stressors – organizational stressors – social stressors. Video case discussion, Web exercises, Self-Awareness Exercises – Studying sources of Stressors and consequences of Stress in Pandemic Period

UNIT II

Theories of stress/ Models – cognitive, behavioural, and psychological theories. Conceptual model - transactional model - health realization/innate health model - measuring stress. Video case discussion, Web exercises, Self-Awareness Exercises & Group Activities

UNIT III

Stress management – Time Management, Personal Management. Therapy and Systematic Management – Stress Inoculation Method – Jacobson Progressive Muscle Relaxation – Systematic Desensitization. Video case discussion, Web exercises, Student Presentations, Group Discussion and Chalk and Talk

UNIT IV

Interventions – Perception – Interpersonal Interventions – Spirituality - Meditation - Personal Responsibilities – Goal Setting – Self Assessment - Relaxation Techniques – Exercise - Diversity - Coping strategies for decreasing stressful behaviors - Rationalemotive - Behavior Therapy - Massage Therapy – Yoga. Clinical importance. Video case discussion, Web exercises, Self-Awareness Exercises – Importance of Relaxation techniques like yoga,

exercises, meditation etc

UNIT V

Occupational Stress - Causes of occupational stress -Role of work place environments – Symptoms of work-related stress - Model of different components of work related stress – NIOSH approach to occupational stress - stress and college - family stress. Video case discussion, Web exercises, Field based activities-visiting organisation for studying Stress and Consequences during Pandemic Period.

Course Outcomes:

- CO1: Describe the physiological, psychological, individual, organizational, and social stressors.
- CO2: Explain cognitive, behavioral, and psychological theories of stress.
- CO3: Apply personal management strategies in stress management.
- CO4: Evaluate various relaxation techniques, including exercise, massage therapy, and yoga.
- CO5: Identify causes of occupational stress

TECHNOLOGY FOR PERSONNEL PRODUCTIVITY MANAGEMENT

COURSE CODE: MBAS214

OBJECTIVE

- This paper, an HR Elective, intends to provide a deeper analytical understanding of employee proactive process orientation availing the technology for effective management of personnel.

METHODOLOGY

The classroom lectures, interactive discussions & presentations, case-study based teaching, case-lets, primary [where feasible] and secondary data compilation on PPM Tech Practices in 5 organizations form part of the methods of coverage of syllabus.

SYLLABUS

UNIT I

TECHNOLOGY-PPM INTERFACE – Introduction – Concept Approaches to and Measurement of Personnel Productivity Techniques and Tools

UNIT II

PERSONNEL FUNCTION AND TECHNOLOGY – Personnel Policies and Procedures and the Utility of Technology to ensure Efficiency to the Organisation – Designing and Development of Personnel Data Recording and Information Giving Systems – Performance Employee Rewards, Payments, Appraisal, Training, Job Satisfaction and other aspects of HRIS (Human Resource Information Systems).

UNIT III

TECHNOLOGY AND PERSONNEL HEALTH – Concept and Measurement of Organisational and Personnel Health (OPH) – Assessment and Estimation of Variables which effect OPH – Usage of Technology – Eastern and Western to Continuously Improve Optt – OPH, Motivation, Morale, Personnel Productivity – A Discussion.

UNIT IV

TECHNOLOGY, SOCIETY AND MANAGEMENT – Technology for Good Organizational Relations – Communications – Interactive Rapport Building – Assessment and Estimation of Psychographic Variables which effect Organisational Relations.

UNIT V

Comprehensive Case Studies and Field Visits.

Course Outcomes:

- CO1: Evaluate different approaches to measuring and improving personnel productivity.
- CO2: Analyze the impact of personnel policies and procedures on organizational efficiency.
CO3: Utilize technology to enhance OPH, motivation, morale, and personnel productivity.
- CO4: Evaluate the role of technology in fostering positive organizational relations.
- CO5: Apply theoretical knowledge to real-world scenarios through case studies.

- Appreciation of a software connected with productivity improvements with a slant towards HRM orientation
- Organization visit and interactions with HR and other line executives with PPM Tech orientation and submission of report
- Book Review

The Internal mark is awarded based on the components and displayed in the notice board before the commencement of the semester-end examinations.

TRAINING AND DEVELOPMENT

COURSE CODE: MBAS215

OBJECTIVES

To appreciate the significances of training and development To introduce the basic concepts in training and development To understand the methods of training and development and To expose to the HRD practices in organizations.

METHODOLOGY

The classroom lectures, interactive discussions & presentations, case-study based teaching, case-lets, business-games [for example Inventory Management], role-plays, primary [where feasible] and secondary data compilation on T & D Practices & their impact in 5 organizations form part of the methods of coverage of syllabus.

SYLLABUS

UNIT I

Job analysis – manpower planning – at the start of the business and as ongoing process – performance appraisal – standards, methods, errors.

UNIT II

Learning Objectives – domains of learning – methods of learning – importance of teaching techniques – instruction technology – instructor behaviour – attention versus involvement.

UNIT III

Need for Training and Development – Role of Development officers – administrators, consultants, designers and instructors – determining training needs – potential macro needs –usefulness of training – development of competency-based training programs – Evaluation of training programs.

UNIT IV

Methods of training – on the job training – off the job training – choosing optimum method– the lecture – field trips – panel discussion – behaviour modeling – interactive demonstrations – brain storming – case studies – action mazes, incident process, inbaskets, team tasks, buzz-groups and syndicates, agenda setting, role-plays – reverse role plays, rotational role plays, finding metaphors, simulations, business games, clinics, critical incidents, fish bowls, T-groups, data gathering, grouping methods, transactional analysis, exception analysis.

UNIT V

Need for development – differences between training and development – management development program – career development program – counseling – evaluation of programs

– job evaluation – methods and techniques.

Course Outcomes (COs)

- **CO1:** Understand the concept, importance, and objectives of training and development.
- **CO2:** Analyze the training needs of an organization and design effective training programs.
- **CO3:** Evaluate different training methods and their effectiveness.
- **CO4:** Develop and implement performance appraisal systems.
- **CO5:** Understand the role of technology in training and development.

INTERPERSONAL RELATIONSHIP MANAGEMENT

OBJECTIVE

METHODOLOGY

Since the course involves various practical components of communication and interpersonal skills development, the teaching methodology will be a combination of lectures, management activities, and games, role-plays and active experiential practices.

SYLLABUS

UNIT I

Interpersonal Relationship Management – concept – need – Types – Factors affecting/influencing Interpersonal Relationship – Stages in developing the interpersonal relationship.

UNIT II

Role of Communication in Interpersonal Relationship Management – Importance – how to improve – Management activities as a tool for IPRM

UNIT III

Interpersonal Relationship Management Models and Theories – Interpersonal Relations at workplace: – Role of employees – role of Managers

UNIT IV

Conflict Management - Concepts – Conflict Management Styles – Managing conflicts in organizations- Steps in conflict management – Types of conflict: People Centered, Task Centered – Steps to conflict resolution- Conflict Transformation. Thomas Kilman Conflict Mode Instrument in deciding the Conflict Management Styles.

UNIT V

Interpersonal Communication and Relationship Based On Cross Culture: Corporate Culture: The Nature of Organizational Cultures; Quality and Cross-Culture; Diagnosing the As-Is Condition; Designing the Strategy for a Culture Change Building. Diversity Management: Impact of cultural diversity in organizational performance- developing interpersonal relationships among the homogenous and diverse task groups.

Course Outcomes (COs)

- **CO1:** Understand the concept of international relationship management and its importance in global business.
- **CO2:** Develop effective intercultural communication and negotiation skills.
- **CO3:** Analyze the cultural and political factors influencing international business

relationships.

- **CO4:** Build and maintain strong relationships with international stakeholders.
- **CO5:** Manage international business transactions and projects effectively.

INTERNATIONAL HUMAN RESOURCE MANAGEMENT

COURSE CODE: MBAS216

OBJECTIVES

- To Understand the IHRM Principle and Practices in the Domestic Context.
- To Study the International HRM Practices with Multicultural Nature compounded by Geographical Dispersion.
- To Adopt the best Practices of International HRM and its application to the Domestic and MNCs operating in India.

LEARNING OUTCOMES

1. Helps the students to gain knowledge on IHRM practices at various contexts.
2. Will help in adopting best practices of International HRM.

SYLLABUS

UNIT I

INTERNATIONAL HUMAN RESOURCE MANAGEMENT: Evolution – Objectives – Significance, Implications, Opportunities and Growth of Internationalization of World Business - Strategic Orientation of IHRM- Types of International Assignments Models of IHRM. Video case discussion, Web exercises, Subject Quiz, International HR issues

UNIT II

INTERNATIONAL WORKFORCE MANAGEMENT: International Job Market And Talent Acquisition Function; Cross-National Advertising, E-Recruitment; International Staffing Choice, Approaches To Multinational Staffing Decisions, Criteria of Selection and Techniques, International Staffing Issues, Successful Expatriation, Role of an Expatriate, Repatriation, Re-Entry and Career Issues. Video case discussion, Web exercises, Self-Awareness Exercises & Group Activities Cross -Culture for global excellence

UNIT III

DEVELOPING INTERNATIONAL MIND SET: International Leadership, Cross Cultural Context and International Assignees, Current Scenario in International Training and Development of International Staff, Sensitivity Training, Career Development, Developing International Staff and Multinational Teams, Knowledge Transfer in Multinational Companies. International Compensation and International Employment Laws: Issues Related to International Compensation and International Assignees. Video case discussion, Web exercises, Subject Quiz, Self-Awareness Exercises- International Laws, Issues and Challenges arises in Global Context during Pandemic period

UNIT IV

IHRM ISSUES, CHALLENGES AND OPPORTUNITIES: IHR issues in the Host Context:

Standardization and Adaption of Work Practices, Retaining, Developing and Retrenching Staff, Language Standardization, Monitoring IHR Practices. IHRM Challenges, Evolution of HR Professionals, , Establishment of Labour Standards by International Institutions, International Legal and Regulatory Context of MNE, International Framework of Ethics and Labour Standards, Industrial Relations, Policies and Practices of Multinationals, Key Concerns for Trade Unions, Recent Trends and Issues .Video case discussion, Web exercises, Self-Awareness Exercises-acquire knowledge regarding Best IHR practices in Global context during Pandemic period.

UNIT V

IHRM in the HOST COUNTRY CONTEXT: Identification of International Standardization and Localization of HR Practices, Standardization Drivers, MNE Strategy and Structure, Corporate Culture, Localization Drivers, Host Country’s Cultural and Institutional Environment, Mode of Operation and Subsidiary Role, Development of Balance Globalization and Localization of HRM, Business Ethics and Global Code of Conduct, Strategic Importance of Offshoring, India Vs. China as Important Offshoring Locations, Comparing and Assessing IHRM Issues In Emerging Markets. Video case discussion, Web exercises, Subject Quiz, IHRM application-based activities.

Course Outcomes (COs)

- **CO1:** Understand the concept, evolution, and strategic importance of International Human Resource Management (IHRM).
- **CO2:** Analyze the cultural, economic, and legal environments affecting IHRM practices.
- **CO3:** Develop strategies for staffing, performance management, and training in an international context.
- **CO5:** Evaluate the challenges and opportunities of managing human resources in global organizations.
- **CO6:** Understand the role of technology in managing global human resources.

TALENT PLANNING AND ACQUISITION

COURSE CODE: MBAS217

OBJECTIVE

The course provides an understanding of planning and acquiring organization's talent needs from a strategic perspective. The course is aimed to offer a deeper orientation of the staffing function of human resources that would enable the learner to perform the talent acquisition function confidently.

COURSE OUTCOMES

By the end of the course the learners are expected to

- Gain conceptual knowledge and operational understanding of all the key aspects of staffing function including human resource planning, job analysis, recruitment and selection.
- Understand the role of human resource planning in creating effective organizations
- Get acquainted with techniques necessary for successful strategic human resource planning.
- Develop the skills to design and implement effective recruitment and selection processes and critically evaluate existing processes.
- Become familiarized with the latest trends and best practices in talent acquisition.

SYLLABUS

UNIT I

Defining Strategic Staffing, Components, Goals, integrating functional areas of HRM-Business and Staffing strategies: Resource Based View, Firm's Business Strategy, Firm's Talent Philosophy – Deriving the firms staffing strategy, The Firm's Strategic Staffing Decisions –Legal Context: Types of Employment Relationships. Video case discussion, Web exercises, Group Discussions, Self-Awareness Exercises & Group Activities

UNIT II

Job Analysis: Methods, Planning Job Analysis - Conducting Job Analysis, Developing Job Descriptions and Person Specifications – Workforce Planning Process, Forecasting the Firm's Talent Demand and Supply- Qualitative and Quantitative Forecasting Methods & Techniques - Resolving the gaps between Firm's Talent supply and demand, staffing planning Video case discussion, Web exercises, Field based activities-visiting organization for studying Job Analysis

UNIT III

Talent Acquisition: Effective recruiters, Training and Developing Recruiters- Recruitment Metrics, Developing Applicant Attraction Strategies – Measurement, Describing and

Interpreting Data, Using Data Strategically – Characteristics of using successful measures, Creating and validating assessment systems – External Assessment Methods – Internal Assessment Methods. Video case discussion, Web exercises, Self-Awareness Exercises – Studying methods of Talent Acquisitions in Pandemic Period

UNIT IV

Latest trends in Recruitment: e-recruitment, social media recruitment, Recruitment management, mobile/video recruitment, Innovative recruitment practices – Selection tools and Techniques, Predictors of Job Performance- Testing: Types of Tests, The Selection Interview: Process, Conduct, Types, Pitfalls - Choosing Candidates, Job Offer Strategie. Video case discussion, Web exercises, Self-Awareness Exercises & Group Activities- Students Presentations – latest trends in recruitments in Pandemic Period

UNIT V

The Employment Contract, presenting a job offer, Negotiating, Closing the Deal – Orienting (Induction) and Socializing New Employees – Managing the Flow of Workforce – Involuntary Employee Separations – Staffing Outcomes, Evaluating Staffing Systems – Technology and Staffing Evaluation. Video case discussion, Web exercises, Self-Awareness Exercises -Group Discussions

Course Outcomes (COs)

- **CO1:** Understand the strategic importance of talent planning and acquisition for organizational success.
- **CO2:** Analyze the internal and external factors influencing talent planning and acquisition.
- **CO3:** Develop effective talent acquisition strategies and processes.
- **CO4:** Evaluate talent management practices and their impact on organizational performance.
- **CO5:** Understand the role of technology in talent planning and acquisition.

MARKETING ELECTIVES

BRAND MANAGEMENT

COURSE CODE: MBAS301

OBJECTIVES

- To increase understanding of the key issues in crafting and evaluating brand strategies
- To provide theories, models, and other analytic tools to make better branding decisions

METHODOLOGY

The classroom methodology will include lectures, quizzes, Web 2.0-based assignments, comprehensive case analysis and discussions, term paper writing with a requirement to take a position on a branding issue.

SYLLABUS

UNIT I: BRANDING CONCEPTS

Brands & Brand Management: What is a brand? - Brand Elements – Core Brand Values and Brand Mantra – Brand Value Chain – Brand Value Proposition – Functional, Emotional and Self Expressive Benefits – Strategic Brand Management Process - Iconic brands – Global brands

UNIT II: BRAND EQUITY AND POSITIONING

Brand Positioning – Identifying, choosing and communicating Points of Parity and Points of Difference – Brand Associations – Primary and Secondary Associations – Repositioning. Customer Based Brand Equity – The Brand Equity Pyramid – Brand Resonance

UNIT III: BRANDING STRUCTURES

Brand Hierarchy – Levels, Principles of designing the brand hierarchy – Managing the Brand portfolio. Brand Architecture – Masterbrand, Overbrand, Freestanding Brand and Endorser Brand structures – Price-Quality Brand Structures - House of Brands, Branded House, and Hybrid Structures. Managing Brands over time: Brand Revitalization - Brand Extension strategies – Product Category and Line Extension – Pros and cons of brand extension.

UNIT IV: BRAND IDENTITY & PERSONALITY

Brand Identity – Kapferer's Brand Identity Prism – Elements of Brand Identity – Co-branding and Ingredient branding. Brand Personality – Brand Personality Dimensions and Traits – Drivers of brand personality. Luxury brands – Cult brands

UNIT V: BRAND METRICS

Brand Metrics – Measuring Brand Equity – Loyalty measures, perceived quality and leadership measures, associations/ differentiation measures, awareness measures and market behavior measures. Brand Valuation – Methods: Cost, market and Income approach, Brand Valuation Models – Interbrand, Y&R's Brand Asset Valuator, Millward Brown's Brand Dynamics approach and Brand.

Course Outcomes (COs)

- CO1: Understand the concept of branding and its strategic importance for organizations.
- CO2: Develop a comprehensive brand strategy for a product or service.
- CO3: Evaluate brand equity and its impact on organizational performance.
- CO4: Manage brand image and reputation effectively.
- CO5: Understand the role of digital media and technology in brand building.

ILLUSTRATIVE EXERCISES

1. Study the latest annual list of Best Global brands from InterBrand and Best Indian brands from The Economic Times. Identify the gainers and losers and understand the reasons behind gain/loss in the ranking
2. Observe the websites of top luxury brands in different categories. Try to identify how the luxury element is represented on the website. Identify successful brand repositioning in the past decade and compile a list of best practices in brand repositioning.

CONSUMER BEHAVIOUR

COURSE CODE: MBAS302

OBJECTIVES

- To understand the conceptual foundations of consumer buying behavior.
- To equip the learner to apply the principles and prepare for a career in Product and Brand Management in the FMCG and consumer durables industry.

METHODOLOGY

Lectures for conceptual foundations for understanding consumer behaviour theories and practice, live case discussions, field based mini projects and terms papers, assignments on augmented topics. Individual as well as group assignments in given topics to understand the application of concepts. Live Cases of existing companies and brands will form a part of the entire learning process for understanding how consumer behaviour concepts are applied in the local and global contexts

SYLLABUS

UNIT I

Consumer Behaviour and Marketing Action: An overview – Consumer involvement, decision-making processes and purchase behaviour and marketing implications – Consumer Behaviour Models. Experiential Exercise: Identify a product category and detail the buying process adopted

UNIT II

Environmental influences on consumer behaviour – Cultural influences – Social class, reference groups and family influences - Opinion leadership and the diffusion of innovations – Marketing implications of the above influences. Experiential Exercise: Analyse the cultural and sociological influences for a global company's brand using live cases

UNIT III

The individual consumer and buying behaviour and marketing implications – Consumer perceptions, learning, attitudes, motivation and personality – psychographics, values and lifestyles. Experiential Exercise: Analyse the psychographic influences for a global company's brand using live cases, analyse the relationship between brand personality and self-concept

UNIT IV

Strategic marketing applications – Market segmentation strategies – Positioning strategies for existing and new products, Re-positioning, perceptual mapping – Marketing communications – Source, message and media effects. Store choice and shopping behaviour – In-Store stimuli, store image and loyalty – Consumerism – Consumer rights and Marketers' responsibilities. Experiential Exercise: Analyse the STP strategies of brands in a category using live cases,

visit a physical shopping mall and understand consumer choices by observation.

UNIT V

The Borderless Consumer Market and buying behaviour – Consumer buying habits and perceptions of emerging non-store choices – Research and applications of consumer responses to direct marketing approaches – Issues of privacy and ethics. Experiential Exercise: Visit some virtual shopping sites and understand consumer choices by observation of recommendations and analysing product reviews.

Course Outcomes (COs)

- **CO1:** Understand the consumer decision-making process and its influencing factors.
- **CO2:** Analyze consumer behavior and its implications for marketing strategies.
- **CO3:** Develop consumer segmentation and targeting strategies.
- **CO4:** Evaluate the role of consumer behavior in product development and branding.
- **CO5:** Understand the ethical and social implications of consumer behavior.

MAGAZINES AND JOURNALS

All marketing area related periodicals

ILLUSTRATIVE EXERCISE

Students are expected to study in-depth any area of consumer behaviour by designing mini research projects and analysing the findings; making presentations on niche topics that are applications of consumer behaviour theories, etc.

CUSTOMER RELATIONSHIP MANAGEMENT

COURSE CODE: MBAS303

OBJECTIVE

To understand the concepts and principles of CRM and appreciate the role and changing face of CRM as an IT enabled function.

METHODOLOGY

Lectures, term papers, industry visit and case discussions

SYLLABUS

UNIT I

CRM concepts: Acquiring customers, customer loyalty, and optimizing customer relationships. CRM defined: success factors, the three levels of Service/ Sales Profiling, Service Level Agreements (SLAs), creating and managing effective SLAs.

Experiential Exercise: Analysing SLAs and understanding the implications of over-promise on customer relationships

UNIT II

CRM in Marketing: One-to-one Relationship Marketing, Cross Selling & Up Selling, Customer Retention, Behaviour Prediction, Customer Profitability & Value Modeling, Channel Optimization, Event-based marketing. CRM and Customer Service: The Call Centre, Call Scripting, Customer Satisfaction Measurement.

Experiential Exercise: Call scripting for customer service representative and IVRS environments using role plays

UNIT III

Sales Force Automation – Sales Process, Activity, Contact, Lead and Knowledge Management. Field Force Automation. CRM links in e-Business: E-Commerce and Customer Relationships on the Internet, Enterprise Resource Planning (ERP), Supply Chain Management (SCM), Supplier Relationship Management (SRM), Partner relationship Management (PRM).

Experiential Exercise: Analyse articles on SRM, PRM and SFA for better application grounded on marketing principles instead of using silo thinking.

UNIT IV

Analytical CRM: Managing and sharing customer data – Customer information databases, Ethics and legalities of data use. Data Warehousing and Data Mining concepts. Data analysis: Market Basket Analysis (MBA), Clickstream Analysis, Personalization and Collaborative Filtering.

Experiential Exercise: Do a Market Basket Analysis MBA for hypothetical shopping carts of

various groups of customers

UNIT V

CRM Implementation: Defining success factors, preparing a business plan – requirements, justification, processes. Choosing CRM tools: Defining functionalities, Homegrown versus out-sourced approaches. Managing customer relationships: conflict, complacency, Resetting the CRM strategy. Selling CRM internally: CRM development Team, Scoping and prioritizing, Development and delivery, Measurement.

Course Outcomes (COs)

- **CO1:** Understand the concept, evolution, and strategic importance of CRM.
- **CO2:** Analyze customer behavior and needs to develop effective CRM strategies.
- **CO3:** Implement CRM technologies and systems to manage customer relationships.
- **CO4:** Evaluate the performance of CRM initiatives and make necessary improvements.
- **CO5:** Understand the ethical implications of CRM and customer data management.

INDUSTRIAL MARKETING

COURSE CODE: MBAS304

OBJECTIVES

- To help the learner distinguish between consumer marketing and industrial marketing
- To understand the nuances of industrial marketing
- To learn to formulate industrial marketing strategies and also design industrial marketing mix elements

METHODOLOGY

Lectures, case discussions, story-telling, role-plays, seminar presentations, position papers, firm/issue analysis, mini-projects, social media content development and sharing

SYLLABUS

UNIT I

Introduction to Industrial Markets - Industrial Marketing System - Concepts and Characteristics - Types of Industrial Markets - Industrial Buyer Behaviour.

UNIT II

Strategic Industrial Marketing (S.T.P.) -Marketing Information Systems and Marketing Research.

UNIT III

Classification of Industrial Products and Services - New Product Development and Introduction - Industrial Product Management. - Pricing Decisions in Industrial Markets.

UNIT IV

Formulating Channel Strategies and Physical Distribution decisions - Promotional Strategies for Industrial Goods/ Services.

UNIT V

Marketing Strategy formulation, implementation and control - Competitive marketing strategies - Introduction to B2B eCommerce: online exchanges and platforms

Course Outcomes (COs)

- **CO1:** Distinguish between consumer and industrial marketing concepts and practices.
- **CO2:** Analyze the characteristics of industrial markets and buyer behavior.
- **CO3:** Develop industrial marketing strategies and plans.

- **CO4:** Implement effective industrial marketing communication and promotion strategies.
- **CO5:** Manage industrial sales and distribution channels effectively.

The Internal mark is awarded based on components such as studying competitive marketing strategies of B2B firms, analysis of B2B advertisements, analysis and discussion of B2B cases and quizzes.

INTEGRATED MARKETING COMMUNICATION

COURSE CODE: MBAS305

OBJECTIVES

To equip students for a career in Product and Brand Management, Advertising – with special reference to Client servicing, Media planning and research.

METHODOLOGY

Briefing of conceptual foundations, live cases, designing an advertising and promotion campaign, field based mini projects and terms papers, assignments, presentations.

SYLLABUS

UNIT I: ADVERTISING - AN INTRODUCTION

Origin and Development - Definition and Classification - Planning Framework - Organizing Framework - the Advertiser and the Advertising Agency interface. STRATEGIC ADVERTISING DECISIONS - Setting Advertising Objectives – The Budget Decision – Preparing the Product and Media Brief

Experiential Exercise: Preparing the Product and Media Brief

UNIT II: COPY DECISIONS

Visualization of Ad Layout – Elements of Ad Copy and Creation – Principles of verbal versus visual thinkers, Styles and Stages in advertising copy creation - Copy (Pre-) Testing methods and measurements.

Experiential Exercise: Continuation of above developing the concept platform and designing ad copy.

UNIT III: MEDIA DECISIONS

Media Planning and Selection – Concepts of Reach, Frequency, Continuity, and Selectivity – Measures of Media Cost Efficiency – Media (Readership/ Viewership) Research. The Internet as an Advertising Medium: Tracking Website visits, page views, hits, and click-stream analysis, permission marketing and privacy, ethical concerns.

Experiential Exercise: Continuation of above deciding the media mix

UNIT IV: MEASURING ADVERTISING EFFECTIVENESS

Control of Advertising by practitioners, media and the market - Advertising in the International Marketplace - Advertising and Principles of Integrated Marketing Communication and Image Building.

Experiential Exercise: Analysing effectiveness reports, live cases

UNIT V: SALES PROMOTION

Rationale, Types - Consumer and Trade Promotions - Sales Promotion Strategies and

Practices, Cross Promotions, Surrogate Selling, Bait and Switch advertising issues.
 BRAND EQUITY - Concepts and Criteria, Building, Measuring and Managing Brand Equity,
 Linking Advertising and sales promotion to achieve ‘brand-standing’ – Leveraging Brand
 Values for business and non-business contexts.

Experiential Exercise: Analysing live cases of sales promotion campaigns, and brand image

COURSE OUTCOMES (COS)

- **CO1:** Understand the concept of integrated marketing communication (IMC) and its role in achieving organizational goals.
- **CO2:** Develop integrated marketing communication plans and strategies.
- **CO3:** Evaluate the effectiveness of IMC campaigns.
- **CO4:** Manage the IMC process, including budgeting, media planning, and execution.
- **CO5:** Understand the ethical and legal implications of IMC.

INTERNATIONAL MARKETING

COURSE CODE: MBAS306

OBJECTIVES

- This course is designed to provide knowledge of marketing management in the international scenario.
- To enable the student to appreciate the nuances of international marketing environment and develop marketing strategies for the dynamic international markets.

SYLLABUS

UNIT I

Introductory case

An overview: The importance of world trade - Scope and challenges of international marketing - Recent trends and developments in international trade- protectionism, trade barriers, easing trade restrictions, role of the IMF and World Bank, WTO and TRIPS, TRIMS and liberalization of service industries.

Video case discussion, Web exercises, Subject Quiz, Marketing application-based activities (using McGraw Hill Connect).

UNIT II

Introductory case

The international marketing environment: The international economic environment, trade environment, social and cultural environments - international political, legal and regulatory environments – Multilateral and geographical groupings - Cultural dynamics in assessing global markets.

Video case discussion, Web exercises, Subject Quiz, Marketing application-based activities (using McGraw Hill Connect).

UNIT III

Introductory case

Assessing international market opportunities: Developing a global vision through marketing research - International marketing management - planning and organization - Market entry strategies - export, joint ventures and direct investments.

Video case discussion, Web exercises, Subject Quiz, Marketing application-based activities (using McGraw Hill Connect).

UNIT IV

Introductory case

Developing Global Marketing Strategies I: Global marketing management - Planning and organization - Products and services for Consumers - Products and services for businesses - Pricing for international markets - International marketing channels.

Video case discussion, Web exercises, Subject Quiz, Marketing application-based activities (using McGraw Hill Connect).

UNIT V

Introductory case

Developing Global Marketing Strategies II: Integrated Marketing Communications and International Advertising - Personal Selling and Sales Management.

Implementing Global Marketing Strategies: Inventive Negotiations with International Customers, Partners, and Regulators - Cultural Analysis Economic Analysis Market Audit and Competitive Market Analysis Preliminary Marketing Plan.

Video case discussion, Web exercises, Subject Quiz, Marketing application-based activities (using McGraw Hill Connect).

Course Outcomes (COs)

- **CO1:** Understand the concept and scope of international marketing.
- **CO2:** Analyze the international marketing environment and its impact on business.
- **CO3:** Develop international marketing strategies and plans.
- **CO4:** Implement international marketing programs and evaluate their effectiveness.
- **CO5:** Manage international marketing operations and control activities.

INTERNET MARKETING

COURSE CODE: MBAS307

OBJECTIVES

The objectives of this course are:

- To rethink marketing in an Internet-enabled marketing environment
- To conceptualize marketing strategy formulation in the context of the Internet
- To understand the Internet marketing mix
- To address the emerging issues on the Internet from a marketing perspective

METHODOLOGY

The classroom methodology will include lectures, quizzes, comprehensive case analysis and discussions, brainstorming on industry news, white papers and group-wise development of an Internet marketing plan.

SYLLABUS

UNIT I: A FRAMEWORK FOR INTERNET MARKETING

Rethinking marketing in a connected world – Internet as a marketing platform: critical success factors – market opportunity analysis in the new economy – generating business model canvas
Delivering customer value types: trapped, hybrid and new-to-the-world value – application of the Long Tail concept in Internet marketing

UNIT II: STRATEGIC INTERNET MARKETING

Planning the Internet strategy – Segmenting the internet market, Niche marketing strategies, On-line positioning and competitive analysis - SOSTAC framework for Internet marketing planning - Internet marketing scenarios – pure-play and bricks-and-clicks businesses - User experience design and its core principles - Web development and customer interface design – 7Cs framework – Adaptive Vs Responsive designs

UNIT III: INTERNET MARKET INTELLIGENCE AND USER BEHAVIOUR

Online market research, Web tracking audits, analytics – marketing performance metrics – Conversion funnel and optimization; Introduction to Search engine optimization and Google Analytics - Online consumer behaviour and characteristics – Issue of trust – Internet communities: creation and transfer of value within communities

UNIT IV: INTERNET MARKETING MIX

Comparing traditional marketing mix with Internet marketing mix - Product hierarchy - Influence of interactivity and individualization - new product development process – mass customization – online brand building - Pricing on the internet – characteristics, customer-driven pricing, dynamic pricing and pricing strategies - Internet as a distribution channel – disintermediation effect – the role of Internet intermediaries – Creating and Managing Online Partnerships: Affiliate marketing Online advertising models and types – Search advertising, Display advertising, Email marketing, Social media channels – Risks and challenges

UNIT V: EMERGING ISSUES IN INTERNET MARKETING

Influence of Web 2.0 on Internet marketing – crowdsourcing applications in marketing
Mobile marketing – advantages and challenges – virtual, augmented and mixed reality – location-based contextual marketing - Global Internet marketing – standardization Vs. differentiation dilemma – Global navigation of website.

Course Outcomes (COs)

- **CO1:** Understand the concept of internet banking and its role in the financial industry.
- **CO2:** Analyze the technological infrastructure and security aspects of internet banking.
- **CO3:** Evaluate the impact of internet banking on customer behavior and expectations.
- **CO4:** Develop strategies for effective online banking service delivery.
- **CO5:** Assess the risks and challenges associated with internet banking.

2. www.razorfish.com – agency for Internet marketing and design of user experience and enterprise design
3. www.emarketer.com – Internet marketing research firm

4. www.econsultancy.com – Internet marketing research and training company

ILLUSTRATIVE EXERCISES

1. Illustrate the application of Long Tail concept in Search Engine Optimization by searching for ‘hotels in Pondicherry’, ‘resorts in Pondicherry’, ‘beach resorts in Pondicherry’ and ‘eco-beach resorts in Pondicherry’. Compare the results on the Search Engine Results Page
2. Observe the translation of corporate strategy to Internet marketing strategy by comparing the websites of a Full-service airline and Low-cost airlines.
3. Identify the website ‘localization’ elements by observing the international websites of, say Levis.

MARKETING ANALYTICS-I

COURSE CODE: MBAS308

OBJECTIVES

- To enable the students to know about the information needs of Management.
- To introduce software packages like MS-EXCEL/SPSS/R for Marketing Analytics
- To introduce the students to many Excel tools that can be used to analyze marketing problems: PivotTables, charting and Excel statistical functions, including COUNTIF, COUNTIFS, SUMIF, SUMIFS, AVERAGEIF, and AVERAGEIFS functions
- To estimate demand curves and to determine profit maximizing prices, price bundling, nonlinear pricing strategies, and price-skimming strategies
- To introduce forecasting tools
- To analyse the consumer needs and product attributes choices that drives sales

METHODOLOGY

The methodology is predominantly by Case analysis and Computer based Problem Solving, complemented by lecture mode. The students have to undertake a project work in a topic of their interest and product, to apply the concepts studied in the course.

SYLLABUS

Unit-I

Using Excel to Summarize Marketing Data: Slicing and Dicing Marketing Data with PivotTables- Using Excel Charts to Summarize Marketing Data- Using Excel Functions to Summarize Marketing Data

Unit-II

Pricing: Estimating Demand Curves and Using Solver to Optimize Price- Price Bundling- Nonlinear Pricing- Price Skimming and Sales

Unit-III

Forecasting: Simple Linear Regression and Correlation- Using Multiple regression to forecast Sales

Unit-IV

Forecasting in the event of special Events-Modelling Trend and Seasonality & other forecasting methods [Ratio to Moving Average/Winter Method / Neural Networks]

Unit-V

Product related decision: Product Attribute Analysis [Conjoint]- Logistic Regression –Discrete Choice Analysis & Random Utility Theory

Course Outcomes (COs)

- **CO1:** Understand the concept of marketing analytics and its role in decision making.
- **CO2:** Apply data analysis techniques to extract meaningful insights from marketing data.

- **CO3:** Develop and implement marketing models for forecasting and optimization.
- **CO4:** Use marketing analytics to measure and improve marketing performance.
- **CO5:** Communicate marketing insights effectively to stakeholders.

MARKETING ANALYTICS-II

COURSE CODE: MBAS309

OBJECTIVES

- To enable the students to know about the information needs of Management.
- To explore customer value analysis and value models
- To introduce the segmentation analysis
- To explore the retail analytics tools
- To analyse the advertising analytical tools
- To introduce Internet and social media analytics

METHODOLOGY

The methodology is predominantly by Case analysis and Computer based Problem Solving, complemented by lecture mode. The students have to undertake a project work in a topic of their interest and product, to apply the concepts studied in the course.

SYLLABUS

Unit-I

Customer Value: Calculating Lifetime Customer Value- Using Customer Value to Value a Business- Customer Value, Monte Carlo Simulation, and Marketing Decision Making- Allocating Marketing Resources between Customer Acquisition and Retention

Unit-II

Market Segment: Clustering- User-Based Collaborative Filtering-Using Classification Trees for Segmentation

Unit- III

Retail Analytics: Market Basket Analysis and Lift - Allocating Retail Space and Sales Resources-Identifying the Sales to Marketing Effort Relationship

Unit-IV

Advertising Analytics: Measuring the Effectiveness of Advertising -Media Selection Models- Pay per Click Advertising- Introduction to Internet and Social Marketing

Unit-V

Introduction to dashboard – Need for Visualization – various visualization tools – Using Visualization tools for Marketing data – Creating dashboards

Course Outcomes (COs)

- **CO1:** Apply advanced statistical techniques to analyze marketing data and extract insights.
- **CO2:** Develop customer-centric models for value analysis and segmentation.
- **CO3:** Utilize retail analytics tools to optimize store performance and customer experience.

- **CO4:** Analyze advertising effectiveness using advanced analytics techniques.
- **CO5:** Apply internet and social media analytics to measure and improve marketing campaigns.

MARKETING FOR NON-PROFIT ORGANIZATIONS

COURSE CODE: MBAS310

OBJECTIVES

- To create an awareness about the nature of marketing function in a non-profit business environment and understand its distinct characteristics and roles.
- To impart an understanding of the design and implementation of the marketing plan, in the context of non-profit organizations.

METHODOLOGY

Lectures, case discussions, story-telling, role-plays, seminar presentations, position papers, firm/issue analysis, mini-projects, social media content development and sharing

SYLLABUS

UNIT I

Introduction to non-profit organizations - Classification and characteristics of non-profit organizations - Role of marketing in a non-profit business setup

UNIT II

Analysing market opportunities - Strategic non-profit marketing (segmentation targeting-positioning)

UNIT III

Product/service decisions - Price decisions - Distribution decisions - Promotion decisions.

UNIT IV

Resource generation for non-profit business - Social marketing

UNIT V

Developing marketing strategies for specific non-profit businesses

Course Outcomes (COs)

- **CO1:** Understand the unique characteristics of non-profit marketing and its distinction from commercial marketing.
- **CO2:** Develop marketing plans and strategies for non-profit organizations.
- **CO3:** Implement marketing tactics to achieve non-profit goals and objectives.
- **CO4:** Evaluate the effectiveness of non-profit marketing campaigns.
- **CO5:** Manage the challenges and opportunities of non-profit marketing in a changing environment.

MARKETING RESEARCH

COURSE CODE: MBAS313

OBJECTIVES

- To introduce the basic concepts of research and methodology of conducting researches in marketing domain.
- To provide a foundation to pursue the summer training/ project work and a winter project work and a professional career in Marketing Research domain.

METHODOLOGY

The methodology is predominantly lecturing mode and case discussion, complemented with a mini-project work.

SYLLABUS

UNIT I: Marketing Research – An Introduction

Introduction to Marketing Research – definitions – classification – marketing research process – nature of marketing – ethics in marketing research – importance of problem definition- environment context- internet and computer applications.

UNIT II: Research designs

Research Design – definition – classification – exploratory research – descriptive research – casual research – interrelationships – usages – significance

UNIT III: Data collection – methods and tools

Data Collection: Objectives – data sources – data types – primary versus secondary data- classifications of primary and secondary data – accuracy and errors – qualitative and quantitative data – their advantages and disadvantages – Data collection methods – data instruments – administration of data instruments – surveys- observations – interviews.

UNIT IV: Measurement and scaling techniques

Measurements and scaling – non comparative scaling techniques – itemized rating scales– Likert scale – semantic differential scale – staple scale – multi-item scales – Sampling designs and procedures – Non probability sampling Techniques – Probability Sampling techniques – Sample size determination.

UNIT V: Data analysis and reporting

Data analysis and reporting: Nature of field work – data checking and editing – data cleaning – frequency distribution – cross-tabulation – hypothesis testing – chi-square, phi coefficient, contingency coefficient, other statistics – usage of SPSS – report writing – executive summary – final technical report.

Course Outcomes (COs)

- **CO1:** Understand the concept of marketing research and its role in decision making.

- **CO2:** Design and develop marketing research projects.
- **CO3:** Collect and analyze marketing research data using appropriate techniques.
- **CO4:** Prepare and present marketing research reports and findings.
- **CO5:** Evaluate the ethical implications of marketing research.

STRATEGIC MARKETING

COURSE CODE: MBAS320

OBJECTIVES

This is an applications-oriented course and the primary objective is to develop the capabilities necessary to apply marketing theories and concepts to actual situations and current events. The course will help the students to develop analytical skills in the formulation and implementation of market driven strategies for an organization and to provide practical, decision-making experience necessary for a career in the dynamic global business economy.

METHODOLOGY

The methodology is predominantly lecturing mode and case discussion, complemented with field based mini projects, terms papers and assignments. The students have to present the cases individually as well as in group assignments to understand the application of concepts.

SYLLABUS

UNIT I

Strategy Formulation – Vision, Mission, Objectives and Goals of business and their relationship with Strategic Marketing Management. Considerations for formulation of marketing strategies for all components of Product, Price, Promotion and Distribution.

UNIT II

Strategic Marketing Management – Objectives & concept of Strategic Marketing Management - Strategy Definition, Creating the marketing plan, Anticipating and adapting to change and Ethical and legal issues.

UNIT III

Strategic Marketing analysis – SWOT Analysis, GAP Analysis – Competitive Analysis – Porter's 5 forces Model of competition, BCG Matrix, GE 9 Cell Model as basic foundation of Strategic Marketing, McKinsey's 7s framework for analyzing and improving organizational effectiveness.

UNIT IV

Marketing Strategy Implementation – Integration of Marketing Strategies and their application to different business sectors – FMCG, Industrial, & Services. Constraints in marketing strategy implementation. Marketing Strategy Evaluation – Marketing Audits & their scope – Measurement of Marketing Performance and its feedback to next year's Marketing strategy formulation.

UNIT V

Specific strategy initiatives new product development and introduction strategies, Planned or unplanned strategy withdrawals /obsolescence, Contingency/alternative strategic planning, Brand Strategies in FMCG markets, Rural and export marketing strategies, Marketing

strategies for IT and ITES industries.

Course Outcomes (COs)

- **CO1:** Understand the strategic marketing process and its role in organizational success.
- **CO2:** Analyze the external and internal environment of an organization to formulate marketing strategies.
- **CO3:** Develop and implement marketing strategies aligned with organizational goals.
- **CO4:** Evaluate the performance of marketing strategies and make necessary adjustments.
- **CO5:** Understand the role of digital marketing in strategic marketing.

ILLUSTRATIVE EXERCISE

The Internal mark is awarded based on the components.

CREATIVITY AND INNOVATION MANAGEMENT

COURSE CODE: MBAS321

OBJECTIVES

This course shall enable students to generate, improve, expand and conceptualize ideas; to define situations and needs for new ideas, and develop and familiarize students with processes that manage the generation, adaptation and change of ideas and concepts and their implementation.

After completing this course, students will be able to:

- understand the purpose, processes and tools of creativity and innovation;
- discern appropriate strategies for implementing ideas;
- combine and build on the knowledge acquired from other subjects;
- appreciate the challenges of innovators in today's ever changing, diverse, and global technological environment.

SYLLABUS

UNIT I: INTRODUCTION

Definition and Justification of creativity and innovation - Types of Creativity & Innovation, Barrier to Creativity & Innovation - Four stages of creativity: Identify the question – Generate answers – Polish outcome
- Implement - Four principle approaches to creativity – Ignore creativity – Recognizing the importance of creativity – Develop creative culture in an organization – Make use of creative techniques in the organizational processes - Major Theories of Creativity - The Psychoanalytical Theory of Creativity - The Mental Illness Theory of Creativity - Eysenck's Theory of Psychoticism - The Addiction Theory of Creativity - The Humanistic Theory of Creativity

UNIT II: CREATIVE PROCESS

Opportunity recognition, Development, Realization - Human creativity- stepping stones of analogy – making the strange familiar and the familiar strange – widening the span of relevance – practice serendipity – chances favours only the prepared mind – curiosity – suspension of judgment – toleration of ambiguity - Idea generation - Sourcing Ideas, Open versus closed Innovation, collaborative Innovation - Linking knowledge, creativity and innovation

UNIT III: ORGANIZING FOR CREATIVITY AND INNOVATION

Individual creativity and innovation – Grassroot & Professional Innovations - Leadership versus Management approach to creativity - Creative culture – Individual personality – team dynamics – free flow of communication – acceptance of risks to fail – explicit rewards - Creative resources: internal versus external - training for creativity & innovation – Internet – Books - Open innovation.

UNIT IV: COMPARISON OF CREATIVITY WITH CONCEPTS OF:

TQM, Operational Research, Neuro-Linguistic Programming (NLP) – Information Technology & Artificial Intelligence - Kaizen, Quality Circles, Business Process Reengineering, General business skills, Suggestion Box - SWOT Analysis of creativity

UNIT V: APPLICATIONS OF CREATIVITY AND INNOVATION

Internalizing creativity in organizational activities through – four aspects of Creativity
- The creative product/Service - The creative person - The creative process- The creative environment - Convergence of creativity across domains - Recent changes in creativity
- Future of Creativity & Innovation.

Course Outcomes (COs)

- **CO1:** Understand the concept of creativity and innovation and their role in organizational success.
- **CO2:** Develop creative thinking and problem-solving skills.
- **CO3:** Identify opportunities for innovation and develop new product or service ideas.
- **CO4:** Manage the innovation process from idea generation to commercialization.
- **CO5:** Foster a culture of innovation within an organization.

CO-PO Mapping

CO	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO1	3	2	2	3	2	3	2
CO2	3	3	2	3	2	3	2
CO3	3	3	2	3	2	3	2
CO4	3	3	2	3	2	3	2
CO5	3	3	2	3	2	3	2
	3	2.8	2	3	2	3	2

FIELD BASED ASSIGNMENT

Students need to visit few organizations and select few activities that could be improved upon. How creativity and innovation in various contexts such as different organizations, diverse cultures etc. be introduced to modify the existing service/product and enhance the employee satisfaction as well as employee productivity.

CONSUMER NEUROSCIENCE AND NEUROMARKETING

COURSE CODE: MBAS322

CREDITS: 3

OBJECTIVES

This course will provide learners with an introduction to the emerging fields of consumer neuroscience and neuromarketing and some of the research methods applied. The course will give an overview of the current and future uses of neuroscience in business. Designed to equip learners for professional roles in marketing research and brand management.

KEY LEARNING OUTCOMES

On successful completion of this subject students should be able to:

- Identify and discuss the function of key brain systems in consumer behaviour
- Explain functional implications of selected perceptual, cognitive, and emotional processes for consumer behaviour and marketing planning
- Describe neuroscience-based tools and techniques used in marketing research
- Critically evaluate and apply marketing neuroscience research insights in selected marketing practices

TEACHING METHODS

Classroom lectures, Term Project assignments, Analysis of live cases, Group tasks in conducting mini research assignments, Student presentations, etc - Experiential Exercises: An applied orientation will be used for all topics as the learners are expected to identify the neuroscience approaches such as nudge used in marketing.

SYLLABUS

UNIT I: OVERVIEW

Defining Neuromarketing - Neuromarketing versus marketing - Brain science and the foundations of neuromarketing - Understanding the New Scientific Foundations of Neuromarketing - The Rational Consumer: Rational models for rational marketing to consumers and limitations – Consumer Perceptions – Interpretation, Impression, Meaning and Value – The Intuitive Consumer Model - Putting Neuromarketing to Work – Branding, Product designing, Packaging, Advertising and marketing communications, Shopping behaviour, Online consumer behaviour, Storytelling

UNIT II: NONCONSCIOUS PROCESSES UNDERLYING CONSUMER BEHAVIOUR

The Intuitive Consumer – From cognition to nonconscious thinking, Attention: The doorway to conscious awareness, Emotion: Arousal, attraction, motivation, Memory: How we construct, retrieve, and reconstruct the past - Emotions in Consumer Responses - Nonconscious emotions versus conscious feelings, Emotions and Attention, Emotions and

Memory - Consumer Motivation - Conscious and nonconscious goals, Consumer Motivation, Goal Seeking, and Goal Attainment - Consumer Decision Making - Kahneman's System 1 and System 2, explicit and implicit decisions. Judgment heuristics, Persuasion versus implicit consumer decisions, judgment heuristics and habit.

UNIT III: NEUROMARKETING IN ACTION

Understanding brand "equity" and the brand experience, Brain-friendly brands, brand leadership and Leveraging habitual buying - Creating Products and Packages - Standing out versus blending in, Neurotising, Neuromarketing and New Product Innovation, Testing Product and Package Designs - Advertising Effectiveness - Indirect Route and low-attention processing, Tracking attention - high and low, Monitoring emotional reactions - Shopping and In-Store Marketing - Multisensory experience, Goal pursuit, Personality and shopping styles. Using Neuromarketing to Test Shopping Environments - Simulating the shopping experience - Online consumer behaviour - Embracing interactivity and consumer control, Website frustration, confusion, and rejection, Online search and limitless information, Social networking and limitless sharing, Online shopping and limitless choice. Testing online ad effectiveness and website ease of use - Entertainment Effectiveness and Storytelling - Stories and persuasion, synchronizing the brain, triggering nonconscious goals. Product Placement, Immersive Games and Simulations. Measuring physiological, brain and behavioural responses to entertainment.

UNIT IV: MEASURING CONSUMER RESPONSE

Traditional Approaches - in-depth interviews, focus groups, consumer surveys, Consumer panels, Observational and experimental studies. - Neuromarketing Measures: Listening to Signals from the Body and the Brain - Interpreting facial expressions, Eye tracking, Electrodermal activity, Physiological responses and Biometrics, Behavioral response times - Running Response-Time Studies - Measuring implicit brand attitudes, Measuring semantic and emotional connections. Wisdom of Crowds - Online eye tracking and facial expression analysis, using "gamification" in online research, "Crowdsourcing" with prediction markets - Ten Scientific Pillars Underlying Neuromarketing - System 1 and System 2, Priming, Emotional "Somatic Markers", Processing Fluency, Misattribution, Nonconscious Goal Pursuit, Low-Attention Processing, Implicit Memory, Implicit Decisions, Reverse Inference

UNIT V: NEUROMARKETING ETHICS

Ethics, Standards and Public Policy Implications – protecting the rights of research participants, Setting "Neuro-Standards", Legal Issues - Balancing accountability and free speech. Ten Myths about Neuromarketing - Neuromarketing and public service advertising - health and education.

Course Outcomes (COs)

- **CO1:** Understand the fundamentals of neuroscience and its application to consumer behavior.

- **CO2:** Apply neuroscience principles to marketing research and consumer insights.
- **CO3:** Develop neuromarketing strategies and tactics for product and brand development.
- **CO4:** Evaluate the ethical implications of neuromarketing.
- **CO5:** Understand the future trends and applications of consumer neuroscience.

INTERNATIONAL BRAND COMMUNICATION

Credits: 3

OBJECTIVE

To equip students to create a relationship between a product offer and the target market in the international and cross-cultural context by designing effective integrated brand communication, advertising and promotion. This course will help students gain an understanding of branding and communication principles and tools for entry level careers in product and brand management.

Upon completion of this course, the student should be able to:

- Explore the strategies that brands employ to target international markets and understand how the integrated marketing communication mix works
- Understand how the principles of branding are applied in the international communication mix
- Develop the Product/ Campaign Brief and create ad Copy
- Understand and apply principles of media planning and selection

SYLLABUS

UNIT I: INTERNATIONAL MARKETING COMMUNICATION STRATEGIC ORIENTATIONS

The International Product Lifecycle – Internationalization strategy and target markets - The standardization versus customization dilemma – Product-Communication Adaptation Strategy Matrix - Integrated Marketing Communication Mix advertising and promotion campaigns and packaging design in the international context.

UNIT II: ELEMENTS OF BRANDING IN MARKETING COMMUNICATION

Brand Equity – Brand Extension - Brand Positioning - Brand Personality - Brand Propositions - Brand Associations - Points of Parity and Points of Difference - Brand Meanings and Brand Values in international cross-cultural contexts – 360 Degree Branding - Storytelling.

UNIT III: DEVELOPING THE INTEGRATED MARKETING COMMUNICATION CAMPAIGN

Product Concept Platform - Product/ Campaign Brief – Campaign Objectives and Budget - elements of ad Copy – hierarchy of effects - message appeals, message strategies and execution frameworks – Celebrity endorsement – Sensory Branding.

UNIT IV: ELEMENTS OF MEDIA PLANNING AND STRATEGY

Principles of Media Planning and Selection – Exposure, Reach, Frequency, Continuity, and Media Selectivity - Integrated Brand Placement - Media Metrics – Surrogate Advertising - Self-regulation and Codes of Ethics.

UNIT V: CORPORATE IMAGE BUILDING

Measuring Advertising Effects - Control of Advertising by practitioners, media and the market
– Owned, earned and owed media communications – Customer Engagement and Interactivity
– Crisis Communications.

Experiential Exercise: Analysing media reports, corporate crises, live cases

Course Outcomes (COs)

- **CO1:** Understand the concept of branding and its importance in international markets.
- **CO2:** Develop effective brand positioning and messaging for global audiences.
- **CO3:** Create integrated marketing communication plans for international markets.
- **CO4:** Manage international advertising and promotional campaigns.
- **CO5:** Evaluate the effectiveness of international brand communication efforts.

OPERATION ELECTIVES

ADVANCED MATERIALS MANAGEMENT

COURSE CODE: MBAS401

OBJECTIVES

- Since parts of this subject have already been taught in an earlier Semester, this Advanced Version is meant to be largely practice-oriented. Hence the mode of coverage will be less through lectures and more through practice sessions, live experiences, data collections, feedback presentations, Case discussions, Seminars, etc.

SYLLABUS

UNIT I

Concepts of Integrated Materials Management (IMM) - Organizing for IMM - Types of Inventories - Inventory Problems in India.

UNIT II

Codification - Computerization and Information Systems - Standardization and Variety Reduction - Value Analysis: ABC, VED, XYZ and other methods of Selective Analysis, AHP for vendor rating.

UNIT III

P system of inventory, Q system of Inventory, Inventory Valuation, Multiple-item model with storage limitations, Purchase model of inventory for multi-item with inventory carrying cost constraint, Purchase model of inventory for multi-item joint replenishment without shortages, Manufacturing model of inventory for multi-item joint replenishment without shortages, EOQ for purchase model of inventory for multi-item joint replenishment with space constraint.

UNIT IV

Purchasing - Source Selection - Vendor Rating - Purchase Budget - Systems - Tenders - Price Negotiations - Forward Buying - Purchasing Capital Equipments – Seasonal Goods- Special Items - Deferred Payment Schemes - Lending Institutions - Global Purchases - Government Buying - EGS & D - Rate Contract - Insurance - Legal Aspects in Purchasing - Evaluation of Purchase Performance.

UNIT V

Stores Layouts - Stores Accounting Procedures and Forms - Stock Verification - Practical Problems in Management of Dead Stocks - Surplus and Scraps - Evaluation of Stores Performance - Materials Handling and Transportation Management.

Course Outcomes (COs)

- **CO1:** Apply advanced material management concepts and techniques to complex supply chain scenarios.
- **CO2:** Develop and implement effective inventory management strategies.

- **CO3:** Optimize supply chain operations through demand forecasting and planning.
- **CO4:** Manage logistics and distribution effectively.
- **CO5:** Evaluate the impact of technology on material management and supply chain performance.

ADVANCED OPERATIONS RESEARCH

COURSE CODE: MBAS402

SYLLABUS

UNIT I

Linear Programming: Review of Linear programming, Dual Simplex method, Two Phase method, Identification of special cases in simplex table, Sensitivity Analysis: Changes in the right-hand side constants of constraints, Changes in the objective function coefficients, adding a new constraint, Adding a new variable.

UNIT II

Transshipment model: Transshipment problem with sources and destinations acting as transient nodes, Transportation problem with some transient nodes between sources and destinations, **Quantity Discount Model for Transportation Problem:** Modeling of transportation problem with quantity discounts: Model with All Quantity Discount Scheme (AQDS), Model with Incremental Quantity Discount Scheme (IQDS), **Assignment Problem:** 0-1 programming model for assignment problem, Branch and bound method for assignment problem

UNIT III

Shortest Path Problem: Dijkstra's Algorithm for shortest path problem, **Minimum Spanning Tree Problem:** Kuruskal's algorithm for minimum spanning tree problem, **Maximal Flow Problem:** Linear programming modeling of maximal flow problem, Maximal Flow problem (MFP) algorithm, **Integer Programming:** Integer programming formulations, Cutting plane algorithm, Branch and bound technique, 0-1 implicit enumeration technique for generalized 0-1 programming problem

UNIT IV

Inventory Control: Purchase model of inventory for multi-item with inventory carrying cost constraint, EOQ for purchase model of inventory for multi-item joint replenishment with space constraint, **Dynamic Programming:** Stage coach problem, Cargo loading problem, Minimizing Total tardiness in single machine scheduling problem, Optimal subdividing problem, Solution of linear programming, **Queueing Theory:** Simulation for queueing problems, Need for simulation, Simulation using high level languages, Introduction to GPSS (general Purpose Simulation System)

UNIT V

Game theory: Linear programming approach for game theory, **Goal Programming:** Goal programming model, Simplex method for goal programming, **Parametric Linear Programming:** Changes in objective function coefficients, Changes in right-hand side constants, **Non-Linear Programming:** Lagrangean method, Kuhn-Tucker condition, Quadratic programming, Separable programming, Chance-constrained programming or Stochastic programming

ADVANCED PRODUCTION MANAGEMENT

COURSE CODE: MBAS403

OBJECTIVES

- Discussions of Advanced nature on the following topics reinforced by Case Analysis, Situation Diagnosis, finding remedial alternatives, mathematical modeling, heuristics, etc. will form a major component of the teaching methodology.

SYLLABUS

UNIT I

Advanced Production System Concept: Forecasting using Multiple Regression (Matrix Method), Introduction to CIM, FMS, Reverse Engineering, Integrated Business Logistics, ERP.

UNIT II

Single Facility Location Problem, Multifacility Location Problem – Minimax Location Problem - Computerized Layout Techniques - ALDEP, CRAFT, Group Technology - Rank Order Clustering Algorithm.

UNIT III

Aggregate Planning: Concepts, Mathematical model. Master Scheduling - Single Machine Scheduling: Branch and Bound Algorithm to Minimize Mean Tardiness, Simple heuristic to minimize total tardiness, Flow Shop Scheduling: Branch and Bound Technique to minimize make span, CDS heuristic - Job Shop Scheduling: priority rules, Non-delay schedule generation - Travelling Salesman Problem and its use to solve Single Machine Scheduling Problem with dependent set up time.

UNIT IV

Assembly Line Balancing: COMSOAL, Resource Allocation and Resource Leveling in Project Networks - Replacement Analysis: - Due to Complete Failure - Distinction between Break Down Maintenance and Preventive Maintenance - Use of Simulation for Maintenance Management Decision, AHP for vendor rating

UNIT V

Inventory Models - Probabilistic Models – Multi-Item Model with Storage Limitation, Purchase model of inventory for multi-item Joint Replenishment without shortages, Manufacturing model of inventory for multi-item Joint Replenishment without shortages, P&Q Systems of Inventory, ABC Classification, VED Analysis, FSN Analysis, XYZ Analysis, Design of Single Sampling Plan using Nomogram.

Course Outcomes (COs)

- **CO1:** Analyze and apply advanced production management techniques to optimize operational efficiency.

- **CO2:** Utilize critical thinking and research tools to solve complex production management issues through case analysis and mathematical modeling.
- **CO3:** Demonstrate ethical leadership and social responsibility in decision-making processes within the production management environment.
- **CO4:** Develop sustainable production strategies by understanding the global, economic, and legal aspects influencing production management.
- **CO5:** Collaborate effectively in team-based projects to design and implement production management solutions that align with organizational goals.

COMPUTER INTEGRATED MANUFACTURING SYSTEMS

COURSE CODE: MBAS404

SYLLABUS

UNIT I

Manufacturing System Management: Types of production system, CAD and CAM, Concurrent engineering, Design for Manufacturing (DFM), Design for Assembly (DFA), Review of aggregate planning, Master production planning, Materials Requirement Planning (MRP), Capacity requirements planning (CRP)

UNIT II

CIM: Need for CIM, Objectives of CIM, major components of CIM, **Standard Architecture of CIM:** IBM Architecture of CIM, Digital Equipment Corporation CIM Architecture, CASA/SME's CIM wheel, Components of manufacturing enterprise, Integrated view of CIM (Hierarchical Planning and Control of CIM, Various Modes of Factory data Exchange), Benefits of CIM, **Mathematical Models of Production Performance:** Performance Measures of Layout, Performance Measures of Capacity Planning, Performance Measures of Inventory Systems, ABC Analysis, Measures of Performance of Single Machine Scheduling Problem, Measures of Performance of Flow Shop Scheduling Problem, Measures of Performance of Job Shop Scheduling Problem, Performance Measures of Maintenance System, **Lean Manufacturing:** Steps of Lean Manufacturing, Components of Lean Manufacturing, **Total Productive Maintenance:** Objectives of TPM Equipment maintenance techniques, Pillars of TPM

UNIT III

Just-In-Time: Types of Kanban, Push/pull production, Kanban systems - Pull system, **Agile Manufacturing:** Dimensions, Bolts and nuts of agile manufacturing, **Computer Aided Process Planning (CAPP):** Variant Process Planning, Generative Process Planning, Knowledge-Based Process Planning, Benefits of CAPP, Feature Recognition in CAPP, FEATURES – A Feature Recognition System, **Algorithms for Group Technology:** Rank Order Clustering (ROC) Algorithm, Bond Energy Algorithm , Production Flow Analysis (PFA), Hierarchical Clustering Algorithm/ Single Linkage Clustering Algorithm, **Classification and Coding System:** Opitz Classification and Coding System, MICLASS system, Multiclass, DCLASS, Introduction to Automated Guided Vehicle System (AGVS)

UNIT IV

Flexible Manufacturing Systems (FMS): Types of flexibility of FMS, Objectives of FMS, Elements of FMS, types of FMS, Types of FMS layout, Complete FMS, **FMS Scheduling:** Review of single machine scheduling, flow scheduling, Job shop scheduling, **Shop Floor Control:** Operation/production planning and control, Shop floor data collection, Shop floor control elements, Types of factory data collection system, Types of data capturing techniques, Barcode Technology, Radio Frequency Identification (RFID), Machine Vision, Automated data collection systems, **Fundamentals of Communication:** Factory communication linkages, Components of communication, Data flow, **Networks:** Network topology, Types of Networks,

Types of data transmission, Computer Network Models [OSI Reference Model, TCP/IP Reference Model, Manufacturing Automation Protocol (MAP), TOP (Technical Office Protocol)]

UNIT V

Geometric Modelling: Wireframe modelling, Surface modelling, Solid modelling [Constructive Solid Geometry, Boundary Representation (B-Rep)], **Robotics:** Terminologies of robot, Coordinate systems, Point to Point Type Robot, Continuous Path Type Robot, drive systems of robot, Robot precision, Applications of robots, **Sensing:** Range sensor, Time-of-flight range finders, Proximity sensors, Touch sensors, Force and torque sensors, **Robot End Effector:** Grippers, Mechanical grippers, Gripper mechanisms, Tools as end effectors, **Robot Programming:** Lead through programming methods, Essentials of robot programming (path in space), Select commands to operate robot, Textual robotic languages (Introduction to VAL II, AL and AML robot languages)

COMPUTER SIMULATION

COURSE CODE: MBAS405

OBJECTIVES

- To understand stochastic models
- To know the various aspects of simulation
- To use high level languages and GPSS etc. In a stochastic environment

SYLLABUS

UNIT I

System concept, need for simulation, Types of model, Major steps of simulation, Types of simulation, Advantages of simulation, Monte-Carlo simulation, Methods of random number generation- Mid-square method, Multiplicative Congruential method, Testing of randomness of random numbers- Chi-square method, Kolmogorov-Smirnov Test, Run test

UNIT II

Random variate formulas for Uniform distribution, Exponential distribution, Poisson distribution, Methods of Random variate generation for Normal distribution, Gamma distribution. Introduction to simulation languages – GPSS, SIMULA I, SIMSCRIPT, GASP, SIMAN, DYNAMO.

UNIT III

Simulation using high level language- Single server model with single queue, Parallel server model with single queue, Single server queueing system with two queues with alternate service, Single server queueing system with balking and with reneging, Single server queueing model with single queue with bulk arrivals, Inventory system, Assembly line system

UNIT IV

GPSS Preliminary blocks- GENERATE, QUEUE, DEPART, TERMINATE, SEIZE, RELEASE, ADVANCE, TABLE OF DEFINITION, ENTER, LEAVE, STOEG, TRANSFER BLOCKS, SAMPLING PROBABILITY DISTRIBUTION

UNIT V

GPSS- Standard Numerical attributes (SNAs), Transaction parameters, Priority block, Select Block, Equivalence Declaration, Table Entity. ARENA Modules - Basic Process Modules, Advanced Process Module Panel, Data Modules Simulation case Studies in Manufacturing and Service organizations.

Course Outcomes (COs)

- **CO1:** Apply stochastic models to simulate complex business scenarios and improve decision-making processes.
- **CO2:** Utilize high-level programming languages and simulation software like GPSS to model and analyze business systems.

- **CO3:** Demonstrate critical thinking in the development and evaluation of simulation models for business applications.
- **CO4:** Integrate ethical considerations and social responsibility when designing simulation models that impact business and society.
- **CO5:** Collaborate effectively in teams to develop and implement simulation projects that address organizational challenges.

CO-PO & CO-PSO Mapping Table

CO	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2

FUNDAMENTALS OF SIX SIGMA

COURSE CODE: MBAS406

OBJECTIVE

- Objective of this course is to train management students about the principles of six sigma implementation and improving quality with respect to products and services.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Factory visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I

The fundamentals of six sigma-principles of quality management- Business Performance Improvement and six sigma-the evolution of Six Sigma-Qualities as a Business Performance Metric-Quality Principles and Six Sigma- six sigma and Competitive Advantage.

Principles of Six Sigma- process Concept and Systems Thinking- Six Sigma Body of Knowledge-Metrics and Measurement-Six Sigma Problem Solving-Six Sigma in Service Organization.

UNIT II

Project Organization, Selection, and Definition- Organizing for Six Sigma Projects- People skills- Six sigma Project Selection- Project Definition-Project Review.

Process Measurement- Process Metrics- Data Collection-Data Summarization– Measurement System Evaluation and Verification- Process Capability Evaluation Benchmarking

UNIT III

Process Analysis – Statistical Methods in Six Sigma- Probability Distribution- Basic Statistical Methods- Tools for Process Analysis.

Process Improvement- Principles of Process Improvement- Tools for Process Improvement- Six Sigma and Lean Production- Implementation Planning.

UNIT IV

Process Control- Control Systems-Statistical Process Control- Constructing and Using Control Charts.

Design for Six Sigma-Concept and Design Development- Overview of DFSS- Concept Development- Concept Engineering- Design Development- Quality Function Deployment-Detailed Design and Analysis- Design Failure Mode and Effect Analysis- Reliability Prediction in DFSS.

Course Outcomes (COs)

- **CO1:** Apply Six Sigma principles to identify and eliminate defects in business processes, enhancing overall quality and efficiency.
- **CO2:** Utilize critical thinking and problem-solving skills to analyze quality-related issues in products and services, using Six Sigma tools and techniques.
- **CO3:** Demonstrate ethical leadership in the implementation of Six Sigma projects, ensuring that improvements benefit both the organization and society.
- **CO4:** Understand the environmental and legal implications of Six Sigma practices and develop strategies that support sustainable business growth.
- **CO5:** Collaborate effectively in team environments to lead Six Sigma initiatives that align with organizational goals and improve process performance.

CO-PO & CO-PSO Mapping Table

CO	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2

5. www.sixsigmaindia.net

ILLUSTRATIVE EXERCISES

1. Six Sigma project in an automobile company.
2. Six Sigma project in a financial organization
3. Six Sigma project in a hospital.
4. Six Sigma project in an educational institution.
5. Six Sigma project in an electronic product manufacturing company
6. Six Sigma project in a hotel
7. Six Sigma project in retail industry
8. Six Sigma project in Telecommunication Industry

INNOVATION AND PRODUCT DEVELOPMENT

COURSE CODE: MBAS407

OBJECTIVE:

- Objective of this course is to train management students about the principles of innovation with respect to products and services.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Factory visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I

High technology-strategic context

Characteristics of high technology, high-tech markets, high-tech products, high-tech environment –market penetration and marketing management, IT-internet opportunities, IT-enablement of new products and industries, IT and digital technology –implications for new product development and competitive advantage

Product Development Strategies

Business, Market, technology and resource strategies, business strategy, basis of competition, competitive strategy, technology strategy and roadmap, product strategy, global resource strategy, implementing strategy, strategy officer, guidelines for preparing and implementation of strategic plans

UNIT II

Marketing management

Marketing-definitions, the role of marketing in high-tech markets-misconceptions, marketing management functions, the marketing process-characteristics, marketing managers –output and success metrics, inventing the whole product, ancillary products and tools, understanding stakeholders needs and priorities. Need satisfaction and window of opportunity-criticality of timing, S-curve model and growth through successive product introduction, value proposition, market segmentation in product development, segment analysis, market segmentation by diffusion of innovation and the technology adoption life cycle, impact of market infrastructure on new product penetration, product development and commercialization investment, the product roadmap, positioning strategy, value pricing, the selling process, managing customer relations,

Product platform and Knowledge integration

Product development goals, knowledge-generation, retention, reuse and integration, dimensions of knowledge integration, knowledge integration across the value chain and virtual teams, time value of knowledge and short time to market, types of products and development projects, product platform and architectural design considerations, product architecture and modularity, strategic outsourcing and product architecture, product life cycle, continuous improvement of a product, baseline and derivative products.

UNIT III

The Product Development process

The product development framework, the product development process at leading companies, the new product development and commercialization process, scaling the process and the dynamic nature of product development, knowledge generation and integration in PDCP, flexibility in product development, market requirement specification, phases of the PDCP, product launch, cross-functional responsibilities and deliverables in product development, deliverables checklist, process development methodology, software product development, product release and post release management, product change management.

Excellence in design and product reliability

Product design-guidelines for excellence-design for excellence-design for reliability, predictability and robustness, reliability profile over the product life cycle- reliability assurance beyond the design phase-reliability design-reliability modeling and other tools- fault tree analysis-failure modes, effects and criticality analysis-design of experiments passive data collection-accelerated testing and screening, Weibull analysis, The Duane growth Model-reliability growth testing-robustness and predictability of performance terminology in product design and development-definitions-product documentation prototype-product characterization testing-customer participation in product development- quality.

UNIT IV

Flawless execution, Global resources management

Challenges in the development and commercialization of high-tech products-strategies for flawless execution-process orientation-kaizen in PDCP-managing critical interfaces systems analysis, systems engineering and life cycle thinking, product development systems analysis methodology-product development –a global perspective-managing constraints-fostering innovation and entrepreneurship-common innovation problems in large companies-engineering excellence and team productivity-manufacturing metaphors for lean product development-virtual team through strategic alliances and sourcing to external and internal suppliers-core competency, core activities and leveraging resources strategic alliances-sourcing strategy and supplier selection-in sourcing and outsourcing structure and management of internal suppliers-outsourcing strategy.

Project management in product development

Project management tasks and a project manager's responsibilities-sources of a project manager's authority and influence-responsibilities of a functional manager- midcourse change in project manager-the planning process-the project plan outline-the statement of work-the work breakdown structure –the project schedule-cost estimating-project organization and resource management-product development-an integrated team from engineering and manufacturing-staff deployment-the task assignment sheet-planning resource demand and deployment-Driving Progress and Project Meetings- a cost/schedule/performance trade-off matrix-project cost and schedule variance analysis project closure-aggregate project planning and management-prioritization of projects-the aggregate project plan- a seven step process.

UNIT V

Best practices for product development managers

Business processes- decision making-risk management- the decision tree in risk management- problem solving-root cause analysis- creative brainstorming- cycles of learning-effective meeting management- effective Presentation.

Managing product and technology portfolios for shareholder value

Factor affecting long-term growth of shareholder value-return on investment models product and technology portfolio planning-a framework for product portfolio planning product portfolio planning-step 3-product project analysis-product portfolio planning-step 4-portfolio analysis-resource distribution-assessing market and business opportunities project viability assessment-estimating the probability of success and financial exposure in product development-intellectual property portfolio planning and protection-protection of intellectual property and patents.

Course Outcomes (COs)

- CO1: Apply innovative management theories and practices to develop and implement strategies for new product and service innovation.
- CO2: Utilize critical thinking and communication skills to analyze and articulate the challenges and opportunities in innovation processes.
- CO3: Demonstrate ethical leadership and social responsibility in guiding innovation initiatives that benefit various stakeholders.
- CO4: Assess the global, economic, and legal implications of innovation and design sustainable business models.
- CO5: Work collaboratively in teams to drive innovation projects and contribute to organizational objectives.

CO-PO Mapping Table:

CO	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO1	3	2	1	2	2	3	2
CO2	3	3	0	1	1	3	2
CO3	2	1	3	1	0	2	3
CO4	3	2	1	3	0	2	2
CO5	2	2	2	2	3	3	3
	2.6	2	1.4	1.8	1.2	2.6	2.4

5. www.tnsglobal.com

ILLUSTRATIVE EXERCISE

1. Innovation and Product development of five best passenger cars currently in the market.
2. Innovation and product development of five best TVs in the current market.
3. Innovation and product development of five best washing machines in the current market.
4. Innovation and product development of five best water heaters in the current market
5. Innovation and product development of five best refrigerators in the current market.

SERVICE OPERATIONS MANAGEMENT

COURSE CODE: MBAS408

OBJECTIVE:

The objective of this course is to teach Service Operations Management concepts and also to make students understand tools necessary to solve Service Operations Management problems.

METHODOLOGY:

Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Service organization visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I

- The Role of Services in an Economy
- The Nature of Services
- Service Strategy

UNIT II

- New Service Development
- Technology in Services
- Service Quality

UNIT III

- The Service Encounter
- The Supporting Facility
- Service Facility Location

UNIT IV

- Managing Projects
- Forecasting Demand for Services
- Managing Capacity and Demand
- Managing Waiting Line

UNIT V

- Capacity Planning and Queuing Models
- Service Supply Relationships
- Managing Facilitating Goods
- Growth and Globalization of Services

Course Outcomes (COs):

- CO1: Identify and analyze key operational challenges in a service business, enabling them to address issues proactively.

- CO2: Adept at resolving quality issues in service operations by applying quality management principles and techniques to ensure consistent service excellence.
- CO3: Critically evaluate and optimize design processes to enhance the intended customer service experience, ensuring alignment with customer expectations and business objectives.
- CO4: Measure service process performance using relevant metrics and tools, enabling them to implement continuous improvement initiatives for better efficiency and effectiveness.
- CO5: Capable of developing comprehensive service operations strategies tailored to the specific needs of a service business, fostering innovation and competitive advantage.

5. www.ibid.informindia.co.in

ILLUSTRATIVE EXERCISES:

- Develop an original case for a Service Operations Management Project in a government organisation.
- Develop an original case for a Service Operations Management Project in a financial organization
- Develop an original case for a Service Operations Management Project in a Hospital.
- Develop an original case for a Service Operations Management Project in an educational institution.
- Develop an original case for a Service Operations Management Project in Tourism
- Develop an original case for a Service Operations Management Project in a Hotel
- Develop an original case for a Service Operations Management Project in retail industry
- Develop an original case for a Service Operations Management Project in Telecommunication Industry

SUPPLY CHAIN ANALYTICS

COURSE CODE: MBAS409

COURSE OBJECTIVES:

- The objective of this course is to study key decision areas in supply chain design and operation. Students will learn what data is needed and how to use these data to measure supply chain performance, such as inventory levels, product availabilities, vendor performance, warehouse operations efficiency and customer service levels.
- Subsequently, they will learn how to use data and apply various tool and methods to analyse trends, forecast the customer demand, extract knowledge and business intelligence, and make decisions. Finally, through the analysis and discussion of case studies they get useful insights on how to optimize the value of supply chain processes and operations, to streamline the goals and to design flexible supply chains.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Factory visit and field study, seminar, Game, Subject Video presentation and Illustrative exercises

SYLLABUS

UNIT I: BUILDING A STRATEGIC FRAMEWORK TO ANALYZE SUPPLY CHAINS

- Understanding the Supply Chain
- Supply Chain Performance: Achieving Strategic Fit and Scope
- Supply Chain Drivers and Metrics

UNIT II: DESIGNING THE SUPPLY CHAIN NETWORK

- Designing Distribution Networks and Applications to Online Sales
- Network Design in the Supply Chain
- Designing Global Supply Chain Networks

UNIT III: PLANNING AND COORDINATING DEMAND AND SUPPLY IN A SUPPLY CHAIN

- Demand Forecasting in a Supply Chain
- Aggregate Planning in a Supply Chain
- Sales and Operations Planning in a Supply Chain
- Coordination in a Supply Chain

UNIT IV: PLANNING, MANAGING INVENTORIES IN A SUPPLY CHAIN AND TRANSPORTATION NETWORKS

- Managing Economies of Scale in a Supply Chain: Cycle Inventory
- Managing Uncertainty in a Supply Chain: Safety Inventory
- Linking Product Availability to Profits
- Transportation in a Supply Chain

UNIT V: MANAGING CROSS FUNCTIONAL DRIVERS IN A SUPPLY CHAIN

- Sourcing Decisions in a Supply Chain
- Pricing and Revenue Management in a Supply Chain
- Sustainability and the Supply Chain
- Information Technology in a Supply Chain

- CO1: Identify and explain key performance indicators (KPIs) and metrics used in supply chain management, such as inventory turnover, order accuracy, and lead time.
- CO2: Apply optimization techniques to improve supply chain efficiency, including methods for inventory management, demand forecasting, and transportation planning.
- CO3: Predictive models to forecast demand, assess risks, and evaluate the impact of various scenarios on supply chain performance.
- CO4: Analytics to support decision-making processes, including supply chain optimization, risk management, and resource allocation.
- CO5: Interpret analytical results to provide actionable insights and recommendations for improving overall supply chain performance.

Mapping of COs with POs

ILLUSTRATIVE EXERCISES:

1. Develop models for making network design decisions and use optimization methods for facility location and network design decisions using Excel and Decision Analysis
2. Use decision tree methodologies to evaluate supply chain planning and capacity allocation decisions under uncertainty
3. Apply forecasting methods as well as formulate and solve optimization problems using Excel Spreadsheets

SUPPLY CHAIN MANAGEMENT

COURSE CODE: MBAS410

OBJECTIVES:

- The objective of this course is to cover not only high-level supply chain strategy and concepts, but also to give students an understanding of the tools necessary to solve supply chain management problems.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Factory visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

UNIT I:

- Introduction to Supply Chain Management
- Inventory Management and Risk Pooling
- Networking Planning
- Supply Contracts

UNIT II:

- The Value of Information
- Supply Chain Integration
- Distribution Strategies

UNIT III:

- Strategic Alliances
- Procurement and Outsourcing Strategies
- Global Logistics and Risk Management

UNIT IV:

- Coordinated Product and Supply Chain Design
- Customer Value
- Smart Pricing

UNIT V:

- Information Technology and Business Processes
- Technology Standards
- Local Issues in Supply Chain Management

Course Outcomes (COs):

- CO1: Describe and explain the fundamental framework and scope of supply chain management.

- CO2: Demonstrate the ability to design, build, and manage a competitive supply chain by applying relevant strategies, models, techniques, and leveraging information technology.
- CO3: Effectively plan demand, manage inventory, and coordinate supply to optimize the overall supply chain network.
- CO4: Gain insights into emerging trends in supply chain management and analyze the significant impact of information technology on supply chain processes and performance.
- CO5: Create and apply strategies to optimize supply chain performance and address challenges.

ILLUSTRATIVE EXERCISES:

1. Study of supply chain practices of fresh fish business in Pondicherry.
2. Study of supply chain practices of fresh milk business in Pondicherry
3. Study of supply chain practices of fresh vegetables business in Pondicherry
4. Study of supply chain practices of fresh flower business in Pondicherry
5. Study of supply chain practices of handloom industry in Pondicherry

TOTAL QUALITY MANAGEMENT

COURSE CODE: MBAS411

OBJECTIVES:

- After undergoing this course student will get clear idea about Total Quality Management and will be able to work efficiently in a Total Quality Management organization
- Also, they can be a member of Total Quality Management Implementation team in an organization.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Factory visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I: (The Foundations of TQM)

- Understanding quality
- Models and frameworks for total quality management
- Leadership and commitment
- Case studies on planning

UNIT II: (Planning)

- Policy, strategy and goal deployment
- Partnerships and resources
- Design for quality
- Case studies on planning

UNIT III: (TQM – performance)

- Performance measurement frameworks.
- Self-assessment, audits and reviews
- Benchmarking
- Case studies on performance

UNIT IV: (TQM – Processes)

- Process management
- Process redesign/engineering
- Quality management system
- Continuous improvement
- Case studies on process

UNIT V: (TQM – People and Implementation)

- Human resource management
- Culture change through teamwork
- Communications, innovation and learning
- Implementation
- Case studies on people and Implementation

TEXT BOOKS:

1. **John S. Oakland**, 2003. Total Quality Management text with cases, Butterworth Heinmann, Oxford/New Delhi
2. **Dale H. Besterfield, Carol Besterfield-Michna, Glen H. Besterfield and Mary Besterfield-Sacre**, 2003. Total Quality Management, Pearson Education, New Delhi.

REFERENCES:

1. **Feigenbaum, A.V.**, 1983. Total Quality Control, McGraw-Hill, New York.
2. **Omachonu, V.K., Ross, J.E.**, 1994. Principles of Total Quality, Lucie Press, Florida.
3. **J. Juran** 1979. Quality Control Handbook, McGraw-Hill, New York

WEB SOURCES:

1. www.iso.org
2. www.qcin.org
3. www.asq.org
4. www.qualitymag.com
5. www.qualitymanagementinternational.com

ILLUSTRATIVE EXERCISES

1. Develop an original case for a Total Quality Management project in a government organization.
2. Develop an original case for a Total Quality Management project in a financial organization
3. Develop an original case for a Total Quality Management project in a hospital.
4. Develop an original case for a Total Quality Management project in an educational institution.
5. Develop an original case for a Total Quality Management project in a company manufacturing any product

SYSTEMS ELECTIVIES

BUSINESS INTELLIGENCE

COURSE CODE: MBAS501

OBJECTIVES

- This subject aims to presents the importance of data and data warehouse
- It also gives different methods perform data mining to find useful patterns if any
- It focuses on Business performance measures

SYLLABUS

UNIT I:

Business Intelligence – Introduction, Framework of Business Intelligence- Definition, History, Architecture of BI, benefits of BI, Intelligence creation and use of BI governance, Transaction processing versus analytic processing, BI implementation – Developing or acquiring BI, Justification and Cost-benefit analysis, Security and protection of privacy, Integration of systems and applications, BI tools and techniques, Major vendors.

UNIT II

Data Warehousing – Definition, and concepts, Characteristics, Data marts, Operational data stores, Enterprise data warehouse, metadata, Architectures. Data warehouse process overview. Data integration, ELT.

Data warehouse development – Vendors, Development approaches, Representation of data in data warehouse, OLAP Vs OLTP, OLAP operations Implementation issues of data warehouse, Administration, security and future trends of data warehouse.

UNIT III:

Business performance management (BPM) – Overview, Definition, BPM Vs BI, Strategize, Plan, Monitor, Act and Adjust of BPM, Performance management, BPM methodologies, technologies and applications, Performance dashboards and scoreboards.

UNIT IV:

Data mining for business intelligence – concepts, definitions, applications, process, methods, Clustering methods, meta heuristics, Artificial neural networks for data mining, data mining software tools.

UNIT V:

Text mining – concepts and definitions, Natural language processing, Applications, Process, Tools. Web mining – overview, web content mining, Web structure mining, Web usage mining. BI Implementation – Overview (BI implementation factors, managerial issues), BI and integration implementation, Connecting BI systems to databases and other systems, On demand BI, Issues of legality, privacy and ethics, Social networks and BI for collaborative decision making, RFID and new BI application opportUNIT ies.

TEXTBOOK

- Turban, E., Sharda, R., Delen, D. and King, D., Business Intelligence- A Managerial Approach, Pearson Education, New Delhi, 2012.

Reference

- Sonar, R.M., Next generation Business Intelligence – A Knowledge Based Approach, VIKAS Publications, New Delhi, 201

DATABASE MANAGEMENT SYSTEMS

COURSE CODE: MBAS502

OBJECTIVES:

- The objective of the subject is to introduce the concepts of data modelling, database design, DBMS products and Database administration

METHODOLOGY:

- Lectures supplemented with case studies and classroom exercises

SYLLABUS

UNIT I:

Concept of system, Conventional file processing system, Drawbacks of conventional file processing system, Database system, Definition, Advantages, Components of Database Management System, Economic Justification of Database Approach, Terminologies of database systems, Data structure: Location methods, Types of pointers, Stack, Queue, sorted list, Ring, Inverted list, Multi –List, Tree, Balanced tree.

UNIT II:

Data model: Hierarchical data model, Network data model, Relational data model, E-R model. Database Design: Steps of database design, Normalization – 1NF, 2NF, 3NF, Case problems for design of conceptual data model, Data Volume and Usage Analysis.

UNIT III:

Implementation design: guidelines for mapping conceptual data model into hierarchical data model, Network data model and Relational data model, Program design guidelines (DAD). Hierarchical Database Management Systems: DBD and DL/I of IMS and DDL and DML of PC-FOCUS. Examples with small programs.

UNIT IV:

Network database management systems: DDL and DML of IDMS, Relational Database Management Systems: Relational Algebra and Relational calculus, DDL and DML of SQL.

UNIT V:

Database Administration: Functions of DBA, Security Mechanism: Authorization, Encryption, Concurrency control, Problem of concurrency control, Resource locking, deadlock/Deadly embrace, Database recovery: Restore/Return, backward recovery, Forward recovery.

TEXT BOOK:

1. Panneerselvam, R., Database Management Systems PHI Learning Pvt. Ltd., New Delhi, 2011.

REFERENCES:

1. James martin, Principles of Database Management, Prentice-Hall of India, 1998.
2. Silberschatz., A., et.al., Database Management Concepts, McGraw Hill International Edition, New York, 1997.
3. Date, C.J., An Introduction to Database Systems, Narosa Publishing House, New Delhi, 1987.

5. www.springerlink.com

ILLUSTRATIVE EXERCISE:

- The Internal mark is awarded based on the components.

DECISION SUPPORT SYSTEMS

COURSE CODE: MBAS503

OBJECTIVES

- To help towards a career in Info. Systems Management.
- To introduce the basic concepts in Decision Support Systems, illustrating, how they facilitate efficient executive decision making.

METHODOLOGY

- The methodology of this subject includes lectures, application problem solving and case studies.

SYLLABUS

UNIT I:

Decision Support Systems – Definition – Characteristics & capabilities of DSS – Components of DSS-database, Model base, Communication subsystem & User – Classes of DSS.

UNIT II:

DSS hardware and software – Group DSS – components & typology – Constructing a DSS – development process.

UNIT III:

DSS development tools – Yardsticks for choosing DSS software – Executive information and support systems.

UNIT IV:

Illustrative DSS applications – Portfolio Management – Human Resource Management, Marketing Decision Support System, Small Business Application, Manufacturing DSS.

UNIT V:

Expert Systems – fundamentals – Types of expert systems – Developing ES – Problems & Limitations of ES.

TEXT BOOK:

1. Efralm Turbon: DECISION SUPPORT SYSTEM AND EXPERT SYSTEMS, Macmillan.

REFERENCES:

5. www.springerlink.com

ILLUSTRATIVE EXERCISE:

- The Internal mark is awarded based on the components.

E-COMMERCE

COURSE CODE: MBAS504

OBJECTIVES:

- To introduce the concepts of Electronic Commerce
- To make students to understand the concepts of Electronic Commerce through case studies

METHODOLOGY:

Lectures, mini-projects, case studies, tutorials using Open-Source software

SYLLABUS

UNIT I:

- Foundations of Electronic Commerce
- Retailing in Electronic Commerce

UNIT II:

- Internet Consumers and Market Research
- Advertisement in Electronic Commerce

UNIT III:

- Electronic Commerce for Service Industries
- Business-to-Business Electronic Commerce

UNIT IV:

- Intranet and Extranet
- Electronic Payment Systems

UNIT V:

- EC Strategy and Implementation
- Public Policy: From Legal Issues to Privacy

TEXT BOOKS:

1. Dave Chaffey, E-Business and E-Commerce Management, Pearson, 2007
2. P.T. Joseph, E-commerce: An Indian Perspective, Prentice-Hall, 2009

REFERENCES:

1. Ritendra Goel, E-Commerce, New Age International, 2007
2. Gary Schneider, Electronic Commerce, Cengage Learning, 2008

WEB RESOURCES

2. <http://e-commerce.net.in/>

3. <http://e-commerce.meetup.com/>
4. <http://www.davechaffey.com/>
5. <http://www.ecommerce-ebooks.com/>

ILLUSTRATIVE EXERCISE:

1. Develop an original case for an E-Commerce project in a financial organization
2. Develop an original case for an E-Commerce project in a company manufacturing any product
3. Develop an original case for an E-Commerce project in retail industry
4. Develop an original case for an E-Commerce project in Telecommunication Industry
5. Develop an original case for an E-Commerce project in B2C application
6. Develop an original case for an E-Commerce project in B2B application
7. Develop an original case for an E-Commerce project in C2C application

OBJECT-ORIENTED PROGRAMMING WITH C++

COURSE CODE: MBAS505

OBJECTIVES:

To introduce the concepts of Object-Oriented Programming using C++ language

To focus on different components of Object-Oriented Programming using C++ language and to plan, design and develop information systems.

METHODOLOGY:

Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Organization visit and field study, seminar, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I:

Introduction to Object-Oriented Programming (OOP) – Organization of data and functions in OOP – Concepts in OOP – Objects, Classes, Data Abstraction, Data Encapsulation, Inheritance, Polymorphism, Dynamic binding, Message Passing –

Benefits of OOP – Application of OOP – Introduction to C++ Programming Language – Structure of a C++ Program – Keywords, Identifiers, Data types, Operators in C++, Character strings, Arrays, Functions, Pointers and Structures.

UNIT II:

Classes and Objects Constructors and Destructors

UNIT III:

Operator Overloading and Type Conversion Inheritance

UNIT IV:

Pointers to objects, Virtual functions and Polymorphism Managing Console Input/Output Operations

UNIT V:

Working with files – File pointers and Error handling Object-Oriented Systems development

TEXT BOOK:

1. **Balagurusamy, E.**2007 OBJECT-ORIENTED PROGRAMMING WITH C++, New Delhi: Tata McGraw-Hill Publishing Co. Ltd.
2. **Farrell,** 2009. OBJECT-ORIENTED PROGRAMMING WITH C++, Cengage Learning India Pvt. Ltd, Delhi.

REFERENCES

1. **Malik,** 2009. C++ Programming Language, Cengage Learning India Pvt. Ltd, Delhi.

2. **Lafore**,2002. Object-Oriented Programming in C++; Pearson Education, Noida.
3. **Ira Pohl**, 2002. Object-Oriented Programming using C++, Pearson Education, Noida.

WEB RESOURCES

2. www.lamp.infosys.deakin.edu.au
3. www.mbsportal.bl.uk
4. www.ibm.com
5. www.infoworld.com

ILLUSTRATIVE EXERCISE:

- Design and Development of Object-Oriented program using C++ for Student admission
- Design and Development of Object-Oriented program using C++ for Income tax calculation
- Design and Development of Object-Oriented program using C++ for Sales application
- Design and Development of Object-Oriented program using C++ for performance appraisal application
- Design and Development of Object-Oriented program using C++ for consolidated mark sheet printing

SOFTWARE ENGINEERING

COURSE CODE: MBAS506

OBJECTIVES:

- To make the students understand the underlying concepts of Software Engineering, Analysis and design, Quality assurance and testing.
- To enable the students to develop software for specific categories.

METHODOLOGY:

- Lectures, mini-projects, case studies, tutorials using Open-Source software

SYLLABUS

UNIT I: Introduction to Software Engineering

Software as a product – its characteristics, components and applications, Software engineering as a process – Process Maturity levels – Different process models – Linear sequential model, Prototyping model, Rapid application development model, Evolutionary software process models, Conventional methods for Software Engineering – System Engineering, Information Engineering and Product Engineering.

UNIT II: Software Quality Assurance

Software quality assurance – concepts, metrics (McCall's Quality Factors and Hewlett-Packard's FURPS factors), Defect Amplification and removal, Formal Technical Reviews (FTRs), Software reliability, statistical quality assurance (SQA) for software.

UNIT III: Requirement analysis and Design

Overview of Software requirement analysis and analysis modeling – data modeling, functional modeling and behavioural modeling

Software design – process, principles, concepts and methods – transform flow and transaction flow – interface design.

UNIT IV: Software testing

Software testing – methods (white box testing, black box testing, basis path testing, control structure Testing) and strategies (UNIT testing, integration testing, validation testing, system testing)

Testing for specialized environments – GUIs, C/S, Web sites, Documentation/Help facilities and Real-time systems, Debugging – process and approaches.

UNIT V: Software Engineering applied to Object-oriented systems and Client/Server systems

Object-oriented software engineering – concepts, distinguishing characteristics and principles, Object oriented Analysis process, Object Design process and Object-oriented Testing strategies Client-server(C/S) software engineering – structure and design of C/S systems.

TEXT BOOKS:

1. Roger Pressman, Software Engineering: A Practitioner's Approach, Tata McGrawHill, 2005
2. Nasib Singh Gill, Software Engineering, Khanna Publishers, 2002

REFERENCES:

1. Ian Sommerville, Software Engineering, Pearson Education, 2010
2. James Peters and Witold Pedrycz, Software Engineering: An Engineering Approach, Wiley, 2000

WEB RESOURCES

1. <http://www.rspa.com/spi/>
2. <http://www.sei.cmu.edu/>
3. <http://www.se.rit.edu/>
4. <http://best-practice-software-engineering.blogspot.com/>
5. <http://softwareengineeringblog.com/>

ILLUSTRATIVE EXERCISE:

- The Internal mark is awarded based on the components.

SOFTWARE PROJECT MANAGEMENT

COURSE CODE: MBAS507

OBJECTIVES:

- To understand the concept of software projects and steps in software project management
- To enable the students to evaluate the technical feasibility, financial viability, market acceptability and social desirability of software projects
- To become familiar with Software project management tools and techniques
- To be effective as project managers and as part of software project teams

METHODOLOGY:

- Lectures, mini-projects, case studies, periodic invited talks from industry experts

SYLLABUS

UNIT I: SOFTWARE DEVELOPMENT PROJECT MANAGEMENT

Software characteristics and development scenarios (4-quadrant view), Software life-cycle processes, Software development project management strategies: Linear, Incremental, Iterative, Adaptive, and Extreme approaches - their characteristics, strengths and weaknesses

UNIT II: SOFTWARE PROJECTS AND METRICS

Software Project Management – Concepts and 3 P's (People, problem and process) Metrics in the process and project domains, Software measurement - size-oriented metrics, function-oriented metrics and extended function point metrics, Integrating metrics within the process

UNIT III: SOFTWARE PROJECT PLANNING

Software Project planning – objectives, scoping, Resources – human resources, reusable software resources and environmental resources Software project estimation – Popular decomposition techniques – problem-based, process based and empirical estimation (COCOMO model)

Make-or-Buy decision, Project Scheduling and tracking, Managing global software projects

UNIT IV: SOFTWARE RISK MANAGEMENT AND CONFIGURATION MANAGEMENT

Risk Management – Reactive and Proactive risk strategies, Risk identification, projection, mitigation and monitoring – RMMM Plan Software configuration management – process and standards

UNIT V: MANAGING PEOPLE AND ORGANIZING COMMUNICATION

Managing people – Defining staff requirements, staff selection, managing staff, management styles, Project organization structures – hierarchical, matrix, agile teams, managing communication – Planning a communication strategy, communication styles, meetings – types and approaches

TEXT BOOKS:

1. Roger Pressman and Bruce Maxim, Software Engineering: A Practitioner's Approach, Tata McGraw-Hill, 2015
2. Robert K. Wysocki, Effective Software Project Management, Wiley, 2010

REFERENCES:

1. Ian Sommerville, Software Engineering, Pearson Education, 2016
2. Ashfaqe Ahmed, Software Project Management: A Process-Driven Approach, CRC Press (Taylor & Francis), 2016
3. Anna P. Murray, the complete Software Project Manager: Mastering technology from Planning to launch and beyond, Wiley, 2016

WEB RESOURCES

1. <http://softwareprojectmanager.org/>
2. <http://www.softwareprojects.org/>
3. <http://www.rspa.com/spi/project-mgmt.html>
4. <http://www.project.net/>
5. <https://www.sei.cmu.edu/>

ILLUSTRATIVE EXERCISE:

- The Internal marks are awarded through continuous assessment based on components such as tests, quizzes, case analysis, etc.

SYSTEMS ANALYSIS AND DESIGN

COURSE CODE: MBAS508

OBJECTIVES:

- To introduce the concepts of System analysis and design
- To focus on different components of System analysis and design and to plan, design and develop such information systems.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Organization visit and field study, seminar, Game, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I:

INTRODUCTION TO SYSTEMS ANALYSIS AND DESIGN – Scope – Functions of a Systems Analyst – What is Systems Analysis and Design – Categories of Information Systems. MANAGING THE APPLICATIONS DEVELOPMENT PORTFOLIO – Role of Information Systems – Systems, Subsystems and their Interdependence – Classical Systems Development – Lifecycle – Introduction to Structured Methodologies – Prototyping – Preliminary Investigation – Testing Project Feasibility.

UNIT II:

STRUCTURED ANALYSIS DEVELOPMENT STRATEGIES – Data Flow Analysis – Physical and Logical – Data Dictionary. APPLICATION PROTOTYPE DEVELOPMENT STRATEGY – Purpose – Steps involved in Uses of Prototypes – Tools for Prototyping- Prototype Strategies.

UNIT III:

COMPUTER AIDED SYSTEMS TOOLS – Role of Tools – Categories of Tools – Case. DESIGN OF COMPUTER OUTPUT – Identification of Computer Outputs – Ways of presenting – Information – Designing of Printed Outputs – Designing Visual Display UNIT s.

UNIT IV:

DESIGN OF INPUT AND CONTROL – Objectives of Input Design – Data Capture Guidelines – Input Validation. DESIGN OF ONLINE DIALOGUE – Purpose and Definition of Online, Interface, etc. – Designing Dialogue – Dialogue Strategies – Data Entry Dialogues.

UNIT V:

MANAGING SYSTEMS IMPLEMENTATION – Training – Conversion Methods – Post Implementation Review. HARDWARE AND SOFTWARE SELECTION – Overall Economic Analysis.

TEXT BOOKS:

1. **James A. Senn.**2007. ANALYSIS AND DESIGN OF INFORMATION SYSTEMS; McGraw Hill International Edition, Singapore.
2. **Alan Dennis, Barbara Haley Wixom** and [Roberta M. Roth](#) ,2009 . Systems Analysis and Design, John Wiley & Sons Inc, USA.

REFERENCES

1. **Igor Hawryszkiewycz**, 2001. Introduction to Systems Analysis and Design, Prentice-Hall of India, New Delhi.
2. **Jeffrey L Whitten** and **Lonnie D Bentley**.2007. ANALYSIS AND DESIGN; Tata McGraw Hill Publishing Company Limited, New Delhi.
3. **John W. Satzinger, Robert B.Jackson** and **Stephen D.Burd**.2007. SYSTEM ANALYSIS AND DESIGN, Cengage Learning India Pvt. Ltd, Delhi.

WEB RESOURCES

2. www.lamp.infosys.deakin.edu.au
3. www.mbsportal.bl.uk
4. www.ibm.com
5. www.infoworld.com

ILLUSTRATIVE EXERCISES

1. Develop an original case for a System analysis and design project in a government organisation.
2. Develop an original case for a System analysis and design project in a financial organization
3. Develop an original case for a System analysis and design project in a Hospital.
4. Develop an original case for a System analysis and design project in an educational institution.
5. Develop an original case for a System analysis and design project in a company manufacturing any product
6. Develop an original case for a System analysis and design project in a Hotel
7. Develop an original case for a System analysis and design project in retail industry
8. Develop an original case for a System analysis and design project in Telecommunication Industry

VISUAL BASIC FOR BUSINESS APPLICATIONS

COURSE CODE: MBAS509

OBJECTIVES:

- To introduce the concepts of Visual Basic
- To focus on different components of Visual Basic and to plan, design and develop information systems.

METHODOLOGY:

- Power Point Presentation, Participative type classes, case study, Assignments, test. Subject quiz, Organization visit and field study, seminar, Subject Video presentation and Illustrative exercise

SYLLABUS

UNIT I

VB environment; Tools; Bars; Different Menus; Customizing a Form – Setting Different properties; Saving, Edit, Debug, Run and writing simple programs; user interface – Creating Controls; Command buttons, simple event procedure; image controls, text boxes; Labels and Navigation.

UNIT II

VB Programming – Editing Tools; Statements; Variables; Data Types; Strings; Numbers; Picture Boxes; Printer Object; Operators, Determinant and Indeterminant loops; Decision Making Statements; Built-In-Functions; Date-Time functions.

UNIT III

Functions – Procedures – Arrays – Writing simple programs using above function (like Searching, Sorting and etc.) – Control Arrays – List and Combo Box; Flex Grid control – VB Object Browser – Introduction to Object Oriented Programming – Making user interfaces using MS Window common control, MDI Forms.

UNIT IV

Tools and Techniques for testing, Debugging and optimization; ActiveX Controls, Basic file Handling – Workspace; Database; Recordset; Report Generation; Accessing with different back end (MS Access, Oracle8i), Building Packages (like Student Information System, Library Information System, Railway Reservation System, Inventory Control System etc.)

UNIT V

Fundamentals of Graphics; Monitoring Mouse activity; File System Controls and File System Object, Communicating with other Windows Applications, VB Script, Programming to Internet.

TEXT BOOKS:

1. **Gary Cornell**,1998. VISUAL BASIC 6 FROM THE GROUND UP, Tata McGraw Hill Publishing Company Ltd.,
2. **Connell** 1999. VISUAL BASIC 6.0, Tata McGraw Hill Education Private Limited, New Delhi.

REFERENCES

1. **David Kruglirski**. 1998 J, Inside Visual C++, Microsoft press.
2. **Zak**, 2008. Visual Basic 2008 Cengage Learning India Pvt. Ltd, Delhi.
3. **Steven Holzner**, 2003. Teach yourself Visual Basic .NET, Pearson Education, Noida.

WEB SOURCES

1. www.startwright.com/virtual.htm
2. www.lamp.infosys.deakin.edu.au
3. www.mbsportal.bl.uk
4. www.ibm.com
5. www.infoworld.com

ILLUSTRATIVE EXERCISE:

1. Design of form for Student admission
2. Design of online test using visual basic (Ten Questions).
3. Design a visual basic system for pay roll application for any manufacturing company
4. Design an online train ticket reservation system using visual basic
5. Design a visual basic system for departmental store bill printing for a customer.

ADVANCED EXCEL

COURSE CODE: MBAS510

OBJECTIVE

- The course is designed to provide an in-depth understanding of the various tools and techniques used in Microsoft Excel for data analysis and management.
- The course is divided into five UNIT s that cover conditional logic and text formulas, charts and data organization, pivot tables and pivot charts, data protection, and macros.
- By the end of the course, you will have gained the skills and knowledge necessary to use Excel effectively for data analysis and management.

METHODOLOGY

Classroom lectures, discussions, and continuous lab exercises with internal and end-semester end examinations as assessment criteria

SYLLABUS

UNIT I: Conditional Logic and Text Formulas

- Introduction to Conditional Logic
- IF Statement, Nested IF, AND, OR, NOT, IFERROR
- SUMIF, AVERAGEIF, COUNTIF, COUNTIFS, SUMIFS, AVERAGEIFS
- Introduction to Text Formulas
- Case Formulas, Fix Number Fields, Trim Spaces, Substitute Text

UNIT II: Charts and Data Organization

- Introduction to Charts
- Chart types, Instant Chart, Update Chart
- Column Chart, Picture Fill, Line Chart, Scatter Chart
- Chart Styles, Chart Layouts, Add Labels, Axis Options, Chart Title, Legends, Data Labels
- Outline, Sort, Filter, and Subtotal
- Group and Ungroup, Sort Data, Sort Multiple Levels
- Filter Data, Advanced Filter, Conditional Sorting, and Filtering
- Sorting with Custom Lists, Subtotal

UNIT III: PivotTables and Pivot Charts

- Introduction to PivotTables
- Creating PivotTables, Choosing Fields, PivotTable Layout
- Filtering PivotTables, Modifying PivotTable Data, Pivot Charts

UNIT IV: Data Protection

- Introduction to Protecting Data
- Workbook Passwords, Protecting Workbooks, Unlocking Cells

UNIT V: Macros

- Introduction to Macros and Macro Security
- Recording a Macro, Assigning a Macro to a Button or Shape

TEXT BOOKS

1. “Excel 2016 Bible”, John Walkenbach
2. “Excel 2016 Power Programming with VBA”, Dick Kusleika and Michael Alexander
3. “Advanced Excel Essentials”, Jordan Goldmeier

WEB SOURCES

1. https://www.youtube.com/watch?v=JYtZ2zsdE_s
2. <https://www.youtube.com/watch?v=RkQl2wVpQAo>
3. https://www.youtube.com/watch?v=NdUZx_yyEqY
4. https://www.youtube.com/watch?v=Jwo5Ae7tH_I

ILLUSTRATIVE EXERCISES

1. Create an IF statement that returns "Pass" if a student's score is greater than or equal to 70, and "Fail" if the score is less than 70.
2. Use the SUMIF function to calculate the total sales for a particular product category.
3. Use the SUBSTITUTE function to replace all instances of a particular text string in a cell with another text string.
4. Create a column chart that shows the sales performance of different regions in a company.
5. Create a Pivot Table that shows the total sales by product category and region.
6. Use a slicer to filter the data in a Pivot Table based on a particular value.
7. Protect a worksheet with a password to prevent unauthorized access.
8. Lock specific cells in a worksheet to prevent users from editing them.
9. Record a macro that performs a series of repetitive tasks, such as formatting data or generating reports.
10. Assign a macro to a button or shape on a worksheet for easy access.
