1. PREAMBLE & PROGRAMME OUTCOMES

1.1. Preamble

B.Sc. Cyber & Digital Science is an exceptional undergraduate degree program that caters to the ever-increasing demand for cybersecurity experts in today's digital era. This specialized course aims to provide students with a comprehensive understanding of the complex world of Cybersecurity and its application in safeguarding digital assets and information systems. As technology continues to advance, the demand for Cybersecurity professionals is soaring, making this degree program an attractive choice for individuals passionate about combating cyber threats and making a meaningful impact in the digital age. The course highlights a well-structured curriculum designed to equip students with indepth knowledge and practical skills to address the complex challenges of Cybersecurity and digital technologies. The main objectives of the course are to:

- Develop technical proficiency in Cybersecurity, covering areas such as Network Essentials, Open Source Intelligence, Network Traffic Analysis, Ethical Hacking, Fundamentals of Cryptography, Cyber Law, and more.
- Nurture critical thinking, problem-solving, and innovation to empower the graduates to adapt and thrive in the ever-changing Cybersecurity industry.
- Introduce students to the niche areas of Cybersecurity and keep them abreast of the developments in the Cybersecurity industry.
- Prepare students for successful careers in Cybersecurity by offering practical hands-on experiences and opportunities for professional growth.
- Cultivate an interest for lifelong learning to ensure that our graduates remain at the forefront of technological advancements throughout their careers.
- Enable holistic, multidisciplinary, and skill-oriented knowledge development in the students.

Upon completing the programme, student can expect a plethora of promising career prospects and job opportunities in the cybersecurity domain. The cybersecurity industry is witnessing rapid growth and offers diverse roles across various sectors, making it an attractive field for aspiring professionals. Some of the prominent career paths and job opportunities for B. Sc. Cyber and Digital Science graduates include:

- Cybersecurity Analyst
- Information Security Officer

- Network Security Engineer
- Ethical Hacker
- Digital Forensics Analyst
- Cybersecurity Consultant
- Cloud Security Specialist
- Etc.

1.2. PROGRAMME OUTCOMES:

Upon completion of the Bachelor of Science (B.Sc.) programme in Cyber and Digital Sciences, students will demonstrate the following outcomes:

UG Certificate Level

- Attain foundational knowledge in Computer Networks and Cybersecurity.
- Ability to provide basic security for systems and networks.

UG Diploma Level

- Develop intermediate-level understanding and skills in Cybersecurity.
- Acquire hands-on skills to verify the Cybersecurity strength of computer systems and networks.

UG Degree Level

- Achieve advanced knowledge and proficiency in diverse areas of Cybersecurity.
- Demonstrate expertise in configuring and managing Cybersecurity for an organization's IT

infrastructure.

UG Degree with Honors / Honors with Research

- Understand the fundamentals of Cybersecurity.
- Becoming conversant with the conventional and modern Cybersecurity technologies.
- Comprehend the various Cybersecurity attacks.
- Learn to compute the Cybersecurity risks faced by an organization.
- Ability to apply the technical and legal Cybersecurity expertise to manage the security of the IT infrastructure of an organization as per industry standards.
- Understand Artificial Intelligence and its uses for Cybersecurity management.

2. DEFINITIONS

Terms used in the NEP Regulations shall have the meaning assigned to them as given below unless the context otherwise requires:

A. Credit: A credit is the number of hours of instruction required per week for the given subject in a given semester of 16-18 weeks. One credit is equivalent to 15 hours of teaching (lecture or tutorial) or 30 hours of practice/field work/community engagement and service per Semester.

B. Academic Year: Means the year starting on 1st day of July and ends on the 30th day of June in the succeeding year.

C. Residence time: Means the time a student spends for attending classes in the College/Institution (either Online/Offline) as a full-time student and enrolled in any Academic programme of the Institution.

D. Semester: Means 18 weeks (90 Working days) of teaching-learning sessions of which two weeks shall be set apart for examinations and evaluation.

E. Grade: Means a letter grade assigned to a student in a Course for his/her performance at academic sessions as denoted in symbols of : O(Outstanding), A+(Excellent), A (Very good), B+(Good), B (Above Average), C (average), P (Pass), F (Fail) and Ab (Absent) with a numeric value of O=10, A+=9, A=8, B+=7, B=6, C=5 P=4, and F=0, Ab=0.

F. Grade Point Average (GPA): Means an average of the Grades secured by a student in all courses in a given academic session duly weighted by the number of credits associated to each of the courses.

G. Cumulative GPA (CGPA): Means the weighted average of all courses the student has taken in a given Programme.

H. A Common Course: Means the set of courses that all students who are admitted to any Programme of the University are required to study these courses include, Languages (English-Modern Indian Languages), NEP specific courses- viz. Understanding India, Environmental sciences/Education, Health and Wellbeing/Yoga, Digital & Technological solutions.

I. Major Discipline: Means the core subjects mandatory for the programme, Major discipline may be a single discipline or interdisciplinary/ multidisciplinary courses. Eg. B.Sc. (Physics) or B.Sc. (Physics, Maths and Chemistry).

J. Minor Discipline: Means the courses which are specific to the specialization in Computer Science.

K. Credit Requirement: For a Degree/Diploma/Certificate Programme means the minimum number of credits that a student shall accumulate to achieve the status of being qualified to receive the said Degree, Diploma/Certificate as the case may be.

L. Exit option: Means the option exercised by the students, to leave the Programme at the end of any given Academic year.

M. Lateral entry: Means a student being admitted into an ongoing Programme of the University otherwise than in the 1st year of the programme.

N. Vocational Studies/Education: This refers to set of activities for participation in an approved project or practical or lab, practices of application of scientific theories, studio activities involving students in creative artistic activities, workshop-based activities, field-based shop-floor learning, and Community engagement services, etc. (These courses are expected to enable students to incorporate the learned skills in daily life and start up entrepreneurship.)

O. Skill-based learning/project: This refers to activities designed to understand the different socio-economic contexts, first-hand understanding of the policies, regulations, organizational structures, processes, and programmes that guide the development process.

P. Work-based internship: Means structured internships with Software Companies, Research and Higher Educational Institution Laboratories, Corporate offices, etc. which will further improve employability.

3. DURATION, ELIGIBILITY & AWARD OF UG DEGREE / DIPLOMA / CERTIFICATE

3.1. Duration of the Programme

The duration of the UG programme is 4 years or 8 semesters. Students who desire to undergo a Three-year UG Programme will be allowed to exit after completion of the 3rd year. If a student wants to leave after the completion of the first or second year, the student will be given a UG Certificate or UG Diploma, respectively, provided they secure the prescribed number of credits (as given in Table 1).

3.2. Eligibility

Senior Secondary School Leaving Certificate or Higher Secondary (12th Grade) Certificate obtained after successful completion of Grade 12 or equivalent stage of education corresponding to Level-4 (Levels in NHEQF). For detailed eligibility, refer the Admissions and Lateral Entry Section 5.

3.3. Awarding of UG Certificate, UG Diploma and Degrees Nomenclature

Four years B.Sc. Degree Programme shall have options for earning a Certificate / Diploma / UG Degree / UG Degree (Honors) / UG Degree (Honors with Research) based on the exit option exercised by the candidates.

3.3.1. UG Certificate

Students who opt to exit after completion of the first year (2 Semesters) and have earned a minimum of 40 credits will be awarded a Certificate in Cybersecurity if, in addition, they complete work based vocational courses / internship of 4 credits during the summer vacation of the first year.

3.3.2. UG Diploma

Students who opt to exit after completion of the second year (4 Semesters) and have earned a minimum of 80 credits will be awarded the UG diploma in Cyber and Digital Sciences if, in addition, they complete work based vocational courses / internship of 4 credits during the summer vacation of the second year.

3.3.3. Three-year UG Degree

Students who wish to discontinue after the 3-year (6 Semesters) UG programme will be awarded a UG Degree in Cyber and Digital Sciences after successful completion of three years, earning a minimum of 120 credits and satisfying the minimum credit requirements as mentioned in Table 1.

3.3.4. Four-year UG Degree (Honors)

A four-year UG Honors degree in Cyber and Digital Sciences will be awarded to those who complete a four-year (8 Semesters) degree programme, earning a minimum of 160 credits and have satisfied the credit requirements as mentioned in Table1.

3.3.5. Four-year UG Degree (Honors with Research)

Students who secure a minimum of 7.5 CGPA in the first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year. They should do a research project or dissertation under the guidance of a faculty member of the University.

The research project/dissertation will be in the major discipline, Cyber and Digital Sciences. The students who secure a minimum of 160 credits, including 12 credits from a research project/dissertation, will be awarded UG Degree in Cyber and Digital Sciences (Honors with Research).

3.3.6. Programme overview

As per the guidelines of NEP, students are mandated to complete 120 credits to complete a basic Bachelor's Degree in 3 years. With an additional 40 credits of course work one can pursue 4th Year Honors or Honors with Research Degree. The UG Programme will consist of the following categories of courses and the minimum credit requirements for 3-year UG and 4-year UG(Honors) or UG (Honors with Research) programmes are given in Table 1.

| S.No. | Component | 3 Year UG | 4 Year UG (Honors/ Honors with research) |
|-------|-------------------------------|---------------------------|--|
| 1 | Major Disciplinary - | 60 Credits | 80 Credits |
| 1 | Computer Science | (15 Courses of 4 credits) | (20 Courses of 4 credits) |
| 2 | Minor Disciplinary – | 24 Credits | 32 Credits |
| Δ | Specialization Courses | (6 Courses of 4 Credits) | (8 Courses of 4 credits) |
| 2 | Multi Dissiplinary Courses | 9 Credits | 9 Credits |
| 3 | Multi-Disciplinary Courses | (3 courses of 3 credits) | (3 courses of 3 credits) |
| 4 | Ability Enhancement Courses | 8 Credits | 8 Credits |
| | Ability Enhancement Courses | (4 courses of 2 credits) | (4 courses of 2 credits) |
| _ | Skill Enhancement Course – | 9 Credits | 9 Credits |
| 5 | On the chosen Specialization | (3 courses of 3 credits) | (3courses of 3 credits) |
| | Vales added serves a | 8 Credits | 8 Credits |
| 0 | value-added courses | (4 courses of 2 credits) | (4 courses of 2 credits) |
| | | 4 Credits | 4 Credits |
| 7 | Summer internship | (Included in Major | (Included in Major |
| | | courses of 60 credits) | courses of 80 credits) |
| 0 | Community engagement and | 2 Credits | 2 Credits |
| 8 | service | (1 Field based Course) | (1 Field based Course) |
| 9 | Research Dissertation Project | - | 12 Credits |
| | Total | 120 | 160 |

Table 1: Breakup of Credits and Courses – Minimum Requirements

Note: Honors students not undertaking research will do 3 courses for 12 credits in lieu of a Research Project / Dissertation.

3.3.7. Degree and Nomenclature

Candidates who complete Eight semesters and earn a minimum of 160 credits and have satisfied the credit requirements as mentioned in the Table 1 will be awarded either of the following degrees.

- B.Sc. Cyber and Digital Sciences *
- B.Sc. Cyber and Digital Sciences (Honors) [#]
- B.Sc. Cyber and Digital Sciences (Honors with Research)##

* for candidates who wish to exit at the end of third year with 120 credits earned and satisfied the other minimum requirements given in 3.3.9.

for candidates who complete 3 theory courses (MJD 21, MJD 22, and MJD 23) instead of the research project work in the Eighth Semester.

for candidates who complete a research project work in the Eighth Semester.

3.3.8. Degree with Specialization

Out of the above said 160 credits (Table1) the candidates shall earn 103 credits (83 credits out of 120 credits in the case of 3 year UG) from the Hardcore courses (Major Disciplinary, Multidisciplinary, Ability Enhancement, Value added Courses and Community Engagement and Service) and the remaining 57 credits (37 credits in the case of 3 year UG) shall be earned from the subjects they choose to study from the list of softcore courses. These 57 credits shall be earned through studying the specialization courses in Minor Disciplinary – Specialization Courses, Skill Enhancement Courses in all the semesters and the Research Project or the Courses the candidates choose to study in the Eighth Semester. The Programme Structure is detailed in the following Figure 1.

Figure 1: Programme Structure with credit breakup

3.3.9. Exit Options and Nomenclature of Certificate, Diploma

Candidates can exercise the following exit options and obtain the said certificate or diploma or degree, if the minimum required credits are earned and other conditions are met. Students exercising the option of exit at the end of 2nd semester or 4th semester need to have completed an internship for atleast 8 weeks along with the necessary credit requirements to qualify for the relevant certificate or diploma. In any case, every student, whenever exit (or complete the 4

year programme), should have completed atleast one internship for a minimum period of 8 weeks.

Exit after 2^{nd} Semester: Certificate in Cybersecurity will be awarded for candidates who exit the course at the end of 2^{nd} semester and earned a minimum of 40 credits and have completed a Summer Internship of 4 credits for a minimum period of 8 weeks, during the summer vacation post 2^{nd} semester.

Exit after 4th Semester: Diploma in Cyber and Digital Sciences will be awarded for candidates who exit the course at the end of 4th semester and earned a minimum of 80 credits and have completed a Summer Internship of 4 credits for a minimum period of 8 weeks, during the summer vacation post 4th semester.

Exit after 6th Semester: UG Degree in Cyber and Digital Sciences (B.Sc. (CDS)) will be awarded for candidates who exit the course at the end of 6th semester and earned a minimum of 120 credits and have completed a Summer Internship of 4 credits for a minimum period of 8 weeks, during the summer vacation post 4th semester.

| Exit after | Credits and other requirements | Awards |
|--------------------------|--------------------------------|---------------------------------------|
| 2 nd Semester | Min: 40 Credits & Internship | Certificate in Cybersecurity |
| 4 th Semester | Min: 80 Credits & Internship | Diploma in Cyber and Digital Sciences |
| 6 th Semester | Min: 120 Credits & Internship | B.Sc. Cyber and Digital Sciences |

4. STRUCTURE OF THE UNDERGRADUATE PROGRAMME

This B.Sc Honors programme offered in the affiliated colleges shall confirm to the structure specified hereunder. As per the decided programme mandate, the students to complete 120 credits to complete a basic Bachelor's Degree in 3 years. With an additional 40 credits of course work one can pursue 4th Year Honors or Honors with Research Degree. The UG Programme will consist of the categories of courses and the minimum credit requirements for 3-year UG and 4-year UG(Honors) or UG (Honors with Research) programmes as given in Table 1 at Section 3.3.6.

4.1. Types of Courses

| Hardcore Courses | Softcore Courses (Specialization specific) |
|---|--|
| Major Disciplinary–Cyber and Digital Sciences | Minor Disciplinary |
| Multi-Disciplinary Courses | Skill Enhancement Courses |
| Ability Enhancement Courses | Summer Internship |
| Value Added Courses | Research Dissertation Project |
| Community Engagement and Service | |

4.2. Description of Courses

The following are the types of courses in this programme:

4.2.1. Major Discipline: 60 Credits - 3 Year UG, & 72 Credits - 4 Year UG

Major discipline (Cyber and Digital Sciences) : Students should secure the prescribed number of credits (not less than 50% of the total credits) through core courses in the major discipline. The major discipline would provide the opportunity for a student to pursue in-depth study of a particular subject or discipline. A student may choose to change the major discipline within the broad discipline at the end of the second semester provided all the prerequisites of the respective degree programme are fulfilled.

4.2.2. Minor Discipline / Specialization: 24 Credits - 3 Year UG & 40 Credits - 4 Year UG

Minor discipline helps a student to gain a broader understanding beyond the major discipline.

4.2.3. Multidisciplinary courses (MD): 9 Credits

All undergraduate students are mandated to pursue 9 credits worth of courses in such multidisciplinary areas / Courses out of 9/10 NEP defined subjects. Colleges may identify any 3 multiple disciplinary streams listed below based on availability of resources and manpower.

| a) Natural Sciences | b) Physical Sciences |
|-----------------------------|----------------------------------|
| c) Mathematics & Statistics | d) Computer Science/Applications |
| e) Data Analysis | f) Social Sciences |
| g) Humanities | h) Commerce & Management |
| i) Library Science | j) Media Sciences, etc. |

Students are expected to learn basic/introductory courses designed by other departments for this purpose. Colleges may list any 3 introductory courses (one each in Natural Sciences, Physical Sciences & Humanities) for uniform adoption of all UG students.

4.2.4. Ability Enhancement Courses (AEC): 8 credits

All Undergraduate (UG) students are mandated to complete at least 8 Credits worth of Courses which focus on Communication and Linguistic skills, Critical reading and Writing skills. These courses are expected to enhance the ability in articulation and presentation of their thoughts at workplace. Colleges may design these ability enhancement courses tuned to the requirements of given major discipline. For example, a course in Business Communication is more appropriate in place of literature/prose/poetry.

| Ability Enhancement Course | | |
|--|---|--|
| I. English Language | II. Indian Language (two courses) | |
| a. English Language & Literature - 1 and 2 | a. Indian language & Literature - 1 and 2 | |
| b. Functional English - 1 and 2 | b. Functional language - 1 and 2 | |
| c. Communicative English - 1 and 2 | c. Communicative language - 1 and 2 | |

4.2.5. Skill Enhancement Courses (SEC): 9 credits

These courses are aimed at imparting practical skills, hands-on training, soft skills, and other skills to enhance the employability of students. Courses are designed as per the students' needs with the available resources. Students can choose these courses from the list of courses offered in the chosen specialization as said in 4.2.2. Colleges may also outsource the Skill Enhancement Courses to AICTE approved agencies for conducting short term Training Workshops, Skill India initiatives of GOI and approved Trades by Skill development of corporation are to be considered.

4.2.6. Value-Added Courses (VAC) Common to All UG Students: 8 credits

Under NEP, the UGC has proposed for 6 to 8 credits worth of common courses which are likely to add value to overall knowledge base of the students. These courses include:

- a) Understanding India
- b) Environmental Sciences/Education/Higher Order Thinking
- c) Digital and Technological solutions
- d) Health, Wellness, Yoga Education, Sports & Fitness/Universal Human Values

The course structure and coverage of topics are suggested by UGC in its draft documents, colleges/UG Boards of Studies may design the methodology for conducting these value added courses.

4.2.7. Summer Internship: 4 Credits

All students will undergo Internships / Apprenticeships in a firm, industry, or organization or Training in labs with faculty and researchers in their own or other Higher Education Institutions / Research institutions during the summer term. Students will be provided with opportunities for internships to actively engage with the practical side of their learning. Such Summer Internship is to be conducted in between 4th Semester and 5th Semester. A review report and award of grade based on Work based learning by students is to be recorded during the 5th Semester. Students who exercise the option of exit at the end of 1st year or 2nd year need to do the internships as specified in the respective section.

4.2.8. Community Engagement and Service: 2 Credits

The curricular component of 'Community Engagement and Service' seeks to expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems. This can be part of summer term activity or part of a major or minor course. Community Engagement shall be conducted for a minimum of 2 weeks.

4.2.9. Research Project / Dissertation: 12 Credits

Students choosing a 4 Year Bachelor's degree (Honors with Research) are required to take up research projects under the guidance of a faculty member. The students are expected to complete the Research Project in the eighth semester.

4.2.10. Audit courses: 0 credits

Audit courses offered do not carry any credits. Evaluation will be based on continuous assessment. Students may be given a Pass or Fail (P/F) based on the assessment that may consist of class tests, homework assignments, and/or any other innovative assessment methodology suitable to the expected learning outcome, as determined by the faculty in charge of the course of study.

4.3. Levels of the Courses

Course codes are based on the academic rigor. The first four letters of the course code indicate the department/Centre, followed by the academic rigor level code in digits. The coding structure follows:

4.3.1. 0-99: Pre-requisite courses

It is required to undertake an introductory course which will be a pass or fail course with no credits. It will replace the existing informal way of offering bridge courses that are conducted in some of the colleges/ universities.

4.3.2. 100-199: Foundation or introductory courses

These are courses which are intended for students to gain an understanding and basic knowledge about the subjects and help decide the subject or discipline of interest. These courses generally would focus on foundational theories, concepts, perspectives, principles, methods, and procedures of critical thinking in order to provide a broad basis for taking up more advanced courses.

4.3.3. 200-299: Intermediate-level courses including subject-specific courses

These courses are intended to meet the credit requirements for minor or major areas of learning. These courses can be part of a major and can be pre-requisite courses for advanced-level major courses.

4.3.4. 300-399: Higher-level Courses

These courses are required for majoring in a disciplinary/interdisciplinary area of study for the award of a degree.

4.3.5. 400-499: Advanced Courses

These courses which would include lecture courses with practicum, seminar-based course, term papers, research methodology, advanced laboratory experiments/software training, research projects, hands-on-training, internship/apprenticeship projects at the undergraduate level or first year post-graduate theoretical and practical courses.

4.4. Credit-hours for different types of courses

A three-credit lecture course in a semester means three one-hour lectures per week with each one-hour lecture counted as one credit. One credit for tutorial work means one hour of engagement per week. A one-credit course in practicum or lab work, community engagement and services, and fieldwork in a semester mean two-hour engagement per week.

The Faculty to Student Ratio in all the practical / laboratory classes shall be maintained at 1:25.

In a semester of 15 weeks duration, a one-credit practicum in a course is equivalent to 30 hours of engagement. A one-credit of Seminar or Internship or Studio activities or Field practice/projects /community engagement and service means two-hour engagements per week. Accordingly, in a semester of 15 weeks duration, one credit in these courses is equivalent to 30 hours of engagement.

4.4.1. Pedagogical Styles

In order to achieve the expected Learning outcomes, UGC Framework has specified different Pedagogical approaches for different courses at undergraduate level. These approaches include:

| a) Lecture course | b) Tutorial course |
|---------------------------------------|---------------------------------|
| c) Practice cum or laboratory courses | d) Seminar Course |
| e) Internship course | f) Studio activity-based course |
| g) Field practicing | h) Project work courses |
| | |

i) Community engagement and service course

The details of these different types of Pedagogical methods are as follows:

| COURSE TYPES | APPROACH | |
|---|---|--|
| Lecture Courses | Regular classroom lectures by qualified / experienced Expert Teachers These Lectures may also include classroom discussion, demonstrations, case analysis Use of Models, Audio-Visual contents, Documentaries, PPTs may supplement. | |
| Tutorial Courses | Problem solving Exercise classes guided discussion, supplementary readings vocational training, etc. | |
| Practical / Lab work | Practical Lab activity with Theoretical support Mini projects, Activity based engagement, Program executions, Data processing and presentation exercise. | |
| Seminar Course A course requiring student to design and participate in discussions, G Discussions, Elocution and Debate, Oral Communication Paper presentation Poster Presentation, Role play participation, Quiz competitions, Business preparation/presentation, etc. | | |
| Internship course | Courses requiring students to <i>Learn by Doing</i> in the workplace external to the educational Institutions. Internships involve working in Software Companies, Research and Higher Educational Institution Laboratories, Corporate Offices, etc. All Internships should be properly guided and inducted for focused learning. | |
| Research Project | Students need to study and analyze the recent research publications from indexed/peer reviewed journals in their area of specialization. Outcome of the study and analysis need to be presented as a thesis or research report with necessary experimental results. | |

Table2: Pedagogical Approaches

4.5. Semester-wise Break: for courses of 3 year UG and 4 Year UG(Hons) Degree programmes

Incorporating the focus of NEP in terms of different categories of courses and award of Certificates, Diplomas and Degrees during different stages of 4 year Degree programmes, a template for Semester-wise course work was designed by the UGC and presented in para 5.3 of Curriculum Framework . Salient features of it are as follows:

- All courses shall carry specified number of credits.
- Every Semester shall have a minimum of 20 credits worth of courses.
- Credits for a course shall be decided on the basis of number of Contact hours of the teaching in a classroom.
- One credit means one hour of Teaching in the case of a Theory subject and at least 2 hours of conducting Practical in the case of Lab subjects.

- All Major and Minor disciplinary Courses shall have 4 credits with 6 hours of work load (including 2 hours of tutorials)
- Language courses, ability enhancement, skill enhancement and value added common course also will have 2 hours of hands on training.
- Progress of Learning is measured in terms of credits earned by the students on successful completion of the course.
- Students can exercise his/her choice for exiting the course at the end of every Academic year.
- Graduate attributes listed by UGC shall be the focus of Teaching-Learning process.
- Semester I and II shall focus on introductory courses/subjects in Major/Minor disciplines and shall focus on providing knowledge in Multidisciplinary areas, skill enhancement and ability enhancement courses.
- Semester III and IV shall focus on Core disciplinary courses with a focus on building strong foundation in the given Discipline.
- Semester V and VI shall focus on providing in-depth knowledge and skills required for taking up a career in the given discipline.
- Semester VII and VIII shall focus on Advanced knowledge and shall direct the students to take up socially relevant projects/Research works newer applications of the knowledge.

5. ADMISSION ELIGIBILITY, LATERAL ENTRY

5.1 Admission Eligibility

The candidates for admission to this programme shall be required to have passed 10+2/10+3 system of examinations or equivalent with Mathematics / Business Mathematics / Computer Science / Computer Applications / Informatics Practices / or Equivalent as one of the subjects of study.

Students shall be admitted to this programme based on admissions criteria fixed by the University / Government of Puducherry from time to time.

5.2 Admissions by Lateral Entry

In this programme, where admission was carried out adopting approved procedures in preceding years, subject to availability, lateral entry admission shall be permitted, subject to:

Candidates seeking entry at the second, third and fourth year, should meet the necessary eligibility criteria with respect to the certificate / diploma / degree they possess, with necessary minimum credits banked in the Academic Bank of Credits (ABC). Such students who get admitted in later years, other than first year will be guided by the following clauses:

- That the University shall notify the admission process and number of vacancies open for lateral entry.
- That the Lateral entrants shall be admitted only after such transparent screening process and such procedure that the University may prescribe from time to time. University may prescribe different methods of screening for different programmes depending on the circumstances prevailing in each case.
- Lateral entry shall be permissible only in the beginning of years 2, 3, 4 of the Under Graduate / Honors programme; provided that the students seeking lateral entry shall have obtained the minimum pass marks / grades fixed by the University in their previous academic years.

6. EVALUATION

All Credit courses are evaluated for 100 marks. Internal Assessment component is for 25 marks and the End Semester University exam is for 75 marks. In case of Practicals, Project work etc., it is 50 marks for Internal and 50 marks for End-Semester Exams.

6.1. Category of Courses

There are three category of courses as shown in 6.2. Category A, theory courses with lecture hours and tutorials are evaluated for an Internal assessment component of 25 Marks and End Semester University Exam for 75 Marks.

| Category A | Theory Courses with Lecture hours and hours allotted for Tutorials wherever required. |
|------------|---|
| Category B | Practical Courses with only Practical hours or Laboratory hours. Laboratory Courses, Internships, Research Project Works and other courses allotted only with practical hours in the curriculum shall be under this category. |
| Category C | Theory & Practice combined Courses where Lecture and Practical hours allotted. |

6.2. Learning Assessment

| Course Types | Internal Assessment | End Semester Assessment | | |
|----------------|--|----------------------------|------------------------------|--|
| | 25 Marks | 75 Marila | | |
| Category A | Evaluation Component | Marks | 75 Marks | |
| TA . 25 Maalar | I. Mid Semester Exam (one) | 20 | (Evaluation | |
| IA: 25 Marks | II. Percentage of Attendance | 05 | Details given in | |
| EA. 75 Marks | Total | 25 | Table 3) | |
| | 50 Marks | | | |
| | For Practical / Internship Cour | ses | | |
| | Evaluation Component | Marks | | |
| | I. Weekly Observation Book / Report | 15 | | |
| | II. Practical Record / Internship Report | 15 | | |
| | III. Model Practical Exam | 15 | 50 N.C. 1 | |
| Category B | IV. Percentage of Attendance | 05 | 50 Marks | |
| | Total | 50 | (Evaluation | |
| IA: 50 Marks | For Research Project Work Cou | Details given in | | |
| EA: 50 Marks | Evaluation Component | Marks | Table 3) | |
| | I. Monthly Review (3 Reviews – 10 Marks each) | 30 | | |
| | II. Project Report | 10 | | |
| | III. Project Work | 10 | | |
| | Total | 50 | | |
| | 25 Marks | | | |
| | | | | |
| | Evaluation Component | Marks | | |
| Category C | I. Mid Semester Exam (one) - Theory | 10 | 75 Marks | |
| IA: 25 Marks | II. Observation Book, Record Book | 10 | (Evaluation | |
| EA: 75 Marks | III. Percentage of Attendance | 05 | Details given in Table 3) | |
| | Total | 25 | | |

6.3. Marks for Attendance

| Attendance % | Marks |
|--------------|-------|
| Below 75% | 0 |
| 75% - 80% | 1 |
| 81% - 85% | 2 |
| 86% - 90% | 3 |
| 91% - 95% | 4 |
| 96% - 100% | 5 |

6.4. Internal Test Scheme

Principal of the College schedules the Mid-Semester Exam for all courses during 8/9th week of start of classes. All faculty members are expected to conduct this Mid-Semester exam for 1¹/₂ hour duration and evaluate, upload the marks to Controller of Examinations of University. Colleges need to preserve the answer books of Mid-Semester exams until declaration of results by the University.

6.5. End Semester University Exam

Controller of Examinations (COE) of Pondicherry University schedules the End-Semester exams for all three categories of courses. For Category C courses, theory and practical exams will be conducted separately by the Controller of Examinations of Pondicherry University.

A detailed Exam Time Table shall be circulated to all Colleges atleast 15 days before the start of exams mostly during 15/16th week of the Semester. Question Papers shall be set externally based on BOS approved syllabus. All students who have a minimum of 70% attendance are eligible to attend the end-semester exams. The breakup of end semester marks is as given below.

6.6. Break up of end semester marks

(All End Semester Exams shall be conducted by the Pondicherry University)

The question paper shall be set as per the Bloom's Taxonomy. Table3 below gives the details of evaluation methods for Category A, B and C courses. Various levels along with their description and sample questions are as follows:

Knowledge: Recall or remember previously learned information.

Example: List the basic data types in Python

Comprehension: Demonstrate understanding of facts and ideas by organizing, comparing, translating, interpreting, giving descriptions, and stating the main ideas.

Example: Explain how a stack data structure works.

Application: Apply knowledge and concepts to solve problems in new situations. Use learned information in a different context.

Example: Write a Python program to solve the deadlock problem.

Analysis: Break down information into parts and examine the relationships between the parts. Identify motives or causes.

Example: Analyse the efficiency of two sorting algorithms and compare their advantages and disadvantages.

Synthesis: Create a new whole by combining elements in novel ways. Use creativity to produce something original.

Example: Design a web application that can generate a time table of a school.

Table3: End Semester Assessment examination details for all three categories of courses

| Course Components | Marks | Duration |
|--|----------|----------|
| Category A. Theory subjects: Sec A: 10 Questions of 2 Marks each (20 Marks) (Knowledge: 3, Comprehension: 2, Application: 3, Analysis:2) | | |
| Sec B: 5 out of 7 Questions of 5 Marks each (25 Marks) (Knowledge: 1, Comprehension: 2, Application: 1, Analysis:3) | 75 Marks | 3 Hours |
| Sec C: 2 Either/OR choice questions of 15 Marks each (30 Marks) (Application: 2 Analysis:2 Questions from all units of Syllabus equally distributed. | | |
| Category B. Skill Enhancement / Practical Courses | | 2.11 |
| Based on Practical Exams conducted by COE of University | 50 Marks | 3 Hours |
| Internship / Research Project Work: Presentation of the work / Report / Viva-voce examinations conducted by COE of university. | 50 Marks | |
| Category C. Theory Subjects with Practical Components: | | |
| i. Theory Component: Sec A: 5 Questions of 2 Marks each (10 Marks) (<i>Knowledge: 3, Comprehension: 2, Application: 3, Analysis:2</i>) | 50 Marks | 3 Hours |
| Sec B: 5 out of 7 Questions of 4 Marks each (20 Marks) (Comprehension: 2, Application: 3, Analysis:2) | | |
| Sec C: 2 Either or type questions of 10 Marks each (20 Marks) (Analysis / Synthesis) Questions from all units of Syllabus equally distributed | | |
| | | |
| ii. Practical Component: Based on Practical Exams conducted by COE of University | 25 Marta | |
| The examination shall be conducted for 50 Marks and reduced to 25 Marks. | 25 Marks | 3 Hours |
| Total Marks: 75 (Theory: 50 Marks + Practical: 25 Marks) | | |

7. CONSOLIDATION OF MARKS, PASSING MINIMUM AND ARREAR EXAM

Controller of Examinations of the University consolidates the Internal Assessment marks uploaded by the Colleges and marks secured by students in end-semester examination. The total marks will be converted into letter grades as shown in the table Section 8.1.

7.1. Passing Minimum

As per NEP Regulations, the passing minimum is 50% marks (IA + End semester put together). However, Pondicherry University considers 40% marks as pass during first 3 years of study and students who secured less than 50 will be awarded 'P' (Pass Grade).

7.2. Arrear Exam

A student who failed to secure 50% marks in aggregate is declared as Failed. Failed students are eligible to take up supplementary examination by registering to the failed course in the following Semester. All other candidates who failed due to shortage of attendance, those who are seeking to improve the grade shall repeat the course.

8. LETTER GRADES AND RANGE OF MARKS

Total Marks secured by a student in each subject shall be converted into a letter grade. UGC Framework has suggested a Country wide uniform letter grades for all UG courses.

8.1. Letter Grades

The following Table shows the seven letter grades and corresponding meaning and the grade points for calculation of CGPA.

| Letter Grade | Grade Point |
|-------------------|--------------------|
| O (outstanding) | 10 |
| A+ (Excellent) | 9 |
| A (Very good) | 8 |
| B+ (Good) | 7 |
| B (Above average) | 6 |
| C (Average) | 5 |
| P (Pass) | 4 |
| F (Fail) | 0 |
| Ab (Absent) | 0 |

In order to work out the above letter grades, the marks secured by a student (Total of Internal Assessment and End Semester Assessment) would be categorized for relative grading.

8.2. Range of Marks for each letter grades

The ranges of marks for each grade would be worked as follows:

| Highest marks in the given subject | Х | | |
|------------------------------------|---|--|--|
| Cut of marks for grading purpose | 50 Marks | | |
| Passing mark (for 3 year UG) | 40 Marks | | |
| Number of grades G (Excl. P grade) | Grades: O, A+, A, B+, B, C, Hence, G = 6 | | |
| Range of marks | К | | |
| K = (X - 50) / G | | | |

The following table gives the range of marks and letter grades. According to K value, one of the following grading scheme will be followed.

(i) If $K \ge 5$, then the grades shall be awarded as given in the following table.

| Range of Marks in % | Letter Grade Points for | Grade Points for |
|-----------------------------|-------------------------|------------------|
| X to (X-K) + 1 | 0 | 10 |
| (X-K) to $(X-2K) + 1$ | A+ | 9 |
| (X-2K) to $(X-3K) + 1$ | А | 8 |
| (X-3K) to $(X-4K) + 1$ | B+ | 7 |
| (X-4K) to $(X-5K) + 1$ | В | 6 |
| (X-5K) to 50 | С | 5 |
| 40 - 49 | Р | 4 |
| Below 40 | F | 0 |
| Absent (Lack of Attendance) | Ab | 0 |

| Range of Marks in % | Letter Grade Points for | Grade Points for |
|-----------------------------|-------------------------|------------------|
| 80-100 | Ο | 10 |
| 71-79 | A+ | 9 |
| 66-70 | А | 8 |
| 61-65 | B+ | 7 |
| 56-60 | В | 6 |
| 50-55 | С | 5 |
| 40-49 | Р | 4 |
| Below 40 | F | 0 |
| Absent (lack of attendance) | Ab | 0 |

(ii) If K< 5, then the grades shall be awarded as given in the following table.

9. CALCULATION OF SGPA & CGPA

Semester Grade Point Average (SGPA) is calculated by taking a weighted average of all grade points secured by a candidate from all subjects registered by him/her in the given Semester. The weights being the number of credits that each subject carries.

Cumulative Grade Point Average (CGPA) shall be calculated as the weighted average of credits that course carries and the value of Grade points averaged for all subjects.

9.1. Procedure of computation of SGPA and CGPA

The following procedure shall be followed to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The SGPA is the ratio of the sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e. SGPA (Si) = Σ (Ci x Gi) / Σ Ci

Where Ci is the number of credits of the ith course and Gi is the grade point scored by the student in the ith course.

| Semester | Course | Credit | Letter Grade | Grade Point | Credit Point (Credit x Grade) |
|----------|----------|--------|-----------------|----------------|----------------------------------|
| Ι | Course 1 | 3 | A | 8 | 3 X 8 = 24 |
| Ι | Course 2 | 4 | B+ | 7 | 4 X 7 = 28 |
| Ι | Course 3 | 3 | В | 6 | 3 X 6 = 18 |
| Ι | Course 4 | 3 | 0 | 10 | 3 X 10 = 30 |
| Ι | Course 5 | 3 | С | 5 | 3 X 5 = 15 |
| Ι | Course 6 | 4 | В | 6 | 4 X 6 = 24 |
| | | 20 | | | 139 |
| | SGPA | | | | 139/20=6.95 |

9.2. Example for Computation of SGPA where candidate has not failed in any course.

9.3. Example for Computation of SGPA where candidate has failed in one course.

| Semeste r | CourseCreditLetterGradeGradeFoint | | Grade Point | Credit Point (Credit x Grade) | |
|--------------|-----------------------------------|------------|----------------|----------------------------------|----------------|
| Ι | Course 1 | 3 | А | 8 | 3 X 8 = 24 |
| Ι | Course 2 4 | | B+ | 7 | 4 X 7 = 28 |
| Ι | Course 3 | Course 3 3 | | 6 | 3 X 6 = 18 |
| Ι | Course 4 | 3 | 0 | 10 | 3 X 10 = 30 |
| Ι | Course 5 3 | | С | 5 | 3 X 5 = 15 |
| Ι | Course 6 4 | | F | 0 | $4 \ge 0 = 00$ |
| | | 20 | | | 115 |
| | SGPA | | | | 115/20=5.75 |

9.4. Example for Computation of SGPA where candidate has failed in two courses.

| Semeste r | Course | Credit | Letter Grade | Grade point | Credit Point (Credit x Grade) |
|--------------|----------|------------|-----------------|----------------|----------------------------------|
| Ι | Course 1 | 3 | А | 8 | 3 X 8 = 24 |
| Ι | Course 2 | 4 | B+ | 7 | 4 X 7 = 28 |
| Ι | Course 3 | 3 | F | 0 | $3 \ge 0 = 00$ |
| Ι | Course 4 | 3 | В | 6 | 3 X 6 = 18 |
| Ι | Course 5 | 3 | С | 5 | 3 X 5 = 15 |
| Ι | Course 6 | 4 | F | 0 | $4 \ge 0 = 00$ |
| | | 20 | | | 85 |
| | | 85/20=4.25 | | | |

The CGPA shall also be calculated in similar way as shown in examples (i), (ii) and (iii) of SGPA for all subjects taken by the students in all the semesters. However, if any student fails more than once in the same subject, then while calculating CGPA, the credit and grade point related to the subject in which the student fails in multiple attempts will be restricted to one time only. The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

In case of audit courses offered, the students may be given (P) or (F) grade without any credits. This may be indicated in the mark sheet. Audit courses will not be considered towards the calculation of CGPA.

10. DECLARATION OF RESULTS

Controller of Examinations (COE) of the University shall declare the results of given UG programme following the CGPA secured by students by the end of 6^{th} Semester and 8^{th} Semester.

Pass Classes:

| Range of CGPA | Result |
|----------------------|------------------------------|
| 9.0 - 10 | First Class with distinction |
| 6.0 - 8.99 | First Class |
| 5.0 - 5.99 | Second Class |
| 4.0 - 4.99 | Pass Class |

11. MINIMUM CREDIT REQUIREMENTS

| S.No | Component | 3-years UG | | | UG 4-years UG (Honors / Honors With research) | | |
|-------|---|------------|---------|-----------|---|-----------|---------------------------|
| | - | Credits | Courses | Cr/Course | Credits | Courses | Cr/Course |
| 1 | Major Disciplinary/ Interdisciplinary Courses | 56 | 14 | 4 | 76 | 19 | 4 |
| 2 | Minor Disciplinary/ Interdisciplinary Courses | 24 | 6 | 4 | 32 | 8 | 4 |
| 3 | Multi-Disciplinary Courses | 9 | 3 | 3 | 9 | 3 | 3 |
| 4 | Ability Enhancement Courses | 8 | 4 | 2 | 8 | 4 | 2 |
| 5 | Skill Enhancement Courses | 9 | 3 | 3 | 9 | 3 | 3 |
| 6 | Value-added courses | 8 | 4 | 2 | 8 | 4 | 2 |
| 7 | Summer Internship (MJD 11) | 4 | | 4 | 4 | 1 | 4 |
| 8 | Community Engagement and Service | 2 | 1 | 2 | 2 | 1 | 2 |
| 9 | Research Project/Dissertation | | | | 12 | Project o | r 3 Courses ^{##} |
| Total | | 120 | | | 160 | | |

<u>##Note:</u> Honors students not undertaking research will do 3 courses for 12 credits in lieu of a research project/Dissertation.

- MJD: Major Disciplinary (Compulsory Hardcore Subjects)
- MID: Minor Disciplinary (Specialization Specific Softcore Subjects)
- MLD: Multi-Disciplinary
- AEC: Ability Enhancement Courses
- SEC: Skill Enhancement Courses
- VAC: Value Added Courses

12. COURSE CODE

- Course code : 7 Characters: 4 Alphabets and 3 Digits. Ex : ABCD123
- Alphabets : 1st and 2nd Alphabets: Major domain 3rd and 4th Alphabets: Specialization
- **Digits** : 1st Digit: Levels (100, 200, 300, 400...) 2nd and 3rd Digits: Serial number of the courses in the given year

Example: CSCY312: Computer Science Cyber and Digital Sciences, Level 300, Serial number of the course in the year (12).

B.Sc. CYBER AND DIGITAL SCIENCES

SYLLABUS

SEMESTER I

| Year | I | Course Code: CSCY101 | | Credits | 4 |
|------------------------------------|---|--|---|--|-----|
| Sem. | 1 | Course Title: Digital Logic Fundamentals | | Hours | 75 |
| | | | Category | С | |
| Course Prerequisites, if any | • | Basic knowledge of Computers | | | |
| Internal | End Sem | nester Marks: 75 | Duration of ESA (Theory | /): 03 hrs. | |
| Assessment Marks: 25 | | | Duration of ESA (Practic | al): 03 hrs. | |
| Course Outcomes | • | Understand and describe the prinumber operations Apply Karnaugh mapping to simpligital circuits Analyze and design basic combinic components Synthesize and evaluate synchroor elements and HDL | nciples of digital systems olify Boolean expressions national circuits using vari | and binary and optimiz ious digital using storage | ze |
| | • | Design and implement various ty | /pes of registers and cour | nters using F | IDL |
| Unit No. | [| Theory Component | + | Hours | |
| Unit I | Digital Systems and Binary Numbers Digital Systems – Binary Numbers – Number-Base Conversions – Octal and Hexadecimal Numbers – Complements of Numbers – Signed Binary Numbers – Binary Codes – Binary Storage and Registers – Binary Logic – Axiomatic Definition of Boolean Algebra – Basic Theorems and Properties of Boolean Algebra – Boolean Functions – Canonical and Standard Forms – Other Logic Operations – Digital Logic Gates – Integrated Circuits | | | 9 | |
| Unit II | Gate-Level Minimization Map Method – Four-Variable K-Map – Product-of-Sums Simplification – Don't-Care Conditions – NAND and NOR Implementation – Other Two-Level Implementations – Exclusive-OR Function – Hardware Description Language | | | 9 | |
| Unit III | Combinational Logic Analysis Procedure – Design Procedure – Binary Adder– Subtractor – Decimal Adder – Binary Multiplier – Magnitude Comparator – Decoders – Encoders – Multiplexers – HDL Models of Combinational Circuits | | | 9 | |
| Unit IV | Synchronous Sequential Logic Storage Elements – Latches – Flip-Flops – Analysis of Clocked Sequential Circuits - Synthesizable HDL Models of Sequential Circuits – State Reduction and Assignment – Design Procedure | | | 9 | |
| Unit V | Registers and Counters Registers – Shift Registers – Ripple Counters – Synchronous Counters – Other Counters – HDL for Registers and Counters | | | 9 | |
| | | Practical Component | nt | | |
| | 1. 2. 3. | Binary to Decimal and vice-versa i Decimal to Hexadecimal and Vice Digital Logic Gates in Python | in Python -Versa in Python | | |

| | 4. Simplification of Boolean Functions in Python | |
|-----------------|--|--------------|
| | 5. Combinational Logic Circuits in Python | |
| | i. Code Converters | |
| | ii. Arithmetic | |
| | (Adders, | |
| | Subtractors, | |
| Exercises | Multipliers, | 30 |
| | Comparators) | |
| | iii. Data Handling | |
| | (Multiplexers, | |
| | Demultiplexers, | |
| | Encoders & Decoders) | |
| | 6. Combinational Logic Circuit Design in Python | |
| | 7. Binary Adder-Subtractor Simulation in Python | |
| | 8. Decimal Adder Simulation in Python | |
| | 9. Binary Multiplier Simulation in Python | |
| | 10. Sequential Circuit Storage Elements: Flip-Flop | |
| | Simulation in Python | |
| | Recommended Learning Resources | |

| | Actions | , and Outcomes, Troubleshooting | g Scenario | | |

| | | 1. Configure NIC settings (IP address, subnet mask, | 30 | |
|---|-----|--|------------------|--|
| | | gateway) | | |
| | | a. Use ping to test connectivity. | | |
| | | b. Use ethtool to diagnose NIC issues on Linux. | | |
| | | 2. Perform the IP address configuration (static and | | |
| | | dynamic) of a computer system | | |
| | | 3. Perform the DHCP configuration of a computer system | | |
| | | 4. Configure MS outlook to receive emails from email | | |
| | | accounts in different mail servers | | |
| | | 5. Use <i>telnet</i> and <i>ftp</i> commands to establish a remote | | |
| | | connection and transfer files | | |
| Exercises | | 6. Execute netstat command with all of its parameters | | |
| | | and record the results | | |
| | | 7. Query DNS records using all DNS commands | | |
| | | 8. Configure the firewall settings for a computer system | | |
| | | and also create firewall rules with <i>iptables</i> and <i>netsh</i> | | |
| | | advfirewall to block/allow specific traffic | | |
| | | 9. Troubleshoot network connectivity issues using <i>ping</i> , | | |
| | | tracert/traceroute, and ipconfig/ifconfig | | |
| | | 10. Install and configure a network operating system. | | |
| | | Create user groups and user accounts in each group | | |
| | | with appropriate account settings. Enable file and | | |
| | | printer sharing among the user groups | | |

SEMESTER II

| Year | Ι | Course Code: CSCY105 | | Credits | 4 |
|------------------------------------|-------|---|--------------------|----------|----|
| | | | | Hours | 75 |
| Sem. | | Course Title: Problem Solving & Programming Fundamentals | | Category | С |
| Course Prerequisites, if any | | Basic knowledge of Computers | | | |
| Internal | End | Semester Marks: 75 Duration of ESA (The | eory): 0 | 3 hrs. | |
| Assessment | | Duration of ESA (Pra | actical): | 03 hrs. | |
| Marks: 25 | | | | | |
| Course Outcomes | | Analyze problems and develop top-down designation | gns | | |
| | | Write, compile, and debug basic programs | | | |
| | | • Implement logic with conditionals and loops | | | |
| | | Manipulate arrays of various dimensions | | | |
| | | • Design and implement functions with recursio | 'n | | |
| Unit No. | | Course Content | | Hours | |
| | | Theory Component | | | |
| | Intr | oduction to Computer Problem-Solving | | | |
| L Init I | Prol | olem-solving Aspect – Top-down Desig | gn − | 9 | |
| Onit i | Imp | lementation of Algorithms – Program Verifica | tion – | | |
| | Effic | ciency of Algorithms – Analysis of Algorithms | | | |
| | Basi | ic programming constructs | | | |
| Unit II | Basi | c Data types (Numerical, String) – Variables – Expre | essions | 9 | |
| | — I/(| D statements – Compile and Run – Debugging | | | |
| | Dec | ision Making – Branching & Looping | | | |
| Unit III | Dec | ision making – Relational Operators – Cond | litional | 9 | |
| | stat | ement, Looping Statements – Nested loops – I | nfinite | | |
| | 100 | | | | |
| | Arra | y Manipulation – Different operations – One dimer | asional | ٥ | |
| Unit IV | Arra | y – Two-dimensional Array – Multi-dimensional A | Isional Vrrav – | 9 | |
| | Cha | $r_{\rm racter} = \Delta r_{\rm rays}$ and Strings | aray | | |
| | Mo | dular solutions | | | |
| | Intro | oduction to Functions – Importance of Desi | ign of | 9 | |
| Unit V | Fun | ctions – Arguments – Parameters – Return Values - | – Local | - | |
| | and | Global Scope – Recursion | | | |
| | | Practical Component | | | |
| | | 1. Program to array counting, array order rever | rsal & | | |
| | | find the maximum number in a set | | | |
| | | Program for removal of duplicates from an ord | dered | | |
| | | array & to partition an array | | | |
| | | Program to find the k^m smallest element | i a la Li | | |
| Exercises | | Program to exchange the values of two variable | lables | | |
| | | without using a third Variable 5 Program that takes a list of numbers as input | tand | 20 | |
| | | Frogram that takes a list of numbers as input counts the total number of elements in the list | tanu t | 50 | |
| | | 6 Program to compute the factorial of a given in | teger | | |
| | | 7. Program to compute the sine of an angle (in de | | | |
| | | using a series expansion | | | |

| | Program to generate the Fibonacci sequence up to a specified limit | | |
|---|--|--|--|
| | Program that takes an integer as input and reverses its digits | | |
| | 10. Program that converts a number from one base to | | |
| | another (e.g., binary to decimal, decimal to binary) | | |
| Recommended Learning Resources | | | |
| 1. R. G. Dromey, "How to Solve it by Computer", Pearson Education | | | |
| Drint Posourcos | India, Thirteen Edition, 2013. | | |
| Print Resources | 2. Allen B. Downey, "Think Python: How to Think like a Computer | | |
| | Scientist", Third Edition, O'Reilly Publishers, 2020. | | |

| Sem. | | | | Hours | 75 |
| | Course Title: Fundamentals of Cybersecurity | | | Category | С |
| Course | • | Basic knowledge of computer netw | orks and internet | | |
| Prerequisites, if | | | | | |
| any | | | | | |
| Internal | End S | emester Marks: 75 | Duration of ESA (Theory) | : 03 hrs. | |
| Assessment | | | Duration of ESA (Practical) | : 03 hrs. | |
| Marks: 25 | | | | | |
| Course | • Le | earning the basic concepts of cybersed | curity | | |
| Outcomes | • 0 | nderstanding user authentication and | access control | | |
| | • 0 | omprehending the basics of cryptogra | ipny | | |
| | | nderstanding operating system and n | aws and regulations | | |
| Linit No | • 0 | | etwork security principles | Hours | |
| Offic NO. | | Theory Componen | ŧ | Hours | |
| Linit I | Intro | duction to Computer and Information | n Security | 9 | |
| Onici | Found | dation of Computer and Information | Security: Definition and its | 5 | |
| | needs | s. Triad and Parkerian Hexad security | models and issues- Attacks | | |
| | and it | and its types – Threats, vulnerabilities and Risk - risk management – | | | |
| | Incide | | | | |
| Unit II | User Authentication and Access Control | | | | |
| | Unde | | | | |
| | Identity verification, Falsifying Identification – Authentication factors | | | | |
| | – Multifactor and Mutual authentication – Common Identification and | | | | |
| | Authentication methods – ACL and its capabilities – Access Control | | | | |
| | Models – DAC, RBAC, ABAC, MAC – Physical Access control - Auditing | | | | |
| | and Accountability – Non Repudiation, Deterrence, IDS and IPS, | | | | |
| | Logging, Monitoring and audit with assessments. | | | | |
| Unit III | Crypt | ography | | 9 | |
| | Histor | ry of Cryptography-Caesar Cipher, | Cryptographic Machines, | | |
| | Kerck | nons s Principies – Modern Tools – Ci | pher, UTP, Symmetric and | | |
| | Cortif | icate - Protecting data at Rest in Mot | tion and in Lise | | |
| Linit IV | Com | liance Laws regulation and Operation | on security | 9 | |
| Officity | Types | of compliance and is Consequences – | Achieving and maintaining | 5 | |
| | comp | liance with control, Government and | Industry related regulatory | | |
| | – Ado | opting compliance frameworks, Com | pliance and technological | | |
| | chang | ges in cloud, Blockchain and crypt | ocurrencies - Process of | | |
| | opera | tion security, its effect in personal | lives and origins, Laws of | | |
| | Opera | ation security. | | | |
| Unit V | Netw | ork and Operating System Security | | 9 | |
| | Huma | an element Security – Gathering | information for Social | | |
| | Engin | eering Attacks and its types, build | ing security awareness – | | |
| | Physic | cal threat Identification and control, P | rotecting-people, data and | | |
| | equip | ment – Designing secure network | using firewall and IDS – | | |
| | Prote | cting Network traffic using network se | curity tools – US hardening | | |
| | – Pro | tecting against Malware – OS secur | ity tools for scanning and | | |

| | assessment of vulnerability – Mobile Embedded IoT and apr | lication | |
|---|---|------------------------|--|
| | Security | | |
| | Practical Component | | |
| | 1 Perform a survey of various malware attacks the | at have 30 | |
| | hannened in the last 3 years the industry in which | t had | |
| | happened the losses incurred the data that was h | reached | |
| | and prepare a report on the same | eacheu | |
| | 2 Identify some open source malware creation tools | hiruc | |
| | 2. Identity some open source maiware creation tools | , (VILUS, | |
| | malware. | Jonuing | |
| | 3. Study the various authentication methods and | prepare | |
| | report on a comparison of the authentication method | S. | |
| Evercises | 4. Providing use case scenarios of the various authen | tication | |
| EXELCISES | methods that are used in real life. | | |
| | 5. Using online cryptography tools, create ciphers | s using | |
| | symmetric and symmetric cryptography. | | |
| | 6. Create message digest using online hash function, of | reate a | |
| | digital certificate online | | |
| | 7. Perform a study of cybersecurity laws in India, USA | and UK | |
| | and compare them. | | |
| | 8. Perform a study of open source firewall and IDS tools | | |
| | 9. Install and work with tcpdump commands in linux | | |
| | 10. Demonstrate OS hardening. | | |
| | Recommended Learning Resources | | |
| | 1. Jason Andress, "Foundations of Information Security - | A Straightforward | |
| | Introduction", William Pollock Publisher, 2019. | | |

SEMESTER V

| Vear | ш | Course Code: CSCY301 | | Credits | 4 | |
|-------------------------------------|---|---|---|--|------------|--|
| 1601 | | Course Title: Operating Systems | | Hours | 75 | |
| Sem. | V | | | Category | С | |
| Course Prerequisites, if any | • k | • Knowledge of computers & computer organization | | | | |
| Internal Assessment Marks: 25 | End Sem | ester Marks: 75 Du Du | ration of ESA (Theor ration of ESA (Practi | ry): 03 hrs ical): 03 hrs | | |
| Course Outcomes | • 1 • 1 • 1 • 1 • 1 • E | o understand the basic concepts o learn the various mechanisms o ynchronization and deadlocks o understand how the memory is o analyze various File System me valuate system structures in vario and Windows and identifying simi | of Operating System of CPU scheduling, p s utilized ethods and Disk sche ous operating system ilarities and difference | n and Process rocess duling algoritl ns, such as Lir ces | hms 1ux | |
| Unit No. | | Course Content | | Hours | | |
| Unit I | Overview Introduct systems Process | Theory Component v and Process management tion: Operating System Structure services - System calls. Proce Concept – process schedul s-Inter process communications- | ures - Operating ess Management: ling-operation on Threads | 9 | | |
| Unit II | Scheduli CPU Sch Process Semapho Monitors Handling Deadlock | ng algorithms and Process Synchroeduling: Basic Concepts – Sched Synchronization: Critical Sectores - Classical problems of Deadlock: Deadlock Character -Deadlock Prevention-Deadlock Detection-Deadlock Recovery. | ronization duling Algorithms. tion problem – synchronization- erization-Deadlock ock Avoidance- | 9 | | |
| Unit III | Memory Main M Structure Demand | Management lemory: Contiguous Memory e of the Page Table –Swapping. Paging-Page Replacement-Thrash | Allocation-Paging- . Virtual Memory: hing. | 9 | | |
| Unit IV | Storage Mass Storage storage concepts Protectic Structure | Management orage structure: Overview- HDD (management- RAID Structure. – Access methods – Directory on –File system Implementations- Allocat | (Disk) Scheduling – File Systems: File y Structure – File tion- File-System tion methods. | 9 | | |
| Unit V | Case Stu The Linu process Linux Fil compone | dies ix system: Design principles – management- Scheduling- Mem- e System. Windows Operating ents- Windows File System. | kernel modules- ory Management- system: Systems | 9 | | |
| | | Practical Component | | | | |

| | 1. | Practice the file handling utilities, Process utilities, Disk utilities, and Networking commands (ipconfig, ping, | 30 |
|-------------------|------|---|---------------------|
| | | arp, route, netstat) | |
| | 2. | Write a program to implement various system call | |
| | | operations | |
| | 3. | Write a program to demonstrate various File | |
| | | management operations | |
| | 4. | Write a program to simulate CPU scheduling algorithms: | |
| | | FCFS, SJF, Round Robin, and priority | |
| | 5. | Write a program to simulate Intra & Inter – Process | |
| | | Communication (IPC) techniques: Pipes, Messages | |
| Exercises | | Queues, and Shared Memory | |
| | 6. | Write a program to simulate solutions to Classical | |
| | | Process Synchronization Problems: Dining Philosophers, | |
| | | Producer-Consumer, Readers – Writers | |
| | 7. | Write a program to simulate the Bankers Algorithm for | |
| | | Deadlock Avoidance | |
| | 8. | Write a program to simulate Page Replacement | |
| | | Algorithms: FIFO, Optimal, LRU | |
| | 9. | Write a program to simulate the implementation of | |
| | | HDD Scheduling Algorithms: FCFS, SCAN, C-SCAN | |
| | 10. | Case study on Linux and Windows Operating systems | |
| | | features and prepare a report on the same | |
| | | Recommended Learning Resources | |
| | 1. | Abraham Silberschatz, Peter B Galvin, G. Gagne, "O | perating Systems |
| Print Resources | | Concepts", 10th Edition, Addison Wesley, 2018. | |
| Think Nesources | 2. | William Stallings, "Operating Systems: Internals and Desig | n Principles", 10th |
| | | Edition, Prentice Hall, 2021. | |

| Course Outcomes | | Understanding the basics of security and risk management Comprehending the various aspects of the information security management Understanding the various security management controls required for security management Applying information security management concepts in a practical scenario | | | | |
| Unit No. | | Course Content | Hou | rs | | |
| | | Theory Component | | | | |
| Unit l | Secu Secu Busi avai Com ethi guid | urity and Risk Management urity, Risk, Compliance, Law, Regulations, and ness Continuity-Confidentiality, integrity, and lability concepts - Security governance principles – upliance - Legal and regulatory issues - Professional c - Security policies, standards, procedures and elines | 9 | | | |
| Unit II | Asse Prot class own secu labe | et Security ecting Security of Asset-Information and asset sification - Ownership (e.g. data owners, system ers) - Protect privacy - Appropriate retention - Data wity controls - Handling requirements (e.g. markings, ls, storage) | 9 | | | |
| Unit III | Secu Engi moc capa arch vuln Mot cybe | arity Engineering neering and Management of Security - Security lels - Security evaluation models - Security abilities of information systems - Security itectures, designs, and solution elements erabilities – Web based systems vulnerabilities - bile systems vulnerabilities - Embedded devices and er physical systems vulnerabilities | 9 | | | |
| Unit IV | Communication and Network Security9Designing and Protecting Network Security - Secure network architecture design (e.g. IP & non - IP protocols, segmentation) - Secure network components - Secure communication channels - Network attacks9 | | | | | |
| Unit V | Iden Con logic of p iden | tity and Access Management trolling Access and Managing Identity - Physical and cal assets control - Identification and authentication eople and devices - Identity as a service (e.g. cloud tity) – Third-party identity services (e.g. on- premise) | 9 | | | |

| Practical Component | | | | | | |
|--|---|----|--|--|--|--|
| Exercises | 1.Consider the IT infrastructure of a typical IT organization and perform the following : Perform an inventory of IT assets (Assets, owners, label / classification) Identify the vulnerabilities, threats & risk associated with each asset Identify suitable security controls to protect every asset 2.Perform a study on the various information security standard organizations across the world Perform a study on various security management standards and prepare a report on the same Perform a study of various information security risk management standards and prepare a report on the same Perform a study of various Business continuity standards and prepare a report on the same Perform a study of various incident management standards and prepare a report on the same Perform a study of various disaster recovery standards and prepare a report on the same | 30 | | | | |

| | | scenarios | | | | | |
| Unit No. | | Course Content | _ | Hou | ırs | | |
| | | Theory Comp | onent | | | | |
| Unit I | Threat | t Analysis and Threat Intelligence | Model Formulation | 9 | | | |
| | Threat | Modeling, Understanding the t | hreat modeling process, | | | | |
| | Threat | modeling methodologies - (| Good Intelligence, Bad | | | | |
| | Intellig | gence, Comparison of Good | and Bad Intelligence, | | | | |
| | Contra | ontrasting Good from Bad intelligence, Effects of both Good and | | | | | |
| | Bad in | telligence. | | | | | |
| Unit II | Adver | sary Data Collection Sources | And Adversarial Data | 9 | | | |
| | Extrac | tion | | | | | |
| | Advers | versary-based threat modeling, Adversary goals, Adversary | | | | | |
| | target | ets, Adversary constraints, Adversary resources-Pivot Off and acting Adversarial Data- Adversary goals as a data source, | | | | | |
| | Extrac | | | | | | |
| | Settin | g up a mitigation plan . | | | | | |
| Unit III | Securi | ty Compromise Indicators and | d Threat Assessments | 9 | | | |
| | Comm | ion indicators of compromise, Cha | allenges of IOCs, Tactics, | | | | |
| | Techn | iques, and Procedures (TTP) - Data | a correlation, | | | | |
| | Creati | ng system log entry files data , Cre | eating unusual outbound | | | | |
| | traffic, | Key Windows Services - Conduc | t Threat Assessments In | | | | |
| | Depth | - Malware analysis , SQL injection | s analysis | | | | |
| Unit IV | Heat I | Maps. Infographics & Dashboards | and Threat Intelligence | 9 | | | |
| | Syster | n | | _ | | | |
| | Heat n | nap - 2D density plots , when to use | e. Practices for using heat | | | | |
| | maps | . Common heat map options and | Visualization tools - Build | uild | | | |
| | Reliab | le & Robust Threat Intelligence | System - Planning and | | | | |
| | directi | on, collection, processing, Analysis | s. Dissemination. | | | | |
| Unit V | Statist | ical Approaches And Analytic | al Skills for Threat | Q | | | |
| | Intellie | ence and Planning for Disaster | | | | | |
| | Statict | ical Annroaches for Threat Intellig | ence - Data preparation | | | | |
| | classifi | ication validation correlation | and scoring - Develop | | | | |
| | | ical Skills for Complex Threats | Inderstanding analytical | | | | |
| | Andiyt | ical skills for complex filleats - | onderstanding analytical | 1 | | | |
| - | | |
|-----------------|--|-----------------|
| | skills, common threats, threat objectives, threat mitigation | |
| | methods and tools, Adversary attack vectors - Planning for | |
| | Disaster - APTS, Zero-day vulnerabilities , zero-day threats , | |
| | Planning against APT attacks | |
| | Practical Component | |
| Practical | 1. Formulate a Full STRIDE Threat Modelling system and | 30 |
| Component: | prepare a report on the same | |
| componenti | 2. Send Phishing Mails for Social Engineering | |
| | 3. Analyzing Phishing Emails that you've received in past | |
| | two years and prepare report on the same | |
| | 4. Familiarize with Binalyze Tactical software for various | |
| | Digital Forensics and Incident Response activities | |
| | 5. Find unwanted applications / software in your Windows | |
| | PC, eliminate it and prepare a report on the same | |
| | 6. Perform a basic malware analysis on a suspicious file in | |
| | your system and prepare a report on the same | |
| | 7. Create Heat Maps using any chosen dataset on | |
| | cybercrimes with the following: | |
| | a. Microsoft Excel | |
| | b. Maltego | |
| | 8. Review the key considerations for the five phase of the | |
| | Threat Intelligence Lifecycle | |
| | 9. Find the vulnerabilities via Internet using Shodan And | |
| | Google Hacking Techniques | |
| | | |
| | Recommended Learning Resources | |

| Practical Component | | | | | |
| Evercises | 1. (| Conduct a tabletop exercise | simulating a | 30 | |
| Exercises | c | yberattack and discuss SOC | response | | |

| | 2. Explore a basic security monitoring tool (like | | | |
|--|--|------------------|--|--|
| | Security Onion or Wireshark) to understand its | | | |
| | functions | | | |
| | 3. Draft incident response procedures for common | | | |
| | cybersecurity incidents | | | |
| | 4. Design a simple layout for a SOC room, considering | | | |
| | space and equipment | | | |
| | 5. Implement basic services like incident monitoring | | | |
| | using open-source tools like OSSEC or Suricata. and evaluate their effectiveness | | | |
| | Assess current SOC services and propose improvements | | | |
| | Assign roles (e.g., incident responder, analyst) for a simulated incident response | | | |
| | Bevelop a training plan covering essential skills for SOC roles | | | |
| | 9. Collect and analyze logs from sample systems using | | | |
| | ELK stack (Elasticsearch, Logstash, Kibana) for log | | | |
| | management | | | |
| | 10. Explore a SIEM tool's interface and functions | | | |
| | through guided exercises using tools like Splunk or | | | |
| | Elastic SIEM | | | |

MLD COURSES

| | 1/11 | | | Credits | 3 |
|---|---|--|-------------------------|--------------|------|
| Year | Course Code: COMS101 | | Hours | 60 | |
| Sem. | 1/11 | Course Title: Introduction to Python Programming | | Category | А |
| Course Prerequisites, if any | Problem-solving skills | | | | |
| Internal Assessment Marks: 25 | End Semester Marks: 75 Duration of ESA (Theory): 03 hrs. | | | | |
| Course Outcomes | Understand Python programming constructs Learn about different data structures in Python Write programs using functions Explore the use of Python modules and packages Perform Visualization using Python package | | | | |
| Unit No. | | Course Cont | ent | Но | ours |
| | Introdu Python | i ction Basics: Working – Identifie | rs – Comments – Types – | | 12 |
| Unit I | Operations – Buit-in, library functions - Strings: Accessing – Properties – Operations - Control-flow Instructions: Decision Control – logical operators – conditional expressions Repetition control instruction – break and continue – <i>pass</i> Statement | | | | |
| Unit II | Console Input/Output12Console Input – Console Output – Formatted printing – Lists - Definition – Accessing – Operations – Methods – Varieties – Comprehension – Tuples - Definition – Accessing – Operations – Varieties – Comprehension – Conversion – Iterators and Iterables - zip() | | | | 12 |
| Unit III | Sets12Definition - Accessing - Operations - Functions -Mathematical set operations - Updating set operationsDictionaries - Definition - Accessing - Operations - Functions- Nested Dictionary | | | 12 | |
| Unit IV | Functions 12 Definition – Communication – Types – Unpacking – Lambda, 12 Recursive functions - Modules and Packages - Creation and importing | | | 12 | |
| Unit V | Exception handling Syntax errors – handling exceptions – <i>try-except</i> – user- defined exceptions – <i>else, finally</i> blocks – Tips - Visualization - Matplotlib package – Plotting Graphs | | | | 12 |
