# PONDICHERRY UNIVERSITY PUDUCHERRY

## **ACADEMIC CURRICULUM**

(SYLLABUS AND REGULATIONS)
FOR

B.Voc – GREEN ENERGY AND ELECTRICAL SYSTEMS

**BACHELOR OF VOCATIONAL DEGREE** 

**CHOICE BASED CREDIT SYSTEM** 

(from the Academic Year 2022-23 onwards)

## **CONTENTS**

• INTRODUCTION - About Course

• KEY FEATURES - Objectives

• COURSE OBJECTIVES - Skill and General

• COURSE STRUCTURE - Levels of Course

• CURRICULUM - I to VI Semester

• LIST OF SUBJECTS - General Science and Humanities (GSH)

- Vocational General (VG)

- Vocational Core (VC)

- Vocational Elective Course (VE)

- On-Job-Training (OJT)

CREDIT DISTRIBUTION

NON CGPA COURSES DETAILS

#### 1. Introduction

#### About B.Voc

Realizing the importance and the necessity of developing skills among students, and creating work-ready manpower on large scale especially to meet the demand-supply mismatch in the Indian Economy, the University Grants Commission (UGC), Ministry of HRD, Government of India had launched a scheme on 27 February 2014 for skills development based higher education as part of college/university education, leading to Bachelor of Vocation (B.Voc.). In these courses, the institute will conduct general education content and sector-specific skills will be imparted by Skill Knowledge Providers/ Training Providers/ Industries.

#### 2. ELIGIBILITY FOR ADMISSION:

Candidates for admission to B.Voc (Production Technology) shall be required to have passed 10+2 or 10+ITI (2 years) or its equivalent from a recognized board of examination.

#### 3. Key Features:

#### **Objectives**

- ➤ To provide a judicious mix of skills relating to a profession and appropriate content of General Education.
- > To ensure that the students have adequate knowledge and skills so that they are work-ready at each exit point of the programme.
- > To provide flexibility to the students through pre-defined entry and multiple exit points.
- ➤ To integrate National Skills Qualifications Framework (NSQF) within the undergraduate level of higher education to enhance the employability of the students and meet industry requirements. Such student apart from meeting the needs of local and national industries are also expected to be equipped to become part of the global workforce.
- ➤ To provide vertical mobility to students admitted in such vocational courses.
- ➤ The certification levels will lead to Diploma/Advanced Diploma/B. Voc. Degree in Green Energy and electric systems and will be offered by Pondicherry University.
- > Students may be awarded Level Certificate/Diploma/Advance Diploma /Degree as outlined in the Table:

| Award                      | Course               | Duration after class XII | Corresponding<br>NSQF level |
|----------------------------|----------------------|--------------------------|-----------------------------|
| Level 4 Certificate        | Certificate          | 06 Months (30 Credits)   | 4                           |
| Level 5 Certificate        | Diploma              | 1 Year (60 Credits)      | 5                           |
| Level 6 Certificate        | Advance Diploma      | 2 Year (120 Credits)     | 6                           |
| <b>Level 7 Certificate</b> | <b>B.Voc. Degree</b> | 3 Year (180 Credits)     | 7                           |

#### 4. Course Objectives

After successfully completing the vocational course, the student would have acquired relevant appropriate and adequate technical knowledge together with the professional skills and competencies in the field of Green Energy so that he/she is properly equipped to take up gainful employment in this Vocation. Thus he/she should have acquired:

#### A. Understanding of

- (a) The relevant basic concepts and principles in basic science subjects (Physics and Mathematics) so that he/she is able to understand the different vocational subjects.
- (b) The basic concepts in engineering drawing using AUTOCAD.
- (c) Understanding various rules and regulations in electrical and green energy.
- (d) The concepts, and principles of working with different electrical & energy measuring tools.
- (e) Importance of Renewable energy systems.
- (f) The knowledge of Green Energy & Electrical systems.
- (g) Understating of energhttps://youtu.be/MBmr1j2hy6Uy utilization.
- (h) The concepts and principles used in Renewable energy systems.

#### B. Adequate Professional Skills and Competencies in

- 1. Have adequate knowledge and skills to prep them ready for the job in this field.
- Be capable to understand the positive aspects of Renewable Energy Technology concerning the environment.
- 3. Handle the installation and commissioning of solar projects in rural and urban areas.
- 4. Be capable to create direct and indirect employment opportunities in rural and backward areas.

#### C. A Healthy and Professional Attitude so that He/ She has

- (a) An analytical approach while working on a job.
- (b) An open mind while locating/rectifying faults.
- (c) Respect for working with his/her own hands.
- (d) Respect for honesty, punctuality, and truthfulness

#### D. NSQF compliant skills in Qualification developed by sector skill council in Capital Goods Sector.

#### 5. Course Structure

The course will consist of a combination of practice, theory and hands-on skills in the Power Generation Sector. The curriculum in each of the years of the programme would be a suitable mix of general education and skill development components.

#### **Skill Development Components:**

- ➤ The focus of skill development components shall be to equip students with appropriate knowledge, practice and attitude, to become work ready. The skill development components will be relevant to the industry as per its requirements.
- ➤ The curriculum will necessarily embed within itself, National Occupational Standards (NOSs) of specific job roles within the industry. This would enable the students to meet the learning outcomes specified in the NOSs.
- > The overall design of the skill development component along with the job roles selected will be such that it leads to a comprehensive specialization in a few domains.
- > The curriculum will focus on work-readiness skills in each of the years of training.
- ➤ Adequate attention will be given in curriculum design to practical work, on-the-job training, development of student portfolios and project work.

#### **General Education Component:**

- ➤ The general education component adheres to the normal senior secondary and university standards. It will emphasize and offer courses which provide holistic development. However, it will not exceed 40% of the total curriculum.
- Adequate emphasis is given to language and communication skills.

The curriculum should be designed in a manner that at the end of year-1, year 2 and year-3, students can meet below mentioned level descriptors for levels 5, 6 and 7 of NSQF, respectively which are as given below:

| Level   | Process<br>required  | Professional<br>Knowledge   | Professional<br>skill  | Core skill  | Responsibility  |
|---------|--|---|--|---|---|
| Level 5 | Job that requires<br>well developed<br>skill, with clear<br>choice of<br>procedures in<br>familiar context   | Knowledge of facts, principles, processes and general concepts, in a field of work or study                         | A range of cognitive and practical skills required to accomplish tasks and solve problems by selecting and applying basic methods, tools materials and information | Desired mathematical skill, understanding of social, political and some skill of collecting and organizing information, communication.  | Responsibility for own work and learning and some responsibility for other's works and learning |
| Level 6 | Demands wide range of specialized technical skill, clarity of knowledge and practice in broad range of activity involving standard/ non-standard practices | Factual and<br>theoretical<br>knowledge in<br>broad contexts<br>within a field of<br>work or study                  | A range of cognitive and practical skills required to generate solutions to specific problems in a field of work or study  | Reasonably good in mathematical calculation, understanding of social, political and reasonably good in data collecting organizing information, and logical communication          | Responsibility for own work and learning and full responsibility for other's works and learning |
| Level 7 | Requires a command of wide ranging specialized theoretical and practical skill, involving variable routine and nonroutine context                          | Wide ranging,<br>factual and<br>theoretical<br>knowledge in<br>broad contexts<br>within a field of<br>work or study | Wide range of cognitive and practical skills required to generate solutions to specific problems in a field of work or study                                       | Good logical and mathematical skill understanding of social political and natural environment good in collecting and organizing information, communication and presentation skill | Full responsibility for output of group and development   |

#### **ASSESSMENT**

#### THEORY COURSES

All theory courses shall be assessed as follows:

| Assessment Method                | Marks |
|----------------------------------|-------|
| Continuous Assessment (Internal) | 40    |
| Semester Examination (External)  | 60    |
| Total                            | 100   |

#### Continuous Assessment (Internal)

| Continuous Assessment (Internal) | Marks |
|----------------------------------|-------|
| Attendance                       | 05    |
| Internal Assessment Test         | 25    |
| Assignments                      | 10    |
| Total                            | 40    |

Attendance carries 5 marks (5 marks for 100% to 95% attendance, 4 marks for 94% to 90% attendance, 3 marks for 89% to 85% attendance, 2 marks for 84% to 80% attendance and 1 mark for 79% to 75% attendance), cycle test carries 25 marks. Performance in the best two of the three tests will be taken for assessment. Assignments carrying 10 marks, shall be in the form of problems, small projects, quizzes, design problems, etc., depending upon the subject content.

#### Semester Examination

The pattern of Semester Examination question papers for theory courses is as follows:

- a) The duration of the examination shall be 3 hours with a maximum of 60 marks.
- b) Section A contains 5 compulsory questions each carrying 2 marks. Only one question shall be selected from each unit. This section carries 10 marks in total.
- c) Section B contains five questions, one question from each unit with 'either' 'or' choice. Each question carries ten marks. Based on necessity, each question may contain sub-divisions. This section carries 50 marks in total.

#### PRACTICAL COURSES:

All practical courses shall be assessed as follows:

| Assessment Method     | Marks |
|-----------------------|-------|
| Continuous Assessment | 40    |
| Semester Examination  | 60    |
| Total                 | 100   |

#### Continuous Assessment (Internal)

| Continuous Assessment (Internal) | Marks |
|----------------------------------|-------|
| Attendance                       | 05    |
| Model examination                | 15    |
| Regular Laboratory Work          | 20    |
| Total                            | 40    |

Attendance carries 5 marks (5 marks for 100% to 95% attendance, 4 marks for 94% to 90% attendance, 3 marks 89% to 85% attendance, 2 marks for 84% to 80% attendance and 1 mark for 79% to 75% attendance). The regular performance in the practical class (Observation and Record) will be evaluated for 20 marks. Performance in the Model examination conducted at the end of the semester will be evaluated for 15 marks. The pattern of the Model Examination will be similar to the Semester Examination.

#### Semester Examination

The Semester Examination of the practical courses will be evaluated for 60 marks by a panel of examiners comprising an internal examiner and an external examiner. The Break-up of marks is as follows:

Procedure : 10 marks
Practical work and calculations : 40 marks
Viva-Voce : 10 marks

#### PROJECT WORK

The Project work carried out in the seventh and eighth semesters- shall be assessed as follows:

| Assessment Method                           | Marks |
|---|-------|
| Continuous Assessment (Internal Evaluation) | 60    |
| Semester Examination (External Evaluation)  | 40    |
| Total                                       | 100   |

ii) Marks allocated for Continuous Assessment are distributed as given in the following table.

| Assessment Method            | Marks |
|------------------------------|-------|
| Guide                        | 25    |
| Project Evaluation Committee | 35    |
| Total                        | 60    |

- a) The guide shall evaluate the student for 25 marks based on the work carried out.
- b) The Project Evaluation Committee comprising the Head of the Department and two other faculty members shall evaluate the project for 35 marks. The evaluation will be carried out through three reviews. The Project Evaluation Committee is constituted by the Head of the Department.
- iii) The final *Semester Examination* of the Project Work will be conducted by a panel of examiners comprising an internal examiner and an external examiner. The Break-up of marks is as follows:

Project report : 15 marks
Presentation : 15 marks
Viva-Voce : 10 marks

#### THEORY cum PRACTICE COURSES

All theory cum practice courses shall be assessed as follows:

| Assessment Method                | Marks |
|----------------------------------|-------|
| Continuous Assessment (Internal) | 40    |
| Semester Examination (External)  | 60    |
| Total                            | 100   |

#### Continuous Assessment (Internal)

| Continuous Assessment (Internal) | Marks |
|----------------------------------|-------|
| Attendance                       | 05    |
| Internal Assessment Test         | 15    |
| Regular Laboratory work          | 15    |
| Total                            | 40    |

Attendance carries 5 marks (5 marks for 100% to 95% attendance, 4 marks for 94% to 90% attendance, 3marks for 89% to 85% attendance, 2 marks for 84% to 80% attendance, and 1 mark for 79% to 75% attendance), Internal Assessment test comprises of cycle test carries 15 marks (Performance in the best two of the three tests will be taken for assessment) and the model examination conducted at the end of the semester and regular performance in the practical class (Observation and Record) will be evaluated 15 marks.

#### Semester Examination

The *Semester Examination* will be conducted as Semester Examination theory and semester Examination Practical each carries 30 Marks.

The pattern of Semester Examination question papers for theory courses is as follows:

- a) The duration of the examination shall be 2 hours with a maximum of 30 marks.
- b) Section A contains five questions, one question from each unit with *'either' 'or' choice*. Each question carries six marks. Based on necessity, each question may contain sub-divisions.

The Semester Examination of the practical courses will be evaluated for 30 marks by a panel of examiners comprising an internal examiner and an external examiner. The Break-up of marks is as follows:

Procedure : 10 marks
Practical work and calculations : 15 marks
Viva-Voce :05 marks

#### ON JOB TRAINING

Depending on the job role (Qualification Packs) that the students have chosen in the industries, the assessment for on-the-job training will be carried out in accordance with the relevant Skill Sector Council.

#### **DECLARATION OF RESULTS**

**Examination Passing Criteria:** 

- i) A student is declared to have *passed* a course if he gets 40% marks and above in the Semester Examination and 50% marks and above overall (Semester Exam marks and Continuous Assessment marks put together)
- ii) If a student fails to clear the semester examination of a theory course after three consecutive attempts, the passing criteria from the fourth attempt onwards will be based on the marks earned by the student in the end-semester examination only. The student is deemed to have passed the course if the mark scored in the end semester examination is 50% and above and he will be awarded only an **C grade** irrespective of the mark scored.

#### **AWARD OF GRADES**

The performance of students in a course is expressed in terms of Letter Grades, each carrying certain Grade Points. A total of Six Passing Grades namely O, A+, A, B+, B, and C is awarded. Total marks (sum of Continuous Assessment and Semester Examination marks) secured by a student in a course are used for computing his Grade by fitting the mark into the Range of Marks assigned for each Grade shown in the table below.

| Range of Marks | Letter | Grade  |
|----------------|--------|--------|
|                | Grade  | Points |
| 91 to 100      | O      | 10     |
| 81 to 90       | A+     | 9      |
| 71 to 80       | A      | 8      |
| 61 to 70       | B+     | 7      |
| 56 to 60       | В      | 6      |
| 50 to 55       | C      | 5      |
| 0 to 49        | F      | 0      |
| Absent         | FA     | 0      |

- 8.2 A student who has secured an 'F' and 'FA' grade shall reappear for the examination in the following semesters. A student who has scored a passing grade other than an "F" and "FA" cannot reappear for the examination.
- 8.3 A student securing 'F' grade in an elective course may reappear for the examination in the following semester or drop the elective course and subsequently register for another elective course in the following semester in place of the dropped elective course.

8.4 Grade Point Average (GPA) indicates the performance of a student in all the examinations appeared by him in a particular semester. GPA score will appear in all the Semester Examination Grade Cards. The Grade Point Average (GPA) for a particular semester is calculated as the ratio of the sum of the products of the number of Credits of a course  $(C_i)$  and the Grade Points scored in that course  $(GP_i)$ , taken for all the courses, to the sum of the number of credits of all the courses (n) registered in that semester.

$$GPA = \frac{\sum_{1}^{n} C_{i} GP_{i}}{\sum_{1}^{n} C_{i}}$$

where, n is the number of courses registered in that semester. For a student who has partially withdrawn from writing examinations of courses in a semester, n is counted as the total number of courses that appeared in that semester minus the number of courses partially withdrawn.

8.5 Cumulative Grade Point Average (CGPA) indicates the performance of a student in all the examinations appeared by him up to a particular semester. CGPA score will appear in all the Semester Examination Grade Cards starting from the first semester. The Cumulative Grade Point Average (CGPA) up to a particular semester is calculated as follows:

$$CGPA = \frac{\sum_{1}^{n} C_{i}GP_{i}}{\sum_{1}^{n} C_{i}}$$

where,  $C_i$  is the Credit of a course,  $GP_i$  is the Grade Point obtained by the student in that course and N is the total number of courses registered up to that semester starting from the first semester

## **CURRICULUM**

Below Table shows for cumulative credits awarded to the learners in skill based vocational courses.

| NSQF<br>Level | Skill<br>Component<br>Credits | General<br>Education<br>Credits | Total Credits<br>for Award | Normal Duration | Exit Points/<br>Awards |
|---------------|-------------------------------|---------------------------------|----------------------------|-----------------|------------------------|
| 4             | 18                            | 12                              | 30                         | One Semester    | Certificate            |
| 5             | 36                            | 24                              | 60                         | Two Semesters   | Diploma                |
| 6             | 72                            | 48                              | 120                        | Four Semesters  | Advanced Diploma       |
| 7             | 108                           | 72                              | 180                        | Six Semesters   | B.Voc Degree           |

| NSQF Level 4 SEMESTER - I |                    |   |          |                  |   |   |   |  |  |  |

#### **Course Objective**

| Course Objective |  |
|------------------|--|
| 1                | To understand General knowledge about A.C & D.C systems            |
| 2                | To explore electrical components & devices                         |
| 3                | To learn D C circuits  |
| 4                | To learn electronics components and circuit, semiconductor devices |
| 5                | To know the working principles of AC and DC circuits               |

#### THEORY

| UNIT | TITLE        | PERIODS |
|------|--------------|---------|
| 1    | INTRODUCTION | 14      |

(i)General knowledge about A.C & D.C systems (Generation, Transmission & Distribution, both single phase & three phase in case of A.C system) (ii) General knowledge about conductors, insulators, semiconductors, resistors, fuse wires, electrical voltage, current, power & energy both in AC & DC systems. (iii) Selection and use of proper sizes, grades of solid & stranded conductors, use of wire gauge etc.

| UNIT | TITLE                          | PERIODS |
|------|--------------------------------|---------|
| 2    | ELECTICAL COMPONENTS & DEVICES | 15      |

Installation work of the classes and with the kinds of cables & wires for building wirings (for fans, lights, small motors and other appliances for domestic use) -Use of test lamps, bells, buzzer, continuity tester & battery in the testing requirements of circuits-Methods of testing out of polarity, phasing out of circuits- Connections and diagrams for main switches, distribution boards ceiling roses, plugs, sockets, switches (including 2 way), lamp holders, fans with regulators, MCCB, MCB, RLCB, ELCB, rotary switches and changeover switches etc.

| UNIT | TITLE        | PERIODS |
|------|--------------|---------|
| 3    | D C CIRCUITS | 14      |

Basic concepts of current, EMF, potential difference, resistivity, temperature coefficient of resistance – Ohm's Law – application of Ohm's law – resistance – series circuits – parallel and Series parallel circuits – Kirchhoff's laws –Problems in the above topics.

| UNIT | TITLE                              | PERIODS |
|------|------------------------------------|---------|
| 4    | ELECTRONICS COMPONENTS AND CIRCUIT | 15      |

IVPN junction diode – operation, forward, reverse bias characteristics- Half-wave rectifier and Full-wave rectifier- filters- PNP and NPN transistors – transistor current components – characteristics of transistor in CB, CE, CC configurations- JFET – construction – operation - drain and transfer characteristics- MOSFET – construction, operation and characteristics of EMOSFET, DMOSFET and VMOSFET

| UNIT | TITLE                 | PERIODS |
|------|-----------------------|---------|
| 5    | SEMICONDUCTOR DEVICES | 14      |

Special Semiconductor Devices - Construction, principle of operation and characteristics of Schottky barrier diode, Varactor diode, Tunnel diode, PIN diode, LED, LCD, UJT, SCR, DIAC and TRIAC. Photoconductivity – photodiode, APD, phototransistor, LDR, optocoupler, solar cell, LASER diode and MOSFET.

|                 | TOTAL PERIODS:  | 72             |
|-----------------|---|----------------|
| COURSE OUT      | TCOMES:   |                |
| Upon completion | on of this course, students will be able to:  |                |
| CO1:            | Understand the basic terminology/definitions of electrical arengineering  | nd electronics |
| CO2:            | Apply the knowledge of theorems/laws to analyze the simpl   | e circuits     |
| CO3:            | Use the principles of electromagnetic induction in electrical   | applications.  |
| CO4:            | Construct and analyze simple AC circuits.   |                |
| CO5:            | Select the electrical machines for different applications   |                |
|                 |   |                |
| TEXT BOOKS      | S:  |                |

|--------------------|--|--|--|--|--|--|--|--|
| Upon completion of | Upon completion of this course, students will be able to:  |  |  |  |  |  |  |  |
| CO1:               | Read and appreciate poems on their own.  |  |  |  |  |  |  |  |
| CO2:               | Analyze poetic texts using appropriate terms such as diction, tone, imagery, figures of speech, etc.               |  |  |  |  |  |  |  |
| CO3:               | Interpret a poem based on contextual evidence  |  |  |  |  |  |  |  |
| CO4:               | Analyze various types of novels and stories and pieces of prose with reference to the matics and other approaches. |  |  |  |  |  |  |  |
| CO5:               | Read and comprehend better.  |  |  |  |  |  |  |  |

| 1  | To understands Matrix theory, To develop practical applications.   | the use  | of ma   | trix al | gebra   | techniques for  |  |
| 2  | To understand mathematical tools needed usage.   | in evalu | ating   | multip  | le inte | grals and their |  |
| 3  | To make the students knowledgeable on effective mathematical tools for the solutions of differential equations that model physical processes |          |         |         |         |                 |  |
| 4  | To understand the Basic on Analytical soli straight line   | d Geom   | netry a | bout I  | Directi | onal ratios and |  |
| To make the students knowledgeable in the areas of direct and inverse functions of trigonometry. |  |          |         |         |         |                 |  |
|  |  |          |         |         |         |                 |  |
| THEORY   |  |          |         |         |         |                 |  |
| UNIT   | TITLE  |          |         |         |         | PERIODS         |  |

Inverse and rank of a matrix, System of linear equations, Symmetric, Skew Symmetric and Orthogonal matrices, Eigen values and Eigenvectors of a real matrix, Characteristic equation, Properties of Eigenvalues. Cayley-Hamilton Theorem (statement only), Diagonalization of matrices.

MATRICES ITS APPLICATIONS

1

11

| UNIT | TITLE             | PERIODS |
|------|-------------------|---------|
| 2    | INTEGRAL CALCULUS | 11      |

Multiple Integral and its applications - change of order of integration. Applications: Areas (double integration) and volumes by triple integration (Cartesian and polar) – mass and center of mass (constant and variable densities)

| UNIT | TITLE                  | PERIODS |
|------|------------------------|---------|
| 3    | DIFFERENTIAL EQUATIONS | 11      |

Exact equations, First order linear equations, Bernoulli's equation, orthogonal trajectories, growth and decay, geometrical applications and electric circuits.

| UNIT | TITLE                     | PERIODS |
|------|---------------------------|---------|
| 4    | ANALYTICAL SOLID GEOMETRY | 11      |

Directional cosines and ratios – angle between two lines – the equation of plane – equations to a straight line and shortest distance between two skew lines.

| UNIT                                  | TITLE  | PERIODS |         |         |           |                     |

| COU          | RSE OUTCOMES:   |
|--------------|---|
| Upon         | completion of this course, students will be able to:                                    |
|              | Learn to properly dimension and annotate engineering drawings as per standards of       |
|              | engineering drawing practice and Students learn the application of engineering graphics |
|              | through computer-aided drafting.  |
| CO2:         | Follow and understand the basics of engineering drawing with simple solids.             |
| <b>CO3</b> : | Properly apply and produce sectional views  |
|              | Properly create multi-view orthographic drawings from three dimensional diagrams.       |
| <b>CO5</b> : | Present a drawing in orthographic and isometric projections.                            |
|              |   |

#### **PREREQUISITES:**

NIL / Course Code – Course Title / Topics

#### LIST OF EXPERIMENTS:

- 1. Study of tools and accessories
- 2. Study of joints
- 3. Staircase wiring
- 4. House wiring
- 5. Energy meter connection single phase and three phase system
- 6. Tube Light and Fan connection
- 7. Two way switch connection
- 8. Ceiling fan coil winding
- 9. Load calculation
- 10. Back up and capacity calculation of inverter

#### **ELECTRONICS LAB**

- 1. Rectifiers Construction of half wave and full wave rectifiers with and without filters Calculation of ripple factors.
- 2. Frequency Response of RC Coupled Amplifiers Determination of frequency response of given RC coupled amplifier Calculation of bandwidth.
- 3. Verification of Kirchoff's Voltage and Current Laws Determine the voltage and current in given circuits using Kirchoff's laws theoretically and verifies the laws experimentally.
- 4.Study of CRO
- 5. VI characteristics of MOSFET and IGBT
- 6. Characteristics of transistor in CB, CE, CC configurations
- 7. Measurement of AC and DC voltages
- 8. Frequency and phase measurements (using Lissajou's figures)

| UNIT | TITLE   | PERIODS |
|------|---|---------|
| 1    | Introduction to Scratch, Events, control, sensing | 22      |

Sprites, stage, blocks, saving and loading projects, using mouse. Sprite options - code, costume, sound, background options - code, backdrop, sounds. Basic events, control Challenge: Sory book with backdrop change or magic show.

Advanced Events, control, sensing of different types, basic operators Challenge: Interactive O & A game, Make a maze game

| UNIT | TITLE   | PERIODS |
|------|---|---------|
| 2    | Logo turtle, Blocks, variables, Lists and operators | 21      |

Drawing with the pen and making different kinds of shapes Challenge: Mandalas with scratch. Blocks help avoid repeat code and take parameters, variables help generalize code and add memory functionality, use of random number generator Challenge: Add scores to earlier programs, reduce lines of code with blocks, generalize Q & A e.g. cube root of a number questions generated on their own.

Advanced operators and lists to remember sequence of data and its processing Challenge: Enter a list of names 10 names and the program tests you to tell them backwards. Given an angle program calculates the cosine of the angle in degrees/radians.

| UNIT | TITLE  | PERIODS |
|------|--|---------|
| 3    | Python Setup, String and Variable, Number and Math | 22      |

Setup environment path variable, Command prompt, indentation, help, Immutable object, and non-immutable object, String Concatenation, Format string, String Operation Numbers, Numeric Operations, Numeric Functions, Mathematical functions

# **Course Objective**

| Course Objective |  |
|------------------|--|
| 1.               | To explain the fundamentals of elastic properties of solids.   |
| 2.               | To understand the motion of waves and application of acoustics   |
| 3.               | To learn to interpret and model physical phenomena using calculus  |
| 4.               | To provide comprehensive knowledge and understanding of electricity and its applications                   |
| 5.               | To learn atomic and molecular physics and explain the macro physical phenomenon with it                    |
| 6.               | To acquire knowledge on fundamentals of physics and its applications in production and energy technologies |
| 1                |  |

#### THEORY

| UNIT | TITLE                | PERIODS |
|------|----------------------|---------|
| 1    | PROPERTIES OF MATTER | 14      |

Elasticity — Hooke's law — Elastic moduli — Poisson's ratio — Beams — bending of beams — Expression for bending moment — Theory of uniform and non — uniform bending - Young's modulus - Koenig's method — Bernoulli s Theorem — Applications Viscosity- Co-efficient of Viscosity-Poiseuille's formula for co efficient of viscosity of a liquid- Stokes law-determination of viscosity-surface tension-molecular interpretation-Drop weight method

| UNIT | TITLE                              | <b>PERIODS</b> |
|------|------------------------------------|----------------|
| 2    | WAVES MOTION AND APPLIED ACOUSTICS | 14             |

Waves Motion- General Transverse waves on a string, Travelling and standing waves on a string. Normal Modes of a string- Group velocity. Phase Velocity, Plane waves, Spherical waves. Wave intensity, Applied Acoustics, Intensity and loudness of sound- Decibels - Intensity levels – musical notes – musical scale- Acoustics of buildings. Reverberation and time of reverberation- Absorption coefficient

| UNIT | TITLE                        | PERIODS |
|------|------------------------------|---------|
|      | INTERPRET AND MODEL PHYSICAL |         |
| 3    | PHENOMENON WITH CALCULUS     | 15      |

Rates and derivatives, straight-line kinematics - relationship between distance, speed, and acceleration. Integration to work backwards from acceleration, speed and distance. Description of the distance covered of a falling object as a function of time. Being able to draw this visually. Potential

| UNIT | TITLE                            | PERIODS |
|------|----------------------------------|---------|
| 4    | ELECTRICITY AND ELECTROMAGNETISM | 14      |

Charges, laws of electrostatics - Coulomb's law, Gauss's law, the electric field/force of a point charge (positive and negative), integrating along an electric line of force to get voltage, line of charge, plate of charge, relating to energy stored in a charge of a capacitor. Deriving the same with Gauss law.

Definition, Transforms of elementary functions, properties. Transform of derivatives and integrals. Multiplication by t and division by t. Transform of unit step function, transform of periodic functions. Initial and final value theorems. Methods for determining inverse Laplace transforms, convolution theorem, Application to differential equations and integral equations. Evaluation of integral by Laplace transforms.

LAPLACE TRANSFORM AND ITS APPLICATIONS

11

1

| UNIT | TITLE             | PERIODS |
|------|-------------------|---------|
| 2    | NUMERICAL METHODS | 11      |

Numerical solution of algebraic and transcendental equations — Bolzono's bisection method — Successive approximation method — Regula falsi method — Newton Raphson method — Numerical solution of simultaneous linear algebraic equations — Gauss elimination method — Gauss Jordan elimination method — Gauss seidel iteration method.

| UNIT | UNIT TITLE          |    |
|------|---------------------|----|
| 3    | OPERATIONS RESEARCH | 11 |

Transportation Problem - Assignment Problem - Travelling salesman problem. Replacement problem - Replacement of items that deteriorate with time - Replacement of items that fail completely.

| UNIT | TITLE            | PERIODS |
|------|------------------|---------|
| 4    | NETWORK ANALYSIS | 11      |

Introduction to Network –Basic concepts – Construction of network diagram. Project Management: Introduction – Critical path method – Critical path determination – Optimal scheduling by CPM – PERT.

| UNIT               | TITLE  | PERIODS              |  |  |  |  |

| 1                       | CRYSTALS STRUCTURE  |   |                  |        |        | 10                  |
| Crystal Structure,      | bonding and properties -Crysta  | 1 Lattic  | ce - P           | rimiti | ve and | l unit cell - seven |

classes of crystal - Bravais Lattice - Miller Indices - Structure of crystals - Simple cubic, Face centered cubic, Body centered cubic and Hexagonal close packed structure Types of bonds in crystals - Ionic, covalent, Metallic, Vander Waal's and Hydrogen Bonding

UNIT TITLE PERIODS
2 THERMODYNAMICS 11

Thermodynamic system - Zero<sup>th</sup> law, First and Second law of thermodynamics – Isothermal and Adiabatic Process - Carnot engine- working and efficiency - Carnot's theorem - Thermodynamic scale of temperature – Clausius and KelvinStatement - Third law of thermodynamics - Entropy - Change in entropy in a reversible/ irreversible process –

Application of heat and Thermodynamics

| UNIT | TITLE                 | PERIODS |
|------|-----------------------|---------|
| 3    | SEMICONDUCTOR PHYSICS | 11      |

Intrinsic semiconductors – p and n doping - Carrier concentration and dependence on temperature PN junction theory - V-I characteristics of a PN junction diode - Half wave rectifier - Full wave rectifier - Bridge rectifier - Efficiency - filters - capacitor filter- choke input filter- pi filter - Zener diode - equivalent circuit - voltage regulator - LED - V-I characteristics – advantages - applications - photo diode - characteristics - applications

| UNIT | TITLE                             | PERIODS |
|------|-----------------------------------|---------|
| 4    | LASER PHYSICS AND ITS APPLICATION | 11      |

Spontaneous emission — Stimulated absorption and emission — Meta stable state —Population inversion — Pumping — types of pumping- main parts of Laser-principle of Laser Production of LASER — Solid State Lasers — Ruby Lasers — Nd: YAG laser — Gas lasers — Helium — Neon laser — CO2 laser — Semiconductor lasers — Diode laser Applications of LASER in cutting — Welding — Drilling — Hologram —material processing, Medicineand Communication

| UNIT | TITLE                              | PERIODS |
|------|------------------------------------|---------|
| 5    | ENERGY SOURCES AND ITS APPLICATION | 11      |

Kinds of energy – Mechanical energy, Thermal energy, Electrical energy, atomic and nuclear energy, (Examples) – Conservation of energy – work energy theorem. World's reserve of Commercial energy sources and their availability – India's production and reserves – Conventional and non – conventional sources of energy, comparison – Coal – Oil and natural gas –applications – merits and demerits. Photovoltaic systems (PV)- principle and applications in Powered fan – powered area – lighting system

### LIST OF EXPERIMENTS:

- 1. Simulation study on Solar PV Energy System.
- 2. Experiment on "VI-Characteristics and Efficiency of 1kWp Solar PV System".
- 3. Experiment on "Shadowing effect &diode based solution in 1kWp Solar PV system". MPPT applications
- 4. Experiment on Performance assessment of Grid connected and Standalone 1kWp Solar Power System.
- 5. Simulation study on Wind Energy Generator.
- 6. Assemble micro Wind Energy Generator.
- 7. Simulation study on Hybrid (Solar-Wind) Power System.
- 8. Experiment on Performance Assessment of Hybrid (Solar-Wind) Power System.
- 9. Simulation study on Hydel Power.
- 10. Experiment on Performance Assessment of 100W Fuel cell.

Electrochemical cell, electro motive force, free energy changes and EMF, concentration of the reactants on EMF, effect of cell temperature, derivation of number of electrons involved in a cell reactions, thermodynamic calculations, electrochemical series-equilibrium potential, Nernst equation-Battery types – primary and secondary batteries and examples - theoretical voltage, capacity, energy & specific energy, power & specific power.

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 2    | Primary & Secondary Batteries | 14      |

Dry cells-zinc/carbon battery, alkaline primary batteries, Zn/air, Lithium batteries, reserve batteries: principle, components, construction, characteristics, applications, and problems associated with the systems.

Principle, construction, components, merits and demerits of lead acid, nickel-cadmium, nickelmetal hydride, lithium-ion batteries-Possible applications

| UNIT | TITLE             | PERIODS |
|------|-------------------|---------|
| 3    | Lead Acid Battery | 15      |

Advantages and disadvantages of lead acid batteries, electrochemical reactions, physical and chemical properties of active materials, characteristics and properties of sulphuric acid, constructional features, materials and manufacturing methods, SLI (Automotive) batteries, charge and discharge properties of lead acid batteries, sealed lead acid or maintenance free batteries fabrication technology and testing. Lead acid battery for PV and automotive applications

| UNIT | TITLE               | PERIODS |
|------|---------------------|---------|
| 4    | Lithium-ion Battery | 14      |

Advanced anodes and cathodes – theoretical capacity – merits and demerits – Nano materials for anodes: carbon nano tubes, graphene, Sn, Al, Si, SnO<sub>2</sub>, NiO, TiO<sub>2</sub>& LiTiO<sub>4</sub>. Nano materials for cathodes: LiCoO<sub>2</sub>, LiMn<sub>2</sub>O<sub>4</sub>, LiFePO<sub>4</sub>, and doped cathodes. Fabrication of nano structured LiCoO<sub>2</sub>, LiMn<sub>2</sub>O<sub>4</sub>, LiFePO<sub>4</sub>, Si, Sn and CNTs. Battery fabrication technology and testing, batteries for electric vehicles, hybrid vehicles and solar photovoltaic applications

| UNIT | TITLE                                | PERIODS |
|------|--------------------------------------|---------|
| 5    | Thermal management of battery system | 15      |

Selection of battery for EVs & HEVs, Traction Battery Pack design, Requirement of Battery Monitoring, Battery State of Charge Estimation methods, Battery Cell equalization problem, thermal control, protection interface, SOC Estimation, Energy & Power estimation, Battery thermal management system, Battery Management System: Definition, Parts: Power Module, Battery, DC/DC Converter, load, communication channel, Battery Pack Safety, Battery Standards & Tests. Battery management – Recycling of battery materials. Design and sizing of batteries for various application - E-mobility.

 UNIT
 TITLE
 PERIODS

 1
 Properties of Semiconductor
 14

 Semiconductors-crystals structures, atomic bonding, energy band diagram—direct & indirect

band gap- p& n doping and carrier concentration-Hall Effect in semiconductors-Intrinsic & extrinsic semiconductor –compound semiconductors-diffusion and drift of carriers, continuity equation – optical absorption – carrier recombination-Effect of temperature.

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 2    | Semiconductors for Solar Cell | 14      |

Silicon: preparation of metallurgical, electronic and solar grade Silicon- Production of single crystal Silicon: Czokralski(CZ) and Float Zone(FZ) method–imperfections–carrier doping and lifetime- Germanium- compound semiconductors: growth & characterization- amorphous materials – Transparent conducting oxides-Anti-reflection principles and coatings – organic materials

| UNIT | TITLE              | PERIODS |
|------|--------------------|---------|
| 3    | Device fabrication | 14      |

Semiconductor junctions: Schottky barriers, MIS, P-N junction, p-i-n junction and its properties Homo & hetero junction solar cells, multi junction solar cells-Fabrication techniques: Diffusion, thin film technology-physicalvapourdeposition(PVD)-Electrodeposition-Molecular beam epitaxy (MBE) - Metal organic chemical vapour deposition(MOCVD)-Plasma enhanced chemical vapour deposition(PECVD)- Organic and Nanotech solar cells—contact & grid metallization.

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 4    | Characterization and Analysis | 15      |

Device isolation & analysis-Ideal cell under illumination- solar cell parameters short circuit current, open circuit voltage, fill factor, efficiency; optical losses; electrical losses, surface recombination velocity, quantum efficiency-measurements of solar cell parameters; I-V curve & L-I-V characteristics, internal Quantum yield measurements— Effects of series and parallel resistance and Temperature -Loss analysis.

| UNIT  | TITLE   | PERIODS |  |  |  |  |  |
|---|---|---------|--|--|--|--|--|
| 5   | Troubleshooting & maintenance of solar system                 | 15      |  |  |  |  |  |
| System maintenance, PV array maintenance, Inverter maintenance, System integrity, Troubleshooting, Identifying the problem, Troubleshooting PV arrays, Troubleshooting underperforming systems, Troubleshooting inverters, Other common problems, Inverter topologies, High Efficiency on-grid inverters, |   |         |  |  |  |  |  |
|   | TOTAL PERIODS:  | 72      |  |  |  |  |  |
| COURSE OUT  | COMES:  |         |  |  |  |  |  |

# LIST OF EXPERIMENTS:

- 1. Identify specifications critical for battery-based inverters
- 2. Wire test and program battery based inverters
- 3. Discuss when and why breakers would be used rather than fuses
- 4. Use a 3-line diagram to wire a system
- 5. Discuss the order and perform safe installation practices of solar
- 6. Demonstrate the order of safe commissioning of solar panel
- 7. Demonstrate the order of shut-down and how to establish an electrically safe working environment

# LIST OF EXPERIMENTS:

## AC MACHINES

- 1.Load test on single/three-phase transformer
- 2.O.C and S.C test on single/three-phase transformer
- 3. Parallel operation of single/three-phase transformer
- 4. Sumpner's test on single/three-phase transformer
- 5. Study of connections STAR/DELTA/ Scott connection on single/three-phase transformer DC MACHINES
- 6. Load test on DC Motor (Shunt/series/Compound Motors)
- 7.Load test on DC Generators (Shunt/series/Compound Motors)
- 8.O.C.C of D.C Generators (shunt/separately)
- 9. Swimburne's /Hopkinson's test on DC Machines
- 10.Study on Retardation test and Speed control of DC Motors.
- 11. Field test of DC series Motor.

### ELECTRONICS LAB DEVICE CHARACTERISTICS

- 1. Characteristics of Diodes (PN Junction / Zener diode).
- 2. Characteristics of a BJT (common base/Emitter/Collector)
- 3. Characteristics of a UJT/FET/IGBT.
- 4. Characteristics of an SCR/GTO/Triac
- 5. Characteristics of photon devices.

### **BIASING AND APPLICATIONS**

- 6. Biasing Techniques for BJT(Fixed/collector to base/voltage divider biasing)
- 7. Biasing Techniques FET.
- 8. Rectifiers and Filters.
  - 9. Diode clippers and clamping circuits.

 Methodologies of conducting energy audit: Post audit analysis:

 UNIT
 TITLE
 PERIODS

 2
 Operation and maintenance of energy audit
 15

Definition, Energy audit- need, Types of energy audit, Energy management (audit) approachunderstanding energy costs, Bench marking, Energy performance, Matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution, Energy audit instruments, Economic benefit analysis.

| UNIT | TITLE                       | PERIODS |
|------|-----------------------------|---------|
| 3    | Insulation and Refractories | 14      |

Insulation type and application, economic thickness of insulation, heat savings and application criteria, refractory-types, selection and application of refractories, case studies.

| UNIT | TITLE   | PERIODS |
|------|---|---------|
|      | Steam system, Cogeneration, Cooling tower and Waste |         |
| 4    | heat recovery                                       | 15      |

# Steam system

Properties of steam, assessment of steam distribution losses, steam leakages, steam trapping, condensate and flash steam recovery systems, identifying opportunity for energy saving, case studies

# Cogeneration

Need, applications, advantages, topping cycles, bottoming cycles, combined cycles, steam tracking mode, electricity tracking mode, saving potential, case studies.

## Cooling Tower

Types and performance evaluation, efficient system operation, flow control strategies and energy saving opportunities, case studies

## Waste heat recovery

**UNIT** 

5

Availability and reversibility, first and second law efficiency, classification, advantages and applications, commercially viable heat recovery devices, saving potential, case studies HVAC and refrigeration system, vapor compression refrigeration cycle, refrigerants, factors affecting refrigeration and air conditioning system performance and savings potential. Vapor absorption refrigeration system, working principle, types and comparison with vapor compression system, saving potential, distribution system for conditioned air.

NIL / Course Code – Course Title / Topics

| Course Objective |   |
|------------------|---|
| 1                | To understand the management process in industry                                      |
| 2                | To understand the difference between between private and public sectors.              |
| 3                | To know laws in industrial area   |
| 4                | To enable the students to create an awareness on Engineering Ethics and Human Values. |
|                  | To instill Moral and Social Values and Loyalty and to appreciate the rights of        |
| 5                | others.   |

### THEORY

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 1    | INTRODUCTION ABOUT MANAGEMENT | 14      |

Growth of industry - The management of men, materials and machines, the art of management, Sources of capital- industrial individual enterprise, private partnership and private Ltd. Co., Joint Stock Co. shares, debentures, financial agencies and their role in promoting industries. Break even analysis.

| UNIT | TITLE                            | PERIODS |
|------|----------------------------------|---------|
| 2    | PRIVATE SECTOR AND PUBLIC SECTOR | 14      |

Public sector enterprise - merits and demerits of public sector industry and private sector industry, Line, staff and functional organizations, reasons for the choice of various types of organization, functions of different departments (stores, purchase and sales), departments relationship between individual departments.

| UNIT | TITLE              | PERIODS |
|------|--------------------|---------|
| 3    | ENGINEERING ETHICS | 14      |

Senses of 'Engineering Ethics' - Variety of moral issues - Types of inquiry - Moral dilemmas -Moral Autonomy – Kohlberg's theory – Gilligan's theory – Consensus and Controversy – Models of professional roles - Theories about right action - Self-interest - Customs and Religion - Uses of Ethical Theories.

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 4    | LABOUR, INDUSTRIAL & TAX LAWS | 15      |

Evolution of industrial law, factory act, workmen compensation act, payment of wages act, employee's state insurance act, Industrial dispute act. Role of technician in industry: Position of technician in various engineering departments, Role of a supervisor in industry, Foremanship, duties and qualities of a good foreman.

| UNIT                | TITLE  | PERIODS       |  |
|---------------------|--|---------------|--|
| 5                   | HUMAN VALUES   | 15            |  |
| Morals, values and  | Ethics – Integrity – Work ethic – Service learning – Civic virtue -      | - Respect for |  |
| others – Living pea | cefully - Caring - Sharing - Honesty - Courage - Valuing time -          | Cooperation   |  |
|                     | mpathy - Self confidence - Character - Spirituality - Introduction       | to Yoga and   |  |
| meditation for prof | essional excellence and stress management.                               |               |  |

| 1  | The course aims to achieve competence according to the scales of the Common European Framework of Reference for Languages, in the four linguistic skills – speaking, listening, reading, and writing. The students will be dealt with in an everyday and balanced way, and grammatical phenomena will be analysed and explained. |            |            |            |             |                         |  |  |  |  |
| 2  | The course content aims at u<br>and cultural life in Germany<br>to find their way in everyday<br>authorities.  | and help   | s students | s to asses | s living si | tuations in Germany and |  |  |  |  |
| 3  | To build students confidence through various methods such as democratic teaching style, inclusion of the students' world of life and experience, progress diary, information and protocol techniques, mind mapping, think-pair-share, communication, discussion and facilitation techniques, etc.                                |            |            |            |             |                         |  |  |  |  |
| 4  | The teaching of values and course 2. The aim is to discover respect, tolerance, helpfulnes of order will be focused on.  | ver cultu  | ral differ | ences an   | d similarit | ies. Values such as     |  |  |  |  |
| 5  | Another focus will be 'Moti-<br>progress, and learn deal with  | n setbacks | s.         |            |             |                         |  |  |  |  |
| Project work and business games play an important role in preparing students for their future professional tasks. In this way, theycan use their existing linguistic, methodological, and professional knowledge even at this language level to realize a project, plan it, search for it, carry it out and present it. This gives room for self-directed, creative, experimental workand learning in the group. |  |            |            |            |             |                         |  |  |  |  |
| THEORY   |  |            |            |            |             |                         |  |  |  |  |
| UNIT   |  | TITLE      |            |            |             | PERIODS                 |  |  |  |  |

Pronunciation: Long and short 'e'.Regional studies: Social networks in D-A-CH. Film: In the company/How does it work? Motivation: Make a promise to yourself. Language activities: Understand flat advertisements/describe a flat/plan the flat furnishing/answer an invitation in writing/talk about a flat furnishing/express liking and disliking/talk about forms of housing/write a text about a flat. Vocabulary: flat/rooms/furniture and devices/colours/housing styles. Grammar: Adjective with 'to be' (+very/to) #in' with accusative/adjective prepositions with dative case. Pronunciation: s and sh. Regional studies: Types of housing in D-A-CH. Film: My flat/How to find a flat? Knowledge of values and orientation: 'Living

and neighbourhood', living together and house rules, quiet times, night's rest, politeness. . Language acts: describing a daily routine/talking about the past/understanding job advertisements/expressing opinions about jobs, understanding blogs about jobs/preparing a telephone conversation, making phone calls, and asking questions/talking about jobs.Vocabulary: professions and places of work/study/jobs. Grammar: Perfect/Participle II: combining regular and irregular verbs/sentences: 'and, or, but'. Pronunciation: listening to and speaking h. Regional studies: Seasonal jobs in D-A-CH. Film: Felix's day/student jobs. Knowledge of values and orientation: 'World of wok and economy', working and paying taxes, compulsory insurance pensions-health insurance-unemployment benefit, dealing with money.

| UNIT | TITLE  | PERIODS |
|------|--|---------|
| 2    | Shopping&health: Clothes and fashion and Shopping & health: Healthy and lively | 11      |

Language acts: talking about clothes/understand a chat about a purchase/talking about the past/have conversations when shopping for clothes/finding your way around the department stores/understand and research information about Berlin. Vocabulary: clothes/floors and goods in a department store/shops and stores. Grammar. 'Which one? Which? This one; that one; these'/participle II: separable and non-separable verbs/personal pronouns in the dative case. Pronunciation: stressing verbs with prefixes. Regional studies: Trendy city Berlin. Film: Can I h help you? I'll try it on!Motivation: Prepare for possible setbacks. Language acts: giving personal details/naming body parts/understanding and explaining a sports exercise/reproducing requests/conducting conversations at the doctor's office/understanding and giving instructions/understanding and giving health tips/inferring words. Vocabulary: body parts/body care/illnesses/medications/jobs. Grammar: imperative/demand sentences/'should, must, must not, may'. Pronunciation: p and b, t and d, k and g. Regional studies: Home remedies for illnesses. Film: Washing hair/The accident. Knowledge of values and orientation: 'Health', health care system, solidarity principle, family doctor comes before hospital, emergency, precaution, prevention.

| UNIT | TITLE   | PERIODS |
|------|---|---------|
| 3    | Travelling and going out: on vacation!, Travelling going out: booking at Restaurant | 11      |

Language actions: Understand suggestions for a city tour/describe a route/write a postcard/describe the weather/understand travel reports/describe problems in the hotel/complain in the hotel/talk about travel destinations. Vocabulary: types of holidays and destinations/sightseeing/weather. Grammar: Pronouns: 'man'/Questions words: 'Who? Whom? What?' Adverbs of time: 'first, then, later, at the end'. Pronunciation: f/v/w. Regional studies: Popular travel destinations in Germany. Film: Packing your suitcase/How was it? Motivation: Celebrate the positive and thank helpers. Introducing yourself/reporting about the past/getting an appointment/understanding information on a homepage/booking a restaurant. Vocabulary: leisure, activities, in a restaurant. Grammar: Genitive: name + s/repetition: perfect/subordinate clause with 'because'.Pronunciation: 'ch'. Strategy: Learning words with all senses. Regional studies: Eating without light. Network-flat share community: That's us. We brought something with us.

| UNIT | TITLE  | PERIODS |
|------|--|---------|
| 4    | Social: After school time , Social: Expressing feelings and Social: Living in the city | 11      |

Understanding reports from school days/talking about school days/writing comments/understanding a radio programme, talking about experiences7speaking one's own mind/presenting something. Vocabulary: school experiences, school subjects, types of school. Grammar: modal verbs in the past tense, repetition: articles/possessive articles in the dative case Pronunciation: 'e'. Strategy: learning important phrases by heart. Regional studies: Types of school in Germany. Network-flat-sharing community: The school project. Knowledge of values and orientation: Friendships Talking about feelings/expressing congratulations/expressing thanks/expressing joy or regret/talking about an event7understanding and writing blogs. Vocabulary: celebrations, events, feelings, congratulations, thanks. Grammar: subordinate clause with 'if', reflexive verbs. Pronunciation: emotional speech. Strategy. Structuring texts. Regional studies. A festival in the north. I feel at home here. Network-flat-sharing community: Bad mood/Everything will be fine! The message. Knowledge of values and orientation: Stress and mental

health. **Understanding** a job interview/asking for things/understanding conversations at banks and authorities/asking politely for something/following a city tour/describing a city Vocabulary: city, job interview, bank, authority. Grammar: adjectives after the definite article/prepositions 'without' + accusative and 'with' dative/subjunctive II: 'could'. Pronunciation:friendly requests. Strategy: imagining a situation. Regional studies: around the ring: Vienna. Network-flat-sharing community: A job for Max/The trial job. Motivation: thanking yourself, sharing it with others.

| UNIT | TITLE  | PERIODS |
|------|--|---------|
| 5    | Working worlds: Always online?, Working worlds: Career | 10      |

Talking about advantages and disadvantages/formulating comparisons/doing an interview. Understanding opinions in texts/expressing one's own opinion/talking about films/understanding film descriptions/describing a film/understanding and writing comments on a film. Vocabulary: media, activities with media, film. Grammar: Adjectives. Comparative and superlative, comparisons with 'as' and 'how' subordinate clause with 'that'. Pronunciation: 'b' or 'w'. Strategy: reading long texts. Regional studies: Cinema! Cinema! Network-flat-sharing community: Do you have time? Wait a minute! Picnic in the park. Knowledge of values and orientation: Advantages and disadvantages of the internet. Conducting a conversation at the ticket counter/Telling information from texts/Expressing career wishes/Writing about a dream job/Preparing a telephone conversation/Transmitting information from a text. Vocabulary: activities at work, travelling by train, on the phone. Grammar: adjectives after the indefinite article/'to become'. Pronunciation: 'm' or 'n'. Strategy: Talking on the phone in German. Regional studies: The modern world of work. Network-flat-sharing community: When are we going? The taster course. Knowledge of values and orientation: Extension: 'Working world and economy'

| COURSE      | OUTCOMES:  |  |  |  |  |
| Upon comp   | eletion of this course, students will be able to:  |  |  |  |  |
| CO1:        | Understand the basics of German grammar.   |  |  |  |  |
| CO2:        | Have increased vocabulary knowledge.   |  |  |  |  |
| CO3:        | Focus on their own motivation, set goals and check them, follow them up (progress diary) and deal with possible setbacks.  |  |  |  |  |
| CO4:        | To understand the social, cultural and economic life in Germany and to be able to reflect with others on the respective values in a comparative way.                 |  |  |  |  |
| CO5:        | Read, listen and understand better.  |  |  |  |  |
| <b>CO6:</b> | Communicate orally and in writing in German.   |  |  |  |  |
| CO7:        | Be able to refer to a dictionary, synonym dictionary and use language apps/websites.   |  |  |  |  |
| CO8:        | To be able to realise a small project, plan it, look for it, carry it out and present it.  |  |  |  |  |
| CO9         | To be more self-confident.   |  |  |  |  |

## **PREREQUISITES:**

NIL / Course Code — Course Title / Topics

## LIST OF EXPERIMENTS:

- 1. Computing efficiency of dc motor and induction motor
- 2. Calculating the efficiency of boiler/ blowers / compressors.
- 3. Draw the energy flow diagram for the industry/shop floor division
- 4. Industry visit with an aim of
  - 1. Studying various energy management system prevailing in a particular organization/ industry
  - 2. Identify the various energy conservation methods useful in a particular industry
- 5. Study of various instrument used for energy audit: lux meter, power analyze, flue gas analyzer.
- 6. Identify the energy conservation opportunities in a lab, department or institute.
- 7. Prepare a sample energy audit questionnaire
- 8. Prepare a sample energy audit report.
- 9. Prepare a technical report on energy conservation act 2003. Studying the various energy conservation methods useful in power generation, transmission and distribution.

NIL / Course Code – Course Title / Topics

### **Course Objective**

- 1. To learn the basic of Biomass Resources
- 2. To learn the different Processing of Biomass
- 3. To learn about Biochemical Conversions
- 4. To learn and do the practical in Algae for Biofuel application
- 5. To understand the basic concepts of bioenergy and its technologies

#### THEORY

| UNIT | TITLE             | PERIODS |
|------|-------------------|---------|
| 1    | Biomass Resources | 14      |

Biomass Resources: Agricultural produce and waste biomass, Biomass from forest produce and energy plantation. Biomass yield, availability, energy potential. Industrial biomass, Biomass from urban and municipal wastes

| UNIT | TITLE                 | PERIODS |
|------|-----------------------|---------|
| 2    | Processing of Biomass | 15      |

Physical properties of biomass: Moisture, bulk density, size, grind ability, crushability. Chemical composition of biomass- estimation of volatile matter, cellulose and lignin content. Properties of municipal solid waste – MSW management principle – Segregation of waste biomass – refuse derived fuels. Pelleting and briquetting of solid biomass – Process flow – factors influencing heat values. Pretreatment of biomass for energy enhancement – Torrefaction

#### Thermo chemical Conversions

Thermal Conversion: Direct combustion, incineration, pyrolysis, gasification and liquefaction; economics of thermo chemical conversion. Biogasification:

Chemical Conversion: Hydrolysis & hydrogenation; solvent extraction of hydrocarbons; solvolysis of wood, biocrude, biodiesel production via chemical process; catalytic distillation; transesterification methods.

| UNIT | TITLE                   | PERIODS |
|------|-------------------------|---------|
| 3    | Biochemical Conversions | 14      |

Fermentation and biochemical processes—Chemical kinetics—Bioreactors for ethanol production. Biomethanation process—anaerobic digestion for biogasification. Biogas digester types, biogas utilization. Biodiesel production—various biomass feedstock for biodiesel.

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 4    | Algae for Biofuel application | 15      |

Introduction to algal biomass; large scale culture and harvest methodologies-Open Raceway ponds & photo bioreactors; biodiesel standards and blending of biofuels.

| UNIT  | TITLE   | PERIODS         |  |  |  |
|---|---|-----------------|--|--|--|
| 5   | Biofuels Standards & Power Generation 14  |                 |  |  |  |
| Adaptation of biofuel in power generation and transport; Biofuel economy; Biofuel road map of India; Entrepreneurship in biofuels; Case studies |   |                 |  |  |  |
|   | TOTAL PERIODS: 72   |                 |  |  |  |
| COURSE O  | UTCOMES:  |                 |  |  |  |
| Upon comple   | tion of this course, students will be able to know:   |                 |  |  |  |
| CO1:  | the basic of Biomass Resources and its applications   |                 |  |  |  |
| CO2:  | the different Processing of Biomass   |                 |  |  |  |
| CO3:  | about Biochemical Conversions   |                 |  |  |  |
| CO4:  | the practical applications in Algae for Biofuel application   |                 |  |  |  |
| CO5:  | And understand the basic concepts of bioenergy and its technologies   |                 |  |  |  |
|   |   |                 |  |  |  |

Crystal structures (BCC, FCC and HCP

**DEFORMATION** 

systems), atomic packing factor, density, Crystalline perfections; point defects, line defects- edge and screw dislocations, surface defects, volume defects. Mechanism of Elastic & plastic deformation (slip and twinning), slip, work hardening theory - Deformation of metals, effects of cold and hot working operations over them. Recovery recrystallization and grain growth, solid solutions, alloys and inter metallic compounds - Importance and Objective of Phase Diagram Systems, Phase and Structure Constituents, Cooling Curves, Unary & Binary Phase Diagrams, Gibbs's Phase Rule, Lever Rule, Eutectic, and Eutectoid Systems, Peritectic and Peritectoid Systems. Iron Carbon Equilibrium Diagram and TTT

10

| UNIT | TITLE          | PERIODS |
|------|----------------|---------|
| 2    | FERROUS METALS | 11      |

Classification of iron and steel - Cast iron types as per I.S. - White, malleable, Grey. Steels: Classification of steels according to carbon content and according to use as per I.S. - Mechanical properties of various steels and their uses. Availability of steel in market, Its forms and specifications. Alloy Steel: Effect of alloying various elements, viz Cr, Hi, Co, V,W, Mo, Si, and Mn, on mechanical properties of steel, Common alloy steels, viz, Ni-steel, Ni-Cr-steel, Tungsten steel, Cobalt steel, Stainless Steel, Tool steel - High Carbon Steel, High Speed steel, Tungsten Carbide, Silicon manganese steel, Spring Steel, Heat Resisting alloy Steels etc.

| UNIT | TITLE          | PERIODS |
|------|----------------|---------|
| 3    | HEAT TREATMENT | 11      |

HEAT TREATMENT OF STEELS: Annealing, Normalising, Hardening & Tempering, quenching media, other treatments such as Martempering, Austempering, Ausforming. temper embrittlement, quench cracks, Hardenability& hardenability testing, Defects due to heat treatment and remedial measures.

Classification of surface hardening treatments, Carburising, heat treatment after Carburizing, Nitriding, Carbo-nitriding, Flame hardening, and Induction hardening

|                     | To understand how to write the technical  | docume    | nts and         | d give   | oral pre   | sentations   |  |
| 5                   | related to the work completed.  |           |                 |          |            |              |  |

Students are advised to create or innovate a product design matching the following objective: Instead of creating a new product and then "selling" it the public, innovative design is a process of identifying, pinpointing, and understanding the needs of the user or audience. What we need are new choices - new products that balance the needs of individuals and of society as a whole; new ideas and new strategies that tackle the global challenges of health, poverty, and education.

Each student has to identify the need of a product, synthesis, analyse, design, modify and select the best design.

Product Identification - Specification Development -Conceptual Design – 2D, 3D Part drawing Conduct of Functional Decomposition, Brain storming of possible solutions, process planning required for Prototypes, Refinement of Design Specification on users' feedback, Evaluation of Potential Solutions, Selection of best design.

The student will make an oral presentation followed by a brief question and answer session. The innovative design (presentation and report) will be evaluated by an internal assessment committee. Presentation will take place during weekly class session. Students have to make oral presentations periodically and finally submit a technical project report.

|              | TOTAL PERIODS: 54   |
|--------------|---|
| COURSE OU    | UTCOMES:  |
| Upon complet | tion of this course, students will be able to:  |
| CO1:         | develop an innovative design model  |
| CO2:         | Identify, understand and discuss current, real-world issues.  |
| CO3:         | Select the best design solution among the potential solutions with its functional decomposition probability, and combinatorics. |
| CO4:         | utilize the technical resources and to work in actual working environment   |
| CO5:         | write technical documents and give oral presentations related to the work completed   |

### PREREQUISITES:

NIL / Course Code – Course Title / Topics

# **Course Objective**

1. To learn the fundamentals of Hybrid Electric Vehicle
2. To learn the various Electric Drives
3. To learn Energy Storage and Its working principles
4. To learn Energy Management System
5. To know the fundamentals of electrical vehicles

### THEORY

| UNIT | TITLE                                   | PERIODS |
|------|---|---------|
| 1    | Introduction to Hybrid Electric Vehicle | 14      |

Review of Conventional Vehicle: Introduction to Hybrid Electric Vehicles: Types of EVs, Hybrid Electric Drive-train, Tractive effort in normal driving

| UNIT | TITLE           | PERIODS |
|------|-----------------|---------|
| 2    | Electric Drives | 14      |

Energy consumption Concept of Hybrid Electric Drive Trains, Architecture of Hybrid Electric Drive Trains, Series Hybrid Electric Drive Trains, Parallel hybrid electric drive trains, Electric Propulsion unit, Configuration and control of DC Motor drives, Induction Motor drives, Permanent Magnet Motor drives, switched reluctance motor

| UNIT | TITLE          | PERIODS |
|------|----------------|---------|
| 3    | Energy Storage | 15      |

Introduction to Energy Storage Requirements in Hybrid and Electric Vehicles:- Battery based energy storage and its analysis, Fuel Cell based energy storage and its analysis, Hybridization of different energy storage devices. Sizing the drive system, Design of Hybrid Electric Vehicle and Plug-in Electric Vehicle

| UNIT | TITLE                           | PERIODS |
|------|---------------------------------|---------|
| 4    | <b>Energy Management System</b> | 15      |

Energy Management Strategies, Automotive networking and communication, EV charging standards, V2G, G2V, V2B, V2H. Business: E-mobility business, electrification challenges, Business- E-mobility business, electrification challenges

| UNIT | TITLE                          | PERIODS |
|------|--------------------------------|---------|
| 5    | <b>Mobility and Connectors</b> | 14      |

Connected Mobility and Autonomous Mobility- case study Emobility Indian Roadmap Perspective. Policy: EVs in infrastructure system, integration of EVs in smart grid, social dimensions of EVs. Connectors- Types of EV charging connector, North American EV Plug Standards, DC Fast Charge EV Plug Standards in North America, CCS (Combined Charging System), CHAdeMO, Tesla, European EV Plug Standards,

Structure of electric power systems - one Line Diagram - generation, transmission and distribution systems, comparison of distribution systems - radial and ring - two wire dc, ac single phase and three phase systems - current and voltage calculations in distributors with concentrated and distributed loads - Kelvin's law for the design of feeders and its limitations

| UNIT | TITLE                        | PERIODS |
|------|------------------------------|---------|
| 2    | TRANSMISSION LINE PARAMETERS | 14      |

Resistance, inductance and capacitance of single and three phase transmission lines - symmetrical and unsymmetrical spacing – transposition - single and double circuits - stranded and bundled conductors - application of self and mutual GMD – Skin and Proximity effect - inductive interference - Corona - characteristics.

| UNIT | TITLE                             | PERIODS |
|------|-----------------------------------|---------|
| 3    | PERFORMANCE OF TRANSMISSION LINES | 15      |

Development of equivalent circuits for short, medium and long lines – efficiency and regulation - attenuation constant and phase constant - surge impedance loading - power circle diagrams for sending and receiving ends - transmission capacity, steady state stability limit – voltage control of lines - shunt and series compensation.

| UNIT | TITLE                 | PERIODS |
|------|-----------------------|---------|
| 4    | INSULATORS AND CABLES | 14      |

Insulators – types and comparison – voltage distribution in string insulator – string efficiency – methods of improving string efficiency – Stress and sag calculations – effect of wind and ice – supports at different levels – stinging chart - cables – types – capacitance of cables – insulation resistance - dielectric stress and grading - dielectric loss - thermal characteristics - capacitance of three core cables

| UNIT | TITLE                         | PERIODS |
|------|-------------------------------|---------|
| 5    | RECENT TRENDS IN TRANSMISSION | 15      |

Design of rural distribution, planning and design of town electrification schemes – comparison of EHVAC & HVDC system – economic distance for HVDC – terminal equipment for HVDC systems – description of DC transmission system – planning advantages-interconnection of HVDC & AC systems – Introduction to FACTS technology.

Electric drives & Controller for e – vehicle lab

| UNIT                   | TITLE  |  |   |   |   | PERIODS |

Objectives of maintenance - types of maintenance - Breakdown, preventive and predictive maintenance

- Repair cycle - Repair Complexity, Lubrication system – Lubricants - inspection.

Maintenance of Mechanical transmission systems - align machinery – static and dynamic balancing - process plants – air conditioning – water purification – environmental control.

TYPES OF MAINTENANCE

| UNIT | TITLE                              | PERIODS |
|------|------------------------------------|---------|
|      | PREDICTIVE MAINTENANCE & CONDITION |         |
| 2    | MONITORING                         | 10      |

Predictive Maintenance - vibration analysis data and noise as maintenance tool – wear debris analysis - Condition monitoring concepts applied to industries – diagnose faults – overhaul – testing and measurement using approved procedures - Total Productive Maintenance (TPM) - Economics of Maintenance- Computer aided maintenance – modern practice – modern manufacturing aspects.

| UNIT | TITLE       | PERIODS |
|------|-------------|---------|
| 3    | RELIABILITY | 11      |

Reliability: Definition, concept of reliability based design, failure rate, MTTF, MTBF, failure pattern, system reliability: Series, Parallel and Mixed configurations - Availability and Maintainability concepts- applications - electro, proportional and servo hydraulic components - shutdown machinery - isolation - dismantle - inspect - NDT - assembly - fans - pumps - valves - bearings - static - dynamic seals.

| UNIT | TITLE                   | PERIODS |
|------|-------------------------|---------|
| 4    | SAFETY AND PRODUCTIVITY | 11      |

Safety and productivity - causes of accidents in industries – accident reporting and investigation - measuring safety performance - Safety organizations and functions - Factories act and rules - Manufacture, Storage and Import of Hazardous Chemical rules - Explosive act - Gas cylinder rules – Electricity act.

| UNIT | TITLE                     | PERIODS |
|------|---------------------------|---------|
| 5    | SAFETY CODES AND STANDARS | 11      |

Safety Codes and Standards – Air Quality – indoor – outdoor – safe drinking water - General Safety considerations in Material Handling equipments - Machine Shop machineries-pressure vessels and pressurized pipelines – IBR - welding equipments – operation and inspection of extinguishers – prevention and spread of fire – emergency exit facilities - NFPA Standards – ISO 14000.

|------|---------------------------------|---------|
| 2    | Resource Assessment of Biomass: | 11      |

Interaction of biomass with electromagnetic spectrum —Principle of remote sensing and its application to biomass quantification - Vegetation indices - Analysis of satellite imageries for biomass quantification. Biomass feedstock potential in India - Regional biomass availability - Case studies.

| UNIT | TITLE                  | PERIODS |
|------|------------------------|---------|
| 3    | Processing of Biomass: | 11      |

Physical properties of biomass: Moisture, bulk density, size, grindability, crushability. Chemical composition of biomass- estimation of volatile matter, cellulose and lignin content. Properties of municipal solid waste – MSW management principle – Segregation of waste biomass – refuse derived fuels. Pelleting and briquetting of solid biomass – Process flow – factors influencing heat values. Pretreatment of biomass for energy enhancement – Torrefaction

| UNIT | TITLE                               | PERIODS |
|------|-------------------------------------|---------|
| 4    | Solid Biofuel Production Processes: | 11      |

Fuel characteristics of solid biofuels - co-firing in thermal power plants – application in industrial units, Industrial production of pellets and briquettes – Integrated process flow - feedstock and product portfolios – Seasonal biomass feedstock – Securing feedstock supply chain.

| Course Objective  |  |   |       |         |         |               |
| 1.  | To learn Nano-electronics and its applications                     |   |       |         |         |               |
| 2.  | To learn about Physical Properties of Nanosystems                  |   |       |         |         |               |
| 3.  | To learn about Nanotechnology for Energy Efficient Devices         |   |       |         |         |               |
| 4.  | To learn about Nanotechnology for Energy Storage                   |   |       |         |         |               |
| 5.  | To learn about Nanotechnology for Solar Energy Conversion          |   |       |         |         |               |
| THEORY  |  |   |       |         |         |               |
| UNIT  | TITLE  |   |       |         | PERIODS |               |

| COURSE OUTCOMES:   |   |  |  |  |  |
|--|---|--|--|--|--|
| Upon completion of this course, students will be able to know: |   |  |  |  |  |
| CO1:   | Nano-electronics  |  |  |  |  |
| CO2:   | Physical Properties of Nanosystems  |  |  |  |  |
| CO3:   | Nanotechnology for Energy Efficient Devices   |  |  |  |  |
| CO4:   | Nanotechnology for Energy Storage   |  |  |  |  |
| CO5:   | Nanotechnology for Solar Energy Conversion  |  |  |  |  |
| TEXT BOOKS:  |   |  |  |  |  |
| 1.   | Quantum Chemistry, Levine, Prentice Hall  |  |  |  |  |
| 2.   | Statistical Mechanics and properties of matter, E.S.R Gopal, Ellis Horwood                      |  |  |  |  |
| REFERENCE BOOKS:   |   |  |  |  |  |
| 1.   | Introduction to solids, Azaroff, Tat Mc-Graw Hill   |  |  |  |  |
| 2.   | Physical principles of micro Micro-electronics, G. Yepifanov, Mir Publishers, 1974, 1st Edition |  |  |  |  |
